

subset of permitted sources required to perform such monitoring. The currently approved ICR for the entire NSR program (major and minor) includes about \$228 million in annual burden costs and about \$9 million in annual preconstruction monitoring costs for sources.

The incremental annual cost increase for reviewing authorities is estimated at \$700,000, all as a result of the increased burden hours. The currently approved ICR for the entire NSR program includes about \$103 million per year for reviewing authorities.

What Is the Next Step in the Process for This ICR?

The EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. When the final rule is published in the **Federal Register**, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
