

denial of the application will lead to the end of LNG exports from the Kenai LNG Facility by early 2009, resulting in a major loss in benefits to the State of Alaska. The applicants further assert that shutdown of the Kenai LNG Facility would cause a shut-in of the flowing gas supplies that would otherwise be produced from the Cook Inlet reservoirs and could result in permanent loss of natural gas reserves and deliverability. In this regard, the applicants maintain that once flowing wells are shut-in, there is no guarantee that those supplies will be available in the future at the same rate of production or that reserves will not be lost permanently. Finally, CPANGC and Marathon note the beneficial impact of the exportation of LNG on the balance of payments between the U.S. and Pacific Rim countries during the two year term of the proposed blanket authorization.

DOE/FE Evaluation

This export application will be reviewed pursuant to section 3 of the Natural Gas Act, as amended, and the authority contained in DOE Delegation Order No. 00-002.00G (Jan. 29, 2007) and DOE Redelegation Order No. 00-002.04C (Jan. 30, 2007). In reviewing LNG exports, DOE considers domestic need for the gas and any other issue determined to be appropriate, including whether the arrangement is consistent with DOE's policy of promoting competition in the marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties that may oppose this application should comment in their responses on these issues. CPANGC and Marathon assert the proposed authorization is in the public interest. Under section 3 of the Natural Gas Act, as amended, an export from the United States to a foreign country must be authorized unless "the proposed exportation will not be consistent with the public interest." Section 3 thus creates a statutory presumption in favor of approval of this application, and parties opposing the authorization bear the burden of overcoming this presumption.

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed decisions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person

wishing to become a party to the proceeding and to have their written comments considered as a basis for any decision on the application must file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to the application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Oil and Gas Global Security and Supply at the address listed above.

A decisional record on the application will be developed through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

The application filed by CPANGC and Marathon is available for inspection and copying in the Office of Oil and Gas Global Security and Supply docket room, 3E-042, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday

through Friday, except Federal holidays. The application is also available electronically by going to the following Web address: <http://www.ferc.gov/programs/gasregulation/index.html>.

[Docket No. CP07-25-000]

Questar Pipeline Company; Notice of Availability of the Environmental Assessment for the Proposed Southern System Expansion Project II

March 2, 2007.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Questar Pipeline Company (Questar) in the above-referenced docket. This EA has been prepared in cooperation with the U.S. Department of Interior's, Bureau of Land Management, U.S. Geological Survey, and U.S. Fish and Wildlife Service (collectively, "cooperating agencies").

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff and cooperating agencies conclude that approval of the proposed project, with
