

conduct the hunt. The full quota of whales was taken.

#### Authorization

BP complied with the requirements of the 2006 LOA, and NMFS has determined that the marine mammal take resulting from the 2006 construction and operation activities is within that analyzed in and anticipated by the associated regulations. Accordingly, NMFS has issued a 1-year LOA to BP, authorizing the taking of marine mammals incidental to oil production operations at the Northstar offshore facility in state and Federal waters in the U.S. Beaufort Sea. Issuance of this LOA is based on findings described in the preamble to the final rule (71 FR 11314, March 7, 2006) and supported by information contained in BP's 2006 annual report that the activities described in the LOA will result in the taking of no more than small numbers of bowhead whales, beluga whales, ringed seals, and, possibly California gray whales, bearded seals, and spotted seals and that the total taking will have a negligible impact on these marine mammal stocks and would not have an unmitigable adverse impact on the availability of these species or stocks for taking for subsistence uses.
