

under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart 1, Section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it proposes to create Class E airspace sufficient in size to contain aircraft executing instrument procedures at Ruby Airport and represents the FAA's continuing effort to safely and efficiently use the navigable airspace.

The Proposal

The FAA is proposing to amend Title 14 Code of Federal Regulations (14 CFR) part 71 to establish a low altitude RNAV route, designated T-209, in the vicinity of Augusta, GA. The route would extend between the Colliers, SC, very high frequency omnidirectional range/tactical air navigation (VORTAC) aid and the EHEJO, GA, navigation fix (located on Federal airway V-154). T-209 would provide a more direct route for north and southbound traffic and would also establish a published route that ensures clearance from the Bulldog A MOA to assist aircraft navigating around the MOA.

This route would enhance the safe and efficient use of the navigable airspace for north and southbound IFR aircraft in the vicinity of Augusta, GA.

Low altitude RNAV routes are published in paragraph 6011 of FAA Order 7400.9P, dated September 1, 2006 and effective September 15, 2006, which is incorporated by reference in 14 CFR 71.1. The low altitude RNAV route listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
