Natural Resources Conservation Service

Rehabilitation of Multiple Purpose Dam No. 3 of the Muddy Fork of the Illinois River Watershed, Washington County, Arkansas

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR Part 1500); and the Natural Resources Conservation Service Regulations (7 CFR Part 650); the Natural Resources Conservation Service,

U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the rehabilitation of Multiple Purpose Dam No. 3 of the Muddy Fork of the Illinois River Watershed, Washington County, Arkansas.

FOR FURTHER INFORMATION CONTACT: Kalven L. Trice, State Conservationist, Natural Resources Conservation Service, Rm. 3416 Federal Building, 700 West Capital Avenue, Little Rock, AR 72201-3225, Telephone (501) 301-3100.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Kalven L. Trice, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project will rehabilitate Multiple Purpose Dam (MPD) No. 3 to maintain the present level of flood control, fish habitat and recreational benefits and comply with the current dam safety and performance standards. Local Sponsoring Organizations for the rehabilitation of MPD No. 3 are the Arkansas Game and Fish Commission and Washington County Conservation District.

Rehabilitation of MPD No. 3 will require the dam to be modified to meet current performance and safety standards for a high hazard dam. The modification will consist of:

- The existing principal spillway inlet and conduit are adequate. The principal spillway crest will be maintained at Elevation 1169.3, the current permanent pool elevation.
- Increasing spillway capacity by the addition of a 100-foot wide RCC structural spillway over the top of dam to supplement the existing 110-foot wide vegetated auxiliary spillway, with the crest elevation of both spillways set at Elevation 1175.3 feet, the current elevation for the vegetated spillway.
- Raising the top of dam and dike (located northwest of the pool area) from Elevation 1179.0 feet to Elevation 1181.9 feet to safely pass the 6-hour to 72-hour duration Probable Maximum Precipitation (PMP) storms.

All disturbed areas will be planted to plants that have wildlife values. The proposed work will not affect any prime farmland, endangered or threatened species, wetlands, or cultural resources.

Federal assistance will be provided under authority of the Small Watershed Rehabilitation Amendments of 2000 (Section 313, Pub. L. 106-472). Total

project cost is estimated to be \$1,429,900, of which \$1,019,600 will be paid from the Small Watershed Rehabilitation funds and \$410,300 from local funds.

The notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Kalven L. Trice, State Conservationist.

No administrative action on implementation of the proposal will be taken until August 8, 2007.

Dated: June 28, 2007.

Kalven L. Trice,

State Conservationist.

AGENCY: Natural Resources Conservation Service (NRCS), U.S. Department of Agriculture.

ACTION: Notice of availability of proposed changes in the NRCS National Handbook of Conservation Practices for public review and comment.

SUMMARY: Notice is hereby given of the intention of NRCS to issue a series of new or revised conservation practice standards in its National Handbook of Conservation Practices. NRCS State Conservationists who choose to adopt these practices for use within their States will incorporate them into Section IV of their respective electronic Field Office Technical Guides (eFOTG). These practices may be used in conservation systems that treat highly erodible land or on land determined to be a wetland.

EFFECTIVE DATES: Comments will be received for a 30-day period commencing with this date of publication. Final versions of these new or revised conservation practice standards will be adopted after the close

of the 30-day period, after consideration of all comments.

ADDRESSES: Comments should be submitted by one of the following methods:

1. In writing to: National Agricultural Engineer, Natural Resources Conservation Service, P.O. Box 2890, Washington, DC 20013-2890; or
2. Electronically by e-mail to: Daniel.meyer@wdc.usda.gov.

FOR FURTHER INFORMATION CONTACT:

Copies of these standards are attached to this Notice or can be downloaded or printed from the following Web site: <ftp://ftp-fc.sc.egov.usda.gov/NHQ/practice-standards/federal-register/>. Single copies of paper versions of these standards are also available from NRCS in Washington, DC. Submit individual inquiries in writing to Daniel Meyer, National Agricultural Engineer, Natural Resources Conservation Service, Post Office Box 2890, Room 6139-S, Washington, DC 20013-2890, or electronically to Daniel.meyer@wdc.usda.gov.

For the next 30 days, NRCS will receive comments relative to the proposed changes. Following that period, a determination will be made by NRCS regarding disposition of those comments and a final determination of changes will be made.
