RIN 2130-AB80

Passenger Equipment Safety Standards; Front-End Strength of Cab Cars and Multiple-Unit Locomotives

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: FRA is proposing to further the safety of passenger train occupants by amending existing regulations to enhance structural strength requirements for the front end of cab cars and multiple-unit locomotives. These enhancements would include the addition of deformation and energy absorption requirements specified in revised American Public Transportation Association (APTA) standards for front-end collision posts and corner posts for this equipment. FRA is also proposing to make miscellaneous clarifying amendments to current regulations for the structural strength of passenger equipment.

DATES: (1) Written comments must be received by October 1, 2007. Comments received after that date will be considered to the extent possible without incurring additional expense or delay.

(2) FRA anticipates being able to resolve this rulemaking without a public, oral hearing. However, if FRA receives a specific request for a public, oral hearing prior to August 31, 2007, one will be scheduled, and FRA will publish a supplemental notice in the **Federal Register** to inform interested parties of the date, time, and location of any such hearing.
