

The Commission allocated spectrum to wireless medical telemetry services (WMTS) on a primary basis, which allows potentially life-critical medical telemetry equipment to operate on an interference-protected basis. The Commission also adopted service rules for WMTS that "license by rule" meaning that users are permitted to operate WMTS equipment that complies with the rules without the need to apply for a license from the Commission. Furthermore, the Commission adopted rules to designate a frequency coordinator, who maintains a database of all WMTS equipment. Without such a database, there would be no record of WMTS usage because WMTS transmitters are not individually licensed. All parties using equipment in the WMTS are required to coordinate/register their operating frequency and other relevant technical operating parameters with the designated coordinator. The database provides a record of the frequencies used by each facility or device to assist parties in selecting frequencies to avoid interference.

Comments are requested concerning: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of

the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

**DATES:** Written PRA comments should be submitted on or before April 2, 2007. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

In addition, each call billed must show the type of services, the amount of the charge, and the date, time, and duration of the call. Finally, the bill must display a toll-free number which subscribers may call to obtain information about pay-per-call services. Similar billing disclosure requirements apply to charges for information services either billed to subscribers on a collect basis or accessed by subscribers through a toll-free number.
