

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****[Docket No. QF06-346-000]****Newark America; Notice of Filing of Notice of Self-Certification of Qualifying Status of a Cogeneration Facility**

May 18, 2007.

Take notice that on September 19, 2006, Newark America, 100 Newark Way, Fitchburg, MA 01420 filed with the Federal Energy Regulatory Commission a notice of self-certification of a facility as a qualifying cogeneration facility pursuant to 18 CFR. 292.207(a) of the Commission's regulations.

The Facility is a recycled paperboard manufacturing plant. The facility is installing a topping cycle steam turbine to convert its current steam production facilities to a Cogeneration Facility. The primary energy source used by the facility is and will continue to be natural gas with No.2 distillate fuel oil as the backup fuel. The nameplate capacity of non-fired General Electric Steam Turbine Generator being installed is 6.25MW. The facility is located in Worcester county of Massachusetts at 100 Newark Way, Fitchburg, MA 01420.

The facility will interconnect to Utili (Fitchburg Gas and Electric). The Newark America manufacturing facility currently receives delivery service for electrical energy under current applicable Fitchburg Gas and Electric industrial electric rate tariffs on file with the Massachusetts Department of Telecommunications and Energy (DTE) and expects to continue to receive service under the these tariffs.

A notice of self-certification does not institute a proceeding regarding qualifying facility status; a notice of self-certification provides notice that the entity making filing has determined the Facility meets the applicable criteria to be a qualifying facility. Any person seeking to challenge such qualifying facility status may do so by filing a motion pursuant to 18 CFR 292.207(d)(iii).

n. Scoping Process:

The Commission intends to prepare a joint Environmental assessment (EA) for the projects in accordance with the National Environmental Policy Act. The multi-project EA will consider both site-specific and cumulative environmental impacts and reasonable alternatives to the proposed actions.

Scoping Meetings

FERC staff will conduct one agency scoping meeting and one public meeting, in conjunction with scoping for the South Feather Power Project. The agency scoping meeting will focus on resource agency and non-governmental organization (NGO) concerns, while the public scoping meeting is primarily for public input. All interested individuals, organizations, and agencies are invited to attend one or both of the meetings, and to assist the staff in identifying the scope of the environmental issues that should be analyzed in the EA. The times and locations of these meetings are as follows:

Agency Scoping Meeting

Date: June 14, 2007.
Time: 10 a.m. (PST).
Place: VFW Post #1747.
Address: 1901 Elgin St., Oroville, CA.

Public Scoping Meeting

Date: June 13, 2007.
Time: 7 p.m. (PST).
Place: VFW Post #1747.

Address: 1901 Elgin St., Oroville, CA.
 Copies of the Scoping Document (SD1) outlining the subject areas to be addressed in the EA are being distributed to the parties on the Commission's mailing list under separate cover. Commission's mailing list. Copies of the SD1 will be available at the scoping meeting or may be viewed on the Web at <http://www.ferc.gov> using the "eLibrary" link (see item m above).

Site Visit

We also will conduct a two-day site visit to the project facilities on Tuesday, June 12, 2007, and Wednesday June 13, 2007, in conjunction with a site visit of the South Feather Power Project. On

both days we will meet at the South Feather Water and Power Agency's Forbestown Office, 5494 Forbestown Rd, Forbestown, CA at 7:30 a.m. All participants are responsible for their own transportation on the site visits and will need to provide their own lunch.

Objectives

At the scoping meetings, the staff will: (1) Summarize the environmental issues tentatively identified for analysis in the EA; (2) solicit from the meeting participants all available information, especially quantifiable data, on the resources at issue; (3) encourage statements from experts and the public on issues that should be analyzed in the EA, including viewpoints in opposition to, or in support of, the staff's preliminary views; (4) determine the resource issues to be addressed in the EA; and (5) identify those issues that require a detailed analysis, as well as those issues that do not require a detailed analysis.

Procedures

The meetings are recorded by a stenographer and become part of the formal record of the Commission proceeding on the project.

Individuals, organizations, and agencies with environmental expertise and concerns are encouraged to attend the meeting and to assist the staff in defining and clarifying the issues to be addressed in the EA.

Secretary.
