

## VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Amvac has indicated that there are no existing stocks of the products identified in Table 1; therefore, the Agency proposes to include the following provisions for the treatment of existing stocks of the products identified or referenced in Table 1: The prohibition on sales, distribution and use, except for proper disposal or export consistent with the requirements of section 17 of FIFRA, is effective immediately.

[FRL-8291-2; Docket ID No. ORD-2005-0001]

### Draft of Part 2 of the 2007 Release of the Causal Analysis/Diagnosis Decision Information System (CADDIS)

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of External Review Draft for Public Review and Comment.

**SUMMARY:** The U.S. Environmental Protection Agency is announcing a 30-day public review and comment period for the external review draft of Part 2 of the 2007 release of the EPA Web site titled, "Causal Analysis/Diagnosis Decision Information System (CADDIS)." The CADDIS Web site was developed and prepared by EPA's National Center for Environmental Assessment (NCEA) in the Office of Research and Development (ORD). NCEA will consider public comments received in accordance with this notice when revising the CADDIS Web site.

EPA is releasing the draft CADDIS 2007 Web site solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. The draft CADDIS 2007 Web site has not been formally disseminated

by EPA. It does not represent and should not be construed to represent any Agency policy or determination. EPA will consider any public comments submitted in accordance with this notice when revising the document.

**DATES:** The 30-day public comment period begins March 23, 2007, and ends April 23, 2007. Technical comments should be in writing and must be submitted electronically or postmarked by April 23, 2007.

**ADDRESSES:** The draft CADDIS 2007 Web site can be accessed via the Internet at <http://caddis.tetratetech.com>. Enter the username "public" and the password "public." Comments may be submitted electronically to the EPA's e-docket, by mail, by facsimile, or by hand delivery/courier. Additional instructions for providing comments and a description of the portions of the Web site that are available for review are provided at the top of the home page of the CADDIS Web site and in the section of this notice entitled, **SUPPLEMENTARY INFORMATION**.

**FOR FURTHER INFORMATION CONTACT:** For information on the public comment period, contact the Office of Environmental Information Docket; telephone: 202-566-1752; facsimile: 202-566-1753; or e-mail: [ORD.Docket@epa.gov](mailto:ORD.Docket@epa.gov). For technical information, contact Vic Serveiss, NCEA, via phone: 202-564-3251, facsimile: 202-564-2018, or e-mail: [serveiss.victor@epa.gov](mailto:serveiss.victor@epa.gov).

### SUPPLEMENTARY INFORMATION:

#### I. Information About the Project/Document

Over 2800 water bodies in the United States are listed by states as biologically impaired. For many of these sites, the cause of impairment is reported as "unknown." To formulate appropriate management actions for impaired water bodies, it is important to identify the causes of biological impairment (e.g., excess fine sediments, nutrients, or toxic substances). Effective causal analyses call for knowledge of the mechanisms, symptoms, and stressor-response relationships for various stressors, as well as the ability to use that knowledge to draw appropriate, defensible conclusions. To aid in these causal analyses, NCEA developed CADDIS. CADDIS is a Web-based decision support system that will help regional, State, and tribal scientists find, access, organize, and share information useful for causal evaluations of impairment in aquatic systems. It is based on EPA's Stressor Identification process, which is an EPA-recommended method for identifying causes of

impairments in aquatic environments. EPA released the first version of CADDIS earlier in 2006, after addressing comments from the public and independently selected peer reviewers. Current features of CADDIS include a step-by-step guide to conducting causal analysis, downloadable worksheets and examples, a library of conceptual models, and links to useful information sources.

Two sets of modules are being added to the CADDIS Web site in preparation for release of a major revision in September 2007 (CADDIS 2007). On January 17, 2007, the draft of the first of the two sets of modules was released for external peer review and public comment. This first set of draft modules included information on six candidate causes: metals, sediments, nutrients, dissolved oxygen, thermal alteration, and ionic strength.

This notice invites comment on the second set of draft modules being developed for CADDIS 2007. Specifically, comment is invited on two additional candidate cause models, altered flow rates and toxic substances; an interactive conceptual model for phosphorus; and added analytical methods, tools, and databases. Descriptive information on ten analytical methods have been added to CADDIS 2007 including scatter plots, linear regression, predicting environmental conditions from biological observations, and species sensitivity distributions. The principal analytical tool added to CADDIS is CADStat; a downloadable software package for analyzing data using a variety of exploratory and statistical approaches. New analytical databases include a stressor-response gallery for metals and a tolerance value database. These additions improve the capability of CADDIS to diagnose the causes of biological impairments in streams.
