An additional mattress standard was promulgated under section 4 of the Flammable Fabrics Act, 15 U.S.C. 1191–1204, effective July 1, 2007, to reduce deaths and injuries related to mattress fires, particularly those ignited by open flame sources such as lighters, candles and matches. 16 CFR part 1633. That standard established new performance requirements for mattresses and mattress sets that will generate a smaller size fire from open flame source ignitions. Part 1633 also contains recordkeeping requirements to document compliance with the standard. OMB approved that collection of information under Control Number 3041–0133, with an expiration date of June 30, 2009. 71 FR 37910.

In May 2006, an Interim Enforcement Policy for Mattresses subject to 16 CFR parts 1632 and 1633, effective May 1, 2006, was issued that reduced prototype surface testing and recordkeeping requirements from six mattress surfaces to two mattress surfaces for each new prototype created after March 15, 2006. That policy is available at http://www.cpsc.gov/BUSINFO/Interimmattress.pdf. Mattress prototypes created before March 15, 2006, are subject to the full requirements of part 1632. In addition, mattress pads are not subject to this policy and must continue to adhere to all the requirements set forth in part 1632.

**POLICY JUSTIFICATION**

**Iraq – Medical Supplies, Equipment, and Training**

The Government of Iraq has requested a possible sale of Medical Consumables, Pharmaceuticals, Medical, Surgical, Dental Supplies, Medical Equipment, support equipment, program support, publications, documentation, personnel training, training equipment, contractor technical and logistics personnel services and other related program requirements. The cost of this proposed sale will be less than $1.05 billion.

This proposed sale would contribute to the foreign policy and national security of the U.S. by providing basic medical needs to Iraqi forces and, as necessary and appropriate, civilians who are casualties of ongoing conflict. The medical supplies will help minimize the casualties sustained during military operations.

The proposed use of this equipment is consistent with the statutory authorities in section 4 of the Arms Export Control Act, as amended, and section 607 of the Foreign Assistance Act of 1961, as amended.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principal contractors are unknown at this time. There are no known offset agreements proposed in connection with this potential sale.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
