RECORD SOURCE CATEGORIES:

This system will consist of records obtained on eligible students applying to Upward Bound projects at approximately 90 host institutions. The records will consist of parental consent and student consent forms, responses from a baseline survey of students, and information provided by Upward Bound projects on each student. At a later point

in time, school records (from school, district, or state databases) and College Board and ACT records will be merged onto the system of records, as will responses from a survey of Upward Bound project coordinators and a follow-up survey of the students. Records in this system of records will be matched with other data solely for research purposes, to study the impacts of Upward Bound on students' preparation for college. The specific matched data will NOT be used to make decisions concerning the rights, benefits, or privileges of the students who participate in this study. After students turn 18 and give their own consent to participate in the study, additional data merges from Federal Student Aid files, National Student Clearing House data, school records, College Board and ACT records, and additional follow-up surveys of students may occur, again solely for research purposes, to study the impacts of Upward Bound on students' postsecondary outcomes. The individual identifiers that would be used to merge the different sources of data would be removed from the data files before the files are used for data analysis.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

Title: Federal Operating Permit Regulations (Renewal).

ICR numbers: EPA ICR No. 1713.06, OMB Control No. 2060-0336.

ICR Status: This ICR was scheduled to expire on March 31, 2007, but an emergency extension granted by OMB on March 13, 2007 extended the expiration date to June 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Title V of the Clean Air Act (Act) requires States to develop and implement a program for issuing operating permits to all sources that fall under any Act definition of "major" and certain other non-major sources that are subject to Federal air quality regulations. The Act further requires EPA to develop regulations that establish the minimum requirements for those State operating permits programs, to oversee implementation of the State programs, and to operate a Federal operating permits program in areas not subject to an approved State program.

The EPA regulations setting forth requirements for the Federal operating permits program are at part 71, title 40, chapter I of the Code of Federal Regulations. These are referred to as the "Part 71 Federal Operating Permit Regulations," which are the subject of the ICR addressed in this notice. The part 71 program is being implemented for sources located in Indian country, Outer Continental Shelf sources, and in areas that do not have part 70 programs.

Burden Statement: The annual public reporting and recordkeeping burden for the part 71 collection of information is estimated to average 221 hours per permitted source. Burden means the total time, effort, or financial resources expended by persons to generate,

maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Sources are required to obtain a part 71 permit from EPA if (1) they are located in areas where there is no approved State, local, or Tribal part 70 program (such as Indian country, the Outer Continental Shelf, and Deepwater ports); (2) they are located in areas where the State, local, or Tribal permitting authority is deficient in implementing an approved part 70 program (none currently or expected); or (3) if EPA has objected to a draft part 70 permit and the State, local, or Tribal permitting authority has failed to adequately resolve the objection (rare).

Estimated Number of Respondents: 123 sources.

Frequency of Response: Sources must apply for an initial permit when the source becomes subject, renew permits every 5 years, submit monitoring reports semi-annually, and submit a compliance certification annually. In addition, approximately 50 percent of sources apply for an administrative amendment each year, 50 percent for a minor permit modification, and 10 percent for a significant permit modification.

Estimated Total Annual Hour Burden: 27,218 hours for sources.

Estimated Total Annual Cost: \$1,128,784 for sources, includes \$0 annualized capital or O&M costs.

Changes in the Estimates: There is an increase of 3,141 hours in the estimated annual burden for sources compared with that identified in the ICR currently approved by OMB. This increase is due to the larger number of sources that will be subject to non-delegated program administration by EPA as a consequence of there being more major sources subject to the program (123 as opposed to 105 in the last ICR) and as a normal consequence of changes in the mix of source activities over time. The increase is not due to any EPA actions to revise regulations or policy since the last ICR update. In its role as the permitting authority for the part 71 program, EPA's

estimated annual burden will decrease by over 24,000 hours as compared to the currently approved ICR. This reduction is due to a change in assumptions to eliminate the scenario where EPA issues a Notice of Deficiency and takes over permitting in a State due to poor implementation or enforcement of a part 70 program.

Dated: June 6, 2007.

Sara Hisel-McCoy,

Acting Director, Collection Strategies Division.
