SUPPLEMENTARY INFORMATION:

Title: Imported Seed and Screenings.
OMB Number: 0579-0124.

Type of Request: Extension of approval of an information collection.
Abstract: Under the authority of the Federal Seed Act (FSA) of 1939, as amended (7 U.S.C. 1551 *et seq.*), the U.S. Department of Agriculture (USDA) regulates the importation and interstate movement of certain agricultural and vegetable seeds and screenings. Title III of the FSA, "Foreign Commerce," requires shipments of imported agricultural and vegetable seeds to be labeled correctly and to be tested for the presence of the seeds of certain noxious weeds as a condition of entry into the United States. The Animal and Plant Health Inspection Service's regulations implementing the provisions of title III of the FSA are found in 7 CFR part 361.

The regulations require the use of a number of information collection activities, including declaration of importation, container labeling, notification of seed location, a seed return request, seed analysis certificates (PPQ Form 925), a compliance agreement (PPQ Form 519), seed identity maintenance, and associated recordkeeping.

We are asking OMB to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.37826 hours per response.

Respondents: Importers of seed and screenings, seed cleaning/processing facility personnel, officials of the Canadian Food Inspection Agency (CFIA), and private seed laboratories accredited by CFIA.

Estimated annual number of respondents: 1,200.

Estimated annual number of responses per respondent: 25.

Estimated annual number of responses: 30,000.

Estimated total annual burden on respondents: 11,348 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 23rd day of March 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

SUPPLEMENTARY INFORMATION:

Title: Importation of Artificially Dwarfed Plants.

OMB Number: 0579-0176.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to prohibit or restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service.

The regulations contained in "Subpart-Nursery Stock, Plants, Roots,

Bulbs, Seeds, and Other Plant Products" (7 CFR 319.37 through 319.37-14) prohibit or restrict the importation of living plants, plant parts, and seeds for propagation.

Among other things, the regulations require artificially dwarfed plants imported into the United States to be accompanied by a phytosanitary certificate issued by the government of the country of origin. This certificate must contain declarations that certain conditions were met in the country of origin to protect against the infestation of the plants by longhorned beetles and other plant pests.

We are asking OMB to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.2533 hours per response.

Respondents: Plant health officials of exporting countries.

Estimated annual number of respondents: 30.

Estimated annual number of responses per respondent: 5.

Estimated annual number of responses: 150.

Estimated total annual burden on respondents: 38 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 23rd day of March 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
