SUPPLEMENTARY INFORMATION:

I. Abstract

The Migratory Bird Treaty Act (16 U.S.C. 703-711) and the Fish and Wildlife Act of 1956 (16 U.S.C. 742d) designate the Department of the Interior as the key agency responsible for (1) the wise management of migratory bird populations frequenting the United States, and (2) setting hunting regulations that allow appropriate harvests that are within the guidelines that will allow for those populations' well-being. These responsibilities dictate that we gather accurate data on various characteristics of migratory bird harvest. We use the knowledge attained by determining harvests and harvest rates of migratory game birds to regulate populations (by promulgating hunting regulations) and to encourage hunting opportunity, especially where crop depredations are chronic and/or lightly-harvested populations occur. Based on information from harvest surveys, we can adjust hunting regulations as needed to optimize harvests at levels that provide a maximum of hunting recreation while keeping populations at desired levels.

Under the Migratory Bird Harvest Program, State licensing authorities collect the name and address information needed to provide a sample frame of all licensed migratory bird hunters. Since Federal regulations require that the States collect this information, we are including the associated burden in our approval request to OMB. We propose to combine three surveys in this IC because the surveys are interrelated and/or dependent upon each other:
