

years. Much of the historic commercial and residential development has occurred on the dry soils which previously supported scrub-jay habitat. Much of this area of Florida was settled early because few wetlands restricted urban and agricultural development. Due to the effects of urban and agricultural development over the past 100 years, much of the remaining scrub-jay habitat is now relatively small and isolated. What remains is largely degraded due to the exclusion of fire, which is needed to maintain xeric uplands in conditions suitable for scrub-jays.

#### Applicant's Proposal

The applicant is requesting take of approximately 0.54 ac of occupied scrub-jay habitat incidental to the construction of a commercial development (Palm Shore Retail). Palm Shore Retail is located within Section 19, Township 26 South, Range 37 East. The parcel is north of Pineda Causeway and west of the FEC Railroad, Palm Shores, Brevard County, Florida.

Development of the Project, including infrastructure, parking areas and landscaping, preclude retention of scrub-jay habitat onsite. Therefore, the applicant proposes to mitigate for the loss of 0.54 ac of occupied scrub-jay habitat by donating \$9,072 to the Florida Scrub-jay Fund administered by The Nature Conservancy. Funds in this account are ear-marked for use in the conservation and recovery of scrub-jays and may include habitat acquisition, restoration, and/or management.

We have determined that the applicant's proposal, including the proposed mitigation and minimization measures, would have minor or negligible effects on the species covered in the HCP. Therefore, the ITP is a "low-effect" project and qualifies for categorical exclusions under the National Environmental Policy Act (NEPA), as provided by the Department of the Interior Manual (516 DM 2 Appendix 1 and 516 DM 6 Appendix 1). This preliminary information may be revised based on our review of public comments that we receive in response to this notice. A low-effect HCP is one involving (1) minor or negligible effects on federally listed or candidate species and their habitats, and (2) minor or negligible effects on other environmental values or resources.

We will evaluate the HCP and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the Act (16 U.S.C. 1531 *et seq.*). If we determine that the application meets those requirements, we will issue the

ITP for incidental take of the Florida scrub-jay. We will also evaluate whether issuance of the section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in the final analysis to determine whether or not to issue the ITP.

**Authority:** We provide this notice under Section 10 of the Endangered Species Act and NEPA regulations (40 CFR 1506.6).

Dated: April 17, 2007.
