Title: Pesticide Product Registration Maintenance Fee.

ICR Status: This is a request to renew an existing approved collection. This ICR is scheduled to expire on May 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

Abstract: This information collection provides a practical means of communication between the registrants and Environmental Protection Agency's Office of Pesticide Programs (OPP) to collect registration maintenance fees from pesticide registrants as required by the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Section 4(i)(5). Annually, the Agency provides registrants a list of the registered products currently registered with the Agency. Registrants are provided the opportunity to review the list, determine its accuracy, and remit payment of the maintenance fees. Each affected firm is required to complete the filing form and submit their fee payment

by January 15 of each year. The failure to pay the required fee for a product will result in cancellation of that product's registration. Information submitted under this ICR is considered by OPP to contain no confidential business information (CBI). If, however, registrants submit data that contains CBI or relates to trade secrets or commercial or financial information, such information is protected from disclosure under section 10 of FIFRA.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.96 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: All pesticide registrants holding currently active registrations under FIFRA section 3 and Section 24(c) are subject to this information collection activity.

Estimated Number of Respondents: 1,720.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 1645.

Estimated Total Annual Labor Cost: \$125,800.

Changes in the Estimates: There is a decrease of 118 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This is an adjustment in the estimated burden due to the steady decline of the number of pesticide registrants and, therefore, participation under this program.

Dated: April 6, 2007.

Title: NESHAP for the Manufacture of Amino/Phenolic Resins (Renewal).

ICR Numbers: EPA ICR Number 1869.05; OMB Control Number 2060-0434.

ICR Status: This ICR is scheduled to expire on May 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Emission Standards for Hazardous Air Pollutants

(NESHAP) for the Manufacture of Amino/Phenolic Resins (40 CFR part 63, subpart OOO) were proposed on December 14, 1998, and promulgated on January 20, 2000.

The NESHAP standard required initial notification, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports and records are essential in determining compliance and are required, in general, of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintain reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart OOO as authorized in Section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined not to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average approximately 293 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Manufacturers of amino/phenolic resins.

Estimated Number of Respondents: 40.

Frequency of Response: On occasion, initially, and semiannually.

Estimated Total Annual Hour Burden: 24,044.

Estimated Total Costs: \$1,537,017, which includes \$0 annualized Capital Startup costs, \$16,000 annualized Operating and Maintenance Costs (O&M), and \$1,521,017, annual Labor Costs.

Changes in the Estimates: There is no change in the labor hours or cost in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Dated: April 6, 2007.
