SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and

accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The information collection requirements specified in the Noise Standard protect employees from suffering material hearing impairment. The information collection requirements of the Noise Standard include conducting noise monitoring; notifying employees when they are exposed at or above an 8-hour time-weighted average of 85 decibels; providing employees with initial and annual audiograms; notifying employees of a loss in hearing based on comparing audiograms; training employees on the effects of noise, hearing protectors, and audiometric examinations; maintaining records of workplace noise exposure and employee audiograms; and allowing employees, OSHA, and NIOSH access to materials and records required by the Standard.

II. Special Issues for Comments

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions to protect employees, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The Agency is requesting a reduction in burden hours from 5.18 million to an estimated 2.85 million. The reduction is a result of reducing the number of participating employers and employees in manufacturing industries by 25%. OSHA will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Noise Standard (29 CFR 1910.95).

OMB Number: 1218-0048.

Affected Public: Business or other for-profit.

Number of Respondents: 379,512.

Frequency: On occasion; annually.

Total Responses: 16,610,221.

Average Time per Response: Varies from 2 minutes to notify employees when noise exposure exceeds the 8-hour time-weighted average of 85 decibels to 1 hour for employees in small establishments to take audiometric examinations.

Estimated Total Burden Hours: 2,853,730 hours.

Estimated Cost (Operation and Maintenance): \$40,993,579.
