POLICY JUSTIFICATION**Turkey - All-Up-Round Selected Availability Anti-Spoofing Module-compliant Block II Tactical HARPOON Missiles**

The Government of Turkey has requested a possible sale of 51 All-Up-Round Selected Availability Anti-spoofing Module-compliant Block II Tactical HARPOON missiles in the following configurations: 8 Tartar, 38 Lightweight canisters, and 5 Encapsulated. Also included: containers, test sets and support equipment, spare and repair parts, publications and technical data, maintenance, personnel training and training equipment, U.S. Government (USG) support, contractor representatives' engineering and technical support services, and other related elements of logistics support. The estimated cost is \$ 159 million.

Turkey is a political and economic power in Europe and in the Eastern Mediterranean, and a partner of the United States in ensuring peace and stability in those regions. It is vital to the U.S. national interest to assist our North Atlantic Treaty Organization (NATO) ally in developing and maintaining a strong and ready self-defense capability that will contribute to an acceptable military balance in the area. This proposed sale is consistent with those objectives.

Turkey will use these missiles to augment its present HARPOON missile inventory and enhance its anti-ship warfare capability. The capabilities of this weapon system will improve Turkey's ability to contribute to coalition NATO operations. The missiles will be provided in accordance with, and subject to the limitation on use and transfer, under the Arms Export Control Act, as amended, and as embodied in the Letter of Offer and Acceptance.

This proposed sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.

The prime contractor will be McDonnell Douglas Company, a wholly Owned subsidiary of The Boeing Company in St. Louis, Missouri. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Turkey; however, Contractor Engineering Technical Services may be required on an interim basis for installations.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 07-31**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act****Annex
Item No. vii****(vii) Sensitivity of Technology:**

1. The Block II HARPOON is an Anti-Surface Warfare missile that provides forces with a capability to engage targets in both the "blue water" regions and the littorals of the world. The highest classification level of all aspects of this proposed sale, including the missiles with its associated publications, documentation, operations, supply, maintenance, and training is Confidential.

2. These missiles incorporate components, software, and technical design information that are considered sensitive. The following components that are included in this proposed sale are considered sensitive and are classified Confidential:

Radar seeker.
Global Positioning System (GPS)/Inertial Navigation System (INS)
Operational Flight Program (OFP) Software
Missile operational characteristics and performance data

These elements are essential to the ability of the HARPOON missile to selectively engage hostile targets over a wide range of operational, tactical and environmental conditions. The Government of Turkey is approved for Precise Positioning Service (PPS) GPS.

3. The missiles' components are classified based on the premise that if a technologically advanced potential adversary were to obtain data on the missile seeker, (OFP), along with characteristics and performance data, systems and procedures could be developed for countermeasures which might reduce the HARPOON's effectiveness. In addition, the information could be used to develop missile systems with similar performance capabilities. All such releases are closely monitored and tailored to eliminate or minimize this risk.

**CERTIFICATION PURSUANT TO § 620C(d) OF THE FOREIGN
ASSISTANCE ACT OF 1961, AS AMENDED**

Pursuant to Section 620C(d) of the Foreign Assistance Act of 1961, as amended (the Act), Executive Order 12163, State Department Delegation of Authority No. 293-1, and a State Department Delegation of Authority signed March 12, 2007, I hereby certify that the furnishing to Turkey of 51 All-Up-Round Selected Availability Anti-spoofing Module-compliant Block II Tactical HARPOON missiles, including containers, test sets and support equipment, spare and repair parts, publications and technical data, maintenance, personnel training and training equipment, U.S. Government (USG) support, and contractor representatives' engineering and technical support services, and other related elements of logistics support is consistent with the principles contained in Section 620C(b) of the Act.

This certification will be made part of the notification to Congress under Section 36(b) of the Arms Export Control Act, as amended, regarding the proposed sale of the above-named articles and services and is based on the justification accompanying said notification, of which said justification constitutes a full explanation.

John C. Rood
Assistant Secretary of State
for International Security and
Nonproliferation
