SUPPLEMENTARY INFORMATION: On January 23, 2007 notice was published in the **Federal Register** (72 FR 2868) that an amendment of Permit No. 774-1847, issued September 11, 2006 (71 FR 53423) had been requested by the above-named organization. The requested amendment has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 774-1847 authorizes the permit holder to continue a long-term ecosystem monitoring program of pinniped species in the South Shetland Islands, Antarctica. The permit holder is authorized to take up to 710 Antarctic fur seals (*Arctophalus gazell*) and 20 leopard seals (*Hydrurga leptonyx*) annually. The animals are captured, measured, weighed, tagged, blood sampled, and have time-depth recorders, VHF transmitters, and platform terminal transmitters attached. A subset of fur seals are given an enema, have a tooth extracted, milk sampled, and are part of a doubly-labeled water study on energetics. A subset of leopard seals are blubber and muscle sampled.

The amendment authorizes the permit holder to increase annual research-related mortality to eight Antarctic fur seals (3 adults and 5 pups) and two leopard seals. Permit conditions are such that research must be stopped when the mortality level is reached. The amendment is intended to allow the continuation of the long-term monitoring studies in the event of greater than anticipated levels of research-related mortality.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Dated: March 14, 2007.
