SUPPLEMENTARY INFORMATION: In response to recommendations made by the Southwest Resource Advisory Council and other concerned individuals, clubs, and organizations, the BLM proposes to change the existing "Open" designation to "Limited to Existing" for all public lands administered by the field office. In addition, the BLM is proposing a comprehensive travel management plan establishing a transportation system of designated roads and trails within the Dry Creek area.

The proposed action does not affect:

- Travel decisions in the Gunnison Gorge National Conservation Area.
- North Delta OHV Play Area, which will be addressed in subsequent travel management planning.
- Gunnison Travel Interim Restrictions Plan Amendment area, which will be addressed in subsequent travel management planning.
- Other designations such as "Limited to Existing" and "Limited to Designated" areas in the RMPs. These areas will be addressed in subsequent travel management planning.

Preliminary issues and management concerns have been identified by BLM personnel, other agencies, and in meetings with individuals and user groups. They represent the BLM's knowledge to date on the existing issues and concerns with current management. Some of these issues and concerns include:

- Impacts to other public land users and adjacent private landowners;
- Impacts to wildlife habitat;

- Impacts to water quality, cultural sites, vegetation, including riparian and wetland areas, and soils; and
- Identification of recreational opportunities.

These issues, along with others that may be identified through public participation, will be considered in the planning process. The public is encouraged to help identify issues and concerns during the scoping phase. The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis and management alternatives. These issues will also guide the planning process. You may submit comments on issues and planning criteria in writing to the BLM at any public scoping meeting, or by using one of the methods listed in the **ADDRESSES** section above. The minutes and list of attendees for each scoping meeting will be available to the public and open for 30 days after the meeting to any participant who wishes to clarify the views he or she expressed.

An interdisciplinary approach will be used to develop the plan amendment in order to consider the variety of resource issues and concerns identified. Disciplines involved in the planning process will include specialists with expertise in rangeland management, outdoor recreation, law enforcement, archaeology, wildlife and fisheries, lands and realty, hydrology, soils, and vegetation. Notification of the planning process will be made to the Governor of Colorado, County Commissioners, local tribes, and potentially affected members of the public.

Barbara Sharrow,
Field Manager, Uncompahgre Field Office.
