DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Record of Decision for the Bair Island Restoration and Management Plan and a Final Environmental Impact Statement/Environmental Impact Report, Don Edwards San Francisco Bay National Wildlife Refuge and the Bair Island State Ecological Reserve, San Mateo County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the decision and availability of the Record of Decision (ROD) for the Bair Island Restoration and Management Plan and Environmental Impact Statement (EIS) for the Don Edwards San Francisco Bay National Wildlife Refuge. A thorough analysis of the environmental, social, and economic considerations was completed and presented in the Final

EIS. The Final EIS was released to the public and a Notice of Availability was published in the **Federal Register** on July 28, 2006. The ROD documents the Service's decision to adopt and implement Alternative 1, Tidal Marsh Restoration with Moderate Public Access for the Bair Island Restoration and Management Plan.

DATES: The ROD was signed by the Acting Manager, California/Nevada Operations, U.S. Fish and Wildlife Service on May 22, 2007.

ADDRESSES: A copy of the ROD may be obtained by writing to: Clyde Morris, Manager, Don Edwards San Francisco Bay National Wildlife Refuge, 9500 Thornton Avenue, Newark, California 94560 or by e-mailing clyde_morris@fws.gov. A copy of the Final ROD and EIS is available at the following Web site address: <http://southbayrestoration.org/bair>.

FOR FURTHER INFORMATION CONTACT: Clyde Morris, Refuge Manager, at the above street and e-mail address or via telephone at (510) 792-0222 extension 25, or by fax at (510) 792-5828.

SUPPLEMENTARY INFORMATION: Bair Island is a 3,000 acre former commercial salt pond complex on San Francisco Bay in Redwood City, California. The U.S. Fish and Wildlife Service (Service) and the California Department of Fish and Game are preparing to restore and manage the 1,400 acres of Bair Island that are still contained within the former salt pond levees to tidal wetlands.

The Bair Island Complex is divided into three distinct areas separated by slough channels: Inner, Middle, and

Outer Bair. Inner Bair Island is connected to the mainland with access from Whipple Avenue and U.S. Highway 101. Inner Bair Island is separated from Middle Bair by Smith Slough, which is separated from Outer Bair by Corkscrew Slough.

Historically, Bair Island was part of a large complex of tidal marshes and mud flats within the drainage of San Francisco Bay, Redwood Creek and Steinberger Slough. Bair Island was diked in the late 1800's and early 1900's for agricultural purposes. It was converted to commercial salt ponds in 1946 and remained in production until 1965. The lands were then drained and sold to a series of real estate development companies. A local referendum in the City of Redwood City halted development plans for Bair Island. The California Department of Fish and Game (CDFG) and the Don Edwards San Francisco Bay National Wildlife Refuge (Refuge) both acquired portions of Bair Island over time. The Peninsula Open Space Trust purchased the majority of the remaining portions of Bair Island in 1999 and their interests were acquired by these agencies.

Five alternatives for restoration and management of Bair Island and the consequences of implementing each alternative were described in detail in the Draft and Final EIS. The Draft EIS was distributed on August 27, 2004 and a public meeting to accept comments on the draft document was held on September 22, 2004. The Service received 31 comment letters from organizations or individuals. All substantive issues raised in these comments were addressed through
