SUPPLEMENTARY INFORMATION:

Background

The licensed drivers in the United States deserve reasonable assurance that their fellow motorists are properly qualified to drive the vehicles they operate. Before the Commercial Motor Vehicle Safety Act of 1986 (CMVSA or the Act at Attachment A) Public Law 99-570, Title XII, 100 Stat. 3207-170) was signed by the President on October 27, 1986, 18 States and the District of Columbia authorized any person licensed to drive an automobile to also legally drive a large truck or bus. No special training or special license was required to drive these vehicles, even though it was widely recognized that operation of certain types of vehicles called for special skills, knowledge and training. Even in the 32 States that had a classified driver licensing system in place, only 12 of these States required

an applicant to take a skills test in a representative vehicle. Equally serious was the problem of drivers possessing multiple driver licenses that enabled these commercial motor vehicle (CMV) drivers to avoid license suspension for traffic law convictions. By spreading their convictions among several States, CMV drivers could avoid punishment for their infringements, and stay behind the wheel.

The CMVSA addressed these problems. Section 12002 of the Act makes it illegal for a CMV operator to have more than one driver's license. Section 12003 requires the CMV driver conducting operations in commerce to notify both the designated State of licensure official and the driver's employer of any convictions of State or local laws relating to traffic control (except parking tickets). This section also requires each person who applies for employment as a CMV operator to notify prospective employers of all previous employment as a CMV operator for at least the previous ten years.

In section 12005 of the Act, the Secretary of Transportation (Secretary) is required to develop minimum Federal standards for testing and licensing of operators of CMVs.

Section 12007 of the Act also directs the Secretary, in cooperation with the States, to develop a clearinghouse to aid the States in implementing the one driver, one license, and one driving record requirement. This clearinghouse is known as the commercial driver's license information system (CDLIS).

The CMVSA further requires each person who has a CDL suspended, revoked or canceled by a State, or who is disqualified from operating a CMV for any period, to notify his or her employer of such actions. Drivers of CMVs must notify their employers within 1 business day of being notified of the license suspension, revocation, and cancellation, or of the lost right to operate or disqualification. These requirements are reflected in 49 CFR part 383, titled "Commercial Driver's License Standards; Requirements and Penalties."

Specifically, section 383.21 prohibits a person from having more than one license; section 383.31 requires notification of convictions for driver violations; section 383.33 requires notification of driver's license suspensions; section 383.35 requires notification of previous employment; and section 383.37 outlines employer responsibilities. Section 383.111 requires the passing of a knowledge test by the driver and section 383.113 requires the passing of a skills test by
