

rate and reduces the amount ladder fuels.

4. Thinning from below to reconstruct fuelbreaks implemented 20 years ago on approximately 260 acres of stands aged 80 to 150 years old. Implement a thinning from below to retain approximately 40% canopy closure, and remove most understory vegetation. Shaded fuelbreaks are approximately 150 to 300 foot-wide strips on which vegetation has been modified so that fires burning into them can be more readily controlled. The residual canopy closure provides sufficient shade to reduce the growth of brush species in the understory.

5. Reduce hazardous fuels on approximately 25 acres of existing fuels buffers. All live trees would be retained. Dead trees under 10 inches in diameter would be removed. These small dead trees and ground fuels would be concentrated for burning by hand-treatment methods.

All proposed treatments would remove excess trees as commercial wood products wherever possible. No trees over 150 years old would be harvested. On approximately 1,460 acres small trees (5 to 10 inches in diameter) would be removed and most trees less than 5 inches in diameter would be removed as activity-generated fuels. The harvest systems used in the proposed action would include mechanized equipment, cable systems, and helicopter. There would be no road construction of new system roads. The project may include reconstruction of road segments, construction of short lengths of temporary roads and decommissioning of other roads. Based on public comment another alternative may be developed that places a diameter limit on all thinning.

Responsible Official

J. Sharon Heywood, Forest Supervisor, Shasta-Trinity National Forest, 3644 Avtech Parkway, Redding, CA 96002. (530) 226-2500.

Nature of Decision To Be Made

The Forest Supervisor will decide whether to implement the proposed action, implement an alternative action that meets the purpose and need or take no action. The decision may include a non-significant forest plan amendment that permits treatment of stands older than 80 years within Late-Successional Reserves.

Scoping Process

Notice of the proposed action will be published in the newspaper of record, the Redding Record Searchlight. It will also be published in the Trinity Journal.

Scoping letters will be mailed to interested and affected public coincident with publication of this notice of intent in the **Federal Register** and information on the proposed action will be posted on the Forest Web site at <http://www.fs.fed.us/r5/shastatrinity/projects>. The Trinity County Firesafe Council has reviewed this proposal and a public meeting was held at the Harrison Gulch Ranger Station on Wednesday, September 28, 2005. This notice of intent initiates the current scoping process, which guides the development of the environmental impact statement. Comments submitted during this scoping process should be in writing and should be specific to the proposed action. The comments should describe as clearly and completely as possible any issues the commenter has with the proposal. The results of scoping include: (a) Identifying potential issues, (b) identifying issues to be analyzed in depth, (c) eliminating non-significant issues or those previously covered by another environmental analysis, (d) exploring additional alternatives, and (e) identifying potential environmental effects of the proposed action and alternatives.

Preliminary Issues

Potential issues identified during the first public comment period include:

- Development of an alternative with a diameter limit for harvesting
- The potential for increased vehicle use as a result of proposed road activities
- Decommissioning roads that provide access for public use and fire fighting

Early Notice of Public Participation in Subsequent Environmental Review

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**. The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 533 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after

completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Dated: May 25, 2007.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a) (2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

If the Committee approves the proposed additions, the entities of the Federal Government identified in this notice for each product or service will be required to procure the services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. If approved, the action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.
2. If approved, the action will result in authorizing small entities to furnish the services to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

End of Certification

The following services are proposed for addition to Procurement List for production by the nonprofit agencies listed:
