SUPPLEMENTARY INFORMATION:

I. What Information is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.
2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
3. Enhance the quality, utility, and clarity of the information to be collected.
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What Should I Consider when I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Provide specific examples to illustrate your concerns.
6. Offer alternative ways to improve the collection activity.
7. Make sure to submit your comments by the deadline identified under **DATES**.
8. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

III. What Information Collection Activity or ICR Does this Action Apply to?

Affected entities: Entities potentially affected by this action are persons who provide training in lead-based paint activities, persons who are engaged in lead-based paint activities, and state agencies that administer lead-based paint activities.

Title: TSCA Section 402 and Section 404 Training and Certification, Accreditation and Standards for Lead-Based Paint Activities.

ICR numbers: EPA ICR No. 1715.09, OMB Control No. 2070-0155.

ICR status: This ICR is currently scheduled to expire on February 29, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This information collection applies to reporting and recordkeeping requirements found in sections 402 and 404 of the Toxic Substances Control Act (TSCA) and applicable regulations at 40 CFR part 745. The purposes of the requirements under TSCA section 402 are to ensure that individuals conducting activities that prevent, detect, and eliminate hazards associated with lead-based paint in residential facilities, particularly those occupied or used by children, are properly trained and certified, that training programs providing instruction in such activities are accredited, and that these activities are conducted according to reliable, effective and safe work practice standards. The TSCA section 404 regulations include reporting and recordkeeping requirements that apply to states and Indian tribes that seek Federal authorization to administer and enforce state and tribal programs that regulate lead-based paint activities based on the TSCA section 402 regulations. The overall goals of the TSCA section 402 and section 404 regulations and the reporting and recordkeeping requirements found therein are to ensure the availability of a trained and qualified workforce to identify and address lead-based paint hazards in residences and to protect the

general public from exposure to lead hazards.

Responses to the collection of information are mandatory (see 40 CFR part 745). Respondents may claim all or part of a document confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to range between 0.28 hours and 80 hours per respondent, depending on the type of respondent. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 25,500.

Frequency of response: Annual.
Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 774,740 hours.

Estimated total annual costs: \$28,792,102. This includes an estimated burden cost of \$28,792,102 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

IV. Are There Changes in the Estimates from the Last Approval?

There is a net increase of 333,927 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's revised estimates of the number of respondents and/or the number of events for which respondents must provide information. Please refer to the Supporting Statement for a detailed explanation of the change in burden. This change is an adjustment.

V. What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
