FOR FURTHER INFORMATION CONTACT:

Salvador Salinas, Acting State Conservationist, Natural Resources Conservation Service, 101 South Main, Temple, Texas 76501-7682, Telephone (254) 742-9800.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Salvador Salinas, Acting State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project will rehabilitate Floodwater Retarding Structure No. 15 to maintain the present level of flood control benefits and comply with the current performance and safety standards.

Rehabilitation of the site will require the dam to be modified to meet current performance and safety standards for a high hazard dam. The modification will consist of raising the top of dam 2.7 feet, installation of an additional principal spillway (30" hooded inlet type), installation of a foundation drain system along the back toe of the embankment, raising the crest elevation of the auxiliary spillway 0.3 feet and widening the auxiliary spillway 20 feet. The auxiliary spillway will be vegetated and the embankment and auxiliary spillway will be fenced for livestock exclusion. All disturbed areas will be planted to adapted native and/or introduced species. The proposed work will not have a significant affect on any prime farmland, endangered or threatened species, wetlands, or cultural resources.

Federal assistance will be provided under authority of the Small Watershed Rehabilitation Amendments of 2000 (Section 313, Pub. L. 106-472). Total project cost is estimated to be \$1,043,600, of which \$757,700 will be paid from the Small Watershed Rehabilitation funds and \$285,900 from local funds.
