Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a clarification to an existing guide in the agency's regulatory guide (RG) series. The NRC has developed this series to describe and make available to the public such information as methods that

are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

At this time, the NRC is issuing a clarification to Revision 1 of RG 1.200, "An Approach for Determining the Technical Adequacy of Probabilistic Risk Assessment Results for Risk-Informed Activities," issued January 2007. The purpose of this clarification is to provide additional explanation to the staff's regulatory position with regard to defining the technical acceptability of a probabilistic risk assessment (PRA), specifically with respect to the treatment of the sources of model uncertainty and the related assumptions in the base PRA.

The clarification to RG 1.200, Revision 1 can be found in Agencywide Documents Access and Management System (ADAMS) Accession Number ML071940235.

The clarification to Regulatory Guide 1.200, Revision 1, is intended for licensees of nuclear power plants. Revision 1 of this RG remains in effect for licensees of nuclear power plants.

The NRC staff encourages and welcomes comments and suggestions in connection with improvements to published RGs, as well as items for inclusion in RGs that are currently under development. You may submit comments by any of the following methods.

Management System (ADAMS) at <http://www.nrc.gov/reading-rm/adams.html> under ADAMS Accession No. ML071940235.

NUCLEAR REGULATORY COMMISSION

NUREG-1556, Volume 9, Revision 2, "Consolidated Guidance About Materials Licenses Program-Specific Guidance About Medical Use Licenses; Draft Guidance Document for Comment

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) has amended its regulations to include jurisdiction over certain radium sources, accelerator-produced radioactive materials, and certain naturally occurring radioactive material, as required by the Energy Policy Act of 2005 (EPAct), which was signed into law on August 8, 2005. The EPAct expanded the Atomic Energy Act of 1954 definition of byproduct material to include these radioactive materials. Subsequently, these radioactive materials were placed under NRC's regulatory authority. NRC is revising its regulations to provide a regulatory framework that includes these newly added radioactive materials. See SECY-07-0062, "Final Rule: Requirements for
