

2007 will be reproduced and distributed to the RAC for consideration at its September meeting. In addition, an opportunity for public comment will be provided at that meeting. All written comments received in response to this notice will be available for public inspection at the NIH OBA office, 6705 Rockledge Drive, Suite 750, Bethesda, MD 20892 (telephone, 301-496-9838), weekdays between the hours of 8:30 a.m. and 5 p.m.

**FOR FURTHER INFORMATION CONTACT:**

Contact OBA by e-mail at [oba@od.nih.gov](mailto:oba@od.nih.gov), or telephone at 301-496-9838, if you have questions, or require additional information about these proposed actions. Comments may be submitted to the same e-mail address or by fax at 301-496-9839 or sent by U.S. mail to the Office of Biotechnology Activities, National Institutes of Health, 6705 Rockledge Drive, Suite 750, MSC 7985, Bethesda, Maryland 20892. For additional information about the RAC meeting at which these proposed actions will be deliberated, please visit the NIH OBA Web site at: <http://www4.od.nih.gov/oba/>.

**SUPPLEMENTARY INFORMATION:** OBA has received information regarding proposed experiments, which, to proceed, would require Major Actions under Section III-A-1-a of the *NIH Guidelines*. Under this section, if the deliberate transfer of a drug resistance trait to micro-organisms could compromise the use of the drug to control disease in humans, veterinary medicine, or agriculture the experiment must be reviewed by the RAC. Dr. David Walker, Chairman, Pathology Department, University of Texas Medical Branch, proposes to introduce DNA constructs encoding resistance to the antibiotic chloramphenicol into *Rickettsia conorii* and *Rickettsia typhi* with the goal of developing genetic tools to study the biology of these organisms and in particular the genes associated with virulence. Dr. Abdu Azad, Professor of Microbiology, University of Maryland proposes a similar experiment in *R. typhi*. Dr. Walker's ultimate goal is to develop a vaccine for *Rickettsia prowazekii*, a Select Agent that causes epidemic typhus.

*Rickettsiae* are spread to humans by arthropods and human to human transmission does not occur directly. *R. conorii* causes Mediterranean Spotted Fever, a disease endemic to southern Europe and Africa. Clinically, it typically presents with high fever, flu-like symptoms, headache and a maculopapular rash. The disease is generally mild but severe forms include major neurological manifestations and

multi-organ failure with a mortality rate estimated up to 2.5%. *R. typhi* is found in the United States and many other parts of the world, although it is relatively uncommon. The clinical presentation in humans includes fever, headache, other constitutional symptoms and, in up to 40% of adults, neurological symptoms. Although generally mild it has a 1-4% mortality rate. Current first-line treatment for *R. typhi* and *R. conorii* is doxycycline or chloramphenicol. Due to its safety profile, doxycycline is the preferred antibiotic but chloramphenicol is indicated in certain patients. Background information may be obtained by contacting NIH OBA via e-mail at [oba@od.nih.gov](mailto:oba@od.nih.gov). ## INTERNATIONAL TRADE COMMISSION

**[Investigation No. 731-TA-903 (Review)]**

### Hot-Rolled Steel Products From the Netherlands

**AGENCY:** United States International Trade Commission.

**ACTION:** Termination of review.

**SUMMARY:** On August 1, 2006, the Department of Commerce ("Commerce") initiated and the U.S. International Trade Commission ("Commission") instituted a five-year review concerning the antidumping duty order on hot-rolled steel products ("hot-rolled steel") from the Netherlands. 71 FR 43443 and 71 FR 43521. However, on May 4, 2007, Commerce published notice in the **Federal Register** of the implementation of the findings of the World Trade Organization Panel under section 129 of the Uruguay Round Agreements Act and the revocation of the antidumping duty order concerning hot-rolled steel from the Netherlands effective April 23, 2007. 72 FR 25261. On June 27, 2007, Commerce published notice in the **Federal Register** of its final results of the sunset review of the antidumping duty order on hot-rolled steel from the Netherlands. 72 FR 35220. In that notice, Commerce determined that a finding of likelihood in a sunset review "presumes the existence of an antidumping duty order currently in force, which is manifestly not the case here. Consequently, in the absence of an order currently in force, the Department cannot make a finding that it is likely that dumping will continue or recur if the order is revoked." 72 FR 35221. Commerce further stated that it was revoking the antidumping duty order on hot-rolled steel from the Netherlands effective November 29, 2006, the fifth anniversary of the date of publication of the order. Accordingly, pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)), the five-year review of the antidumping duty order concerning hot-rolled steel from the Netherlands (investigation No. 731-TA-903 (Review)) is terminated.

**DATES:** *Effective Date:* June 27, 2007.
