SUPPLEMENTARY INFORMATION: This notice initiates the comprehensive conservation planning process for Elizabeth Hartwell Mason Neck (Mason Neck) and Featherstone NWRs, headquartered in Woodbridge, Virginia.

Background

The CCP Process

The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd-668ee), requires us to develop a comprehensive conservation plan for each national wildlife refuge. The purpose of a CCP is to provide refuge managers with 15-year strategies for achieving refuge purposes and contributing to the mission of the National Wildlife Refuge System (NWRS), in conformance with the sound principles of fish and wildlife management and conservation, legal mandates, and Service policies. In addition to providing broad management direction on conserving wildlife and habitat, the plans identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation.

We establish each refuge for specific purposes, and use those purposes to develop and prioritize its management goals, objectives, and public uses. The planning process is one way for us and for the public to evaluate those goals and objectives for the best possible conservation of important wildlife habitat, while providing opportunities for wildlife-dependent recreation compatible with those purposes and the mission of the NWRS.

We request your input on all issues, concerns, ideas, improvements and suggestions for the future management of Mason Neck and Featherstone NWRs in Fairfax and Prince William Counties, Virginia, respectively.

You may submit comments at any time during the planning process by writing to the refuge planner (see **ADDRESSES**, above).

We will conduct the environmental review of this project in accordance with the requirements of the National

Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321, *et seq.*), the Council on Environmental Quality Regulations on NEPA (40 CFR parts 1500-1508), other appropriate Federal laws and regulations, and our policies and procedures for complying with them. All of the comments we receive on either our environmental assessments or our environmental impact statements become part of their official public record. We will handle requests for those comments in accordance with the Freedom of Information Act, NEPA (40 CFR 1506.6(f)), and other policies and procedures of the Department or the Service. When we receive such a request, we will provide comment letters with the names and addresses of the individuals who wrote them. However, to the extent permissible by law, we will not provide the telephone numbers of those individuals.

Mason Neck and Featherstone NWRs

Mason Neck and Featherstone NWRs are two of the three refuges in the Potomac River NWR Complex. The Occoquan Bay NWR is the third. We established that refuge in 1972, and completed its CCP in 1997. The refuge complex headquarters is located in Woodbridge, Prince William County, Virginia. The refuges provide natural habitat important for wildlife in a landscape otherwise dominated by urban development, 18 miles south of Washington, DC.

The 2,277-acre Mason Neck NWR lies in Fairfax County, Virginia. Established in 1969, it was the first national wildlife refuge set aside specifically to protect the federally-listed bald eagle. Its other purposes are to protect natural resources, conserve fish and wildlife, and develop compatible fish- and wildlife-oriented recreation. The refuge habitats include oak-hickory forest, freshwater marsh, and 4.4 miles of shoreline along the Potomac River. Bald eagles shelter and nest in its mature forests and forage and hunt along its marshes, bays, and river. Seven bald eagle nests are located on or near the refuge, as well as an eagle roost and a wintering population of 50-60 birds.

Other significant resources on the refuge include the largest freshwater marsh in northern Virginia and one of the State's largest great blue heron rookeries, with more than 1,400 nests. More than 200 species of birds, 31 species of mammals, and 44 species of reptiles and amphibians use the refuge. It is also part of the Chesapeake Bay Estuary Complex, designated by the RAMSAR Convention as a "Wetland of International Importance."
