

information regarding data from any systematic surveys, as well as any studies or analysis of data that may show population size or trends; information pertaining to the biology or ecology of the species; information regarding the effects of current land management on population distribution and abundance; information on the current condition of habitat; and recent information regarding conservation measures that have been implemented to benefit the species. Additionally, we specifically request information regarding the current distribution of populations and evaluation of threats faced by the species in relation to the five listing factors (as defined in section 4(a)(1) of the Act) and the species' listed status as judged against the definition of threatened or endangered. Finally, we solicit recommendations pertaining to the development of or potential updates to recovery plans and additional actions or studies that would benefit these species in the future.

Our practice is to make comments, including names and home addresses of respondents, available for public review. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Submit your comments and information on the following species to the corresponding address(es). You also may view information we receive in response to this notice and review, as well as other documentation in our files, at the following locations by appointment, during normal business hours. How Are These Species Currently Listed?

Table 1 gives current listing information. Also, the List of Endangered and Threatened Wildlife and Plants (List), which covers all listed species, is in 50 CFR 17.11 (wildlife) and 17.12 (plants). We amend the List by publishing final rules in the **Federal Register**. The List also is available on our Internet site at <http://endangered.fws.gov/wildlife.html#Species>.

Definitions

To help you submit information about the species being reviewed, we provide the following definitions:

(A) *Species* includes any species or subspecies of fish, wildlife, or plant, and any distinct population segment of any species of vertebrate, which interbreeds when mature;

(B) *Endangered* means any species that is in danger of extinction throughout all or a significant portion of its range; and

(C) *Threatened* means any species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

How Do We Determine Whether a Species Is Endangered or Threatened?

Section 4(a)(1) of the Act establishes that we determine whether a species is endangered or threatened based on one or more of the five following factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

Section 4(a)(1) of the Act requires that our determination be made on the basis of the best scientific and commercial data available.

What Could Happen as a Result of Our Review?

For each species under review, if we find new information that indicates a change in classification may be warranted, we may propose a new rule that could do one of the following:

(a) Reclassify the species from threatened to endangered (uplist);

(b) Reclassify the species from endangered to threatened (downlist); or

(c) Remove the species from the List (delist).

If we determine that a change in classification is not warranted, then this species will remain on the List under its current status.
