

in Utah and Wyoming. The EA will be used by the BLM to consider the issuance of a right-of-way grant for the portion of the project on Federal lands.

The EA assesses the potential environmental effects of the construction and operation of the proposed project. The project is comprised of two components. The first component includes 123.7 miles of 24-inch-diameter pipeline commencing at a new interconnect in Uintah County, Utah and traversing in a northerly direction through Daggett County, Utah to a proposed interconnect in Sweetwater County, Wyoming. The second component involves the installation of two compressor units at the existing Wamsutter Compressor Station located in Sweetwater County, Wyoming. The proposed pipeline would deliver up to 400,000 decatherms per day to Kerr-McGee Corporation in response to increasing gas production in the Uintah Basin in eastern Utah to West, Central, and Eastern markets. Additional pipeline facilities would consist of pig launchers/receivers, meter stations and associated interconnects, and mainline block valves.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street, NE., Room 2A, Washington, DC 20426, (202) 502-8371.

Copies of the EA have been mailed to federal, state and local agencies, public interest groups, Native American tribes, interested individuals, local libraries, newspapers, and parties to this proceeding.

Any person wishing to comment on the EA may do so. To ensure consideration prior to a Commission decision on the proposal, it is important that we receive your comments before the date specified below.
