

U.S. It will also require a right-of-way permit from the Bureau of Land Management for those portions of the alignment which cross lands under that agency's jurisdiction. Coordination with Native Americans occurred in 2002 and 2004. Consultation with the U.S. Fish and Wildlife Service under Section 7 of the Endangered Species Act is in process, as are consultations under Section 106 of the National Historic Preservation Act.

Proposal and Alternatives: The SCOP Final EIS evaluates the potential environmental impacts associated with three pipeline alternatives, a Process Improvements Alternative, and the No-Action Alternative (the three pipeline alternatives and No Action alternatives were presented in the Draft EIS). The Boulder Islands North Alternative is the "environmentally preferred" alternative and remains the "agency preferred" alternative. However, based on public comments, the pipeline alternatives have been slightly modified and the Process Improvements Alternative has been added.

The pipeline alternatives have been revised to limit the total phosphorus loading discharged to Lake Mead and the Las Vegas Wash to not exceed the current wasteload allocation of 334 pounds per day on an average annual basis during ordinary conditions. In addition, details regarding the Boulder Basin Adaptive Management Plan have been included in the description of the pipeline alternatives. The Process Improvements Alternative has been added to the EIS. Although the Process Improvements Alternative meets the definition of "No Action" described in CEQ's Forty Questions, and is considered an extension of the original "No Action" alternative, it is analyzed and presented in the Final EIS as a separate alternative at the request of the public.

Additions to the EIS resulting from public comments also include sections addressing the potential impacts to downstream users; a more extensive review of the studies and literature that are available regarding endocrine disrupting chemicals and pharmaceuticals and personal care products, and a discussion of the treatment capabilities of the plants and the effectiveness in removal of these substances; and a description of the destratification of Lake Mead and its effect on water quality.

Decision Process: The National Park Service and Bureau of Reclamation will prepare separate Records of Decision no sooner than 30 days following publication of the Environmental Protection Agency's notice of

availability in the **Federal Register**. Following approval of the selected actions, the officials responsible for implementation are the Superintendent, Lake Mead National Recreational Area and the Regional Director, Lower Colorado Region, Bureau of Reclamation.

Dated: November 14, 2006.
