(E,E)-9,11-Tetradecadien-1-yl Acetate; Receipt of Application for Emergency Exemption, and Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a quarantine exemption request from the United States Department of Agriculture/Animal and Plant Health Inspection Service (USDA/APHIS) to use the pesticide (E,E)-9,11-tetradecadien-1-yl acetate (CAS No. 30562-09-5) to treat host plants to control the Light Brown Apple Moth (LBAM). The Applicant proposes the use of a new chemical which has not been registered by EPA. Due to the unique nature of this emergency situation, in which the time to review the conditions of this situation was short, it was not possible to issue a solicitation for public comment, in accordance with 40 CFR 166.24, prior to the Agency's decision to grant these exemptions.

DATES: EPA is waiving the public comment period, as allowed in 40 CFR 166.24, due to the short period of time available with which to review this situation and render a timely decision. However, comments may still be submitted and will be evaluated.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through

www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).
- ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- iv. Describe any assumptions and provide any technical information and/or data that you used.
- v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- vi. Provide specific examples to illustrate your concerns and suggest alternatives.
- vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

II. What Action is the Agency Taking?

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the Administrator determines that emergency conditions exist which require the exemption. USDA/APHIS has requested the Administrator to issue a quarantine exemption for the use of (E,E)-9,11-tetradecadien-1-yl acetate on host plants to control the LBAM. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the Applicant asserts that requested chemical is

needed as part of a quarantine program to eradicate the LBAM. The LBAM destroys, stunts, or deforms young seedlings, spoils the appearance of ornamental plants, and injures deciduous fruit-tree crops, citrus, and grapes. LBAM has the potential to cause significant economic losses due to increased production costs and the possible loss of international and domestic markets. The impact on production costs for LBAM hosts may exceed \$100 million in the state of California.

The Applicant proposes to place the pheromone dispensers in tree crops and field crops. Dispensers are to be applied uniformly throughout the treated acreage to obtain a reduction in mating. Between 200 to 300 dispensers should be used per acre.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA require publication of a notice of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient) which has not been registered by EPA. The notice provides an opportunity for public comment on the application.

EPA is waiving the public comment period, as allowed in 40 CFR 166.24, due to the short period of time available with which to review this situation and render a timely decision. However, comments may still be submitted and will be evaluated.
