SUPPLEMENTARY INFORMATION: On March 21, 2007, notice was published in the *Federal Register* (72 FR 13250) that a request for a scientific research permit to take sea turtles had been submitted by the above-named organization. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The purpose of the proposed research is to continue long term monitoring of sea turtles foraging in the Key West National Wildlife Refuge and surrounding waters. The applicant will net or hand capture up to 90 green, 135 loggerhead, 15 hawksbill, and 5 Kemp's ridley sea turtles per year. The turtles will be measured, weighed, flipper and Passive Integrated Transponder tagged, blood and tissue sampled, marked with paint, and released. A subset of green turtles would be lavaged and satellite tagged. The permit is valid for five years.

Issuance of this permit, as required by the ESA, was based on a finding that

such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
