Federal Highway Administration

Notice of Final Federal Agency Actions on Proposed Highway in North Carolina

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of limitation on claims for judicial review of actions by FHWA and other Federal Agencies.

SUMMARY: This notice announces actions taken by the FHWA and other Federal agencies that are final within the meaning of 23 U.S.C. 139(I)(1). The actions relate to a proposed highway project, Greensboro-High Point Road Improvements, from US 311 (I-74) to Hilltop Road (SR 1424) in Greensboro, North Carolina, Guilford County, North Carolina. Those actions grant licenses, permits, and approvals for the project.

DATES: By this notice, the FHWA is advising the public of final agency actions subject to 23 U.S.C. 139(I)(1). A claim seeking judicial review of the

Federal agency actions on the highway project will be barred unless the claim is filed on or before September 10, 2007. If the Federal law that authorizes judicial review of a claim provides a time period of less than 180 days for filing such claim, then that shorter time period still applies.

NCDOT—Project Development and Environmental Analysis Branch Office's normal business hours are 8 a.m. to 5 p.m. (Eastern Time).

SUPPLEMENTARY INFORMATION: Notice is hereby given that the FHWA and other Federal agencies have taken final agency actions by issuing licenses, permits, and

approvals for the following highway project in the State of North Carolina: Greensboro-High Point Road Improvements, Federal Air No. STP-4121(1), Guilford County, North Carolina. the proposed action will improve 12.7 km (7.9 miles) of the Greensboro-High Point Road from the northbound ramp terminal of the US 311 bypass (future I-74) interchange in High Point to the Hilltop Road intersection in Greensboro, North Carolina. Portions of the selected alternative (Corridor 2) widen existing roadways and portions construct a four to six-land facility on new location. The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Final Environmental Impact Statement (FEIS) for the project, approved on May 15, 2006, in the FHWA Record of Decision (ROD) issued on December 30, 2006, and in other documents in the FHWA administrative record. The FEIS, ROD, and other documents in the FHWA administrative record file are available by contacting the FHWA or NCDOT at the addresses provided above. The FHWA FEIS and ROD can be viewed at the NCDOT—Project Development and Environmental Analysis Branch, 1 South Wilmington Street, Raleigh, North Carolina; NCDOT—Division 7 Construction Engineer Office, 1584 Yanceyville Street, Greensboro, North Carolina and Greensboro MPO Office,

National Highway Traffic Safety Administration

[Docket No. NHTSA–2007–27505]

Federal Motor Vehicle Safety Standards: New Pneumatic Tires for Vehicles Other Than Passenger Cars

AGENCY: National Highway Traffic Safety Administration, DoT.

ACTION: Denial of petition for rulemaking.

SUMMARY: This document responds to a petition for rulemaking regarding Federal motor vehicle safety standard (FMVSS) No. 119, *Pneumatic Tires for Vehicles Other Than Passenger Cars*. Pacific Coast Retreaders (PCR), a distributor of new truck tires that are manufactured in China, petitioned the agency on February 1, 2006, to amend FMVSS No. 119, paragraph S5.1, Tire and rim matching information (b). Specifically, PCR petitioned the agency to accept tire load rating data for two bias ply truck tire sizes, 10–20 and 11–22.5, from the Chinese tire standardization organization Guo Biao 9744–1997 (GB 9744). NHTSA has determined that this petition is moot with regard to the 10–20 size tires because the maximum load rating labeled on these tires, in the single and dual wheel configurations, meets the requirements of FMVSS No. 119. With regard to the 11–22.5 size tires, the agency denies the request by the petitioner that FMVSS No. 119, paragraph S5.1(b) be amended to

include the GB 9744 maximum load rating for this single tire size. The agency does not consider amending the standard to include the specifications of a tire standardization organization for one tire size.

SUPPLEMENTARY INFORMATION:

A. Background

PCR, a distributor of new truck tires manufactured in China, petitioned the agency on February 1, 2006, to accept the Chinese tire marking standards for two bias ply truck tire sizes, 10–20 and 11–22.5. The petitioner stated that the requirements in FMVSS No. 119, paragraph S5.1(b) are outdated and “are well behind the changes in the intermodal transportation industry.” The petitioner further stated that the Chinese tire marking standards from GB 9744 are not included in the list of marking standards referenced by NHTSA in FMVSS No. 119. However, PCR did not explicitly request that the GB 9744 publication be added to FMVSS No. 119.

The petitioner provided a copy of a page from the Chinese GB 9744 publication with information on the tire load limits at various cold inflation pressures, similar to a page of truck tire load-pressure values from the publications listed in paragraph S5.1(b) of FMVSS No. 119. The publications that are already listed are as follows: Tire and Rim Association (TRA); European Tyre and Rim Technical Organization (ETRTO); Japan Automobile Tyre Manufacturers Association, Inc. (JATMA); Deutsche Industrie Norm; British Standards Institution; Scandinavian Tire and Rim Organization (STRO); and the Tyre and Rim Association of Australia. The table on the page from the GB 9744 publication specifies a maximum load rating of 2,160 kg (4,752 pounds) for the 10–20 size tire load range F (12 ply-rated) in the dual wheel (four tires per axle) configuration. However, the Tire and Rim Association (TRA), which is the United States voluntary standards organization, in its 2005 Year Book specifies a maximum load rating of 2,180 kg (4,805 pounds) for the same tire size and configuration. The TRA publication also lists the value of the maximum load rating for the 11–22.5
