40 CFR 93.118(e)(1) requires that upon a finding of adequacy these budgets must be used in transportation conformity determinations unless the maintenance plan is later disapproved by EPA.

We note that the submitted Denver, Colorado, carbon monoxide maintenance plan proposes revisions to the previously approved 2013 carbon monoxide MVEB for Denver. The submitted Longmont, Colorado, carbon monoxide maintenance plan proposes changes to the previously approved 2010 and 2015 carbon monoxide MVEBs for Longmont. The submitted Denver, Colorado, PM₁₀ maintenance plan proposes changes to the previously approved 2015 PM₁₀ and NO_x MVEBs for Denver. However, 40 CFR 93.118 (e)(1) does not allow budgets in submitted plans to supersede MVEBs in approved implementation plans for the same Clean Air Act requirement and the same years addressed by a previously approved implementation plan unless EPA specifies otherwise in its approval of a SIP, a circumstance that does not apply here. Thus, this adequacy finding does not make any changes to these previously approved budgets. These budgets will be addressed in EPA's action regarding the approval or disapproval of the maintenance plans.

The submitted Denver PM₁₀ maintenance plan includes a budget trading protocol for calculating the PM₁₀ and NO_x budgets for each conformity determination. That protocol will be addressed in EPA's action to approve or disapprove the maintenance plan; this adequacy finding has no bearing on that action and does not authorize the use of the budget trading protocol.
