

contaminants in the mine atmosphere, and to dilute possible accumulation of explosive gases. Lack of adequate ventilation in underground mines has resulted in fatalities from asphyxiation and explosions due to a buildup of explosive gases.

SUPPLEMENTARY INFORMATION:

I. Background

Underground mines present harsh and hostile working environments. The ventilation system is the most vital life support system in underground mining and a properly operating ventilation system is essential for maintaining a safe and healthful working environment. Inadequate ventilation can be a primary factor for deaths caused by disease of the lungs (e.g. silicosis). In addition, poor working conditions from lack of adequate ventilation contribute to accidents resulting from heat stress, limited visibility, or impaired judgment from contaminants.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the

Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506 (c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

FOR FURTHER INFORMATION CONTACT: Contact the employee listed in the **ADDRESSES** section of this notice.

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(g) of the Federal Mine Safety and Health Act of 1977 (Pub. L. 95-173, as amended by Pub. L. 95-164) (Mine Act), states that a representative of miners, or any individual miner where this is no miners representative, may submit a written or oral notification of alleged violation of the Mine Act or a mandatory standard or of an imminent danger. Such notification requires the Mine Safety and Health Administration (MSHA) to make an immediate inspection. A copy of the notice must be provided to the operator.

Title 30, Code of Federal Regulations (30 CFR), Part 43, implements Section 103(g) of the Mine Act. It provides the procedures for submitting notification of the alleged violation and the actions which MSHA must take after receiving the notice. Although the regulation contains a review procedure (required by Section 103(g)(2) of the Mine Act) whereby a miner or a representative of miners may in writing request a review if no citation or order is written as a result of the original notice, the option is so rarely used that it was not considered in the burden estimates.
