

regulations, and to allow the public an opportunity to participate in the NEPA process, the earliest MMS would be able to offer this area for leasing would be approximately March 2008. Postponing the sale to be held as "soon as practicable" while complying with all applicable laws is in the best interests of all parties, including the American public as owners of these resources. It also is more economical and efficient for the Government and industry to hold this sale in conjunction with Central GOM Sale 206 at the same time and location. The area to be offered in Sale 224 is small, approximately 130 tracts, whereas recent Central Gulf sales have offered over 4,000 tracts. The logistics of holding a sale are intensive and relatively costly; therefore, it makes sense to hold the smaller sale in conjunction with a larger sale. Additionally, holding Sale 224 in conjunction with Sale 206 would help ensure that a sufficient number of companies would be represented in bidding, which may enhance the number of bids and possibly the revenue generated by more competitive bidding.

This NOA follows the Call for Information and Nominations and the Notice of Intent to Prepare an EIS in the release process for the sale. The draft SEIS associated with this NOA updated the environmental and socioeconomic analyses in the *Gulf of Mexico OCS Oil and Gas Lease Sale 181, Eastern Planning Area Final EIS* (OCS EIS/EA MMS 2001-051), which addressed the original "Sale 181 Area." The MMS plans to complete the requirements of NEPA, the OCS Lands Act, and CZMA coverage for the proposed lease sale.
