SUPPLEMENTARY INFORMATION:

Background

In accordance with the UNFCCC's reporting requirements as specified in Articles 4.2 and 12, and following reporting guidelines developed (and adopted by the UNFCCC COP at its first session), the United States prepared the first U.S. Climate Action Report (CAR) and submitted it to the UNFCCC Secretariat in October 1994.

At the eighth COP in 2002, in Decision 4/CP.8 the Parties requested that Parties included in Annex I to the convention submit to the secretariat a fourth national communication (see FCCC/CP/2002/7/Add.1). This document is available on the Internet at <http://unfccc.int/resource/docs/cop8/07a01.pdf#page=12>.

The Fourth United States Climate Action Report (CAR)

The draft fourth CAR provides an update on key activities conducted by the U.S. since the third CAR, an inventory of U.S. greenhouse gas emissions and sinks, an estimate of the effects of mitigation measures and policies on future emissions levels, and a description of U.S. leadership and involvement in international programs, including associated contributions and funding efforts.

In addition, the text discusses U.S. national circumstances that affect U.S. vulnerability and responses to climate change. Finally, the CAR presents information on the U.S. Climate Change Science Program, the U.S. Climate Change Technology Program, our efforts in systematic observations, including the U.S. Integrated Earth Observation System, and our education, training and outreach efforts.
