DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Parts 23 and 26

[Docket OST-97-2550]

RIN 2105-AD51

Disadvantaged Business Enterprise Program

AGENCY: Office of the Secretary, DOT.
ACTION: Final rule.

SUMMARY: This document adjusts the dollar limits and size limits used to define small businesses for the Department of Transportation's Airport Concessions Disadvantaged Business Enterprise (ACDBE) program. The Department of Transportation amends these size limits in order to ensure that the opportunity of small businesses to participate in the ACDBE program remains unchanged after taking inflation into account. This document, as required by statute, also adjusts the dollar limits used to define small businesses for the Department of Transportation's Disadvantaged Business Enterprise (DBE) program, which applies to State and local highway, transit, and airport recipients of DOT financial assistance. This document also corrects a reference error in a previous final rule. Finally, this document makes minor changes to the language of a previous rule in order to accurately explain the role of administrative guidance material.

DATES: This rule is effective May 2, 2007.

Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, Department of Transportation, 400 7th Street, SW., Room 10424, Washington, DC 20590, phone numbers (202) 366-9310 (voice), (202) 3669313 (fax), (202) 755-7687 (TTY), bob.ashby@dot.gov (e-mail).

SUPPLEMENTARY INFORMATION:

Background

On March 22, 2005, the Department published a final rule revising 49 CFR Part 23—the regulation governing the airport concessions disadvantaged business enterprise (ACDBE) program.

On the same day, the Department published a supplemental notice of proposed rulemaking (SNPRM) on the business size standards for eligibility in the ACDBE program as well as on two other matters concerning implementation of the program. This final rule addresses the issues raised in the SNPRM and the comments made in response to the SNPRM.

The DBE Airport Concessions and Contracting Programs

The DOT-assisted contracts DBE rule and airport concessions DBE rule are based on different statutes. Each statute applies to a distinct type of business that may seek DOT financial assistance. The ACDBE program is designed to give business opportunities to certain small business concerns that operate at airports and that are owned and controlled by socially and economically disadvantaged individuals. The ACDBE program is mandated by 49 U.S.C. 47107(e), originally enacted in 1987 and amended in 1992.

The DBE program for DOT-assisted contracts is a statutory program intended to ensure nondiscriminatory contracting opportunities for small business concerns owned and controlled by socially and economically disadvantaged individuals in the Department's highway, mass transit and airport financial assistance programs. The statutory provision governing the DBE program in the highway and mass transit financial assistance programs is 1101(b) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), Public Law 109-59, August 10, 2005. The statutory provision governing the DBE program as it relates to the airport planning and airport development financial assistance programs is 49 U.S.C. 47113.

ACDBE Gross Receipts Size Standards

The ACDBE program is designed to help small business concerns, owned and controlled by socially and economically disadvantaged individuals, become self-sufficient and able to compete with non-disadvantaged firms. Under the current DOT rule, if the airport concessions firm's annual gross receipts averaged over the preceding three fiscal years exceed \$30 million, then it is not considered a small business eligible to be certified as an ACDBE. The Department notes that the existing size standards have not been adjusted for inflation since June 1, 1992. This final rule adjusts the size standards for eligibility as an ACDBE.

A number of comments submitted to the Department supported adjusting the

gross receipts size limit for inflation. One comment suggested that the Department consider distinct size standards for each type of concession. A number of comments also suggested that an employee based size standard is inappropriate because businesses may operate using different business model configurations with different numbers of employees. These comments also point out that verifying the number of employees is more complex than verifying gross receipts, which are recorded in tax returns.

This final rule adjusts the general ACDBE gross receipts cap for inflation. This rule only applies an employee based size standard if the business operates pay telephones or if the business is an automobile dealer. The Department views a general gross receipts size limit that is adjusted for inflation as the most efficient and fair way to establish size limits for the ACDBE program. The adjustment compensates for the rise in the general level of prices over time from the second quarter of 1992 to the third quarter of 2006. In order to ensure that this adjustment is made on a more timely basis in the future, the rule provides for a similar adjustment every two years, using the same methods. At two year intervals, the Department will publish a final rule to update the size standard numbers.

It should be emphasized that this action does not increase the size standard for ACDBEs in real dollar terms. It simply maintains the status quo, adjusting to 2006 dollars. A number of comments opposed the idea of making Part 23 and Part 26 size standards identical because the capitalization requirements for airport concessions are much higher. The Department agrees and will not harmonize the standards.

In order to make an inflation adjustment to the gross receipts figures, the Department of Transportation uses a Department of Commerce price index. The Department of Commerce's Bureau of Economic Analysis prepares constant dollar estimates of state and local government purchases of goods and services by deflating current dollar estimates by suitable price indexes. These indices include purchases of durable and non-durable goods, and other services. Using these price deflators enables the Department to adjust dollar figures for past years' inflation. Given the nature of the Department's DBE Program and ACDBE Program, adjusting the gross receipts cap in the same manner in which inflation adjustments are made to the costs of state and local government
