Description: The DHS Chemical and Nuclear Preparedness and Protection Division (CNPPD) is providing an Internet on-line voluntary training program to improve security in the chemical industry sector. Information is automatically collected in a computer database as result of individuals engaging in the training. Explicit reporting or recordkeeping is not required. The training is designed for the general chemical facility employee. U.S. chemical industry direct employment is about 882,000 (2004 per American Chemistry Council); approximately half of employees are estimated as potential participants. Estimated duration of training is 30 to 60 minutes in first year, and less if individuals do "refresher" in succeeding years. Minimal participation data are collected automatically as trainee completes the on-line exercises.

Upon completion, a Certificate of Completion is generated at the trainee's computer work station, printed and optionally e-mailed to a facility supervisor. DHS will monitor program participation, success in training and basic distribution variables submitted upon registration, but not personal identification, and may analyze and report to government management, Congress and the public periodically.

Director, Information and Technology Division, Chief Information Officer, Preparedness Directorate.
