

protection. The OSC detects the rocket plume of missiles and sends appropriate signals to the CP for processing. The CP analyzes the data from each OSC and automatically deploys the appropriate countermeasures. The CP also contains comprehensive built-in test circuitry. The control indicator displays the incoming direction of the threat, so that the pilot can take appropriate action. Hardware is Unclassified. Technical data and documentation to be provided is Unclassified.

4. The AN/ALR-56M Advanced Radar Warning Receiver continuously detects and intercepts Radio Frequency signals in certain frequency ranges and analyzes and separates threat signals from non-threat signals. It contributes to full-dimensional protection by providing individual aircraft probability of survival through improved aircrew situational awareness of the radar-guided threat environment. The ALR-56M is designed to provide improved performance in a dense signal environment and improved detection of modern threats signals. Hardware is Unclassified. Technical data and documentation to be provided is Unclassified.

5. The AN/ALQ-157 Infrared Counter Measures System provides multiple simultaneous protection for large heavy-lift helicopters and medium-size fixed-wing aircraft against Surface-to-air Missiles and Air-to-air Missiles threats. The system employs advanced components and microprocessor technology to allow operator jamming code selection and reprogram capability for future threats. The two fuselage-mounted synchronized jammer assemblies provide continuous protection against threats launched from any direction. The power module, line filter and pilot control indicator can be placed anywhere within the aircraft. Hardware is Unclassified. Technical data and documentation to be provided is Unclassified.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware or software in this proposed sale, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.
