Research and Innovative Technology Administration

[RITA-2007-28836]

Nationwide Differential Global Positioning System (NDGPS) Program

AGENCY: Research and Innovative Technology Administration, DOT.

ACTION: Notice; request for public comments.

SUMMARY: The Research and Innovative Technology Administration (RITA), on behalf of the U.S. Department of Transportation (DOT), is assessing the current user needs and systems requirements of the inland (terrestrial) component of NDGPS. This assessment is in preparation for making a recommendation to the National Space-Based Positioning, Navigation and Timing (PNT) Executive Committee (<http://www.pnt.gov>) on the need to continue to operate the inland component of the NDGPS system, and to make a decision on funding the NDGPS. The assessment may recommend other funding sources for future maintenance or enhancement of NDGPS, or shared sponsorship with other Federal and non-Federal agencies and entities, including the private sector. If no transportation requirements or other federal user requirements are identified as a result of the needs assessment, and if there are no other Federal or other funding sources willing to sponsor or partner in sponsoring NDGPS, DOT would develop a decommissioning plan for NDGPS.

DATES: Comments and related material must reach the Docket Management Facility on or before October 1, 2007. Late filed comments will be considered to the maximum extent practicable.

SUPPLEMENTARY INFORMATION:

Background

In 1997, the Department of Transportation and Related Agencies Appropriations Act of 1998 (Pub. L. 105-66, section 346 (111 Stat. 1449)) authorized the implementation of the inland component of NDGPS. Federal agencies, states, and scientific organizations have been cooperating to complete the inland NDGPS component throughout the U.S. If completed as originally envisioned, NDGPS will provide coverage of the conterminous U.S., Hawaii, and Alaska, regardless of terrain, man-made obstructions, or other surface obstructions. This coverage is achieved by using a robust medium frequency broadcast optimized for surface applications. NDGPS currently meets all of the Maritime Differential GPS performance requirements.

The completed NDGPS system would provide an accurate, highly-reliable, dynamic, nationwide real-time differential GPS location and integrity function to users that could enable multiple surface transportation, other civil, commercial, scientific and homeland security applications. More information is available at: <http://www.navcen.uscg.gov/ndgps/default.htm>.

The Department of Transportation is evaluating the user needs and system

requirements of the NDGPS system. DOT is examining whether it would be in the public interest to continue operations of the inland component of the NDGPS system, or to invest in completing and enhancing NDGPS by:

1. Completing the planned NDGPS Initial Operational Capability (IOC); or
2. Completing the planned NDGPS Full Operational Capability (FOC).

If further investment is not in the public interest and there are no other funding sources, DOT is evaluating whether to decommission the inland component of NDGPS.

DOT is also seeking information about potential NDGPS sponsor partnerships with other Federal, state and local agencies, universities, and the private sector.

Future operations and investment decision scenarios might include:

1. Sharing sponsorship (program operations, maintenance and funding responsibilities) across interested Federal, state and local agencies, which may lead to completing the planned NDGPS Initial Operating Capability (IOC) of providing users with coverage by at least one NDGPS site over the conterminous United States (CONUS), as defined in the 2005 Federal Radionavigation Plan (2005 FRP), available at: <http://www.navcen.uscg.gov/pubs/frp2005/2005%20FRP%20WEB.pdf>;
2. Sharing sponsorship (program operations, maintenance and funding responsibilities) across interested Federal, state and local agencies, which may lead to completing the planned NDGPS Full Operating Capability (FOC) of dual coverage over CONUS, as defined in the 2005 FRP;
3. Transferring system funding and/or operations to the private sector through a public-private partnership or similar mechanism; or,
4. If user requirements are not identified, decommissioning the inland component of NDGPS.

In all scenarios, the Coast Guard will continue to operate, maintain, and manage the Maritime Differential GPS system to meet maritime safety, navigation and security mission requirements.

Contributing factors to these decisions are:

1. Whether there are sufficient number of current and projected NDGPS transportation users, and/or other civil sector users (e.g., civil Federal, state and local agencies, commercial and scientific interests) to justify continued system operation, or build-out to FOC completion;
2. Whether there are sufficient safety, mobility, efficiency, economic,
