

of sufficient magnitude that they are unsatisfactory from the standpoint of public health or welfare or environmental quality. EPA intends to work with the lead agency to reduce these impacts. If the potentially unsatisfactory impacts are not corrected at the final EIS stage, this proposal will be recommended for referral to the CEQ.

Adequacy of the Impact Statement

Category 1—Adequate

EPA believes the draft EIS adequately sets forth the environmental impact(s) of the preferred alternative and those of the alternatives reasonably available to the project or action. No further analysis or data collection is necessary, but the reviewer may suggest the addition of clarifying language or information.

Category 2—Insufficient Information

The draft EIS does not contain sufficient information for EPA to fully assess environmental impacts that should be avoided in order to fully protect the environment, or the EPA reviewer has identified new reasonably available alternatives that are within the spectrum of alternatives analyzed in the draft EIS, which could reduce the environmental impacts of the action. The identified additional information, data, analyses, or discussion should be included in the final EIS.

Category 3—Inadequate

EPA does not believe that the draft EIS adequately assesses potentially significant environmental impacts of the action, or the EPA reviewer has identified new, reasonably available alternatives that are outside of the spectrum of alternatives analyzed in the draft EIS, which should be analyzed in order to reduce the potentially significant environmental impacts. EPA believes that the identified additional information, data, analyses, or discussions are of such a magnitude that they should have full public review at a draft stage. EPA does not believe that the draft EIS is adequate for the purposes of the NEPA and/or Section 309 review, and thus should be formally revised and made available for public comment in a supplemental or revised draft EIS. On the basis of the potential significant impacts involved, this proposal could be a candidate for referral to the CEQ.

Final EISs

EIS No. 20060488, ERP No. F-BLM-J02049-WY, Atlantic Rim Natural Gas Field Development Project, Proposed Natural Gas Development to 2000 Wells, 1800 to Coal Beds and 200 to Other Formations, Carbon County, WY.

Summary: EPA continues to have environmental concerns about adverse impacts to water quality, wildlife habitat and native vegetation, and suggests that the ROD include additional BMPs that avoid or reduce impacts to these resources.

EIS No. 20070023, ERP No. F-AFS-L65521-WA, Buckhorn Access Project, To Utilize the Marias Creek Route to Construct and Reconstruct Roads, Funding, NPDES Permit and U.S. Army COE Section 404 Permit, Okanogan and Wenatchee National Forests, Tonasket Ranger District, Okanogan County, WA.

Summary: The Final EIS addressed EPA's comments on the NPDES permit and surface water quality; however, EPA continues to have environmental concerns about impacts to wetlands. EPA requests that the ROD include detailed information on the performance bond and implementation of the monitoring plan based on the most recent modeling and analysis of water resources. Additionally, the ROD should outline how the monitoring activities of 3 agencies will be coordinated.

EIS No. 20070062, ERP No. F-NPS-H65025-NE, Niobrara National Scenic River General Management Plan, Implementation, Brown, Cherry, Keya Paha and Rock Counties, NE.

Summary: EPA does not object to the proposed action.

Background: EPA participates with other Federal agencies, states and tribes in the Mississippi River/Gulf of Mexico Watershed Nutrient Task Force. In 2001, the Task Force released the Action Plan for Reducing, Mitigating and Controlling Hypoxia in the Northern Gulf of Mexico (or Action Plan available at <http://www.epa.gov/msbasin/taskforce/actionplan.htm>). The Action Plan was informed by the science described in 2000 in An Integrated Assessment of Hypoxia in the Northern Gulf of Mexico (or Integrated Assessment available at http://www.noaa.gov/products/hypox_finalfront.pdf) developed by the National Science and Technology Council, Committee on Environment and Natural Resources. Six technical reports provided the scientific foundation for the Integrated Assessment and are available at <http://>
