

**Subject**

(d) Air Transport Association of America (ATA) Code 5: Time Limits.

**Reason**

(e) The mandatory continuing airworthiness information (MCAI) states:

Installation of G-load monitoring units on some Zlin Z 42 series airplanes has revealed that certain aircraft during aerobatic manoeuvres exceeded the limit loads initially defined for the certification.

As a consequence to restore the safety margins on aircraft operated in Utility ("U") category; this Airworthiness Directive (AD) mandates a modification of the Airplane Flight Manual (AFM) so as to limit the permissible manoeuvres in "U" category flights.

**Actions and Compliance**

(f) Unless already done, within 10 days after June 5, 2007 (the effective date of this AD) modify the Limitations Section of the Airplane Flight Manual (AFM) following Moravan Aviation s.r.o. Mandatory Service Bulletin Z242L/49a, dated February 15, 2007, by incorporating AFM, revision 8, dated November 24, 2006.

**FAA AD Differences**

**Note:** This AD differs from the MCAI and/or service information as follows: No differences.

**Other FAA AD Provisions**

(g) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Staff, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120-0056.

**Modification of Class E Airspace; St. Johns, AZ**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action modifies the Class E airspace area at St. Johns, AZ. The establishment of an Area Navigation (RNAV) Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) to Runway 32 at St. Johns Industrial Air Park, St. Johns, AZ, has made this action necessary. Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the RNAV (GPS) IAP to RWY 32 at St. Johns Industrial Air Park makes this proposal necessary. The intended effect of this action is to provide adequate controlled airspace for aircraft executing the RNAV (GPS) SIAP to RWY 32 at St. Johns Industrial Air Park, St. Johns, AZ.

**EFFECTIVE DATE:** 0901 UTC, August 30, 2007. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

**SUPPLEMENTARY INFORMATION:****History**

On March 12, 2007, the FAA proposed to amend 14 CFR part 71 by establishing a Class E Airspace area at St. Johns Industrial Air Park, St. Johns, AZ (72 FR 10953). Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the RNAV (GPS) SIAP to RWY 32 at St. Johns Industrial Air Park, St. Johns, AZ. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received.

**The Rule**

This action amends Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying the Class E airspace area at St. Johns Industrial Air Park, St. Johns, AZ. The establishment of an Area Navigation (RNAV) Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) to Runway 32 at St. Johns Industry Air Park, St. Johns, AZ., has made this action necessary.

Additional controlled airspace extending upward from 700 feet above the surface is needed to contain aircraft executing the RNAV (GPS) SIAP to RWY 32 at St. Johns Industrial Air Park, St. Johns, AZ.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9P dated September 1, 2006, and effective September 15, 2006, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in this Order.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not

a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Docket No. 30551 Amdt. No. 3219]

#### Standard Instrument Approach Procedures, Weather Takeoff Minimums; Miscellaneous Amendments

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) and/or Weather Takeoff Minimums for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

**DATES:** This rule is effective May 31, 2007. The compliance date for each SIAP and/or Weather Takeoff Minimums is specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 31, 2007.

**ADDRESSES:** Availability of matters incorporated by reference in the amendment is as follows:

Box 25082, Oklahoma City, OK 73125) telephone: (405) 954–4164.

**SUPPLEMENTARY INFORMATION:** This amendment to Title 14 of the Code of Federal Regulations, Part 97 (14 CFR part 97), establishes, amends, suspends, or revokes SIAPs and/or Weather Takeoff Minimums. The complete regulatory description of each SIAP and/or Weather Takeoff Minimums is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR part 51, and 14 CFR part 97.20. The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, 8260–5 and 8260–15A. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs and/or Weather Takeoff Minimums, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs and/or Weather Takeoff Minimums but refer to their depiction
