

Section 35: Lots 3 through 6, 11 through 14.

Containing 5,116.65 acres, more or less.

BTU Western Resources, Inc.

proposes to mine the tract as a part of the North Antelope Rochelle Mine. At the 2006 mining rate of 89.7 million tons per year, the coal included in the Porcupine Tract would extend the life of the North Antelope Rochelle by as many as six years.

Lands in the Hilight Field, West Hilight Field, and Porcupine Tracts contain Federal surface administered by the Forest Service and private surface estate which overlies the Federal coal. Lands in the West Jacobs Ranch Tract contain private surface estate which overlies the Federal coal.

The Black Thunder Mine, Jacobs Ranch Mine, and North Antelope Rochelle Mine are operating under approved mining permits from the Land Quality and Air Quality Divisions of the Wyoming Department of Environmental Quality. The USDA Forest Service and the Office of Surface Mining Reclamation and Enforcement (OSM) will be cooperating agencies in the preparation of the EIS. Before the tracts can be leased, the Forest Service must consent to leasing the portions of the tracts that are part of the Thunder Basin National Grassland. If the four tracts are leased to the applicants, the new leases must be incorporated into the existing mining and reclamation plans for the adjacent mines. Before the Federal coal in each tract can be mined, the Secretary of the Interior must approve the revised Mineral Leasing Act (MLA) mining plan for the mine in which each tract will be included. The OSM is the Federal agency that is responsible for recommending approval, approval with conditions, or disapproval of the revised MLA mining plan to the Office of the Secretary of the Interior. Other cooperating agencies may be identified during the scoping process.

The BLM will provide interested parties the opportunity to submit comments or relevant information or both. This information will help the BLM identify issues to be considered in preparing the Wright Area Coal EIS. Issues that have been identified in analyzing the impacts of previous Federal coal leasing actions in the Wyoming Powder River Basin (PRB) include the need for resolution of conflicts between existing and proposed oil and gas development and coal mining on the tracts proposed for coal leasing; potential impacts to big game herds and hunting; potential impacts to Greater sage-grouse; potential impacts to listed threatened and endangered

species; potential health impacts related to blasting operations conducted by the mines to remove overburden and coal; the need to consider the cumulative impacts of coal leasing decisions combined with other existing and proposed development in the Wyoming PRB; and potential site-specific and cumulative impacts on air and water quality.

Your response is important and will be considered in the EIS process. If you do respond, we will keep you informed of the availability of environmental documents that address impacts that might occur from this proposal.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Alan Rabinoff,

Acting State Director.

Your written comments should be specific and explain the reason for any recommendation. The BLM appreciates any and all comments, but those most useful and likely to influence decisions on management and protection of wild horses and burros are those that are either supported by quantitative information or studies or those that include citations to and analysis of applicable laws and regulations. Except for comments provided in electronic format, speakers should submit two copies of their written comments where feasible.
