Needs and Uses: The Commission will submit this information collection to the OMB as an extension (no change in reporting requirements) after this 60 day comment period to obtain the full three-year clearance from them.

The Commission has adjusted the number of respondents because they increased; therefore, the burden hours have also increased.

The purpose of this information collection is to continually streamline and simplify processes for wireless applicants and licensees, who previously used a myriad of forms for various wireless services and types of requests, in order to provide the Commission, information that has been collected in separate databases, each for a different group of services. Such processes have resulted in unreliable reporting, duplicate filings for the same licensees/applicants, and higher cost burdens to licensees/applicants. By streamlining the Universal Licensing System (ULS), the Commission eliminates the filing of duplicative applications for wireless carriers; increases the accuracy and reliability of licensing information; and enables all wireless applicants and licensees to file all licensing-related applications and other filings electronically, thus increasing the speed and efficiency of the application process. The ULS also benefits wireless applicants/licensees by reducing the cost of preparing applications, and speeds up the licensing process in that the Commission can introduce new entrants more quickly into this already competitive industry. Finally, ULS enhances the availability of licensing information to the public which has access to all publicly available wireless

licensing information on-line, including maps depicting a licensee's geographic service area.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.
