*The Standards Council of Canada (SCC) voted to end its Laboratory Accreditation Program for Substance Abuse (LAPSA) effective May 12, 1998. Laboratories certified through that program were accredited to conduct forensic urine drug testing as required by U.S. Department of Transportation (DOT) regulations. As of that date, the certification of those accredited Canadian laboratories will continue under DOT authority. The responsibility for conducting quarterly performance testing plus periodic on-site inspections of those LAPSA-accredited laboratories was transferred to the U.S. HHS, with the HHS' NLCP contractor continuing to have an active role in the performance testing and laboratory inspection processes. Other Canadian laboratories wishing to be considered for the NLCP may apply directly to the NLCP contractor just as U.S. laboratories do.

Upon finding a Canadian laboratory to be qualified, HHS will recommend that DOT certify the laboratory (**Federal Register**, July 16, 1996) as meeting the minimum standards of the Mandatory Guidelines published in the **Federal Register** on April 13, 2004 (69 FR 19644). After receiving DOT certification, the laboratory will be included in the monthly list of HHS-certified laboratories and participate in

the NLCP certification maintenance program.

SUPPLEMENTARY INFORMATION: **I. Abstract**

This information collection is associated with regulations implementing the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES regulates international trade in listed species through a system of permits and certificates. We assess permit requests according to criteria in CITES and Federal regulations (50 CFR parts 13 and 23) for the issuance, suspension, revocation, or denial of permits.

We have developed a new permit application form (FWS Form 3-200-80) specific to permit requests for the export of fertilized live eggs, caviar, or meat from aquacultured paddlefish or sturgeon. In the past, we have used FWS Form 3-200-24 (Export of Captive Born Wildlife) to collect the information necessary for us to evaluate these permit requests. When using that general form, applicants have had considerable difficulty understanding what information is necessary and how to supply it. The proposed form clarifies these issues. The information we plan to collect includes, but is not limited to:
