Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.archives.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 72 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.

2. The relationship between the Federal Register and Code of Federal Regulations.

3. The important elements of typical Federal Register documents.

4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, September 11, 2007
9:00 a.m.–Noon

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741–6008

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 748 and 749

RIN 3133–AD24

Records Preservation Program and Appendices—Record Retention Guidelines; Catastrophic Act Preparedness Guidelines

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: NCUA is issuing a final rule to amend its regulations regarding a federally-insured credit union's obligation to maintain a records preservation program. The final rule clarifies the meaning of catastrophic act and the requirements for preserving vital records. The agency also provides a new Appendix B that offers guidelines for developing a program to prepare for a catastrophic act. NCUA believes the revised rule language and new appendix will facilitate the recovery of essential operations after a catastrophic act resulting in continued member confidence in the credit union system.

DATES: This rule is effective September 4, 2007.

FOR FURTHER INFORMATION CONTACT: Andrew Healey, Program Officer, Division of Supervision, Office of Examination and Insurance, at (703) 518–6360 or Linda K. Dent, Staff Attorney, Office of General Counsel, at (703) 518–6540.

SUPPLEMENTARY INFORMATION:

Background

On March 15, 2007, the NCUA Board (Board) requested comments on proposed amendments to parts 748 and 749 addressing catastrophic act events, vital records preservation, and vital member services restoration. The agency's previous experiences with catastrophic acts underscored the importance of preserving vital records and swiftly restoring vital member services. In particular, NCUA's review of events in the aftermath of hurricanes Katrina and Rita demonstrated the need for advance planning and preparation to respond to a catastrophic act successfully. In reviewing these experiences, the Board determined the most immediate issues for credit unions and their members concerned access to funds and account information, access to facilities, and locating and communicating with staff. The proposed amendments drew from these experiences to identify program elements the Board considered essential to restoring vital records and member services.

While many of these elements are covered in previous NCUA guidance issued to federally-insured credit unions on disaster recovery planning, the Board wants to ensure that credit unions are maintaining sufficient plans and safeguards to preserve vital records. The Board believes the regulatory changes are necessary to ensure credit unions establish certain minimum standards for preserving vital records. The Board also believes the recommendations and guidance offered, concerning restoring vital member services and development of a program to prepare for a catastrophic act, provide important information about maintaining member services and confidence in the credit union system if a catastrophic act occurs.

Summary of Comments

The Board received twelve comments on the proposed regulation: Four from natural person credit unions, one corporate credit union, two national trade associations, and five state trade associations. While all commenters generally supported the overall purpose of the proposed changes, about half of them offered recommendations on the definitions for catastrophic act, vital member services, and vital records, and the proposed new Appendix B to Part 749. Comments for these items were mixed and are discussed in further detail below.

Section 748.1(b). Catastrophic Act Report

The Board proposed to revise the definition of catastrophic act to include any event, natural or otherwise, causing an interruption in vital member services for more than two business days. Seven commenters recommended additional changes: Four commenters believe the definition should clarify what constitutes a business day; two commenters suggested including cross-references to relevant definitions in parts 748 and 749; and one commenter felt the definition of catastrophic act should focus only on whether a loss of vital member services has occurred without regard to whether physical damage has occurred.

Section 748.1(b) previously required a credit union to file a report when a catastrophic act caused physical damage to its facilities. The proposed rule retained this requirement but added that a catastrophic act would include an interruption in vital member services lasting for more than two consecutive business days, regardless of whether physical damage is present. In the final rule, the Board has substituted the word ''disaster'' for ''event'' and added the word ''causing'' before ''an interruption'' to address concerns that relatively minor events could be construed to trigger the need to file a report and, also, clarifying the causal link between a disaster and an interruption in vital member services. The Board believes these changes are consistent with the usual and customary meaning of the word catastrophe. These changes also reinforce the Board's view that the reporting requirement applies only to a disaster as opposed to a circumstance where physical damage or a business closing occurs but is not disaster-related.

The Board believes adding a definition of business day is unnecessary and could be cumbersome because the hours and days of operations vary significantly among credit unions. The word ''consecutive'' has been added to the regulation so the requirement to submit a report due to an interruption in vital member services caused by a disaster will be triggered when the interruption is ''projected to last more than two consecutive business days.'' Two consecutive business days means full consecutive days on which a credit union would normally be open for business. For example, if a credit union, normally operating Monday through Friday from 9 a.m. to 5 p.m., shuts early on Thursday because a hurricane has caused a loss of power,

the credit union must file a report only if it is unable to provide vital member services, through any of its delivery channels, by 9:00 am on Tuesday. Finally, as suggested in the comments, the Board also included a cross-reference to the definition of vital member services in part 749.

Part 749

Vital Member Services

Six commenters generally supported the proposed definition, while two of the commenters addressing this subject suggested including a clarification that vital member services can be provided by any means or delivery channel. The Board believes the additional clarification is unnecessary as the final rule does not restrict the manner in which vital member services are provided.

Vital Records

Eight commenters provided comments on the proposed definition: Four were in support of the proposed change and four recommended changes. Two of the recommendations, one from a national trade association and the other from a state trade association, expressed concern about the rule's impact on small, non-automated credit unions and recommended flexibility, or exemption, for such institutions. The Board is not persuaded an exemption for small credit unions is warranted; this is discussed below in the section on the Regulatory Flexibility Act.

Another recommendation suggested the Board include the general ledger as a vital record. This is unnecessary because the content of the general ledger is contained in the records designated as vital; the Board notes credit unions are free to classify additional records as vital if they choose.

As proposed, vital records is defined to include a ''list of share, deposit, and loan balances for each member's account as of the most recent business day,'' and another recommendation was that the phrase ''as of the most recent business day'' would be clearer if the word ''completed'' were added before ''business'' or the phrase ''day of normal operations'' was substituted for ''business day.'' To clarify, the Board has revised the phrase to read ''as of the close of the most recent business day.'' This means the credit union must have this record as of the close of the most recent day the credit union was open for business.

The Board is aware of some concern about the level of detail required in the records log, particularly where records may be stored in an electronic format and various individuals may be involved in scanning paper records for storage. This provision is re-worded slightly in the amendment but substantively unchanged from previous requirements; the Board believes recording this information is not unduly burdensome and ensures accountability for this important function. The log can take various forms, for example, a data processing system log. Where various persons may be involved in preparing records for storage, whether in an electronic format or otherwise, the log should identify who is responsible, as stated in the regulation, for ''sending the record to storage.''

Appendix B—Catastrophic Act Preparedness Guidelines

Nine commenters expressed an opinion on whether to include a new Appendix B in the regulation: Three supported including it and six recommended against it. Five of the six commenters that opposed including the appendix felt sufficient guidance already existed. One of these five, a national trade association, also expressed a concern that including the appendix and other recommendations in the regulation would cause examiners and credit union staff to misconstrue the guidance as being enforceable like a regulation. The sixth commenter felt it would be more appropriate to integrate the guidance into the regulation.

The Board has weighed the fact the guidance is available from other sources and the potential for confusion regarding enforceability of a regulation versus guidance. The Board believes the benefit to credit unions in having the guidance in proximity to the regulatory requirement will enhance access to the guidance and will facilitate compliance. The Board believes including specific words like ''recommended'' and ''guidance'' means, as a legal matter, that the guidance is just that—guidance—and is not enforceable as a regulation. These words clarify and minimize, to the extent linguistically possible, the potential for misinterpretation.

NCUA, as a matter of its supervisory obligation to protect the interests of credit union members and the National Credit Union Share Insurance Fund, offers guidance to help federally-insured credit unions meet their obligation to protect their operations. Federally-insured credit unions may choose to meet this obligation through other alternatives appropriate for their operations.

Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact a proposed rule may have on a substantial number of small credit unions (those under $10 million in assets). This proposed rule modifies a preexisting requirement for federally-insured credit unions to file reports of catastrophic acts and to have a vital records preservation program. The requirement to maintain vital records as of the most recent business day versus the existing month-end requirement may pose some burden for non-automated credit unions. There are approximately 122 non-automated credit unions or approximately 3.3% of all small credit unions. The NCUA has determined and certifies that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small credit unions. Accordingly, the NCUA has determined that an RFA analysis is not required.

Paperwork Reduction Act

The changes involve information collection requirements. As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), NCUA submitted a copy of the proposed rule as part of an information collection package to the Office of Management and Budget (OMB) for its review. OMB has approved this collection as a revision to an existing collection, OMB Control Number 3133–0032.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their regulatory actions on state and local interests. In adherence to fundamental federalism principles, NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order. This proposed rule, if adopted, will not have substantial direct effects on the states, on the relationship between the national government and states, or on the distribution of power and responsibilities among the various levels of government. NCUA has determined the proposed rule does not constitute a policy that has federalism implications for purposes of the executive order.

Treasury and General Government Appropriations Act, 1999

NCUA has determined that the proposed rule will not affect family

well-being within the meaning of section 654 of the Treasury and General Appropriations Act, 1999, Public Law 105–277, 112 Stat. 2681 (1998).

List of Subjects

12 CFR Part 748

Credit Unions, Reporting and record keeping requirements.

12 CFR Part 749

Credit Unions, Reporting and record keeping requirements.

By the National Credit Union Administration Board on July 26, 2007.

Mary Rupp,

Secretary of the Board.

■ For the reasons set forth in the preamble, the Board amends 12 CFR parts 748 and 749 as set forth below.

■ Accordingly, NCUA amends 12 CFR parts 748 and 749 as follows:

PART 748—SECURITY PROGRAM, REPORT OF SUSPECTED CRIMES, SUSPICIOUS TRANSACTIONS, CATASTROPHIC ACTS AND BANK SECRECY ACT COMPLIANCE

■ 1. The authority citation for part 748 continues to read as follows:

Authority: 12 U.S.C. 1766(a) and 1786(q); 15 U.S.C. 6801 and 6805(b); 31 U.S.C. 5311 and 5318.

■ 2. Amend § 748.1 by revising the second sentence of paragraph (b) to read as follows:

§ 748.1 Filing of reports.

* * * * *

(b) * * * A catastrophic act is any disaster, natural or otherwise, resulting in physical destruction or damage to the credit union or causing an interruption in vital member services, as defined in § 749.1 of this chapter, projected to last more than two consecutive business days. * * *

* * * * *

PART 749—RECORDS PRESERVATION PROGRAM AND APPENDICES—RECORD RETENTION GUIDELINES; CATASTROPHIC ACT PREPAREDNESS GUIDELINES

■ 1. The authority citation for part 749 continues to read as follows:

Authority: 12 U.S.C. 1766, 1783 and 1789; 15 U.S.C. 7001(d).

■ 2. Amend part 749 by revising the part heading as set forth above.

■ 3. Revise § 749.0 to read as follows:

§ 749.0 Purpose and scope.

(a) This part describes the obligations of all federally-insured credit unions to maintain a records preservation program to identify, store and reconstruct vital records in the event that the credit union's records are destroyed and provides recommendations for restoring vital member services. All credit unions must have a written program that includes plans for safeguarding records and reconstructing vital records. To complement these plans, it is recommended a credit union develop a method for restoring vital member services in the event of a catastrophic act as defined in § 748.1(b) of this chapter. Additionally, the regulation establishes flexibility in the format credit unions may use for maintaining writings, records or information required by other NCUA regulations.

(b) Appendix A to this part provides guidance concerning the appropriate length of time credit unions should retain various types of operational records. Appendix B to this part also provides guidance for developing a program for responding to a catastrophic act to ensure duplicate vital records can be used for restoration of vital member services.

■ 4. Revise § 749.1 to read as follows:

§ 749.1 Definitions.

For purposes of this part:

Vital member services mean informational account inquiries, share withdrawals and deposits, and loan payments and disbursements.

Vital records refer to the following records:

(a) A list of share, deposit, and loan balances for each member's account as of the close of the most recent business day that:

(1) Shows each balance individually identified by a name or number;

(2) Lists multiple loans of one account separately; and

(3) Contains information sufficient to enable the credit union to locate each member, such as address and telephone number.

(b) A financial report, which lists all of the credit union's asset and liability accounts and bank reconcilements, current as of the most recent month-end.

(c) A list of the credit union's accounts at financial institutions, insurance policies, and investments along with related contact information, current as of the most recent month-end.

(d) Emergency contact information for employees, officials, regulatory offices, and vendors used to support vital records.

■ 5. Revise § 749.2 to read as follows:

§ 749.2 Vital records preservation program.

The board of directors of a credit union is responsible for establishing a vital records preservation program within 6 months after its insurance certificate is issued. The program must be in writing and contain procedures for maintaining duplicate vital records at a vital records center. The procedures must include: designated staff responsible for vital records preservation, a schedule for the storage and destruction of records, and a records preservation log detailing for each record stored, its name, storage location, storage date, and name of the person sending the record for storage. It is recommended credit unions include in these procedures a method for using duplicate records to restore vital member services in the event of catastrophic act. Credit unions which have some or all of their records maintained by an off-site data processor are considered to be in compliance for the storage of those records if the service agreement specifies the data processor safeguards against the simultaneous destruction of production and back-up information.

■ 6. Revise § 749.3 to read as follows:

§ 749.3 Vital records center.

A vital records center is defined as a storage facility, which may include another federally-insured credit union, at any location far enough from the credit union's offices to avoid the simultaneous loss of both sets of records in the event of a catastrophic act. A credit union must maintain or contract with a third party to maintain any equipment or software for its vital records center necessary to access records.

■ 7. Revise § 749.4 to read as follows:

§ 749.4 Format for vital records preservation.

Preserved records may be in any format that can be used to reconstruct the credit union's records. The format used must accurately reflect the information in the record, remain accessible to all persons entitled to access by statute, regulation or rule of law, and be capable of reproduction by transmission, printing, or otherwise.

■ 8. Revise § 749.5 to read as follows:

§ 749.5 Format for records required by other NCUA regulations.

Where NCUA regulations require credit unions to retain certain writings, records or information, credit unions may use any format that accurately reflects the information in the record, is accessible to all persons entitled to

access by statute, regulation or rule of law, and is capable of being reproduced by transmission, printing, or otherwise. The credit union must maintain the necessary equipment or software to permit an examiner to access the records during the examination process.

■ 9. Add new Appendix B to part 749 to read as follows:

Appendix B to Part 749—Catastrophic Act Preparedness Guidelines

Credit unions often look to NCUA for guidance on preparing for a catastrophic act. While NCUA has minimal regulation in this area,[1] as an aid to credit unions it is publishing this appendix of suggested guidelines. It is recommended that all credit unions develop a program to prepare for a catastrophic act. The program should be developed with oversight and approval of the board of directors. It is recommended the program address the following five elements:

(1) A business impact analysis to evaluate potential threats;

(2) A risk assessment to determine critical systems and necessary resources;

(3) A written plan addressing:

i. Persons with authority to enact the plan;

ii. Preservation and ability to restore vital records;

iii. A method for restoring vital member services through identification of alternate operating location(s) or mediums to provide services, such as telephone centers, shared service centers, agreements with other credit unions, or other appropriate methods;

iv. Communication methods for employees and members;

v. Notification of regulators as addressed in 12 CFR 748.1(b);

vi. Training and documentation of training to ensure all employees and volunteer officials are aware of procedures to follow in the event of destruction of vital records or loss of vital member services; and

vii. Testing procedures, including a means for documenting the testing results.

(4) Internal controls for reviewing the plan at least annually and for revising the plan as circumstances warrant, for example, to address changes in the credit union's operations; and

(5) Annual testing.

[FR Doc. E7–14851 Filed 8–1–07; 8:45 am]

BILLING CODE 7535–01–P

[1] See 12 CFR 748.1(b) concerning a FICU's reporting of any catastrophic act that occurs at its office to its regional director and 12 CFR 749.3 concerning the location of a FICU's vital records center to avoid the simultaneous loss of both sets of records in the event of disaster.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 23

[Docket No. CE261; Special Conditions No. 23–201–SC]

Special Conditions: Centex Aerospace, Inc.; Cirrus Design Corporation Model SR22; Installation of a Full Authority Digital Engine Control (FADEC) Engine

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions; request for comments.

SUMMARY: These special conditions are issued for the Cirrus Design Corporation, Model SR22 airplane as modified by Centex Aerospace, Inc. This airplane as modified by Centex Aerospace, Inc. will have a novel or unusual design feature(s) associated with the installation of a full authority digital engine control (FADEC) engine. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: The effective date of these special conditions is July 26, 2007.

Comments must be received on or before September 4, 2007.

ADDRESSES: Mail two copies of your comments to: Federal Aviation Administration, Regional Counsel, ACE–7, Attn: Rules Docket No. CE261, 901 Locust, Kansas City, MO 64106. You may deliver two copies to the Regional Counsel at the above address. Mark your comments: Docket No. CE261. You may inspect comments in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Peter L. Rouse, Federal Aviation Administration, Small Airplane Directorate, Aircraft Certification Service, 901 Locust, Room 301, Kansas City, MO 64106; telephone (816) 329–4135; facsimile (816) 329–4090.

SUPPLEMENTARY INFORMATION: The FAA has determined that notice and opportunity for prior public comment hereon are impracticable because these procedures would significantly delay issuance of the approval design and thus delivery of the affected aircraft. In addition, the substance of these special conditions has been subject to the public comment process in several prior instances with no substantive comments received. The FAA therefore finds that good cause exists for making these special conditions effective upon issuance.

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will file in the docket all comments we receive, as well as a report summarizing each substantive public contact with FAA personnel about these special conditions. You can inspect the docket before and after the comment closing date. If you wish to review the docket in person, go to the address in the **ADDRESSES** section of this preamble between 7:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

We will consider all comments we receive by the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these special conditions based on the comments we receive.

If you want us to let you know we received your comments on these special conditions, send us a pre-addressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it back to you.

Background

On, March 15, 2004, Centex Aerospace, Inc. applied for a supplemental type certificate for the Cirrus Model SR22 to install a full authority digital engine control in the Cirrus Model SR22. CenTex Aerospace, Inc. plans to install a Teledyne Continental Motors model IOF–550–N engine in a Cirrus Design Corporation Model SR–22 airplane. This type certified engine, approved under FAA Type Certificate E3SO; Revision 7, dated February 4, 2002, incorporates Full Authority Digital Electronic Controls (FADEC) fuel and ignition control system. Even though the engine control system is certificated as part of the engine and does not interface or share data with any of the airplane systems, the installation of an engine with an electronic control system requires evaluation due to critical environmental effects and possible effects on or by other airplane systems. For example,

indirect effects of lightning, radio interference with other airplane electronic systems, shared engine and airplane data and power sources.

The Cirrus SR 22 is currently approved under Type Certificate No. A00009CH. The Cirrus SR–22 is a 3,400 pound single-engine, four-place, fixed-gear airplane powered by a 310 hp reciprocating engine. It has a conventional tractor configuration and utilizes composites for the structure. Some unique features of the SR–22 include sidestick controls and a ballistic recovery system, and a single combination throttle/propeller control lever.

The considerations for installation of digital electronic engine control systems were not envisaged and are not adequately addressed in 14 CFR part 23. The regulatory requirements in 14 CFR part 23 for evaluating the installation of complex systems, including electronic systems and critical environmental effects, are contained in § 23.1309. However, when § 23.1309 was developed, the use of highly airframe integrated electronic control systems for engines was not envisioned. Therefore, the § 23.1309 requirements were not applicable to systems certificated as part of the engine (reference § 23.1309(f)(1)). The parts of the system that are not certificated with the engine could be evaluated using the criteria of § 23.1309. However, the integral nature of systems such as these makes it unfeasible to evaluate the airplane portion of the system without including the engine portion of the system. Section 23.1309(f)(1) prevents complete evaluation of the installed airplane system since evaluation of the engine system's effects is not required.

Type Certification Basis

Under the provisions of § 21.101, Centex Aerospace, Inc. must show that the Cirrus Design Corporation Model SR22, as changed, continues to meet the applicable provisions of the regulations incorporated by reference in Type Certificate No. A00009CH, or the applicable regulations in effect on the date of application for the change. The regulations incorporated by reference in the type certificate are commonly referred to as the ''original type certification basis.'' The regulations incorporated by reference in Type Certificate No. A00009CH are as follows:

Model SR22: Part 23 of the Federal Aviation Regulations effective February 1, 1965, as amended by 23–1 through 23–53, except as follows:

23.301 through Amendment 47
23.855, 23.1326, 23.1359, not applicable
Federal Aviation Regulations 36 dated December 1, 1969, as amended by current amendment as of the date of type Certification.

Equivalent Safety Items:

Equivalent Levels of Safety finding (ACE–96–5) made per the provisions of 14 CFR part 23, § 23.221; Refer to FAA ELOS letter dated June 10, 1998 for models SR20, SR22.
Equivalent Levels of Safety finding (ACE–00–09) made per the provisions of 14 CFR part 23, §§ 23.1143(g) and 23.1147(b); Refer to FAA ELOS letter dated September 11, 2000, for model SR22.

Special Conditions:

23–ACE–88 for ballistic parachute
23–134–SC for protection of systems for High Intensity Radiated Fields (HIRF)
23–163–SC for inflatable restraint system

In addition, if the regulations incorporated by reference do not provide adequate standards regarding the change, the applicant must comply with certain regulations in effect on the date of application for the change.

If the Administrator finds that the applicable airworthiness regulations (i.e., 14 CFR part 23, § 23.1309) do not contain adequate or appropriate safety standards for the Model SR22 because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

The FAA issues special conditions, as defined in § 11.19, under § 11.38 and they become part of the type certification basis under § 21.101.

Special conditions are initially applicable to the model for which they are issued. Should the applicant apply for a supplemental type certificate to modify any other model included on the same type certificate to incorporate the same novel or unusual design feature, the special conditions would also apply to the other model.

Novel or Unusual Design Features

The Centex Aerospace, Inc. modified Cirrus Model SR22 will incorporate the following novel or unusual design features:

An engine that includes an electronic control system with Full Authority Digital Engine control (FADEC) capability.

Discussion

The regulatory requirements in 14 CFR part 23 for evaluating the installation of complex systems, including electronic systems and critical environmental effects, are contained in § 23.1309. However, when § 23.1309 was developed, the use of electronic control systems for engines were not envisioned. Therefore, the § 23.1309 requirements were not applicable to systems certificated as part of the engine (reference § 23.1309(f)(1)). Although the parts of the system that are not certificated with the engine could be evaluated using the criteria of § 23.1309, the integral nature of systems such as these makes it unfeasible to evaluate the airplane portion of the system without including the engine portion of the system. However, § 23.1309(f)(1) again prevents complete evaluation of the installed airplane system since evaluation of the engine system's effects is not required.

The Policy Statement; Installation of Electronic Engine Control for Reciprocating Engine, PS–ACE100–2004–10024, states:

> The current Small Airplane Directorate Standards Office policy on EEC installation in small airplanes, under § 23.1309, has been to issue two special conditions. The first special condition applies § 23.1309(a) through (e) to the propulsion system installation. The second special condition is protection of the EEC from exposure to HIRF. The evaluation should be limited to the interfaces of the engine/control system and verification that none of the assumptions made for part 33 certification of the engine are invalidated by the installation. The analysis should not extend into data submitted and approved as part of the engine certification program.

The Lightning and HIRF certification requirements for design and installation approval of electronic equipment are presented in 14 CFR part 23, § 23.1309, and Advisory Circular (AC) 23.1309–1C and AC 23–17A. However, a typical misinterpretation is that the concepts in AC 23.1309–1C can be applied to engine control systems to reduce the certification requirements for single engine airplanes.

The EEC is certified as part of the engine design certification, the certification requirements for engine control systems must be driven by 14 CFR part 33 and the two advisory circulars; AC 33.28–1 and AC 33.28–2. Both of those Advisory Circulars clearly state that electronic engine controls must provide the same level of safety as traditional mechanical engine controls. We believe the EEC systems have additional failure modes that were not present in purely mechanical engine controls. To ensure an equivalent level of safety, the FAA position has always been:

> EEC System with catastrophic and hazardous failure conditions, without an acceptable conventional engine control backup, lightning and HIRF protection levels are required to be certified to the levels for catastrophic failure conditions.

The environmental certification tests are normally conducted with the appropriate category and level of RTCA/DO–160. For HIRF, it is at the environment in the notice or category W of section 20 of RTCA/DO–160. For indirect effects of lightning, it is at the appropriate category and level for pin injection tests and multiple stroke and multiple burst tests of section 22 of RTCA/DO–160. When appropriate, engine certification data may be used when showing compliance with this requirement. However, the effects of the installation on this data must be addressed.

The applicant will comply with the following special condition:

The installation of the electronic engine control system must comply with the requirements of § 23.1309(a) through (e) at Amendment 23–49. The intent of this requirement is not to reevaluate the inherent hardware reliability of the control itself, but rather determine the effects, including environmental effects addressed in § 23.1309(e), on the airplane systems and engine control system when installing the control on the airplane. When appropriate, engine certification data may be used when showing compliance with this requirement; however, the effects of the installation on this data must be addressed.

With respect to compliance with § 23.1309(e), the levels required for compliance shall be at the levels for catastrophic failure conditions.

Applicability

As discussed above, these special conditions are applicable to the Cirrus Model SR22 as modified by Centex Aerospace, Inc. Should Centex Aerospace, Inc. apply at a later date for a supplemental type certificate to modify any other model included on Type Certificate No. A00009CH, to incorporate the same novel or unusual design feature, the special conditions would apply to that model as well.

Conclusion

This action affects only certain novel or unusual design features on one model of airplane. It is not a rule of general applicability and affects only the applicant who applied to the FAA for approval of these features on the airplane.

The substance of these special conditions has been subjected to the notice and comment period in several prior instances and has been derived without substantive change from those previously issued. It is unlikely that prior public comment would result in a significant change from the substance contained herein. Therefore, because a delay would significantly affect the certification of the airplane, which is imminent, the FAA has determined that prior public notice and comment are unnecessary and impracticable, and good cause exists for adopting these special conditions upon issuance. The FAA is requesting comments to allow interested persons to submit views that may not have been submitted in response to the prior opportunities for comment described above.

List of Subjects in 14 CFR Part 23

Aircraft, Aviation safety, Signs and symbols.

Citation

■ The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(g), 40113 and 44701; 14 CFR 21.16 and 21.101; and 14 CFR 11.38 and 11.19.

The Special Conditions

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for the Cirrus Model SR22 airplanes as modified by Centex Aerospace, Inc.

1. Electronic Engine Control System

The installation of the electronic engine control system must comply with the requirements of § 23.1309(a) through (e) at Amendment 23–49. The intent of this requirement is not to reevaluate the inherent hardware reliability of the control itself, but rather determine the effects, including environmental effects addressed in § 23.1309(e), on the airplane systems and engine control system when installing the control on the airplane. When appropriate, engine certification data may be used when showing compliance with this requirement; however, the effects of the installation on this data must be addressed.

With respect to compliance with § 23.1309(e), the levels required for compliance shall be at the levels for catastrophic failure conditions.

Issued in Kansas City, Missouri on July 26, 2007.

James E. Jackson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 171

RIN 3038–AC43

Rules Relating To Review of National Futures Association Decisions in Disciplinary, Membership Denial, Registration and Member Responsibility Actions

AGENCY: Commodity Futures Trading Commission.

ACTION: Final Rule.

SUMMARY: The Commodity Futures Trading Commission (''Commission'' or ''CFTC'') hereby amends 17 CFR Part 171, by adding language to Commission Rule § 171.9(b) (manner of service), allowing for service by facsimile (''fax'') or by electronic means (''e-mail''), making either means of service effective upon receipt. The amendment will also indicate that parties who consent to accepting service of documents by electronic means or fax in the underlying NFA action also consent to accepting service by the same means in proceedings under Part 171.

DATES: August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Thuy Dinh, Office of the General Counsel, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW., Washington, DC 20581. Telephone: (202) 418–5128.

SUPPLEMENTARY INFORMATION: On October 9, 1990, the Commission adopted Part 171 to establish standards and procedures for its review of decisions of registered futures associations such as the National Futures Association (''NFA'') in disciplinary actions, membership denial actions, registration actions and member responsibility actions. 55 FR 41061. From the time Part 171 was promulgated until now, Commission Rule 171.9(b) provides only for service by personal delivery (effective upon receipt) or service by mail (effective upon deposit). On May 22, 2007, the NFA asked the Commission to amend language to Rule 171.9(b), to allow service by fax and e-mail. In proposing the amendment, NFA cited three supporting arguments: (1) To avoid undue delay (due to cautionary procedures adopted in the post-September 11 climate, postal mail to U.S. government agencies is often delayed and thus is not as effective as it used to be prior to September 11); (2) to take advantage of technological means of service, which will be faster and less costly than the mails; (3) to

streamline procedures. NFA cites Commission Rules under 17 CFR Part 10, which allows for service of documents by fax in enforcement proceedings. In addition, it cites its own rules governing arbitration, compliance and disciplinary cases as allowing service by both fax and e-mail. Thus, NFA asserts, to allow service by fax and e-mail in Part 171 would make the process more efficient.

After reviewing NFA's proposed amended language and its justifications for the proposal, the Commission has decided to adopt NFA's request in its entirety. Amending the 17 CFR 171.9(b) to allow for service by fax and e-mail will(a) enhance the efficiency of proceedings under Part 171; and (b) comport with the various capabilities of today's changing world.

Related Matters

A. No Notice Is Required Under 5 U.S.C. 553

The Commission has determined that this amendment to Part 171 is exempt from the provisions of the Administrative Procedure Act, 5 U.S.C. 553, which generally require notice of proposed rulemaking and provide other opportunities for public participation. However, 5 U.S.C. 553 gives an agency discretion not to provide notice for ''rules of agency organization, procedure, or practice.'' Notice and public procedure are unnecessary in this case. The proposed amendment, if made effective immediately, will actually promote efficiency and facilitate the Commission's core mission. For the above reasons, the notice requirements under 5 U.S.C. 553 are inapplicable.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (''RFA''), 5 U.S.C. 601 *et seq.*, requires agencies with rulemaking authority to consider the impact those rules will have on small businesses. With respect to persons seeking Commission reviews of NFA adjudicatory decisions, the amendments will impose no additional regulatory burden. Commission review of NFA disciplinary and membership denial actions has been carried out pursuant to 17 CFR Part 171 since 1990. These amendments to 17 CFR 171.9(b) do not present any significant changes and will in fact ease the regulatory burden by providing more options, greater certainty and predictability concerning manners of service under Part 171. Accordingly, the Acting Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that the amendments will not have a significant economic impact on a substantial number of small businesses.

C. Paperwork Reduction Act

The amendments to Part 171 rules do not impose a burden within the meaning and intent of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, *et seq.*

D. Cost-Benefit Analysis

Section 15(a) of the Commodity Exchange Act, 7 U.S.C. 19(a), requires the Commission to consider the costs and benefits of its action before issuing a new regulation. Section 15(a) further specifies that costs and benefits shall be evaluated in light of five broad areas of market and public concern: (1) Protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. Accordingly, the Commission can, in its discretion, give greater weight to any one of the five enumerated areas of concern and can, in its discretion, determine that notwithstanding its costs, a particular rule is necessary or appropriate to protect the public interest or to effectuate any of the provisions, or accomplish any of the purposes, of the Commodity Exchange Act.

The amendments to Part 171 will not create any significant change in the Commission's appellate process or impose new burdens or costs thereon. In fact, the amendments should enhance the protection of market participants and the public by making service more certain, faster and cheaper.

After considering these above factors, the Commission has determined to amend Part 171, as set forth below.

List of Subjects in 17 CFR Part 171

Administrative practice and procedure, Commodity exchanges, Commodity futures.

■ In consideration of the following, and pursuant to authority contained in the Commodity Exchange Act, the Commission hereby amends chapter I of title 17 of the Code of Federal Regulations to read as follows:

PART 171–RULES RELATING TO REVIEW OF NATIONAL FUTURES ASSOCIATION DECISIONS IN DISCIPLINARY, MEMBERSHIP DENIAL, REGISTRATION AND MEMBER RESPONSIBILITY ACTIONS

■ 1. The authority citation for Part 171 continues to read as follows:

Authority: 7 U.S.C. 4a, 12a, and 21.

■ 2. Section 171.9 is amended by revising paragraph (b) to read as follows:

§ 171.9 Service

* * * * *

(b) *Manner of Service:* Service may be made by personal delivery (effective upon receipt), mail (effective upon deposit), facsimile (effective upon receipt) or electronic mail (effective upon receipt). When service is effected by mail, the time within which the person served may respond thereto shall be increased by five days. Parties who consent to accepting service of documents by electronic means in the underlying NFA action also consent to accepting service by the same means in proceedings under this Part 171.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 33

[Docket No. PL07–1–000]

FPA Section 203 Supplemental Policy Statement

Issued July 20, 2007.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Policy statement.

SUMMARY: The Federal Energy Regulatory Commission is providing guidance regarding future implementation of section 203 of the Federal Power Act. In the Supplemental Policy Statement the Commission adopts policies and provides clarifications intended to continue the encouragement of beneficial utility industry investment while also providing for effective customer protections, including working in a complementary fashion with the states in protecting customers.

DATES: *Effective Date:* This Supplemental Policy Statement is effective July 20, 2007.

SUPPLEMENTARY INFORMATION:

Before Commissioners: Joseph T. Kelliher, Chairman; Suedeen G. Kelly, Marc Spitzer, Philip D. Moeller, and Jon Wellinghoff.

FPA Section 203 Supplemental Policy Statement

1. The Commission is issuing this Policy Statement as a supplement to the Commission's rulemakings issued in 2006 to implement provisions of the Energy Policy Act of 2005 [1] and also as a supplement to its 1996 Merger Policy Statement.[2] The 2006 rulemakings addressed amendments to the Commission's corporate review authority under section 203 of the Federal Power Act (FPA),[3] the repeal of the Public Utility Holding Company Act of 1935 [4] and the enactment of the Public Utility Holding Company Act of 2005.[5] Based on our experience in implementing the new laws thus far, and on the two technical conferences in which industry participants and state commissioners provided input on key issues, including the protection of captive customers against inappropriate cross-subsidization and the need to provide sufficient flexibility to encourage industry investment that benefits customers, the Commission finds that it is appropriate to provide guidance in this Policy Statement regarding future implementation of section 203. We clarify that this Policy Statement supplements, and does not replace, any part of the Commission's 1996 Merger Policy Statement.

2. This Policy Statement is one of three actions being taken based on the Commission's experience implementing amended FPA section 203 and PUHCA 2005, as well as the record from the Commission's December 7, 2006 and March 8, 2007 technical conferences regarding section 203 and PUHCA 2005. In addition, in separate orders, the Commission is concurrently issuing a Notice of Proposed Rulemaking proposing to grant a limited blanket authorization for certain dispositions of jurisdictional facilities under FPA section 203(a)(1) [6] and a Notice of Proposed Rulemaking proposing to codify restrictions on affiliate transactions between franchised public utilities with captive customers and their market-regulated power sales affiliates or non-utility affiliates.[7]

I. Background

3. In 1996, the Commission issued the 1996 Merger Policy Statement updating and clarifying the Commission's procedures, criteria and policies concerning public utility mergers under section 203 of the FPA.[8] The purpose of the 1996 Merger Policy Statement was to ensure that mergers are consistent with the public interest and to provide greater certainty and expedition in the Commission's analysis of merger applications. The 1996 Merger Policy Statement refined and modified the Commission's merger policy ''in light of dramatic and continuing changes in the electric power industry and corresponding changes in the regulation of that industry.'' [9]

4. In the 1996 Merger Policy Statement, the Commission set out the three factors it generally considers when analyzing whether a proposed section 203 transaction [10] is consistent with the public interest: effect on competition, effect on rates, and effect on regulation. In 2000, the Commission issued the Filing Requirements Rule,[11] which updated the filing requirements under 18 CFR Part 33 of the Commission's regulations for section 203 applications. Among other things, the Filing Requirements Rule codified the Commission's screening approach to quickly identify mergers that may raise horizontal competitive concerns, provided specific filing requirements consistent with Appendix A of the 1996 Merger Policy Statement, established guidelines for vertical competitive analysis, and set forth filing requirements for mergers that potentially raise vertical market power concerns. The revised filing requirements are in effect today, as recently modified (discussed below), and they assist the Commission in determining whether section 203 transactions are consistent with the public interest, provide more certainty to applicants regarding what showings must be made to satisfy the Commission's concerns under section 203, and expedite the Commission's review of such applications.

5. The scope of the Commission's section 203 review was expanded by EPAct 2005. Among other things, amended section 203: (1) Expands the Commission's review authority to include authority over certain holding company mergers and acquisitions, as well as certain public utility acquisitions of generating facilities; (2) requires that, prior to approving a disposition under section 203, the Commission must determine that the transaction would not result in inappropriate cross-subsidization of non-utility affiliates or encumbrance of utility assets; [12] and (3) imposes statutory deadlines for acting on

[12] Section 203(a)(4) is not an absolute prohibition on the creoss-subsidization of a non-utility associate company or the pledge or encumbrance of utility assets for the benefit of an associate company. If the Commission determines that the cross-subsidization, pledge or encumbrance will be consistent with the public interest, such action may be permitted.

mergers and other jurisdictional transactions.

6. Through the Order No. 669 rulemaking proceeding, the Commission promulgated regulations adopting certain modifications to 18 CFR 2.26 and Part 33 to implement amended section 203. The Commission also provided blanket authorizations for certain transactions subject to section 203. These blanket authorizations were crafted to ensure that there is no harm to captive utility customers, but sought to accommodate investments in the electric utility industry by facilitating market liquidity. Some commenters in the rulemaking proceeding urged the Commission to grant additional blanket authorizations. Other commenters argued that the Commission should adopt additional generic rules to guard against inappropriate cross-subsidization associated with the mergers. Certain commenters argued that the Commission should modify its competitive analysis for mergers, which has been in place for 10 years. The Commission stated that it would reevaluate these and other issues at a future technical conference on the Commission's section 203 regulations as well as certain issues raised in the Order No. 667 rulemaking proceeding implementing PUHCA 2005.

7. On December 7, 2006, the Commission held a technical conference (December 7 Technical Conference) to discuss several of the issues that arose in the Order No. 667 and Order No. 669 rulemaking proceedings. The December 7 Technical Conference discussed a range of topics. The first panel discussed whether there are additional actions, under the FPA or the Natural Gas Act (NGA), that the Commission should take to supplement the protections against cross-subsidization that were implemented in the Order No. 667 and Order No. 669 rulemaking proceedings. The second panel discussed whether, and if so how, the Commission should modify its Cash Management Rule [13] in light of PUHCA 2005, and whether the Commission should codify specific safeguards that must be adopted for cash management programs and money pool agreements and transactions. The third panel discussed whether modifications to the specific exemptions, waivers and blanket authorizations set forth in the Order No. 667 and Order No. 669 rulemaking proceedings are warranted. Post-technical conference comments were accepted.

8. On March 8, 2007, the Commission held a second technical conference (March 8 Technical Conference) to discuss whether the Commission's section 203 policy should be revised and, in particular, whether the Commission's Appendix A merger analysis is sufficient to identify market power concerns in today's electric industry market environment. The first panel discussed whether the Appendix A analysis is appropriate to analyze a merger's effect on competition, given the changes that have occurred in the industry (*e.g.,* the development of Regional Transmission Organizations (RTOs)) and statutory changes (*e.g.,* as a result of the repeal of PUHCA 1935 and new authorities given to the Commission in EPAct 2005). The second panel assessed the factors the Commission uses in reviewing mergers and the coordination between the Commission and other agencies (including state commissions) with merger review responsibility.

II. Discussion

9. Based on the Commission's experiences thus far in implementing amended section 203, the input received through the Order No. 669 rulemaking proceeding, and the comments received in response to the December 7 and March 8 Technical Conferences, the Commission finds that additional clarification and guidance regarding our section 203 policy are warranted. The Commission will provide certain clarifications and guidance concerning: (1) The information that must be filed as part of section 203 applications for transactions that do not raise cross-subsidization concerns; (2) the types of applicant commitments and ring-fencing measures that, if offered, might address cross-subsidization concerns; [14] (3) the scope of blanket authorizations under sections 203(a)(1) and 203(a)(2); (4) what constitutes a disposition of control of jurisdictional facilities for purposes of section 203; and (5) the Commission's Appendix A analysis.

10. We note that amended section 203 and PUHCA 2005 did not become effective until February 2006. The Commission thus has had only 18 months' experience under the new laws. Therefore, we will continue to monitor the issues that arise under section 203, including cross-subsidization issues, and re-evaluate our regulatory approach as appropriate. The Commission's goals are to provide sufficient flexibility to adopt customer protections as needed, work in a complementary fashion with the states in protecting customers, appropriately address the need for regulatory certainty with respect to jurisdictional transactions, and address ways to allow beneficial utility industry investment that does not harm captive customers.[15]

A. The Commission's Cross-Subsidization Concerns and Exhibit M Requirements

11. At the December 7 Technical Conference, a number of commenters asserted that a vast majority of section 203 transactions pose no threat of cross-subsidization but nonetheless, the Commission's regulations require applicants to provide ''an explanation, with appropriate evidentiary support for such explanation * * * of how applicants are providing assurance * * * that the proposed transaction will not result in, at the time of the transaction or in the future, cross-subsidization of a non-utility associate company or pledge or encumbrance of utility assets for the benefit of an associate company * * *.'' [16]

[13] *Regulation of Cash Management Practices,* Order No. 634, 68 FR 40500 (July 8, 2003), FERC Stats. & Regs. ¶ 31,145, *revised,* Order No. 634–A, 68 FR 61993 (Oct. 31, 2003), FERC Stats. & Regs. ¶ 31,152 (2003) (Cash Management Rule).

[14] When ''cross-subsidization'' occurs, some of the costs of dealings between affiliated regulated and unregulated companies are borne by the regulated utility affiliate. The costs might be passed on to captive customers through the rates of the regulated affiliate. ''Ring-fencing'' employs various techniques to separate and protect the financial assets and ratings of the regulated utility from the business risks of other members of the holding company family, including bankruptcy of the parent or its affiliates. These techniques could preclude some types of transactions that involve cross-subsidization.

[15] As indicated below, the Commission does not propose actions on all of the issues raised by commenters. For example, the Commission is not proposing changes to its regulations that would require: (1) Codification of specific requirements for cash management programs and money pool agreements; (2) codification of additional information reporting requirements (through section 203 applications or through routine reporting requirements); or (3) additional, generic actions pursuant to the Commission's NGA authority. Based on the types of filings made since Order Nos. 667 and 669 became effective and the comments raised at the technical conferences, we do not believe further actions on these particular issues are warranted at this time. Moreover, we note that certain commenters recommended that the Commission provide a list on its website of all jurisdictional public utilities (including qualifying facilities and exempt wholesale generators), foreign utility companies, transmitting utilities, electric utilities, electric utility companies, and holding companies (as those terms are defined under EPAct 2005 and PUHCA 2005) for use by market participants in their regulatory compliance monitoring efforts and as they consider whether to acquire or hold the securities of companies, the acquisition or holding of which might or might not be subject to FPA section 203 or PUHCA 2005. While the Commission declines to rule on this issue in the context of a policy statement, it will explore the feasibility of making some of this information publicly available on its website.

[16] The explanation, to be provided as Exhibit M to a section 203 application, includes:

Continued

12. Several commenters argued that it is not clear how to provide the explanation required under Exhibit M for transactions in which cross-subsidization is not possible, is precluded by existing safeguards or is reduced to a very low possibility. Thus, they urged the Commission to establish criteria to identify ''safe harbors'' or classes of transactions that clearly do not raise cross-subsidization concerns. They contended that such an approach will enhance regulatory certainty by letting parties know up front that with these types of transactions, there is no risk of additional restrictions being imposed by the Commission.

13. The Commission's focus generally has been on preventing a transfer of benefits from a public utility's captive customers to shareholders of the public utility's holding company due to an intra-system transaction that involves electric power or energy, generation facilities, or non-power goods and services.[17] Concerns arise in a number of circumstances, including where a market-regulated affiliate (*e.g.,* a power seller with market-based rates) or a non-utility affiliate provides power or goods and services to a franchised public utility with captive customers, as well as the circumstance in which the franchised public utility with captive customers provides power or non-power goods and services to the market-regulated or non-utility affiliate. For instance, a franchised public utility with captive customers may purchase power from its marketing affiliate at a price above market or sell power to its marketing affiliate at below-market prices, thus transferring benefits from customers to shareholders of the holding company. Further, customers may be harmed if the franchised public utility purchases non-power goods and services from an affiliate at above-market prices or sells non-power goods and services to an affiliate at less than market value and seeks to recover the overcharges or the undercharges through rates for service to captive customers.[18] Concerns may also arise with respect to intra-corporate financing transactions that may encumber franchised public utility assets in favor of a market-regulated or non-utility affiliate. The Commission's regulatory concern with this particular form of cross-subsidization is with the potential adverse impact of the internal finance transaction on the rates of a franchised public utility with captive customers.

1. ''Safe Harbors'' for Meeting Exhibit M Requirements for Certain Transactions

14. Since the February 2006 effective date of the FPA section 203 amendments, the Commission has gained sufficient experience in implementing the cross-subsidization provision of FPA section 203(a)(4) to provide policy guidance on the cross-subsidization demonstration required by Exhibit M. As described above, there are many instances where cross-subsidization can occur, but our focus is on the specific requirements under section 203(a)(4) and the Order No. 669 rulemaking proceeding—inappropriate cross-subsidization of non-utility or market-regulated affiliates or the pledge or encumbrance of utility assets for the benefit of an associate company. The concern arises in a corporate structure that has at least one franchised public utility with captive customers and one or more non-utility affiliates or market-regulated utility affiliates (*i.e.,* utilities regulated on a market rather than a cost basis). These types of relationships provide opportunities for cross-subsidization in routine transactions between affiliates in addition to more significant transactions such as transfers of utility assets, encumbrance of utility assets, new affiliate contracts, and issuance of securities by affiliates (that usually receive more public scrutiny or regulatory attention).

15. Where these affiliate relationships do not exist, that is, where a transaction involves only market-regulated and/or non-utility affiliated entities or is a bona fide, arm's-length, bargained-for exchange, then the transaction is not likely to result in inappropriate cross-subsidization and the detailed explanation and evidentiary support required by Exhibit M may not be warranted.

16. Accordingly, for purposes of compliance with Exhibit M, the Commission will recognize three classes of transactions that are unlikely to raise the cross-subsidization concerns described in the Order No. 669 rulemaking proceeding. These, in effect, are ''safe harbors'' for meeting the section 203 cross-subsidization demonstration, absent concerns identified by the Commission or evidence from interveners that there is a cross-subsidy problem based on the particular circumstances presented.

17. The first class of transactions includes those transactions where the applicant shows that a franchised public utility with captive customers is not involved. If no captive customers are involved, then there is no potential for harm to customers. Therefore, compliance with Exhibit M could be a showing that no franchised public utility with captive customers [19] is involved in the transaction.

18. The second class of transactions includes those transactions that are subject to review by a state commission. The Commission, in the context of specific mergers or other corporate transactions, intends to defer to state commissions where the state adopts or has in place ring-fencing measures to protect customers against inappropriate cross-subsidization or the encumbrance of utility assets for the benefit of the ''unregulated'' affiliates. Therefore, compliance with Exhibit M could be satisfied with a showing that the proposed transaction complies with specific state regulatory protections against inappropriate cross-subsidization by captive customers. If a state does not have the authority to impose cross-subsidization protections, however, the transaction would not qualify for this safe harbor.

19. The third class of transactions are those involving only non-affiliates. Where a franchised public utility transacts only with nonaffiliated entities, the potential for inappropriate cross-subsidization of a non-utility associate company or the pledge or encumbrance of utility assets for the benefit of an associate company

''Disclosure of existing pledges and/or encumbrances of utility assets; and a detailed showing that the transaction will not result in: any transfer of facilities between a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, and an associate company; any new issuance of securities by a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, for the benefit of an associate company; any new pledge or encumbrance of assets of a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, for the benefit of an associate company; or any new affiliate contract between a non-utility associate company and a traditional public utility associate company that has captive customers or that owns or provides transmission service over jurisdictional transmission facilities, other than non-power goods and services agreements subject to review under sections 205 and 206 of the Federal Power Act; or if no such assurance can be provided, an explanation of how such cross-subsidization, pledge, or encumbrance will be consistent with the public interest.'' 18 CFR 33.2(j)(1)–(2).

[17] Order No. 669, FERC Stats. & Regs. ¶ 31,200 at P 147.

[18] *Transactions Subject to FPA Section 203,* 70 FR 58636 (Oct. 7, 2005) FERC Stats. & Regs. ¶ 32,589 at P 47 (2005. In the concurrent Affiliate Transactions NOPR, *supra* note 7, the Commission is proposing to extend the affiliate abuse restrictions to apply to all franchised public utilities with captive customers and their market-regulated power sales affiliates and non-utility affiliates.

[19] The Commission has defined ''captive customers,'' for purposes of FPA section 203, to mean ''any wholesale or retaile electric energy customers served under cost-based regulation.'' 18 CFR 33.1(b)(5).

generally is not present. Therefore, compliance with Exhibit M could be satisfied with a showing that a public utility transacts only with nonaffiliated entities. This category includes a transfer of assets between a public utility and non-affiliates, but does not include mergers with, or acquisitions of, public utilities.

20. After review of a section 203 application relying on any of these ''safe harbors,'' if the Commission finds that the applicant has failed to make a sufficient showing that it meets the criteria described above, then the application will be deemed to be deficient and a new Exhibit M will be required.

2. Other Means of Addressing Cross-Subsidization Concerns

21. Intra-corporate financing transactions may raise cross-subsidization concerns if the assets of a franchised public utility with captive customers are used to finance its market-regulated utility affiliates or non-utility affiliates or their activities. In the December 7 Technical Conference, several commenters noted that their states had implemented ring-fencing measures to mitigate potential risks of cross-subsidization but that many states had not. These commenters suggested that the Commission implement safeguards to mitigate risks in the absence of state regulation (although not necessarily on a generic basis, relying on the states where the state has already taken such measures). Most commenters urged the Commission to continue to review whether potential mergers required additional protections on a case-by-case basis. Representatives of the state commissions, including the Oregon Public Utility Commission, Wisconsin Public Service Commission and Missouri Public Service Commission, recommended that the Commission only act where there is a demonstrable gap in state authority. None supported adoption of federal, mandatory ring-fencing conditions. Some commenters did not oppose the establishment of guidelines on the kinds of protections that might be appropriate in different cases.[20]

22. American Public Power Association and the National Rural Electric Cooperative Association argued that the Commission adopt regulations with minimum cross-subsidization safeguards that would apply in all cases, and also provide an exhaustive menu of additional cross-subsidization safeguards, including ring-fencing measures, that applicants might propose or that the Commission might impose in appropriate cases. They proposed that the Commission codify its code of conduct requirements in the regulations and that these restrictions be made applicable to all traditional public utilities and their unregulated affiliates.

23. The Commission agrees that it is appropriate to codify in our regulations code of conduct affiliate restrictions to prevent cross-subsidization involving power and non-power goods and services transactions and to make those prophylactic restrictions applicable to all traditional (franchised) public utilities (not just public utilities seeking section 203 approval) and their transactions with power sellers as well as non-utility affiliates. Accordingly, contemporaneous with this Policy Statement, we are instituting a Notice of Proposed Rulemaking to do this. However, with respect to additional restrictions that may be appropriate for section 203 applicants, such as ring-fencing restrictions, the Commission does not believe it is necessary or appropriate to mandate generic one-size-fits-all protections for all section 203 applicants. Rather, the Commission will examine the facts and circumstances of each transaction and determine on a case-by-case basis whether additional protections against inappropriate cross-subsidization or encumbrances of utility assets are necessary. As noted above, part of our approach will involve review of whether state commissions have authority to impose cross-subsidy protections or have in place such protections. The Commission, as a general matter, intends to defer to state-adopted protections unless they can be shown to be inadequate to protect wholesale customers. This deference is appropriate because retail customers typically represent the vast majority of load served by a franchised public utility, and ring-fencing measures typically affect the entire corporation, thereby protecting both retail and wholesale customers. If it can be shown, however, that these measures are inadequate to protect wholesale customers in a given case, the Commission may adopt supplemental protections as appropriate. Finally, we emphasize that, consistent with section 203 and the Commission's regulations, all section 203 applicants must demonstrate that a proposed transaction will not result in inappropriate cross-subsidization of non-utility associate companies or the inappropriate pledge or encumbrance of utility assets for the benefit of an associate company, either through meeting one of the safe harbor demonstrations, proposing its own ring-fencing or other protections to prevent cross-subsidization, or demonstrating that there are no potential cross-subsidy issues associated with the proposed transaction.

24. With respect to guidance to applicants that do not make the ''safe harbor'' demonstration or do not demonstrate that cross-subsidy issues are not present, one way to make the demonstration required by Exhibit M would be to propose ring-fencing measures. For example, a ring-fencing structure related to internal corporate financings, *i.e.,* money pool or cash management transactions, could include some or all of the following elements depending on the circumstances: (1) The holding company participates in the money pool as a lender only and it does not borrow from the subsidiaries with captive customers; (2) where the holding company system includes more than one public utility, the money pool for subsidiaries with captive customers is separate from the money pool for all other subsidiaries; (3) all money pool transactions are short-term (one year or less), and payable on demand to the public utility; (4) the interest rate formula is set according to a known index and recognizes that internal and external funds may be loaned into the money pool; (5) loan transactions are made pro rata from those offering funds on the date of the transactions; (6) the formula for distributing interest income realized from the money pool to money pool members is publicly disclosed; and (7) the money pool administrator is required to maintain records of daily money pool transactions for examination by the Commission by transaction date, lender, borrower, amount, and interest rate(s).[21] We clarify that the forms of ring-fencing protections listed herein are simply examples of protections that the Commission would consider in evaluating proposed ring-fencing measures. Appropriate ring-fencing measures will depend on the facts presented and the specifics of an applicant's corporate structure and must be evaluated on a case-by-case basis. Further, as noted earlier, to the extent a state commission imposes specific ring-fencing measures, the Commission will defer to those measures absent evidence

[20] *See, e.g.,* Comments of Clifford M. Naeve, December 7 Technical Conference, Tr. 91–92; Comments of Joseph G. Sauvage, December 7 Technical Conference, Tr. 56–58.

[21] These ring-fencing measures are among those requirements typically approved by the Securities and Exchange Commission (SEC) and/or adopted by state commissions.

that additional measures are needed to protect wholesale customers.

25. The Commission also notes that if it approves a transaction under section 203 (with or without ring-fencing measures), the Commission retains authority under section 203(b) to later impose additional cross-subsidy protections or modify any previously approved measures. Further, irrespective of any link to the section 203 transaction, the Commission retains ongoing authority under section 206 of the FPA [22] to modify rates, contracts and practices that may result in inappropriate cross-subsidization or encumbrances of utility assets (and, if appropriate, to require new practices).

3. Future Case-Specific Informational Filings

26. Given that the Commission often issues its order in a section 203 proceeding before the state proceedings are completed, the Commission may grant authorization under section 203 before the relevant state commission issues an order specifying any state-required cross-subsidy or ring fencing protections. In such circumstances, as appropriate, the Commission in the context of individual section 203 authorizations will require applicants to file with the Commission a copy of any subsequent state orders. Such copy would be filed in the Commission's section 203 proceeding docket as an informational filing, and the applicant would also provide copies to the intervenors in the Commission's section 203 proceedings.

B. Blanket Authorizations Under Sections 203(a)(1) and 203(a)(2) and Clarifications Regarding Jurisdictional Transactions

27. Through the Order No. 669 rulemaking proceeding, the Commission granted certain blanket authorizations on a generic basis under section 203.[23] Participants at the December 7 Technical Conference addressed whether additional blanket authorizations were warranted. Specifically, commenters discussed under what circumstances the Commission should grant a blanket authorization under section 203(a)(1) (which applies to public utilities' dispositions of jurisdictional facilities) to parallel the Order No. 669 blanket authorizations under section 203(a)(2) (which, among other things, applies to holding companies' acquisitions of securities of public utilities with jurisdictional facilities). The section 203 blanket authorizations under Order No. 669 allow a holding company to acquire the voting securities of a transmitting utility, an electric utility company, or a holding company in a holding company system that includes a transmitting utility or an electric utility company, if, after the acquisition, the holding company will own less than 10 percent of the outstanding voting securities. What most commenters seek is a parallel blanket authorization under section 203(a)(1) for the public utilities in such transactions to ''dispose'' of their facilities to the holding company, *i.e.,* a blanket authorization for transactions that (1) involve or permit transfers (dispositions) of up to 10 percent of a public utility's voting stock, or (2) involve a transfer of up to 10 percent of the voting stock of a holding company that directly or indirectly owns or controls a public utility. Alternatively, they seek clarification that certain transactions are not jurisdictional.

28. Several commenters supported modification of the rules to grant such a parallel blanket authorization under 203(a)(1). In addition, Mirant Corporation (Mirant) argued that section 203(a)(1) should not apply at all to stock transactions in the secondary market involving the corporate parent. Mirant maintained that if the Commission continues to apply section 203(a)(1) to equity transfers of upstream ownership interests in public utilities that result in either a direct or indirect change in control over the underlying public utility, there would be a substantial and unnecessary overlap between sections 203(a)(1) and 203(a)(2). The Goldman Sachs Group, Inc. (Goldman) added that financial investors need certainty on whether particular transactions in the secondary market would require prior Commission approval under section 203(a)(1). Goldman also argued for a blanket authorization under section 203(a)(2) for the acquisition of voting securities by firms acting in a fiduciary capacity.

29. Edison Electric Institute (EEI) argued for a blanket authorization for internal corporate reorganizations under both sections 203(a)(1) and 203(a)(2) for transfer of assets from one non-traditional utility subsidiary, such as an exempt wholesale generator, to another non-traditional utility subsidiary.

30. The Financial Institutions Energy Group (FIEG) [24] requested that the Commission clarify that transactions that do not affect control do not, in fact, require approval under section 203(a)(1). Alternatively, FIEG argued that there are several types of transactions under which no change of control is involved and, therefore, the Commission should provide blanket authorizations under both section 203(a)(1) and section 203(a)(2). FIEG asserted that such transactions include: (1) Acquisitions of voting securities that would give the acquiring entity less than 10 percent ownership of outstanding voting securities; (2) acquisitions of up to 20 percent of the voting interests in a public utility where the acquirer is eligible to file with the SEC a Schedule 13G demonstrating no intent to exercise control over the entity whose securities are being acquired; (3) acquisitions involving securities held for lending, hedging, underwriting and/or fiduciary purposes. FIEG also argued that a blanket authorization should be granted for transactions in which a public utility or a holding company is acquiring or assigning a jurisdictional contract where the acquirer does not have captive customers and the contract does not convey control over the operation of a generation or transmission facility.

31. In support of its requests for clarification and expanded blanket authorizations, FIEG states that shares and other interests in public utilities are bought, sold and traded on a regular basis and that an active market for a public utility's shares is important to its ability to raise capital. FIEG explains that if a passive or non-controlling investor must seek prior Commission approval for transactions, the trading process is slowed, resulting in a less efficient market for the company's shares. According to FIEG, such inefficiencies chill participation in the industry and reduce needed market liquidity.

32. Several commenters also urged the Commission to provide greater clarity on what constitutes a passive investment for which no Commission authorization is required under section 203(a)(1).

33. The Commission agrees that greater industry investment and market liquidity are important goals. However, blanket authorizations under section 203 cannot be granted lightly, particularly generic authorizations. Because it is an *ex ante* determination as to the appropriateness of a category

[22] 16 U.S.C. 824e.

[23] 18 CFR 33.1(c)

[24] Members of FIEG include: Bank of America, N.A, Barclays Bank PLC, Bear Energy LP, Citigroup Energy Inc., Credit Suisse Energy LLC (a subsidiary of Credit Suisse), Deutche Bank AG, J. Aron & Company (a subsidiary of The Goldman Sachs Group), JPMorgan Chase & Co., Lehman Brothers Commodity Services Inc. (a subsidiary of Lehman Brothers Holding Inc.), Merrill Lynch Commodities, Inc., Morgan Stanley Capital Group Inc., Société Générale, and UBS Energy LLC (a subsidiary of UBS AG).

of transactions under section 203 and a counterparty is not yet identified, a blanket authorization can be granted only when the Commission can be assured that the statutory standards will be met, including ensuring that the interests of captive customers are safeguarded and that public utility assets are protected under all circumstances. It is under this paradigm that we provide the following guidance with respect to the section 203 blanket authorizations.

34. First, we will grant in part and deny in part requests for blanket authorizations under section 203(a)(1) to parallel those previously granted under section 203(a)(2). The Commission recognizes that, in some circumstances, the lack of a blanket authorization under section 203(a)(1) can lessen the practical effectiveness of the blanket authorizations previously granted under section 203(a)(2). Accordingly, in a Notice of Proposed Rulemaking issued contemporaneous with this Policy Statement, the Commission is proposing a limited blanket authorization under section 203(a)(1) under which a public utility would be ''pre-authorized'' to dispose of less than 10 percent of its securities to a public utility holding company but only if, after the disposition, the holding company and any associate or affiliated company in aggregate will own less than 10 percent of that public utility.[25] The Commission believes that this narrow blanket authorization will provide appropriate relief to investors and at the same time ensure that utility assets and captive customers are protected.

35. The Commission will continue to consider broader requests for blanket authorizations under section 203(a)(1) on a *case-specific* basis,[26] taking into account all other authorizations that have been granted and whether those authorizations, in conjunction with a blanket authorization under section 203(a)(1), would raise concerns. While the Commission, as discussed above, has determined that additional generic blanket authorizations for public utilities' dispositions of jurisdictional assets are not warranted at this time (other than the blanket authorizations discussed in the accompanying NOPR), we expect that in many circumstances individual blanket authorizations can be granted. Such an individual, situation-specific, *ex ante* blanket authorization will provide some of the certainty that is sought by the industry and investors. At the same time, this approach will allow the Commission to assess specific circumstances, to place time limits on blanket authorizations if appropriate (subject to possible renewal), to monitor industry activity, and to adapt the use of blanket authorizations over time as we gain further experience with financial institution investments in particular. Further, we do not rule out the possibility that groups of similarly situated holding companies, such as financial institutions, can make joint filings seeking common blanket authorizations under section 203(a)(1) or section 203(a)(2); however, they would need to clearly demonstrate on the record that there would be no adverse impact on captive customers or the public interest if the authorizations were granted.

36. In response to requests that the Commission clarify that secondary market transactions involving public utilities do not require approval under section 203(a)(1)(A) (which provides that a public utility may not sell, lease ''or otherwise dispose'' of the whole of its jurisdictional facilities or any part hereof without prior Commission approval), we so clarify. Secondary market transactions, for purposes of this discussion, are purchases or sales of the securities of a public utility or its upstream holding company by a third-party investor. Thus, such transactions do not include the securities' initial issuance or reacquisition by the issuer. Thousands of shares of the stock of a public utility or public utility holding company may be traded on a daily basis by non-public utility third parties, particularly if the stock is widely held and publicly traded. As noted by Mirant, EEI and members of FIEG in their comments, neither a public utility holding company nor a public utility subsidiary of the holding company are themselves parties to these transactions and they cannot know in advance what trading will occur or whether direct or indirect ''control'' over the public utility is being acquired. It would be virtually impossible in such circumstances for the public utility or holding company to know what is occurring before the fact and we do not interpret section 203(a)(1)(A) to be triggered for these secondary trades. Accordingly, neither public utilities nor public utility holding companies have an obligation to seek approval of a ''disposition'' of public utility jurisdictional facilities for such trades.[27]

37. In addition, we clarify that transactions that do not transfer control of a public utility do not fall within the ''or otherwise dispose'' language of section 203(a)(1)(A) and thus do not require approval under section 203(a)(1)(A) (assuming there is no sale or lease of the facilities). As indicated in our discussion of what constitutes a disposition of control for purposes of the Commission's section 203 analysis,[28] while the Commission cannot make an *ex ante* determination regarding what is control for purposes of the Commission's section 203 analysis absent facts of a specific case, the Commission is setting forth herein certain guidelines regarding what has been deemed to be (or not to be) control. This clarification addresses many of the concerns raised by commenters regarding acquisitions involving securities held for lending, hedging, underwriting and/or fiduciary purposes. If such transactions do not result in a transfer of control and there is no sale or lease of the facilities taking place, then section 203(a)(1)(A) is not triggered. This should assist applicants in determining the need for prior authorization under section 203.

38. With respect to the request for a generic blanket authorization for internal corporate reorganizations under both sections 203(a)(1) and 203(a)(2) for the transfer of assets from one non-traditional utility subsidiary [29] to another non-traditional utility subsidiary, the Commission cannot be certain of the impact of such transactions on utility affiliates on a generic basis and, therefore, will not grant a blanket authorization at this time. The Commission will consider case-specific blanket authorizations (with appropriate reporting requirements) on a case-by-case basis.

39. The Commission also denies the request for a generic blanket authorization under section 203(a)(2) for non-bank fiduciaries subject to the jurisdiction of the SEC. The Commission finds that we need further experience in this area before granting a blanket authorization on a generic basis. However, the Commission is willing to consider such requests on a holding company-specific basis or from similarly situated holding companies, such as similarly situated financial institutions. Any such applications would need to demonstrate in sufficient

[25] Blanket Authorization NOPR, *supra* note 6.

[26] Order No. 669–A, FERC Stats. & Regs. ¶ 31,214 at P 103; Order No. 669–B, FERC Stats. & Regs. ¶ 31,225 at P 43.

[27] If the acquirer of securities in the secondary market is a public utility holding company, however, it may have an obligation to file for approval under section 203(a)(2). If the acquirer is another public utility, it may also have to file under section 203(a)(1)(C) (no public utility may purchase securities of another public utility if over $10 million in value).

[28] *See infra* section II.C.

[29] For example, power marketers, exempt wholesale generators, or qualifying facilities.

detail that applicants would not be able to control public utilities and that there would be no adverse impact on captive customers or the public interest if the authorizations were granted. As discussed above with respect to section 203(a)(1) authorizations, this type of approach would allow the Commission to assess specific circumstances, to place time limits on blanket authorizations if appropriate (subject to possible renewal), to monitor industry activity, and to adapt the use of blanket authorizations over time as we gain further experience.

40. Certain participants to the technical conferences argue that a blanket authorization under section 203(a)(1) should be granted for transactions in which a public utility or a holding company is acquiring or disposing of a jurisdictional contract where the acquirer does not have captive customers and the contract does not convey control over the operation of a generation or transmission facility. These commenters argue that because acquisition of these contracts cannot create competitive or rate concerns, the Commission should grant blanket authorization under section 203(a)(1) for such transactions. Because the specific request for blanket authorization may present concerns where the transferor has captive customers, we seek comment in the Blanket Authorization NOPR on whether a generic blanket authorization under section 203(a)(1) is warranted for the acquisition or disposition of a jurisdictional contract where neither the acquirer nor transferor has captive customers and the contract does not convey control over the operation of a generation or transmission facility.

41. We also decline to grant a generic blanket authorization under sections 203(a)(1) and 203(a)(2) for acquisitions of up to 20 percent of the voting interests in a public utility where the acquirer is eligible to file with the SEC a Schedule 13G, which demonstrates no intent to exercise control over the entity whose securities are being acquired. While the Commission may consider eligibility to file a Schedule 13G with the SEC as part of an indication that an entity will not be able to assert control over a public utility, the Commission will not accept Schedule 13G eligibility as a definitive statement regarding control. The Commission will consider Schedule 13G eligibility as one factor in the analysis of whether an entity can assert control over a public utility.[30]

[30] *See, e.g., Capital Research and Management Company,* 116 FERC ¶ 61,267 (2006).

C. Disposition of ''Control'' of Jurisdictional Facilities

42. Several commenters have asked the Commission to provide guidance on what constitutes a disposition of ''control'' of jurisdictional facilities under section 203. Most recently, this request is being pressed by the investment community, which seeks further clarification regarding the scope of the Commission's regulatory authority, and greater regulatory certainty as to when section 203 review is required.

43. We will provide guidance here, but emphasize that the determination of whether there is a disposition of control must be based on all circumstances. In other words, the decision must be made on a fact-specific basis. As discussed further below, while our case law under section 201 provides guidance on the factors that may result in control, no single factor or factors necessarily results in control. The electric industry remains a dynamic, developing industry, and no bright-line standard will encompass all relevant factors and possibilities that may occur now or in the future.[31]

44. We note that much of the Commission's precedent in this area was developed based on concerns that there could be a jurisdictional void if the Commission did not interpret broadly what constitutes a disposition of ''control'' of public utility facilities under FPA section 203. The Commission was particularly concerned about the creation of holding companies and holding company acquisitions that could result in an indirect change of control of the jurisdictional facilities of public utilities, without Commission review. In EPAct 2005, however, Congress has filled any jurisdictional void involving public utility holding companies by amending section 203 to specifically give the Commission authority over certain holding company acquisitions and mergers involving FPA public utilities. Thus, the Commission's pre-EPAct 2005 precedent should be read with this context in mind.

1. Precedent Discussing Dispositions of Control

45. Section 203 requires prior Commission approval if a public utility seeks to sell, lease, or otherwise dispose of jurisdictional facilities. As previously noted, the Commission has interpreted the ''or otherwise dispose'' language of section 203(a)(1) to include transfers of ''control'' of jurisdictional facilities. Additionally, prior Commission approval is required for any public utility that seeks to directly or indirectly merge or consolidate the whole of its jurisdictional facilities, or any part thereof, with the facilities of another person, ''by any means whatsoever.'' [32] As interpreted by the Commission, the requirement to obtain the Commission's approval under the ''merge or consolidate'' clause depends on whether the public utility's facilities are subject to the jurisdiction of the Commission and whether the transaction directly or indirectly would result in a change of ''control'' of the facilities.[33]

46. In *Enova Corporation*, the Commission explained that the purpose of section 203 is to provide a mechanism for maintaining oversight of the facilities of public utilities and to prevent transfers of control over those facilities that would harm consumers or that would inhibit the Commission's ability to secure the maintenance of adequate service and the coordination in the public interest of jurisdictional facilities.[34] The Commission determined that it cannot definitively identify every combination of entities or disposition of assets that may trigger jurisdiction under section 203, since it cannot anticipate every type of restructuring that might occur. The Commission stressed that its concern was with changes in control, including direct or indirect mergers that affect jurisdictional facilities. It said that it must be flexible in responding to industry restructuring if it is to discharge its statutory responsibility ''to secure the maintenance of adequate service and the coordination in the public interest of facilities subject to the jurisdiction of the Commission.'' [35]

47. Noting in *Enova* that the FPA did not provide definitions for the terms ''dispose'' or ''control,'' the Commission stated that those terms should not be read narrowly because to do so would result in a jurisdictional void in which certain types of corporate transactions could escape Commission oversight. While section 203 applies to changes or transfers in the proprietary interests of

[31] *Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, Order No. 697, 72 FR 39903 (July 20, 2007), FERC Stats. & Regs. ¶ 31,252, at P 174 (2007) (Market-Based Rate Final Rule).

[32] While the section 203(a)(1) requirements for obtaining Commission authorization do not use the word ''control'' in the statutory text, section 203(a)(4) provides that the Commission must approve a proposed ''disposition, consolidation, acquisition, or *change in control*'' (emphasis added) if the statutory criteria are met.

[35] *Id.* at 61,496.

a public utility,[36] not all transactions under section 203 involve a change in control of a public utility. If no change in control results from the transaction, it is not likely to adversely affect competition, rates or regulation, or result in cross-subsidization.

48. Our guidance concerning what constitutes a disposition of control of jurisdictional facilities for purposes of section 203 requires a discussion of what constitutes control of a public utility since a public utility is a person that owns or operates jurisdictional facilities. In *Enova*, the Commission cited the definition of control that has been in its accounting regulations since 1937. Under that definition, control means:

> the possession, directly or indirectly, of the power to direct or cause the direction of management and policies of a company, whether such power is exercised through one or more intermediary companies, or alone, or in conjunction with, or pursuant to an agreement, and whether such power is established through a majority or minority ownership or voting of securities, common directors, officers, or stockholders, voting trusts, holding trusts, associated companies, contract or any other direct or indirect means.[37]

49. The Commission has also discussed certain elements of control in cases concerning whether an entity is a public utility under section 201.[38] In those cases, the Commission linked ''decision-making'' and ''dominion and control'' in determining whether an entity is a ''public utility.'' The Commission also noted that the reference to ''operates [jurisdictional] facilities'' in the definition of public utility in section 201(e) of the FPA refers ''to the person who has control and decision-making authority concerning the operation of facilities.'' [39]

50. In a case in which the Commission disclaimed jurisdiction under section 201(e) over financial institutions that took title to facilities as part of a leveraged lease transaction, the Commission based its decision that the lessor/owner was not a public utility under section 201 on the following factors (which it found in a previous but analogous situation): (1) The financial institutions that held legal title were not operating the facilities; (2) none of the parties taking title to the facilities were in the business of producing or selling electric power; and (3) all had a principal business other than that of a public utility.[40] As part of its finding that the lessor/owner did not operate the facility, the Commission interpreted the word ''operates'' as referring to the person who has control and decision-making authority concerning the operation of the facility, *i.e.*, *not* a person who merely performs specific services that are ordered and directed by another party.

51. We note that ''control'' has been found even where that control is not absolute or unfettered. In a case involving a complex holding company corporate structure, the Commission deemed an investment adviser subsidiary to be a public utility because of its participation in wholesale transactions. The Commission found that the investment adviser had control over the wholesale contracts to be executed under the power marketer's market-based rate schedule because the combination of the following three factors translated into control: (1) The sole discretion to enter into contracts; (2) the exclusive ownership of the intellectual property on which contracts will be based; and (3) the intention that the investment adviser will recommend the contracts into which the power marketer subsidiary would enter.[41]

52. The Commission cited its decisions in *Bechtel* and *Shaw* as providing guidance on whether a nominal manager of a generating company actually exercised sufficient control to be deemed the operator and, hence, a public utility.[42] Based in part on those cases, in *Beck*, the Commission found that a manager was a controlling entity where he: (1) Effectively governed the physical operation of the jurisdictional facility; and (2) effectively served as the decision-maker in the sales of wholesale power. While the application in that case described a series of companies, at least five contracts (all of which either directly affected or were negotiated by the manager), and a trustee in addition to the manager, the Commission concluded that the manager was the controlling entity because he had the substantive decision-making authority regarding the jurisdictional assets, the market-based rate tariff and a full requirements purchase agreement. The Commission made this finding even though some of the manager's actions were subject to the approval of the trustee in certain circumstances, *e.g.*, if the transaction exceeded $1 million in value.

53. More recently, in the Market-Based Rate Final Rule, in providing guidance on what contractual arrangements convey control over a public utility, we explained that we will consider the totality of circumstances and attach the presumption of control when an entity can affect the ability of capacity to reach the market. We further explained that our guiding principle is that an entity controls the facilities of another when it controls the decision-making over sales of electric energy, including discretion as to how and when power generated by these facilities will be sold.[43]

54. Investments in public utilities that do not convey control may in some cases be considered to be passive investments not subject to section 203(a)(1)(A) (unless there is a sale or lease of the facilities). The Commission has found an investment to be passive if, among other things, (1) the acquired interest does not give the acquiring entity authority to manage, direct or control the day-to-day wholesale power sales activities, or the transmission in interstate commerce activities, of the jurisdictional entity;[44] and (2) the acquired interest gives the acquiring entity only limited rights (*e.g.*, veto and/or consent rights necessary to protect its economic investment interests, where those rights will not affect the ability of the jurisdictional public utility to conduct jurisdictional activities);[45] and (3) the acquiring entity has a principal

business other than that of producing, selling, or transmitting electric power.[46]

55. We emphasize that the circumstances that convey control in section 203 analysis vary depending on a variety of factors, including the transaction structure, the nature of voting rights and/or contractual rights and obligations conveyed in the transaction. For example, in *PDI Stoneman,* the Commission considered the acquisition of facilities through three transactions, over approximately seven years, in which the applicant's resulting ownership shares at issue at the end of each of the three transactions went from one-third to two-thirds to 100 percent of the voting stock. The applicant claimed that control never vested until the third transaction because of a ''supermajority'' provision in the operating agreement that required approval by 80 percent of the voting stock for a range of decisions, including the sale of electricity from the plant. The Commission focused on the market-based rate schedule and concluded that the first transaction may have transferred control over that jurisdictional asset because, even with one-third of the voting stock, the applicant had the authority to influence all significant decisions, including the sale of power from the plant. Further, the Commission ruled that the material change in the proportion of interests after the second transaction resulted in a change of control.[47]

56. While the purpose of the above discussion is to provide guidance on what, based on past precedent, constitutes a change of control for purposes of section 203, the burden remains upon the entities involved in a proposed transaction to decide whether they need to obtain Commission authorization under section 203 to undertake a proposed transaction.

2. General Guideline Regarding What Is Not a Transfer of Control

57. Based on the industry's need for further guidance on what may or may not constitute a transfer of control of jurisdictional facilities under section 203, and for greater regulatory certainty in undertaking utility investments, the Commission's general policy in future cases will be to presume that a transfer of less than 10 percent of a public utility's holdings is not a transfer of control if: (1) After the transaction, the acquirer and its affiliates and associate companies, directly or indirectly, in aggregate will own less than 10 percent of such public utility; and (2) the facts and circumstances do not indicate that such companies would be able to directly or indirectly exercise a controlling influence over the management or policies of the public utility. The Commission will apply this policy on a case-by-case basis. Further, if holding companies or other acquirers believe that facts and circumstances prevent them from exercising control even if they own 10 percent or more of a public utility, they may seek to make such a demonstration to the Commission.

58. This 10 percent threshold is consistent with the definition of ''holding company'' under section 1262(8)(A) of PUHCA 2005 (at which point a company may be in control of a subsidiary public utility). It is also consistent with the blanket authorization granted under section 203(a)(2) in the Order No. 669 rulemaking proceeding, under which holding companies are pre-authorized to acquire up to 9.99 percent of voting securities of a public utility, as well as the proposed section 203(a)(1) blanket authorization in the contemporaneous Notice of Proposed Rulemaking.[48]

Further, the Commission has employed a rebuttable presumption in the context of its Standards of Conduct for Transmission Providers that ownership of 10 percent or more of voting interests creates a rebuttable presumption of control.[49]

D. The Commission's Appendix A Analysis

1. Appendix A Policy and Case History

59. The 1996 Merger Policy Statement uses an analytical screen (Appendix A analysis) to allow early identification of transactions that clearly do not raise competitive concerns.[50] As discussed below, the Commission does not believe modifications to its Appendix A analysis are warranted at this time. However, the Commission will provide certain clarifications in light of the concerns raised by commenters in the Order No. 669 rulemaking proceeding and the March 8 Technical Conference.

60. In horizontal mergers, if an applicant fails the Competitive Analysis Screen (one piece of the Appendix A analysis), the Commission's analysis focuses on the merger's effect on the merged firm's ability and incentive to withhold output in order to drive up the market price. The ability to withhold output depends on the amount of marginal capacity controlled by the merged firm, and the incentive to do so depends on the amount of infra-marginal capacity that could benefit from higher prices. For example, in a horizontal merger combining a company with significant baseload capacity with a company owning capacity on the margin under many season/load conditions, the theory of competitive harm would be that the combination of the ''ability'' assets with one company's existing ''incentive'' assets would increase the likelihood of the company exercising market power. Proper mitigation would address the harm to competition by reducing the merged firm's ''ability'' assets or its ''incentive'' assets through divestiture or some other method. In *Commonwealth Edison Company,* we discussed both the ability and the incentive of the merged firm to

[46] *See Metropolitan Life Insurance Company,* 113 FERC ¶ 61,300, at P 6 (2005).

[47] *PDI Stoneman,* 104 FERC ¶ 61,270 at P 15–17.

[48] Blanket Authorization NOPR, *supra* note 6. In *The Goldman Sachs Group, Inc.,* 114 FERC ¶ 61,118 (*Goldman*), *order on reh'g,* 115 FERC ¶ 61,303 (2006), the Commission held that, under section 203(a)(2), subsidiaries that are not themselves holding companies are not required to seek authorization from the Commission to purchase, acquire, or take ''covered'' securities. Covered securities relate to (1) acquisitions of securities worth more than $10 million, and (2) acquisitions of securities of a transmitting utility, an electric company, or a holding company in a holding company system that includes a transmitting utility, or an electric utility company. The Commission also held that subsidiaries' securities acquisitions are not attributable to the upstream holding company. Thus, the upstream holding company also is not required to seek section 203(a)(2) authorization for its subsidiaries' acquisitions. This does not mean that authorization may not be required under other provisions of section 203. For example, if a non-utility subsidiary acquires securities of a public utility, that public utility must obtain section 203(a)(1)(A) authorization if the transaction results in a transfer of control of facilities valued at more than $10 million. Further, if each of a number of non-utility subsidiaries acquires, for example, up to 9.99 percent of the same public utility (in order to avoid becoming a holding company and/or avoid a transfer of control to a single one of the subsidiaries), it is possible that the public utility disposition of securities to several companies under common control could, taken as a whole, result in a transfer of control. Finally, irrespective of the dollar amount of the transaction, an indirect merger or consolidation could occur and require approval under section 203(a)(1)(B). *Goldman,* 114 FERC ¶ 61,118 at P 13–15. Thus, while the Commission's policy as a general matter will be to presume that a transfer of control is not likely where ownership in a public utility is less than 10 percent, the burden is on the entities to file under section 203 if this threshold is met. The Commission will continue to review the facts and circumstances of transactions on a case-by-case basis.

[49] 18 CFR 358.3(c).

[50] As part of the screen analysis, applicants must define the relevant products sold by the merging entities, identify the customers and potential suppliers in the geographic markets that are likely to be affected by the proposed transaction, and measure the concentration in those markets. Using the Delivered Price Test to identify alternative competing suppliers, the concentration of potential suppliers included in the defined market is then measured by the Herfindahl-Hirschman Index (HHI) and used as a screen to determine which transactions clearly do not raise market power concerns. 1996 Merger Policy Statement, FERC Stats. & Regs. ¶ 31,044 at 30,119–20.

withhold output. We found that despite screen failures, the merger would not harm competition in the relevant wholesale markets and therefore did not require any mitigation:

> An examination of market supply conditions shows three reasons why a profitable withholding strategy by ComEd would be unlikely: (a) For most hours during the year, the supply curve is relatively flat, so withholding capacity would not significantly raise the market price; (b) for those hours during which it could successfully raise the market price, ComEd would have to forgo sales from its low-cost nuclear capacity; and (c) ComEd's only generation is nuclear which is difficult to ramp down or up so as to withhold output during the most profitable time periods.[51]

61. The Commission also examines the possibility of competitive harm in vertical mergers. In the first stage of the analysis, the Commission requires applicants to calculate the post-merger concentration in both the upstream and downstream markets to determine whether the upstream and downstream markets are highly concentrated, because highly concentrated upstream and downstream markets are necessary, but not sufficient, conditions for a vertical foreclosure strategy to be effective. If both of those necessary conditions are present, then the second stage of the analysis focuses on whether the merger creates or enhances the ability or incentive of the merged firm to exercise vertical market power through vertical foreclosure or raising rivals' costs.[52]

62. For example, in *AEP/CSW,* the Commission found—without relying solely on changes in HHI statistics—that the merger of two vertically integrated utilities with both transmission and generation assets would harm competition by enhancing the ability and incentive for the merged firm to use control of its transmission assets to frustrate competitors' access to relevant markets. The Commission therefore required that AEP turn over control of its transmission facilities to a Commission-approved Regional Transmission Operator and, in the interim, be subject to market monitoring by an independent entity and have an independent entity calculate and post the available transfer capacity on AEP's transmission system.[53]

63. We will continue to analyze mergers (both horizontal and vertical) and other section 203 applications by focusing on a transaction's effect on the company's ability and incentive to exercise market power, and thus harm competition. We expect applicants and intervenors to frame their arguments in this manner.

2. Issues Raised at the March 8 Technical Conference

a. The Role of HHIs in the Appendix A Analysis

64. Some commenters argued that the Commission was overly focused on the HHI statistic, which measures concentration, and asked that the Commission look at competitive effects of section 203 transactions that are not apparent from the assessment of concentration.[54]

65. In fact, as noted above, the Commission does look beyond the change in HHI in its analysis of the effect on competition in both horizontal and vertical mergers. The change in HHI serves as a screen to identify those transactions that could potentially harm competition. If the screen is failed, then, as discussed in paragraph 59 above, the Commission examines the factors that could affect competition in the relevant market. Specifically, in these circumstances the Commission typically considers a case-specific theory of competitive harm, which includes, but is not limited to, an analysis of the merged firm's ability and incentive to withhold output in order to drive up prices. Again, and as noted above, the Commission has discussed its consideration of such factors in cases such as *Commonwealth Edison Company.* Further, the Filing Requirements Rule requires applicants failing the screen to address market conditions beyond the change in HHI:

> The facts of each case (*e.g.*, market conditions, such as demand and supply elasticity, ease of entry and market rules, as well as technical conditions, such as the types of generation involved) determine whether the merger would harm competition. When there is a screen failure, applicants must provide evidence of relevant market conditions that indicate a lack of a competitive problem or they should propose mitigation.[55]

Moreover, even where an applicant passes the HHI screen, the Commission also considers intervenor theories of competitive harm.

b. Commission-Developed Computer Simulation Model

66. Some commenters stated that the Commission should develop and internally run its own computer simulation model, similar to what is done by the U.S. Department of Justice (DOJ) and the Federal Trade Commission (FTC). Dr. Frankena asserted that using a computer simulation model would be more reliable than our alleged practice of relying exclusively on applicants to perform the current Appendix A analysis. Mr. Hegedus advocated the use of regional models in concert with the process the Commission proposed in the market-based rate rulemaking proceeding and other proceedings involving market power issues. Dr. Moss suggested using an in-house model in a more limited way, as a consistency check on submissions rather than as a formal evaluative tool. Dr. Neifer stated that models are among the many types of evidence the DOJ considers in evaluating a merger. For example, the DOJ uses simple models that evaluate the costs and benefits of the merger as well as more complex ones that model a firm's decision to operate a generating unit in the markets at issue.

67. Other commenters argued that the costs for the Commission to develop and run its own computer simulation model would exceed any related benefits. Mr. Baliff argued that it would be difficult to use any model unless it were generally accepted, well known, and accessible to all so that applicants could know whether their proposed transactions passed muster. In addition, different models focus on different decisions—bidding decisions, supply decisions, pricing decisions—and some or all of these may be relevant. Mr. Hegedus argued that the Commission should develop regional models to analyze mergers based on the information available from its analyses of market-based rate authorizations and through its Office of Enforcement.

68. We will not develop and run our own computer simulation model in lieu of or in addition to the Delivered Price Test model that we already require applicants to perform as part of the Competitive Analysis Screen. While advocates of computer simulation models believe that such models would more accurately analyze the effect on competition, and some believe they will allow better coordination with other Commission programs involving market

[55] Filing Requirements Rule, FERC Stats. & Regs. ¶ 31, 111 at 31, 897.

power issues, these advocates have not demonstrated how the Commission's use of an internal model would have altered any Commission determinations on previous section 203 applications. While the benefits of a Commission-internal computer simulation model have not been well-defined or quantified, we believe that the costs of such a modeling requirement in time and resources to applicants, intervenors, and Commission staff would be likely to exceed any benefits.

69. It also should be emphasized that those who advocate use of an internal modeling overlook important differences between Commission proceedings under section 203 and the processes used by the DOJ and the FTC to review mergers and acquisitions. The Commission's process of reviewing mergers and acquisitions under section 203 is a public one. An application is filed publicly, all interested parties have the ability to comment, and the Commission decides the case based on the public record. Our Appendix A analysis facilitates this public process by requiring the submission of a transparent market power study, using standardized assumptions and criteria, that is available for review and comment by all interested parties, including state commissions and customers, and, importantly, can be replicated by them in the limited time period available for public comment. Similarly, when mitigation measures are necessary in Commission proceedings, they are based on the public record and available for comment by all interested parties.

70. By contrast, the DOJ and the FTC use largely informal and non-public processes for reviewing transactions subject to their jurisdiction. Their meetings with applicants are not noticed to the public and are less formal in nature. This provides the DOJ and the FTC greater flexibility to use, among other things, internal modeling tools that may not be easily replicated or other methodological approaches that are stylized to an individual case. In DOJ and FTC proceedings, staff and applicants can engage in extensive informal communications to discuss and address data, methodological and other disputes that are associated with these more stylized approaches. Similarly, when mitigation is required, staff and applicants can design such mitigation measures in a non-public manner. In sum, these more informal processes, while entirely appropriate in the context of DOJ and FTC review of mergers and transactions, simply cannot be replicated by the Commission given the due process and other considerations relevant in proceedings under section 203 of the FPA.

71. We also note that some commenters urging the Commission to develop and run its own internal computer simulation model are mistakenly assuming that the current process is flawed because applicants can file merger impact studies using their own methodologies and assumptions. On the contrary, in the 1996 Merger Policy Statement, in the Filing Requirements Rule and in many subsequent orders interpreting those issuances, the Commission has carefully set forth the requirements of how the Commission's adopted study methodology, the Delivered Price Test, must be performed and what assumptions the Commission will accept as reasonable. If applicants fail to perform the studies according to the Commission's prescribed methodology, or their studies are based on faulty assumptions or use questionable data inputs, then those studies are required to be amended or supplemented with additional data.[56] In some cases the Commission has required that new studies be conducted which conform to the Commission's standards. Thus, contrary to the view of some commenters, neither the Commission nor intervenors are disadvantaged by our current policy of requiring applicants to perform the merger impact studies, nor is the Commission subject to manipulation by applicants who can allegedly game the studies to their own benefit. Studies which do not conform to the Commission's explicit requirements are either rejected or required to be revised until they do conform, and intervenors have opportunity in every merger proceeding to inform the Commission if they believe that something in the applicant's study is amiss.

72. Specifically, merger applicants must submit the model and all of the data inputs necessary for completing the Competitive Analysis Screen in any section 203 Application requiring a complete Appendix A analysis.[57] In those cases, Commission staff reviews the data supplied and runs the applicants' models to check the accuracy of the results and the sensitivity of the results to changes in the underlying assumptions. In addition, the models and input data are available to intervenors in the proceeding, who can also verify the accuracy of the results and perform sensitivity tests.

73. A complete Competitive Screen Analysis submission provides sufficient information to identify those transactions that may harm competition. The data submitted includes a valuable intermediate calculation: A supply curve of all the generators that can possibly serve the area, and whether those generators are dispatched given transmission constraints. Finding the supply curve requires an estimate of suppliers' generation costs, including fuel costs, operation and maintenance costs, heat rates, and emissions costs; competitive market prices; transmission prices; and transmission import constraints.[58] Whether the Commission grants the merger application with or without conditions, rejects it, or sets it for hearing, the Commission can determine whether the application presents any competitive issues because the current Competitive Analysis Screen is sufficiently precise to make such a determination.

74. In summary, there has been no showing that a Commission-internal computer simulation model is needed, both in light of these burdens as well as because the study that the Commission already requires applicants to perform is adequate to measure the potential for competitive harm associated with section 203 dispositions. And, as noted above, the Commission is diligent in ensuring that applicants conduct the Competitive Analysis Screen properly, including using reasonable assumptions and data inputs.

c. Adding Hart-Scott-Rodino Information to the Section 203 Record

75. Some commenters suggested that the Commission require applicants to file all materials submitted to the DOJ and the FTC in their Hart-Scott-Rodino (HSR) filings. Other commenters noted that such a filing would create confidentiality concerns due to the public nature of the Commission's section 203 proceedings. We also share those concerns. Unlike the DOJ and the FTC, who can keep any of the information confidential, our proceedings require a public record, and our decisions must be based on evidence that is available to the parties

[56] For example, in *Entergy Gulf States, Inc.,* Commission Staff was unable to verify the results of applicants' model performing the Competitive Analysis Screen, and sent the applicants a deficiency letter identifying the error in the input data and requiring the applicants to submit the corrected data. *Entergy Gulf States, Inc.,* Docket No. EC07–70–000, at 1 (Apr. 6, 2007) (unpublished deficiency letter).

[57] In cases involving a *de minimis* amount of generation being combined in the relevant geographic market, applicants are not required to perform a complete Appendix A analysis.

[58] *See* 1996 Merger Policy Statement, FERC Stats. & Regs. ¶ 31,044 at 30,130–33 (discussion of the delivered price test).

of record in the proceeding. We permit applicants to request confidentiality for certain documents and file a protective order to allow intervenors to view those documents. However, we cannot maintain the same degree of confidentiality as do the DOJ and the FTC.[59] The HSR filings often contain highly sensitive proprietary documents such as the companies' price forecasts, pricing analyses, and pricing decisions.[60] Access to such valuable commercial information could not only harm the merging companies, it could also harm competition in wholesale electricity markets by facilitating coordination by competitors, who would have a better understanding of each other's pricing strategies and competitive objectives.

d. Alternatives to Trial-Type Hearings

76. Some commenters suggested that the Commission use alternatives to trial-type evidentiary hearing procedures, including technical conferences and paper hearings with limited periods of discovery and additional data requests.

77. Given the statutory deadlines faced by the Commission on section 203 applications,[61] we believe that holding an evidentiary hearing generally will not be feasible, depending on the issues in dispute. Therefore, in cases that present complicated factual disputes, we will consider alternatives such as paper hearings with a limited period of discovery, so that we can develop a complete record.

e. Attribution of Generation Under Contract

78. Some commenters also requested clarification on how generation under contract should be attributed in the analysis of market concentration. Specifically, they asked whether the generation should be attributed to the party with operational control of the generation facility or to the party with the economic interest in the capacity.

79. The determination on whether a long-term generation contract should be attributed to the purchaser of power or the seller depends on the party with operational control, which depends upon the specific contract. Therefore, we have required that applicants file information about whether their long-term generation contracts confer operational control over generation resources to the purchaser. Our practice has been to attribute contracted capacity to the purchaser if such a contract confers operational control over the generation to the purchaser.[62] We will continue this practice, and require applicants to file purchase and sales data, including information on whether the terms and conditions of purchase contracts confer operational control over generation to the purchaser. However, if an applicant fails the Competitive Analysis Screen, we will consider arguments regarding the ability and incentive of the merged firm to exercise market power, and therefore consider the merged firm's contractual positions as well as its physical control of generation.

III. Information Collection Statement

80. The Office of Management and Budget's (OMB) regulations require that OMB approve certain information collection and data retention requirements imposed by agency rules.[63] In this supplemental policy statement, the Commission is providing guidance regarding future implementation of FPA section 203. The Commission is not imposing any additional information collection requirement upon the public. The Commission is not proposing any changes to its current regulations. Accordingly, there should be no impact on the current reporting burden associated with an individual section 203 application. The Commission also does not expect the total number of section 203 applications to be affected by this Supplemental Policy Statement. However, the Commission will submit for informational purposes only a copy of this Supplemental Policy Statement to OMB.

Burden Estimate: The Public Reporting and records retention burden for section 203 applications is as follows.

Title: FERC–519, ''Application Under the Federal Power Act, Section 203''.

Action: Revised Collection.

OMB Control No.: 1902–0082.

The applicant will not be penalized for failure to respond to this information collection unless the information collection displays a valid OMB control number or the Commission has provided justification as to why the control number should not be displayed.

Respondents: Businesses or other for profit.

Frequency of Responses: N/A.

Necessity of the Information: This Supplemental Policy Statement provides guidance regarding future implementation of FPA section 203. The Commission is not proposing any changes to its current regulations.

Internal Review: The Commission has conducted an internal review of the public reporting burden associated with the collection of information and assured itself, by means of internal review, that there is specific, objective support for its existing information burden estimate.

81. Interested persons may obtain information on the reporting requirements by contacting: Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC, 20426 [Attention: Michael Miller, Office of the Executive Director, Phone (202) 502–8415, fax (202) 273–0873, e-mail: *michael.miller@ferc.gov*]. Comments on the requirements of the Supplemental Policy Statement may also be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 [Attention: Desk Officer for the Federal Energy Regulatory Commission, fax (202) 395–7285, e-mail *oira_submission@omb.eop.gov*].

IV. Environmental Analysis

82. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.[64] The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment.[65] The Supplemental Policy Statement is categorically excluded as it addresses actions under section 203.[66] Accordingly, no environmental assessment is necessary and none has been prepared in this Supplemental Policy Statement.

[59] As Mark J. Niefer noted, ''the [Antitrust] Division [of the DOJ] is precluded from sharing much of the information it gathers to analyze a merger'' and ''[e]xcept in very limited circumstances, information provided to the Division * * * may not be disclosed to others without the consent of the producing party.'' Comments of Mark J. Niefer, March 8 Technical Conference, Tr. 106–07.

[66] *See* 18 CFR 380.4(a)(16).

V. Regulatory Flexibility Act Certification

83. The Regulatory Flexibility Act of 1980 (RFA)[67] requires agencies to prepare certain statements, descriptions and analyses of proposed rules that will have a significant economic impact on a substantial number of small entities.[68] However, the RFA does not define ''significant'' or ''substantial.'' Instead, the RFA leaves it up to an agency to determine the effect of its regulations on small entities.

84. Most filing companies regulated by the Commission do not fall within the RFA's definition of small entity.[69] Further, as noted above, the Supplemental Policy Statement does not propose any changes to the Commission's current regulations under section 203; therefore there is no change in how the Commission's regulations under section 203 affect small entities. Therefore, the Commission certifies that the Supplemental Policy Statement will not have a significant economic impact on a substantial number of small entities. As a result, no regulatory flexibility analysis is required.

VI. Document Availability

85. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through the Commission's Home Page (*http://www.ferc.gov*) and in the Commission's Public Reference Room during normal business hours (8:30 a.m. to 5 p.m. Eastern time) at 888 First Street, NE., Room 2A, Washington DC 20426.

86. From the Commission's Home Page on the Internet, this information is available in the Commission's document management system, eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number (excluding the last three digits of the docket number), in the docket number field.

87. User assistance is available for eLibrary and the Commission's website during normal business hours. For assistance, please contact FERC Online Support at (202) 502–6652 (toll-free at 1–866–208–3676) or e-mail at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. E-mail the Public Reference Room at *public.referenceroom@ferc.gov.*

VII. Effective Date and Congressional Notification

88. This Supplemental Policy Statement is effective July 20, 2007. The Commission has determined that, consistent with the discussion above with regard to information collection and the RFA, this policy statement also is not a ''major rule'' as defined in section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996. The Commission will submit this Supplemental Policy Statement to both houses of Congress and to the General Accounting Office.

[68] The RFA definition of ''small entity'' refers to the definition provided in the Small Business Act, which defines a ''small business concern'' as a business that is independently owned and operated and that is not dominant in its field of operation. 15 U.S.C. 632. The Small Business Size Standards component of the North American Industry Classification System defines a small electric utility as one that, including its affiliates, is primarily engaged in the generation, transmission, and/or distribution of electric energy for sale and whose total electric output for the preceding fiscal year did not exceed 4 million MWh. 13 CFR 121.201.

[69] 5 U.S.C. 601(3), citing to section 3 of the Small Business Act, 15 U.S.C. 632. Section 3 of the Small Business Act defines a ''small-business concern'' as a business which is independently owned and operated and which is not dominant in its field of operation.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 522

Implantation or Injectable Dosage Form New Animal Drugs; Oxytetracycline Hydrochloride Injection

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of an abbreviated new animal drug application (ANADA) filed by Norbrook Laboratories, Ltd. The ANADA provides for use of an oxytetracycline hydrochloride injectable solution in beef cattle, beef calves, nonlactating dairy cattle, and dairy calves for the treatment of various bacterial diseases.

DATES: This rule is effective August 2, 2007.

FOR FURTHER INFORMATION CONTACT: John K. Harshman, Center for Veterinary Medicine (HFV–104), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0169, e-mail: *john.harshman@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: Norbrook Laboratories, Ltd., Station Works, Newry BT35 6JP, Northern Ireland, filed ANADA 200–452 that provides for use of OXYTET 10 (oxytetracycline hydrochloride) Injection in beef cattle, beef calves, nonlactating dairy cattle, and dairy calves for the treatment of various bacterial diseases. Norbrook Laboratories, Ltd.'s OXYTET 10 Injection is approved as a generic copy of Boehringer Ingelheim Vetmedica, Inc.'s, MEDAMYCIN Injectable approved under NADA 108–963. The ANADA is approved as of June 27, 2007, and the regulations are amended in 21 CFR 522.1662a to reflect the approval.

In accordance with the freedom of information provisions of 21 CFR part 20 and 21 CFR 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

FDA has determined under 21 CFR 25.33(a)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of ''rule'' in 5 U.S.C. 804(3)(A) because it is a rule of ''particular applicability.'' Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 524

Ophthalmic and Topical Dosage Form New Animal Drugs; Emodepside and Praziquantel

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Bayer HealthCare LLC. The NADA provides for veterinary prescription use of an emodepside and praziquantel topical solution on cats for the treatment and control of infections by several internal parasites.

DATES: This rule is effective August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Melanie R. Berson, Center for Veterinary Medicine (HFV–110), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855; 301–827–7540; e-mail: *melanie.berson@fda.hhs.gov*.

SUPPLEMENTARY INFORMATION: Bayer HealthCare LLC, Animal Health Division, P.O. Box 390, Shawnee Mission, KS 66201, filed NADA 141–275 that provides for veterinary prescription use of PROFENDER (emodepside and praziquantel) Topical Solution for the treatment and control of infections by several internal parasites of cats. The NADA is approved as of June 29, 2007, and the regulations are amended in 21 CFR part 524 by adding § 524.775 to reflect the approval.

In accordance with the freedom of information provisions of 21 CFR part 20 and 21 CFR 514.11(e)(2)(ii), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday.

Under section 512(c)(2)(F)(ii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(ii)), this approval qualifies for 3 years of marketing exclusivity beginning on the date of the approval.

The agency has determined under 21 CFR 25.33(d)(1) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This rule does not meet the definition of ''rule'' in 5 U.S.C. 804(3)(A) because it is a rule of ''particular applicability.'' Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808.

List of Subjects in 21 CFR Part 524

Animal drugs.

■ Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, 21 CFR part 524 is amended as follows:

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS

■ 1. The authority citation for 21 CFR part 524 continues to read as follows:

Authority: 21 U.S.C. 360b.

■ 2. Add § 524.775 to read as follows:

§ 524.775 Emodepside and praziquantel.

(a) *Specifications.* Each milliliter of solution contains 21.4 milligrams (mg) emodepside and 85.7 mg praziquantel.

(b) *Sponsor.* See No. 000859 in § 510.600(c) of this chapter.

(c) *Conditions of use in cats*—(1) *Amount.* The recommended minimum dose is 1.36 mg/pound (lb) (3 mg/kilogram (kg)) emodepside and 5.45 mg/lb (12 mg/kg) praziquantel applied as a single topical dose.

(2) *Indications for use.* For the treatment and control of hookworm infections caused by *Ancylostoma tubaeforme* (adults, immature adults, and fourth stage larvae), roundworm infections caused by *Toxocara cati* (adults and fourth stage larvae), and tapeworm infections caused by *Dipylidium caninum* (adults) and *Taenia taeniaeformis* (adults).

(3) *Limitations.* Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Dated: July 17, 2007.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1, 26, and 602

[TD 9348]

RIN 1545–BC50

Qualified Severance of a Trust for Generation-Skipping Transfer (GST) Tax Purposes

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations providing guidance regarding the qualified severance of a trust for generation-skipping transfer (GST) tax purposes under section 2642(a)(3) of the Internal Revenue Code (Code), which was added to the Code by the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA). The regulations will affect trusts that are subject to the GST tax.

DATES: *Effective Date:* The regulations are effective August 2, 2007.

Applicability Date: For dates of applicability, see § 26.2642–6(k)(1) and § 26.2642–6(k)(2).

FOR FURTHER INFORMATION CONTACT: Mayer R. Samuels, (202) 622–3090 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been previously reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) under control number 1545–1902.

The collection of information in these final regulations is in § 26.2642–6(e). This information is requested by the IRS to identify whether a trust is exempt from the GST tax. This information is

required to determine whether the amount of tax has been calculated correctly. The respondents are trustees of trusts that are being severed.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number assigned by the Office of Management and Budget.

The estimated average annual burden per respondent/recordkeeper is .5 hours per respondent. Comments concerning the accuracy of this burden estimate should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, SE:W:CAR:MP:T:T:SP, Washington, DC 20224 and the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Books or records relating to this collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

Section 2642(a)(3) was added to the Internal Revenue Code by the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA), Public Law 107–16 (115 Stat. 38 (2001)). Under section 2642(a)(3), if a trust is divided into two or more trusts in a ''qualified severance,'' the resulting trusts will be recognized as separate trusts for GST tax purposes. In many cases, a qualified severance of a trust will facilitate the most efficient and effective use of the transferor's GST tax exemption. The GST tax exemption is each person's lifetime exemption that may be allocated to a generation-skipping transfer. If the transfer is made in trust, allocation of the donor's GST tax exemption reduces the trust's inclusion ratio, which in turn determines the amount of GST tax imposed on any generation-skipping transfer made with regard to the trust.

On August 24, 2004, the IRS published in the **Federal Register** a notice of proposed rulemaking (REG–145987–03, 2004–39 IRB 519, 69 FR 51967), providing rules under section 2642(a)(3) regarding the qualified severance of a trust for GST tax purposes. The IRS received written and oral comments responding to the notice of proposed rulemaking. No public hearing was requested or held. After consideration of all the comments, the proposed regulations are adopted as amended by this Treasury decision, and the corresponding proposed regulations are removed. The comments and revisions to the proposed regulations are discussed below. In addition, additional proposed regulations are being issued contemporaneously with these final regulations in order to respond to certain comments that the Treasury Department and the IRS believe merit further consideration in proposed regulations.

Summary of Comments

The proposed regulations take the position that the severance rules contained in § 26.2654–1(b) of the regulations were superseded by the enactment of section 2642(a)(3), and therefore that § 26.2654–1(b) is no longer effective. However, many commentators noted that sections 2654(b) and 2642(a)(3) address different situations, and they suggested that section 2642(a)(3) was intended to supplement, rather than to replace, section 2654(b), and to thereby provide more flexibility in severing trusts for GST tax purposes. The commentators noted that section 2642(a)(3) qualified severances are effective prospectively from the date of severance and thus, that section only addresses severances that typically would occur after an irrevocable trust (whether inter vivos or testamentary) has been in existence for a period of time. In contrast, § 26.2654–1(b) addresses only severances of testamentary trusts and revocable inter vivos trusts included in the transferor's gross estate, and a severance satisfying § 26.2654–1(b) is effective retroactively to the date of death. Section 26.2654–1(b) provides for the recognition of severances of separate shares of such trusts, and of discretionary severances that, although not provided for in the governing instrument, are necessary to fully utilize available tax benefits (for example, the reverse qualified terminable interest property election under section 2652(a)(3)). To fulfill the purpose of these severances (generally, efficient utilization and allocation of the decedent's GST exemption), the severance must be effective retroactive to the date of death. Thus, section 2642(a)(3) and § 26.2654–1(b) address different circumstances.

In response to these comments, the final regulations do not supersede § 26.2654–1(b). Rather, § 26.2654–1(b) is retained, but, as explained hereafter, is proposed to be amended as described in a notice of proposed rulemaking issued contemporaneously with these final regulations. Subject to those proposed changes, § 26.2654–1(b) will continue to provide rules for mandatory and discretionary severances of trusts includible in the transferor's gross estate, effective retroactively to the transferor's date of death. The final regulations under § 26.2642–6 generally provide rules for the qualified severance of a trust (whether or not includible in the transferor's gross estate) if the severance will be effective only prospectively from the date of severance.

One commentator requested that the regulations provide that separate trusts, created as the result of a mandated division of a single trust that is effective under state law, be recognized prospectively as separate trusts for certain GST tax purposes, even if the severance does not satisfy the requirements of a qualified severance. This comment will be addressed in the proposed regulations under section 2642, issued contemporaneously with these final regulations.

One commentator requested that the regulations provide additional flexibility in severing a trust that has an inclusion ratio between zero and one. Specifically, the commentator requested that the final regulations permit the qualified severance of a trust into one or more separate resulting trusts, as long as one or more of the resulting trusts, in the aggregate, would receive a fractional share of the total value of the original trust's assets that equals the applicable fraction of the original trust. In such a qualified severance, the resulting trust or trusts receiving this fractional share would each have an inclusion ratio of zero, and each of the other resulting trusts would have an inclusion ratio of one. This comment will be addressed in the proposed regulations under section 2642, issued contemporaneously with these final regulations.

In response to comments, the final regulations continue to require that, in notifying the IRS of the severance of a trust, the words ''Qualified Severance'' should appear at the top of Form 706–GS(T), ''Generation-Skipping Transfer Tax Return for Terminations,'' but the use of red ink for that purpose is not required.

One commentator questioned the requirement in the proposed regulations that any non-pro rata funding of trusts resulting from a qualified severance must be based on the value of the trust assets as of the date of funding. The commentator pointed out that, in many cases, the funding of trusts resulting from a qualified severance will take place over a period of time, rather than on one specific date. Accordingly, under the final regulations, the non-pro rata funding of trusts resulting from a

qualified severance must be achieved by applying the appropriate fraction or percentage to the total value of the trust assets as of the ''date of severance.'' The term ''date of severance'' is defined as the date selected for determining the value of the trust assets (whether selected on a discretionary basis or by a court order), provided that funding is commenced immediately and occurs within a reasonable time before or after the selected date of severance. For this purpose, a reasonable time may differ depending upon the type of asset involved, but in no event may be more than 90 days.

Several commentators requested that the regulations address the severance of a trust that was irrevocable on September 25, 1985, but with respect to which an addition was made to the trust after September 25, 1985. For purposes of determining the inclusion ratio with respect to such a trust, § 26.2601–1(b)(1)(iv)(A) provides that the trust is deemed to consist of two portions, one portion not subject to GST tax (the non-chapter 13 portion) with an inclusion ratio of zero, and one portion subject to GST tax (the chapter 13 portion) with an inclusion ratio determined under section 2642. In response to these comments, the final regulations provide guidance regarding a qualified severance of the chapter 13 portion of these trusts.

The proposed regulations include a mandatory reporting requirement, without which a severance would not constitute a qualified severance. One commentator noted that, in some situations, it may be advantageous to sever a trust but to avoid qualification under section 2642(a)(3) as a qualified severance. The Treasury Department and the IRS believe that the qualified severance rules were not intended to be optional; that is, able to be employed or avoided depending upon the tax consequences of a particular severance. Therefore, under the final regulations, the reporting provisions do not constitute a requirement for qualified severance status, but each severance should be reported to ensure that the provisions of Chapter 13 of the Code may be properly applied with regard to the trusts.

One commentator noted that § 1.1001–1(h)(1) of the proposed regulations provides favorable income tax treatment only with respect to a qualified severance. The commentator requested that the regulations also address the income tax treatment of all other trust modifications and severances. The commentator noted that the failure to address, for example, the income tax consequences of severances that are not qualified severances for GST tax purposes implies that such severances are taxable events for income tax purposes. In response to these comments, the category of severances to which § 1.1001–1(h)(1) will apply has been broadened. No inference should be drawn with respect to the income tax consequences under section 1001 of any severance that is not described in § 1.1001–1(h)(1).

Commentators noted that some qualified severances may result in a taxable termination or taxable distribution, for example, if after the severance, one of the resulting trusts is a skip person. The final regulations clarify that, if the qualified severance itself results in a GST taxable event, the taxable event is treated as occurring immediately after the severance. As a result, if the resulting trust that is a skip person is also the trust that has a zero inclusion ratio after the severance, then no GST tax will result from the taxable event that is deemed to occur after the severance. An example was added illustrating this rule.

Finally, in response to comments, an example has been added addressing the qualified severance rules in the case of a trust where the beneficiary is granted a contingent testamentary general power of appointment that is dependent upon the trust's inclusion ratio.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. It is hereby certified that the collection of information in these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based upon the fact that the collection of information imposed by this regulation is not significant as reflected in the estimated burden of information collection for, which is 0.5 hours per respondent, and that few trustees are likely to be small entities. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking preceding these regulations was submitted to the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these final regulations is Mayer R. Samuels, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. Other personnel from the IRS and the Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 26

Estate taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

■ Accordingly, 26 CFR parts 1, 26 and 602 are amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1**. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2**. In § 1.1001–1, paragraph (h) is added to read as follows:

§ 1.1001–1 Computation of gain or loss.

* * * * *

(h) *Severances of trusts*—(1) *In general.* The severance of a trust (including without limitation a severance that meets the requirements of § 26.2642–6 or of § 26.2654–1(b) of this chapter) is not an exchange of property for other property differing materially either in kind or in extent if—

(i) An applicable state statute or the governing instrument authorizes or directs the trustee to sever the trust; and

(ii) Any non-pro rata funding of the separate trusts resulting from the severance (including non-pro rata funding as described in § 26.2642–6(d)(4) or § 26.2654–1(b)(1)(ii)(C) of this chapter), whether mandatory or in the discretion of the trustee, is authorized by an applicable state statute or the governing instrument.

(2) *Effective/applicability date.* This paragraph (h) applies to severances occurring on or after August 2, 2007. Taxpayers may apply this paragraph (h) to severances occurring on or after August 24, 2004, and before August 2, 2007.

PART 26—GENERATION-SKIPPING TRANSFER TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1986

■ **Par. 3**. The authority citation for part 26 is amended by adding an entry in numerical order to read, in part, as follows:

Authority: 26 U.S.C. 7805 * * *

Section 26.2642–6 also issued under 26 U.S.C. 2642. * * *

■ **Par. 4**. In § 26.2600–1, the table of contents is amended by adding entries for §§ 26.2642–6 and 26.2654–1(c) to read as follows:

§ 26.2600–1 Table of contents.

* * * * *

§ 26.2642–6 Qualified severance.

(a) In general.
(b) Qualified severance defined.
(c) Effective date of qualified severance.
(d) Requirements for a qualified severance.
(e) Reporting a qualified severance.
(f) Time for making a qualified severance.
(g) Trusts that were irrevocable on September 25, 1985.
(1) In general.
(2) Trusts in receipt of a post-September 25, 1985, addition.
(h) [Reserved]
(i) [Reserved]
(j) Examples.
(k) Effective date.
(1) In general.
(2) Transition rule.

* * * * *

§ 26.2654–1 Certain trusts treated as separate trusts.

* * * * *

(c) Cross reference.

* * * * *

■ **Par. 5**. Section 26.2642–6 is added to read as follows:

§ 26.2642–6 Qualified severance.

(a) *In general.* If a trust is divided in a qualified severance into two or more trusts, the separate trusts resulting from the severance will be treated as separate trusts for generation-skipping transfer (GST) tax purposes and the inclusion ratio of each new resulting trust may differ from the inclusion ratio of the original trust. Because the post-severance resulting trusts are treated as separate trusts for GST tax purposes, certain actions with respect to one resulting trust will generally have no GST tax impact with respect to the other resulting trust(s). For example, GST exemption allocated to one resulting trust will not impact on the inclusion ratio of the other resulting trust(s); a GST tax election made with respect to one resulting trust will not apply to the other resulting trust(s); the occurrence of a taxable distribution or termination with regard to a particular resulting trust will not have any GST tax impact on any other trust resulting from that severance. In general, the rules in this section are applicable only for purposes of the GST tax and are not applicable in determining, for example, whether the resulting trusts may file separate income tax returns or whether the severance may result in a gift subject to gift tax, may cause any trust to be included in the gross estate of a beneficiary, or may result in a realization of gain for purposes of section 1001. See § 1.1001–1(h) of this chapter for rules relating to whether a qualified severance will constitute an exchange of property for other property differing materially either in kind or in extent.

(b) *Qualified severance defined.* A qualified severance is a division of a trust (other than a division described in § 26.2654–1(b)) into two or more separate trusts that meets each of the requirements in paragraph (d) of this section.

(c) *Effective date of qualified severance.* A qualified severance is applicable as of the date of the severance, as defined in § 26.2642–6(d)(3), and the resulting trusts are treated as separate trusts for GST tax purposes as of that date.

(d) *Requirements for a qualified severance.* For purposes of this section, a qualified severance must satisfy each of the following requirements:

(1) The single trust is severed pursuant to the terms of the governing instrument, or pursuant to applicable local law.

(2) The severance is effective under local law.

(3) The date of severance is either the date selected by the trustee as of which the trust assets are to be valued in order to determine the funding of the resulting trusts, or the court-imposed date of funding in the case of an order of the local court with jurisdiction over the trust ordering the trustee to fund the resulting trusts on or as of a specific date. For a date to satisfy the definition in the preceding sentence, however, the funding must be commenced immediately upon, and funding must occur within a reasonable time (but in no event more than 90 days) after, the selected valuation date.

(4) The single trust (original trust) is severed on a fractional basis, such that each new trust (resulting trust) is funded with a fraction or percentage of the original trust, and the sum of those fractions or percentages is one or one hundred percent, respectively. For this purpose, the fraction or percentage may be determined by means of a formula (for example, that fraction of the trust the numerator of which is equal to the transferor's unused GST tax exemption, and the denominator of which is the fair market value of the original trust's assets on the date of severance). The severance of a trust based on a pecuniary amount does not satisfy this requirement. For example, the severance of a trust is not a qualified severance if the trust is divided into two trusts, with one trust to be funded with $1,500,000 and the other trust to be funded with the balance of the original trust's assets. With respect to the particular assets to be distributed to each resulting trust, each resulting trust may be funded with the appropriate fraction or percentage (pro rata portion) of each asset held by the original trust. Alternatively, the assets may be divided among the resulting trusts on a non pro rata basis, based on the fair market value of the assets on the date of severance. However, if funded on a non pro rata basis, each resulting trust must be funded by applying the appropriate fraction or percentage to the total fair market value of the trust assets as of the date of severance.

(5) The terms of the resulting trusts must provide, in the aggregate, for the same succession of interests of beneficiaries as are provided in the original trust. This requirement is satisfied if the beneficiaries of the separate resulting trusts and the interests of the beneficiaries with respect to the separate trusts, when the separate trusts are viewed collectively, are the same as the beneficiaries and their respective beneficial interests with respect to the original trust before severance. With respect to trusts from which discretionary distributions may be made to any one or more beneficiaries on a non-pro rata basis, this requirement is satisfied if—

(i) The terms of each of the resulting trusts are the same as the terms of the original trust (even though each permissible distributee of the original trust is not a beneficiary of all of the resulting trusts);

(ii) Each beneficiary's interest in the resulting trusts (collectively) equals the beneficiary's interest in the original trust, determined by the terms of the trust instrument or, if none, on a per-capita basis. For example, in the case of the severance of a discretionary trust established for the benefit of A, B, and C and their descendants with the remainder to be divided equally among those three families, this requirement is satisfied if the trust is divided into three separate trusts of equal value with one trust established for the benefit of A and A's descendants, one trust for the

benefit of B and B's descendants, and one trust for the benefit of C and C's descendants;

(iii) The severance does not shift a beneficial interest in the trust to any beneficiary in a lower generation (as determined under section 2651) than the person or persons who held the beneficial interest in the original trust; and

(iv) The severance does not extend the time for the vesting of any beneficial interest in the trust beyond the period provided for in (or applicable to) the original trust.

(6) In the case of a qualified severance of a trust with an inclusion ratio as defined in § 26.2642–1 of either one or zero, each trust resulting from the severance will have an inclusion ratio equal to the inclusion ratio of the original trust.

(7) In the case of a qualified severance occurring after GST tax exemption has been allocated to the trust (whether by an affirmative allocation, a deemed allocation, or an automatic allocation pursuant to the rules contained in section 2632), if the trust has an inclusion ratio as defined in § 26.2642–1 that is greater than zero and less than one, then the trust must be severed initially into two trusts. One resulting trust must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the applicable fraction, as defined in § 26.2642–1(b) and (c), used to determine the inclusion ratio of the original trust immediately before the severance. The other resulting trust must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the excess of one over the fractional share described in the preceding sentence. The trust receiving the fractional share equal to the applicable fraction shall have an inclusion ratio of zero, and the other trust shall have an inclusion ratio of one. If the applicable fraction with respect to the original trust is .50, then, with respect to the two equal trusts resulting from the severance, the Trustee may designate which of the resulting trusts will have an inclusion ratio of zero and which will have an inclusion ratio of one. Each separate trust resulting from the severance then may be further divided in accordance with the rules of this section. See paragraph (j), *Example 7* of this section.

(e) *Reporting a qualified severance*—(1) *In general.* A qualified severance is reported by filing Form 706–GS(T), ''Generation-Skipping Transfer Tax Return for Terminations,'' (or such other form as may be provided from time to time by the Internal Revenue Service (IRS) for the purpose of reporting a qualified severance). Unless otherwise provided in the applicable form or instructions, the IRS requests that the filer write ''Qualified Severance'' at the top of the form and attach a Notice of Qualified Severance (Notice). The return and attached Notice should be filed by April 15th of the year immediately following the year during which the severance occurred or by the last day of the period covered by an extension of time, if an extension of time is granted, to file such form.

(2) *Information concerning the original trust.* The Notice should provide, with respect to the original trust that was severed—

(i) The name of the transferor;

(ii) The name and date of creation of the original trust;

(iii) The tax identification number of the original trust; and

(iv) The inclusion ratio before the severance.

(3) *Information concerning each new trust.* The Notice should provide, with respect to each of the resulting trusts created by the severance—

(i) The name and tax identification number of the trust;

(ii) The date of severance (within the meaning of paragraph (c) of this section);

(iii) The fraction of the total assets of the original trust received by the resulting trust;

(iv) Other details explaining the basis for the funding of the resulting trust (a fraction of the total fair market value of the assets on the date of severance, or a fraction of each asset); and

(v) The inclusion ratio.

(f) *Time for making a qualified severance.* (1) A qualified severance of a trust may occur at any time prior to the termination of the trust. Thus, provided that the separate resulting trusts continue in existence after the severance, a qualified severance may occur either before or after—

(i) GST tax exemption has been allocated to the trust;

(ii) A taxable event has occurred with respect to the trust; or

(iii) An addition has been made to the trust.

(2) Because a qualified severance is effective as of the date of severance, a qualified severance has no effect on a taxable termination as defined in section 2612(a) or a taxable distribution as defined in section 2612(b) that occurred prior to the date of severance. A qualified severance shall be deemed to occur before a taxable termination or a taxable distribution that occurs by reason of the qualified severance. See paragraph (j) *Example 8* of this section.

(g) *Trusts that were irrevocable on September 25, 1985*—(1) *In general.* See § 26.2601–1(b)(4) for rules regarding severances and other actions with respect to trusts that were irrevocable on September 25, 1985.

(2) *Trusts in receipt of a post-September 25, 1985, addition.* A trust described in § 26.2601–1(b)(1)(iv)(A) that is deemed for GST tax purposes to consist of one separate share not subject to GST tax (the non-chapter 13 portion) with an inclusion ratio of zero, and one separate share subject to GST tax (the chapter 13 portion) with an inclusion ratio determined under section 2642, may be severed into two trusts in accordance with § 26.2654–1(a)(3). One resulting trust will hold the non-chapter 13 portion of the original trust (the non-chapter 13 trust) and will not be subject to GST tax, and the other resulting trust will hold the chapter 13 portion of the original trust (the chapter 13 trust) and will have the same inclusion ratio as the chapter 13 portion immediately prior to the severance. The chapter 13 trust may be further divided in a qualified severance in accordance with the rules of this section. The non-chapter 13 trust may be further divided in accordance with the rules of § 26.2601–1(b)(4).

(h) [Reserved].

(i) [Reserved].

(j) *Examples.* The rules of this section are illustrated by the following examples:

Example 1. Succession of interests. T dies in 2006. T's will establishes a testamentary trust (Trust) providing that income is to be paid to T's sister, S, for her life. On S's death, one-half of the corpus is to be paid to T's child, C (or to C's estate if C fails to survive S), and one-half of the corpus is to be paid to T's grandchild, GC (or to GC's estate if GC fails to survive S). On the Form 706, ''United States Estate (and Generation-Skipping Transfer) Tax Return,'' filed for T's estate, T's executor allocates all of T's available GST tax exemption to other transfers and trusts, such that Trust's inclusion ratio is 1. Subsequent to filing the Form 706 in 2007 and in accordance with applicable state law, the trustee divides Trust into two separate trusts, Trust 1 and Trust 2, with each trust receiving 50 percent of the value of the assets of the original trust as of the date of severance. Trust 1 provides that trust income is to be paid to S for life with remainder to C or C's estate, and Trust 2 provides that trust income is to be paid to S for life with remainder to GC or GC's estate. Because Trust 1 and Trust 2 provide for the same succession of interests in the aggregate as provided in the original trust, the severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

Example 2. Succession of interests in discretionary trust. In 2006, T establishes Trust, an irrevocable trust providing that income may be paid from time to time in

such amounts as the trustee deems advisable to any one or more members of the group consisting of T's children (A and B) and their respective descendants. In addition, the trustee may distribute corpus to any trust beneficiary in such amounts as the trustee deems advisable. On the death of the last to die of A and B, the trust is to terminate and the corpus is to be distributed in two equal shares, one share to the then-living descendants of each child, per stirpes. T elects, under section 2632(c)(5), to not have the automatic allocation rules contained in section 2632(c) apply with respect to T's transfers to Trust, and T does not otherwise allocate GST tax exemption with respect to Trust. As a result, Trust has an inclusion ratio of one. In 2008, the trustee of Trust, pursuant to applicable state law, divides Trust into two equal but separate trusts, Trust 1 and Trust 2, each of which has terms identical to the terms of Trust except for the identity of the beneficiaries. Trust 1 and Trust 2 each has an inclusion ratio of one. Trust 1 provides that income is to be paid in such amounts as the trustee deems advisable to A and A's descendants. In addition, the trustee may distribute corpus to any trust beneficiary in such amounts as the trustee deems advisable. On the death of A, Trust 1 is to terminate and the corpus is to be distributed to the then-living descendants of A, per stirpes, but, if A dies with no living descendants, the principal will be added to Trust 2. Trust 2 contains identical provisions, except that B and B's descendants are the trust beneficiaries and, if B dies with no living descendants, the principal will be added to Trust 1. Trust 1 and Trust 2 in the aggregate provide for the same beneficiaries and the same succession of interests as provided in Trust, and the severance does not shift any beneficial interest to a beneficiary who occupies a lower generation than the person or persons who held the beneficial interest in Trust. Accordingly, the severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

Example 3. Severance based on actuarial value of beneficial interests. In 2004, T establishes Trust, an irrevocable trust providing that income is to be paid to T's child C during C's lifetime. Upon C's death, Trust is to terminate and the assets of Trust are to be paid to GC, C's child, if living, or, if GC is not then living, to GC's estate. T properly elects, under section 2632(c)(5), to not have the automatic allocation rules contained in section 2632(c) apply with respect to T's transfers to Trust, and T does not otherwise allocate GST tax exemption with respect to Trust. Thus, Trust has an inclusion ratio of one. In 2008, the trustee of Trust, pursuant to applicable state law, divides Trust into two separate trusts, Trust 1 for the benefit of C (and on C's death to C's estate), and Trust 2 for the benefit of GC (and on GC's death to GC's estate). The document severing Trust directs that Trust 1 is to be funded with an amount equal to the actuarial value of C's interest in Trust prior to the severance, determined under section 7520 of the Internal Revenue Code. Similarly, Trust 2 is to be funded with an amount equal to the actuarial value of GC's interest in Trust prior to the severance, determined under section 7520. Trust 1 and Trust 2 do not provide for the same succession of interests as provided under the terms of the original trust. Therefore, the severance is not a qualified severance.

Example 4. Severance of a trust with a 50% inclusion ratio. On September 1, 2006, T transfers $100,000 to a trust for the benefit of T's grandchild, GC. On a timely filed Form 709, ''United States Gift (and Generation-Skipping Transfer) Tax Return,'' reporting the transfer, T allocates all of T's remaining GST tax exemption ($50,000) to the trust. As a result of the allocation, the applicable fraction with respect to the trust is .50 [$50,000 (the amount of GST tax exemption allocated to the trust) divided by $100,000 (the value of the property transferred to the trust)]. The inclusion ratio with respect to the trust is .50 [1 − .50]. In 2007, pursuant to authority granted under applicable state law, the trustee severs the trust into two trusts, Trust 1 and Trust 2, each of which is identical to the original trust and each of which receives a 50 percent fractional share of the total value of the original trust, valued as of the date of severance. Because the applicable fraction with respect to the original trust is .50 and the trust is severed into two equal trusts, the trustee may designate which resulting trust has an inclusion ratio of one, and which resulting trust has an inclusion ratio of zero. Accordingly, in the Notice of Qualified Severance reporting the severance, the trustee designates Trust 1 as having an inclusion ratio of zero, and Trust 2 as having an inclusion ratio of one. The severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

Example 5. Funding of severed trusts on a non-pro rata basis. T's will establishes a testamentary trust (Trust) for the benefit of T's descendants, to be funded with T's stock in Corporation A and Corporation B, both publicly traded stocks. T dies on May 1, 2004, at which time the Corporation A stock included in T's gross estate has a fair market value of $100,000 and the stock of Corporation B included in T's gross estate has a fair market value of $200,000. On a timely filed Form 706, T's executor allocates all of T's remaining GST tax exemption ($270,000) to Trust. As a result of the allocation, the applicable fraction with respect to Trust is .90 [$270,000 (the amount of GST tax exemption allocated to the trust) divided by $300,000 (the value of the property transferred to the trust)]. The inclusion ratio with respect to Trust is .10 [1 − .90]. On August 1, 2008, in accordance with applicable local law, the trustee executes a document severing Trust into two trusts, Trust 1 and Trust 2, each of which is identical to Trust. The instrument designates August 3, 2008, as the date of severance (within the meaning of paragraph (d)(3) of this section). The terms of the instrument severing Trust provide that Trust 1 is to be funded on a non-pro rata basis with assets having a fair market value on the date of severance equal to 90% of the value of Trust's assets on that date, and Trust 2 is to be funded with assets having a fair market value on the date of severance equal to 10% of the value of Trust's assets on that date. On August 3, 2008, the value of the Trust assets totals $500,000, consisting of Corporation A stock worth $450,000 and Corporation B stock worth $50,000. On August 4, 2008, the trustee takes all action necessary to transfer all of the Corporation A stock to Trust 1 and to transfer all of the Corporation B stock to Trust 2. On August 6, 2008, the stock transfers are completed and the stock is received by the appropriate resulting trust. Accordingly, Trust 1 is funded with assets having a value equal to 90% of the value of Trust as of the date of severance, August 3, 2008, and Trust 2 is funded with assets having a value equal to 10% of the value of Trust as of the date of severance. Therefore, the severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied. Trust 1 will have an inclusion ratio of zero and Trust 2 will have an inclusion ratio of one.

Example 6. [Reserved].

Example 7. Statutory qualified severance. T dies on October 1, 2004. T's will establishes a testamentary trust (Trust) to be funded with $1,000,000. Trust income is to be paid to T's child, S, for S's life. The trustee may also distribute trust corpus from time to time, in equal or unequal shares, for the benefit of any one or more members of the group consisting of S and T's three grandchildren (GC1, GC2, and GC3). On S's death, Trust is to terminate and the assets are to be divided equally among GC1, GC2, and GC3 (or their respective then-living descendants, per stirpes). On a timely filed Form 706, T's executor allocates all of T's remaining GST tax exemption ($300,000) to Trust. As a result of the allocation, the applicable fraction with respect to the trust is .30 [$300,000 (the amount of GST tax exemption allocated to the trust) divided by $1,000,000 (the value of the property transferred to the trust)]. The inclusion ratio with respect to the trust is .70 [1 − .30]. On June 1, 2007, the trustee determines that it is in the best interest of the beneficiaries to sever Trust to provide a separate trust for each of T's three grandchildren and their respective families. The trustee severs Trust into two trusts, Trust 1 and Trust 2, each with terms and beneficiaries identical to Trust and thus each providing that trust income is to be paid to S for life, trust principal may be distributed for the benefit of any or all members of the group consisting of S and T's grandchildren, and, on S's death, the trust is to terminate and the assets are to be divided equally among GC1, GC2, and GC3 (or their respective then-living descendants, per stirpes). The instrument severing Trust provides that Trust 1 is to receive 30% of Trust's assets and Trust 2 is to receive 70% of Trust's assets. Further, each such trust is to be funded with a pro rata portion of each asset held in Trust. The trustee then severs Trust 1 into three equal trusts, Trust GC1, Trust GC2, and Trust GC3. Each trust is named for a grandchild of T and provides that trust income is to be paid to S for life, trust principal may be distributed for the benefit of S and T's grandchild for whom

the trust is named, and, on S's death, the trust is to terminate and the trust proceeds distributed to the respective grandchild for whom the trust is named. If that grandchild has predeceased the termination date, the trust proceeds are to be distributed to that grandchild's then-living descendants, per stirpes, or, if none, then equally to the other two trusts resulting from the severance of Trust 1. Each such resulting trust is to be funded with a pro rata portion of each Trust 1 asset. The trustee also severs Trust 2 in a similar manner, into Trust GC1(2), Trust GC2(2), and Trust GC3(2). The severance of Trust into Trust 1 and Trust 2, the severance of Trust 1 into Trust GC1, Trust GC2, Trust GC3, and the severance of Trust 2 into Trust GC1(2), Trust GC2(2) and Trust GC3(2), constitute qualified severances, provided that all other requirements of section 2642(a)(3) and this section are satisfied with respect to each severance. Trust GC1, Trust GC2, Trust GC3 will each have an inclusion ratio of zero and Trust GC1(2), Trust GC2(2), and Trust GC3(2) will each have an inclusion ratio of one.

Example 8. Qualified severance deemed to precede a taxable termination. In 2004, T establishes an inter vivos irrevocable trust (Trust) for a term of 10 years providing that Trust income is to be paid annually in equal shares to T's child C and T's grandchild GC (the child of another then-living child of T). If either C or GC dies prior to the expiration of the 10-year term, the deceased beneficiary's share of Trust's income is to be paid to that beneficiary's then-living descendants, per stirpes, for the balance of the trust term. At the expiration of the 10-year trust term, the corpus is to be distributed equally to C and GC; if either C or GC is not then living, then such decedent's share is to be distributed instead to such decedent's then-living descendants, per stirpes. T allocates T's GST tax exemption to Trust such that Trust's applicable fraction is .50 and Trust's inclusion ratio is .50 [1 − .50]. In 2006, pursuant to applicable state law, the trustee severs the trust into two equal trusts, Trust 1 and Trust 2. The instrument severing Trust provides that Trust 1 is to receive 50% of the Trust assets, and Trust 2 is to receive 50% of Trust's assets. Both resulting trusts are identical to Trust, except that each has different beneficiaries: C and C's descendants are designated as the beneficiaries of Trust 1, and GC and GC's descendants are designated as the beneficiaries of Trust 2. The severance constitutes a qualified severance, provided all other requirements of section 2642(a)(3) and this section are satisfied. Because the applicable fraction with respect to Trust is .50 and Trust was severed into two equal trusts, the trustee may designate which resulting trust has an inclusion ratio of one, and which has an inclusion ratio of zero. Accordingly, in the Notice of Qualified Severance reporting the severance, the trustee designates Trust 1 as having an inclusion ratio of one, and Trust 2 as having an inclusion ratio of zero. Because Trust 2 is a skip person under section 2613, the severance of Trust resulting in the distribution of 50% of Trust's corpus to Trust 2 would constitute a taxable termination or distribution (as described in section 2612(a)) of that 50% of Trust for GST tax purposes, but for the rule that a qualified severance is deemed to precede a taxable termination that is caused by the qualified severance. Thus, no GST tax will be due with regard to the creation and funding of Trust 2 because the inclusion ratio of Trust 2 is zero.

Example 9. [Reserved].

Example 10. Beneficiary's interest dependent on inclusion ratio. On August 8, 2006, T transfers $1,000,000 to Trust and timely allocates $400,000 of T's remaining GST tax exemption to Trust. As a result of the allocation, the applicable fraction with respect to Trust is .40 [$400,000 divided by $1,000,000] and Trust's inclusion ratio is .60 [1 − .40]. Trust provides that all income of Trust will be paid annually to C, T's child, for life. On C's death, the corpus is to pass in accordance with C's exercise of a testamentary limited power to appoint the corpus of Trust to C's lineal descendants. However, Trust provides that if, at the time of C's death, Trust's inclusion ratio is greater than zero, then C may also appoint that fraction of the trust corpus equal to the inclusion ratio to the creditors of C's estate. On May 3, 2008, pursuant to authority granted under applicable state law, the trustee severs Trust into two trusts. Trust 1 is funded with 40% of Trust's assets, and Trust 2 is funded with 60% of Trust's assets in accordance with the requirements of this section. Both Trust 1 and Trust 2 provide that all income of Trust will be paid annually to C during C's life. On C's death, Trust 1 corpus is to pass in accordance with C's exercise of a testamentary limited power to appoint the corpus to C's lineal descendants. Trust 2 is to pass in accordance with C's exercise of a testamentary power to appoint the corpus of Trust to C's lineal descendants and to the creditors of C's estate. The severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied. No additional contribution or allocation of GST tax exemption is made to either Trust 1 or Trust 2 prior to C's death. Accordingly, the inclusion ratio with respect to Trust 1 is zero. The inclusion ratio with respect to Trust 2 is one until C's death, at which time C will become the transferor of Trust 2 for GST tax purposes. (Some or all of C's GST tax exemption may be allocated to Trust 2 upon C's death.)

Example 11. Date of severance. Trust is an irrevocable trust that has both skip person and non-skip person beneficiaries. Trust holds two parcels of real estate, Property A and Property B, stock in Company X, a publicly traded company, and cash. On June 16, 2008, the local court with jurisdiction over Trust issues an order, pursuant to the trustee's petition authorized under state law, severing Trust into two resulting trusts of equal value, Trust 1 and Trust 2. The court order directs that Property A will be distributed to Trust 1 and Property B will be distributed to Trust 2, and that an appropriate amount of stock and cash will be distributed to each trust such that the total value of property distributed to each trust as of the date of severance will be equal. The court order does not mandate a particular date of funding. Trustee receives notice of the court order on June 24, and selects July 16, 2008, as the date of severance. On June 26, 2008, Trustee commences the process of transferring title to Property A and Property B to the appropriate resulting trust(s), which process is completed on July 8, 2008. Also on June 26, the Trustee hires a professional appraiser to value Property A and Property B as of the date of severance and receives the appraisal report on Friday, October 3, 2008. On Monday, October 6, 2008, Trustee commences the process of transferring to Trust 1 and Trust 2 the appropriate amount of Company X stock valued as of July 16, 2008, and that transfer (as well as the transfer of Trust's cash) is completed by October 9, 2008. Under the facts presented, the funding of Trust 1 and Trust 2 occurred within 90 days of the date of severance selected by the trustee, and within a reasonable time after the date of severance taking into account the nature of the assets involved and the need to obtain an appraisal. Accordingly, the date of severance for purposes of this section is July 16, 2008, the resulting trusts are to be funded based on the value of the original trust assets as of that date, and the severance is a qualified severance assuming that all other requirements of section 2642(a)(3) and this section are met. (However, if Trust had contained only marketable securities and cash, then in order to satisfy the reasonable time requirement, the stock transfer would have to have been commenced, and generally completed, immediately after the date of severance, and the cash distribution would have to have been made at the same time.)

(k) *Effective/applicability date*—(1) *In general.* This section applies to severances occurring on or after August 2, 2007.

(2) *Transition rule.* In the case of a qualified severance occurring after December 31, 2000, and before August 2, 2007, taxpayers may rely on any reasonable interpretation of section 2642(a)(3) as long as reasonable notice concerning the qualified severance and identification of the trusts involved has been given to the IRS. For this purpose, the proposed regulations (69 FR 51967) are treated as a reasonable interpretation of the statute. For purposes of the reporting provisions of § 26.2642–6(e), notice to the IRS should be mailed by the due date of the gift tax return (including extensions granted) for gifts made during the year in which the severance occurred. If no gift tax return is filed, notice to the IRS should be mailed by April 15th of the year immediately following the year during which the severance occurred. For severances occurring between December 31, 2000, and January 1, 2007, notification should be mailed to the IRS as soon as reasonably practicable after August 2, 2007, if sufficient notice has not already been given.

■ **Par. 6**. Section 26.2654–1 is amended by adding paragraphs (b)(4) *Example 3* and (c) to read as follows:

§ 26.2654–1 Certain trusts treated as separate trusts.

* * * * *

(b) * * *

(4) *Examples.* * * *

Example 3. Formula severance. T's will establishes a testamentary marital trust (Trust) that meets the requirements of qualified terminable interest property (QTIP) if an election under section 2056(b)(7) is made. Trust provides that all trust income is to be paid to T's spouse for life. On the spouse's death, the trust corpus is to be held in further trust for the benefit of T's then-living descendants. On T's date of death in January of 2004, T's unused GST tax exemption is $1,200,000, and T's will includes $200,000 of bequests to T's grandchildren. Prior to the due date for filing the Form 706, ''United States Estate (and Generation-Skipping Transfer) Tax Return,'' for T's estate, T's executor, pursuant to applicable state law, divides Trust into two separate trusts, Trust 1 and Trust 2. Trust 1 is to be funded with that fraction of the Trust assets, the numerator of which is $1,000,000, and the denominator of which is the value of the Trust assets as finally determined for federal estate tax purposes. Trust 2 is to be funded with that fraction of the Trust assets, the numerator of which is the excess of the Trust assets over $1,000,000, and the denominator of which is the value of the Trust assets as finally determined for federal estate tax purposes. On the Form 706 filed for the estate, T's executor makes a QTIP election under section 2056(b)(7) with respect to Trust 1 and Trust 2 and a ''reverse'' QTIP election under section 2652(a)(3) with respect to Trust 1. Further, T's executor allocates $200,000 of T's available GST tax exemption to the bequests to T's grandchildren, and the balance of T's exemption ($1,000,000) to Trust 1. If the requirements of paragraph (b) of this section are otherwise satisfied, Trust 1 and Trust 2 are recognized as separate trusts for GST tax purposes. Accordingly, the ''reverse'' QTIP election and allocation of GST tax exemption with respect to Trust 1 are recognized and effective for generation-skipping transfer tax purposes.

(c) *Cross reference.* For rules applicable to the qualified severance of trusts (whether or not includible in the transferor's gross estate), see § 26.2642–6.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

■ **Par. 7**. The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

■ **Par. 8**. In § 602.101, paragraph (b) is amended by adding entries in numerical order to the table to read as follows:

BILLING CODE 4830–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 229

Protection of Archaeological Resources: Uniform Regulations

AGENCY: Department of Defense.

ACTION: Final rule.

SUMMARY: This rule reinstates 32 CFR part 229, ''Protection of Archaeological Resources: Uniform Regulations,'' which was inadvertently removed by the Department of Defense in 2006. Except for certain formatting updates, the requirements in this document are consistent with those removed in 2006.

DATES: *Effective Date:* This rule is effective August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Ms. Maureen Sullivan, OSD, 703 604 5419, *Maureen.sullivan@osd.mil.*

SUPPLEMENTARY INFORMATION: On Friday, March 10, 2006 (71 FR 12280), the Department of Defense removed 32 CFR part 229. This was done because the corresponding DoD issuance, DoD Directive 4710.1, was canceled and removed from the DoD Directives System. The current corresponding issuance is DoD Instruction 4715.3, Environmental Conservation Program, issued May 3, 1996.

List of Subjects in 32 CFR Part 229

Administrative practice and procedure, Historic preservation, Indians—lands, Penalties, Public lands, Reporting and recordkeeping requirements.

■ Accordingly, subchapter M of title 32 of the Code of Federal Regulations, is amended to add part 229 to read as follows:

PART 229—PROTECTION OF ARCHAEOLOGICAL RESOURCES: UNIFORM REGULATIONS

Sec.

Note: The information collection and reporting requirements in this part were approved by the Office of Management and Budget under control number 1024–0037.

Authority: Pub. L. 96–95, 93 Stat. 721, as amended, 102 Stat. 2983 (16 U.S.C. 470aa–mm) Sec. 10(a). Related Authority: Pub. L. 59–209, 34 Stat. 225 (16 U.S.C. 432, 433); Pub. L. 86–523, 74 Stat. 220, 221 (16 U.S.C. 469), as amended, 88 Stat. 174 (1974); Pub. L. 89–665, 80 Stat. 915 (16 U.S.C. 470a–t), as amended, 84 Stat. 204 (1970), 87 Stat. 139 (1973), 90 Stat. 1320 (1976), 92 Stat. 3467 (1978), 94 Stat. 2987 (1980); Pub. L. 95–341, 92 Stat. 469 (42 U.S.C. 1996).

§ 229.1 Purpose.

(a) The regulations in this part implement provisions of the Archaeological Resources Protection Act of 1979, as amended (16 U.S.C. 470aa–mm) by establishing the uniform definitions, standards, and procedures to be followed by all Federal land managers in providing protection for archaeological resources, located on public lands and Indian lands of the United States. These regulations enable Federal land managers to protect archaeological resources, taking into consideration provisions of the American Indian Religious Freedom Act

(92 Stat. 469; 42 U.S.C. 1996), through permits authorizing excavation and/or removal of archaeological resources, through civil penalties for unauthorized excavation and/or removal, through provisions for the preservation of archaeological resource collections and data, and through provisions for ensuring confidentiality of information about archaeological resources when disclosure would threaten the archaeological resources.

(b) The regulations in this part do not impose any new restrictions on activities permitted under other laws, authorities, and regulations relating to mining, mineral leasing, reclamation, and other multiple uses of the public lands.

§ 229.2 Authority.

(a) The regulations in this part are promulgated pursuant to section 10(a) of the Archaeological Resources Protection Act of 1979 (16 U.S.C. 470ii), which requires that the Secretaries of the Interior, Agriculture and Defense and the Chairman of the Board of the Tennessee Valley Authority jointly develop uniform rules and regulations for carrying out the purposes of the Act.

(b) In addition to the regulations in this part, section 10(b) of the Act (16 U.S.C. 470ii) provides that each Federal land manager shall promulgate such rules and regulations, consistent with the uniform rules and regulations in this part, as may be necessary for carrying out the purposes of the Act.

§ 229.3 Definitions.

As used for purposes of this part:

(a) *Archaeological resource* means any material remains of human life or activities which are at least 100 years of age, and which are of archaeological interest.

(1) *Of archaeological interest* means capable of providing scientific or humanistic understandings of past human behavior, cultural adaptation, and related topics through the application of scientific or scholarly techniques such as controlled observation, contextual measurement, controlled collection, analysis, interpretation and explanation.

(2) *Material remains* means physical evidence of human habitation, occupation, use, or activity, including the site, location, or context in which such evidence is situated.

(3) The following classes of material remains (and illustrative examples), if they are at least 100 years of age, are of archaeological interest and shall be considered archaeological resources unless determined otherwise pursuant to paragraph (a)(4) or (a)(5) of this section:

(i) Surface or subsurface structures, shelters, facilities, or features (including, but not limited to, domestic structures, storage structures, cooking structures, ceremonial structures, artificial mounds, earthworks, fortifications, canals, reservoirs, horticultural/agricultural gardens or fields, bedrock mortars or grinding surfaces, rock alignments, cairns, trails, borrow pits, cooking pits, refuse pits, burial pits or graves, hearths, kilns, post molds, wall trenches, middens);

(ii) Surface or subsurface artifact concentrations or scatters;

(iii) Whole or fragmentary tools, implements, containers, weapons and weapon projectiles, clothing, and ornaments (including, but not limited to, pottery and other ceramics, cordage, basketry and other weaving, bottles and other glassware, bone, ivory, shell, metal, wood, hide, feathers, pigments, and flaked, ground, or pecked stone);

(iv) By-products, waste products, or debris resulting from manufacture or use of human-made or natural materials;

(v) Organic waste (including, but not limited to, vegetal and animal remains, coprolites);

(vi) Human remains (including, but not limited to, bone, teeth, mummified flesh, burials, cremations);

(vii) Rock carvings, rock paintings, intaglios and other works of artistic or symbolic representation;

(viii) Rockshelters and caves or portions thereof containing any of the above material remains;

(ix) All portions of shipwrecks (including, but not limited to, armaments, apparel, tackle, cargo);

(x) Any portion or piece of any of the foregoing.

(4) The following material remains shall not be considered of archaeological interest, and shall not be considered to be archaeological resources for purposes of the Act and this part, unless found in a direct physical relationship with archaeological resources as defined in this section:

(i) Paleontological remains;

(ii) Coins, bullets, and unworked minerals and rocks.

(5) The Federal land manager may determine that certain material remains, in specified areas under the Federal land manager's jurisdiction, and under specified circumstances, are not or are no longer of archaeological interest and are not to be considered archaeological resources under this part. Any determination made pursuant to this subparagraph shall be documented. Such determination shall in no way affect the Federal land manager's obligations under other applicable laws or regulations.

(6) For the disposition following lawful removal or excavations of Native American human remains and ''cultural items'', as defined by the Native American Graves Protection and Repatriation Act (NAGPRA; Pub. L. 101–601; 104 Stat. 3050; 25 U.S.C. 3001–13), the Federal land manager is referred to NAGPRA and its implementing regulations.

(b) *Arrowhead* means any projectile point which appears to have been designed for use with an arrow.

(c) *Federal land manager* means:

(1) With respect to any public lands, the secretary of the department, or the head of any other agency or instrumentality of the United States, having primary management authority over such lands, including persons to whom such management authority has been officially delegated;

(2) In the case of Indian lands, or any public lands with respect to which no department, agency or instrumentality has primary management authority, such term means the Secretary of the Interior;

(3) The Secretary of the Interior, when the head of any other agency or instrumentality has, pursuant to section 3(2) of the Act and with the consent of the Secretary of the Interior, delegated to the Secretary of the Interior the responsibilities (in whole or in part) in this part.

(d) *Public lands* means:

(1) Lands which are owned and administered by the United States as part of the national park system, the national wildlife refuge system, or the national forest system; and

(2) All other lands the fee title to which is held by the United States, except lands on the Outer Continental Shelf, lands under the jurisdiction of the Smithsonian Institution, and Indian lands.

(e) *Indian lands* means lands of Indian tribes, or Indian individuals, which are either held in trust by the United States or subject to a restriction against alienation imposed by the United States, except for subsurface interests not owned or controlled by an Indian tribe or Indian individual.

(f) *Indian tribe as defined in the Act* means any Indian tribe, band, nation, or other organized group or community, including any Alaska village or regional or village corporation as defined in, or established pursuant to, the Alaska Native Claims Settlement Act (85 Stat. 688). In order to clarify this statutory definition for purposes of this part, ''Indian tribe'' means:

(1) Any tribal entity which is included in the annual list of recognized tribes published in the **Federal Register** by the Secretary of the Interior pursuant to 25 CFR part 54;

(2) Any other tribal entity acknowledged by the Secretary of the Interior pursuant to 25 CFR part 54 since the most recent publication of the annual list; and

(3) Any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688), and any Alaska Native village or tribe which is recognized by the Secretary of the Interior as eligible for services provided by the Bureau of Indian Affairs.

(g) *Person* means an individual, corporation, partnership, trust, institution, association, or any other private entity, or any officer, employee, agent, department, or instrumentality of the United States, or of any Indian tribe, or of any State or political subdivision thereof.

(h) *State* means any of the fifty states, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands.

(i) *Act* means the Archaeological Resources Protection Act of 1979 (16 U.S.C. 470aa–mm).

§ 229.4 Prohibited acts and criminal penalties.

(a) Under section 6(a) of the Act, no person may excavate, remove, damage, or otherwise alter or deface, or attempt to excavate, remove, damage, or otherwise alter or deface any archaeological resource located on public lands or Indian lands unless such activity is pursuant to a permit issued under § 229.8 or exempted by § 229.5(b) of this part.

(b) No person may sell, purchase, exchange, transport, or receive any archaeological resource, if such resource was excavated or removed in violation of:

(1) The prohibitions contained in paragraph (a) of this section; or

(2) Any provision, rule, regulation, ordinance, or permit in effect under any other provision of Federal law.

(c) Under section (d) of the Act, any person who knowingly violates or counsels, procures, solicits, or employs any other person to violate any prohibition contained in section 6 (a), (b), or (c) of the Act will, upon conviction, be fined not more than $10,000.00 or imprisoned not more than one year, or both: provided, however, that if the commercial or archaeological value of the archaeological resources involved and the cost of restoration and repair of such resources exceeds the sum of $500.00, such person will be fined not more than $20,000.00 or imprisoned not more than two years, or both. In the case of a second or subsequent such violation upon conviction such person will be fined not more than $100,000.00, or imprisoned not more than 5 years, or both.

§ 229.5 Permit requirements and exceptions.

(a) Any person proposing to excavate and/or remove archaeological resources from public lands or Indian lands, and to carry out activities associated with such excavation and/or removal, shall apply to the Federal land manager for a permit for the proposed work, and shall not begin the proposed work until a permit has been issued. The Federal land manager may issue a permit to any qualified person, subject to appropriate terms and conditions, provided that the person applying for a permit meets conditions in § 229.8(a) of this part.

(b) Exceptions:

(1) No permit shall be required under this part for any person conducting activities on the public lands under other permits, leases, licenses, or entitlements for use, when those activities are exclusively for purposes other than the excavation and/or removal of archaeological resources, even though those activities might incidentally result in the disturbance of archaeological resources. General earth-moving excavation conducted under a permit or other authorization shall not be construed to mean excavation and/or removal as used in this part. This exception does not, however, affect the Federal land manager's responsibility to comply with other authorities which protect archaeological resources prior to approving permits, leases, licenses, or entitlements for use; any excavation and/or removal of archaeological resources required for compliance with those authorities shall be conducted in accordance with the permit requirements of this part.

(2) No permit shall be required under this part for any person collecting for private purposes any rock, coin, bullet, or mineral which is not an archaeological resource as defined in this part, provided that such collecting does not result in disturbance of any archaeological resource.

(3) No permit shall be required under this part or under section 3 of the Act of June 8, 1906 (16 U.S.C. 432), for the excavation or removal by any Indian tribe or member thereof of any archaeological resource located on Indian lands of such Indian tribe, except that in the absence of tribal law regulating the excavation or removal or archaeological resources on Indian lands, an individual tribal member shall be required to obtain a permit under this part;

(4) No permit shall be required under this part for any person to carry out any archaeological activity authorized by a permit issued under section 3 of the Act of June 8, 1906 (16 U.S.C. 432), before the enactment of the Archaeological Resources Protection Act of 1979. Such permit shall remain in effect according to its terms and conditions until expiration.

(5) No permit shall be required under section 3 of the Act of June 8, 1906 (16 U.S.C. 432) for any archaeological work for which a permit is issued under this part.

(c) Persons carrying out official agency duties under the Federal land manager's direction, associated with the management of archaeological resources, need not follow the permit application procedures of § 229.6. However, the Federal land manager shall insure that provisions of § 229.8 and § 229.9 have been met by other documented means, and that any official duties which might result in harm to or destruction of any Indian tribal religious or cultural site, as determined by the Federal land manager, have been the subject of consideration under § 229.7.

(d) Upon the written request of the Governor of any State, on behalf of the State or its educational institutions, the Federal land manager shall issue a permit, subject to the provisions of §§ 229.5(b)(5), 229.7, 229.8(a)(3), (4), (5), (6), and (7), 229.9, 229.10, 229.12, and 229.13(a) to such Governor or to such designee as the Governor deems qualified to carry out the intent of the Act, for purposes of conducting archaeological research, excavating and/or removing archaeological resources, and safeguarding and preserving any materials and data collected in a university, museum, or other scientific or educational institution approved by the Federal land manager.

(e) Under other statutory, regulatory, or administrative authorities governing the use of public lands and Indian lands, authorizations may be required for activities which do not require a permit under this part. Any person wishing to conduct on public lands or Indian lands any activities related to but believed to fall outside the scope of this part should consult with the Federal land manager, for the purpose of determining whether any authorization is required, prior to beginning such activities.

§ 229.6 Application for permits and information collection.

(a) Any person may apply to the appropriate Federal land manager for a permit to excavate and/or remove archaeological resources from public lands or Indian lands and to carry out activities associated with such excavation and/or removal.

(b) Each application for a permit shall include:

(1) The nature and extent of the work proposed, including how and why it is proposed to be conducted, proposed time of performance, locational maps, and proposed outlet for public written dissemination of the results.

(2) The name and address of the individual(s) proposed to be responsible for conducting the work, institutional affiliation, if any, and evidence of education, training, and experience in accord with the minimal qualifications listed in § 229.8(a).

(3) The name and address of the individual(s), if different from the individual(s) named in paragraph (b)(2) of this section, proposed to be responsible for carrying out the terms and conditions of the permit.

(4) Evidence of the applicant's ability to initiate, conduct, and complete the proposed work, including evidence of logistical support and laboratory facilities.

(5) Where the application is for the excavation and/or removal of archaeological resources on public lands, the names of the university, museum, or other scientific or educational institution in which the applicant proposes to store all collections, and copies of records, data, photographs, and other documents derived from the proposed work. Applicants shall submit written certification, signed by an authorized official of the institution, of willingness to assume curatorial responsibility for the collections, records, data, photographs and other documents and to safeguard and preserve these materials as property of the United States.

(6) Where the application is for the excavation and/or removal of archaeological resources on Indian lands, the name of the university, museum, or other scientific or educational institution in which the applicant proposes to store copies of records, data, photographs, and other documents derived from the proposed work, and all collections in the event the Indian owners do not wish to take custody or otherwise dispose of the archaeological resources. Applicants shall submit written certification, signed by an authorized official of the institution, or willingness to assume curatorial responsibility for the collections, if applicable, and/or the records, data, photographs, and other documents derived from the proposed work.

(c) The Federal land manager may require additional information, pertinent to land management responsibilities, to be included in the application for permit and shall so inform the applicant.

(d) *Paperwork Reduction Act.* The information collection requirement contained in this section of these regulations has been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1024–0037. The purpose of the information collection is to meet statutory and administrative requirements in the public interest. The information will be used to assist Federal land managers in determining that applicants for permits are qualified, that the work proposed would further archaeological knowledge, that archaeological resources and associated records and data will be properly preserved, and that the permitted activity would not conflict with the management of the public lands involved. Response to the information requirement is necessary in order for an applicant to obtain a benefit.

§ 229.7 Notification to Indian tribes of possible harm to, or destruction of, sites on public lands having religious or cultural importance.

(a) If the issuance of a permit under this part may result in harm to, or destruction of, any Indian tribal religious or cultural site on public lands, as determined by the Federal land manager, at least 30 days before issuing such a permit the Federal land manager shall notify any Indian tribe which may consider the site as having religious or cultural importance. Such notice shall not be deemed a disclosure to the public for purposes of section 9 of the Act.

(1) Notice by the Federal land manager to any Indian tribe shall be sent to the chief executive officer or other designated official of the tribe. Indian tribes are encouraged to designate a tribal official to be the focal point for any notification and discussion between the tribe and the Federal land manager.

(2) The Federal land manager may provide notice to any other Native American group that is known by the Federal land manager to consider sites potentially affected as being of religious or cultural importance.

(3) Upon request during the 30-day period, the Federal land manager may meet with official representatives of any Indian tribe or group to discuss their interests, including ways to avoid or mitigate potential harm or destruction such as excluding sites from the permit area. Any mitigation measures which are adopted shall be incorporated into the terms and conditions of the permit under § 229.9.

(4) When the Federal land manager determines that a permit applied for under this part must be issued immediately because of an imminent threat of loss or destruction of an archaeological resource, the Federal land manager shall so notify the appropriate tribe.

(b)(1) In order to identify sites of religious or cultural importance, the Federal land manager shall seek to identify all Indian tribes having aboriginal or historic ties to the lands under the Federal land manager's jurisdiction and seek to determine, from the chief executive officer or other designated official of any such tribe, the location and nature of specific sites of religious or cultural importance so that such information may be on file for land management purposes. Information on sites eligible for or included in the National Register of Historic Places may be withheld from public disclosure pursuant to section 304 of the Act of October 15, 1966, as amended (16 U.S.C. 470w–3).

(2) If the Federal land manager becomes aware of a Native American group that is not an Indian tribe as defined in this part but has aboriginal or historic ties to public lands under the Federal land manager's jurisdiction, the Federal land manager may seek to communicate with official representatives of that group to obtain information on sites they may consider to be of religious or cultural importance.

(3) The Federal land manager may enter into agreement with any Indian tribe or other Native American group for determining locations for which such tribe or group wishes to receive notice under this section.

(4) The Federal land manager should also seek to determine, in consultation with official representatives of Indian tribes or other Native American groups, what circumstances should be the subject of special notification to the tribe or group after a permit has been issued. Circumstances calling for notification might include the discovery of human remains. When circumstances for special notification have been determined by the Federal land manager, the Federal land manager will include a requirement in the terms and conditions of permits, under § 229.9(c), for permittees to notify the Federal land

manager immediately upon the occurrence of such circumstances. Following the permittee's notification, the Federal land manager will notify and consult with the tribe or group as appropriate. In cases involving Native American human remains and other ''cultural items'', as defined by NAGPRA, the Federal land manager is referred to NAGPRA and its implementing

§ 229.8 Issuance of permits.

(a) The Federal land manager may issue a permit, for a specified period of time appropriate to the work to be conducted, upon determining that:

(1) The applicant is appropriately qualified, as evidenced by training, education, and/or experience, and possesses demonstrable competence in archaeological theory and methods, and in collecting, handling, analyzing, evaluating, and reporting archaeological data, relative to the type and scope of the work proposed, and also meets the following minimum qualifications:

(i) A graduate degree in anthropology or archaeology, or equivalent training and experience;

(ii) The demonstrated ability to plan, equip, staff, organize, and supervise activity of the type and scope proposed;

(iii) The demonstrated ability to carry research to completion, as evidenced by timely completion of theses, research reports, or similar documents;

(iv) Completion of at least 16 months of professional experience and/or specialized training in archaeological field, laboratory, or library research, administration, or management, including at least 4 months experience and/or specialized training in the kind of activity the individual proposes to conduct under authority of a permit; and

(v) Applicants proposing to engage in historical archaeology should have had at least one year of experience in research concerning archaeological resources of the historic period. Applicants proposing to engage in prehistoric archaeology should have had at least one year of experience in research concerning archaeological resources of the prehistoric period.

(2) The proposed work is to be undertaken for the purpose of furthering archaeological knowledge in the public interest, which may include but need not be limited to, scientific or scholarly research, and preservation of archaeological data;

(3) The proposed work, including time, scope, location, and purpose, is not inconsistent with any management plan or established policy, objectives, or requirements applicable to the management of the public lands concerned;

(4) Where the proposed work consists of archaeological survey and/or data recovery undertaken in accordance with other approved uses of the public lands or Indian lands, and the proposed work has been agreed to in writing by the Federal land manager pursuant to section 106 of the National Historic Preservation Act (16 U.S.C. 470f), paragraphs (a) (2) and (a) (3) shall be deemed satisfied by the prior approval.

(5) Written consent has been obtained, for work proposed on Indian lands, from the Indian landowner and the Indian tribe having jurisdiction over such lands;

(6) Evidence is submitted to the Federal land manager that any university, museum, or other scientific or educational institution proposed in the application as the repository possesses adequate curatorial capability for safeguarding and preserving the archaeological resources and all associated records; and

(7) The applicant has certified that, not later than 90 days after the date the final report is submitted to the Federal land manager, the following will be delivered to the appropriate official of the approved university, museum, or other scientific or educational institution, which shall be named in the permit:

(i) All artifacts, samples, collections, and copies of records, data, photographs, and other documents resulting from work conducted under the requested permit where the permit is for the excavation and/or removal of archaeological resources from public lands.

(ii) All artifacts, samples and collections resulting from work under the requested permit for which the custody or disposition is not undertaken by the Indian owners, and copies of records, data, photographs, and other documents resulting from work conducted under the requested permit, where the permit is for the excavation and/or removal of archaeological resources from Indian lands.

(b) When the area of the proposed work would cross jurisdictional boundaries, so that permit applications must be submitted to more than one Federal land manager, the Federal land manager shall coordinate the review and evaluation of applications and the issuance of permits.

§ 229.9 Terms and conditions of permits.

(a) In all permits issued, the Federal land manager shall specify:

(1) The nature and extent of work allowed and required under the permit, including the time, duration, scope, location, and purpose of the work;

(2) The name of the individual(s) responsible for conducting the work and, if different, the name of the individual(s) responsible for carrying out the terms and conditions of the permit;

(3) The name of any university, museum, or other scientific or educational institutions in which any collected materials and data shall be deposited; and

(4) Reporting requirements.

(b) The Federal land manager may specify such terms and conditions as deemed necessary, consistent with this part, to protect public safety and other values and/or resources, to secure work areas, to safeguard other legitimate land uses, and to limit activities incidental to work authorized under a permit.

(c) The Federal land manager shall include in permits issued for archaeological work on Indian lands such terms and conditions as may be requested by the Indian landowner and the Indian tribe having jurisdiction over the lands, and for archaeological work on public lands shall include such terms and conditions as may have been developed pursuant to § 229.7.

(d) Initiation of work or other activities under the authority of a permit signifies the permittee's acceptance of the terms and conditions of the permit.

(e) The permittee shall not be released from requirements of a permit until all outstanding obligations have been satisfied, whether or not the term of the permit has expired.

(f) The permittee may request that the Federal land manager extend or modify a permit.

(g) The permittee's performance under any permit issued for a period greater than 1 year shall be subject to review by the Federal land manager, at least annually.

§ 229.10 Suspension and revocation of permits.

(a) *Suspension or revocation for cause.* (1) The Federal land manager may suspend a permit issued pursuant to this part upon determining that the permittee has failed to meet any of the terms and conditions of the permit or has violated any prohibition of the Act or § 229.4. The Federal land manager shall provide written notice to the permittee of the suspension, the cause thereof, and the requirements which must be met before the suspension will be removed.

(2) The Federal land manager may revoke a permit upon assessment of a civil penalty under § 229.15 upon the permittee's conviction under section 6

of the Act, or upon determining that the permittee has failed after notice under this section to correct the situation which led to suspension of the permit.

(b) *Suspension or revocation for management purposes.* The Federal land manager may suspend or revoke a permit, without liability to the United States, its agents, or employees, when continuation of work under the permit would be in conflict with management requirements not in effect when the permit was issued. The Federal land manager shall provide written notice to the permittee stating the nature of and basis for the suspension or revocation.

§ 229.11 Appeals relating to permits.

Any affected person may appeal permit issuance, denial of permit issuance, suspension, revocation, and terms and conditions of a permit through existing administrative appeal procedures, or through procedures which may be established by the Federal land manager pursuant to section 10(b) of the Act and this part.

§ 229.12 Relationship to section 106 of the National Historic Preservation Act.

Issuance of a permit in accordance with the Act and this part does not constitute an undertaking requiring compliance with section 106 of the Act of October 15, 1966 (16 U.S.C. 470f). However, the mere issuance of such a permit does not excuse the Federal land manager from compliance with section 106 where otherwise required.

§ 229.13 Custody of archaeological resources.

(a) Archaeological resources excavated or removed from the public lands remain the property of the United States.

(b) Archaeological resources excavated or removed from Indian lands remain the property of the Indian or Indian tribe having rights of ownership over such resources.

(c) The Secretary of the Interior may promulgate regulations providing for the exchange of archaeological resources among suitable universities, museums, or other scientific or educational institutions, for the ultimate disposition of archaeological resources, and for standards by which archaeological resources shall be preserved and maintained, when such resources have been excavated or removed from public lands and Indian lands.

(d) In the absence of regulations referenced in paragraph (c) of this section, the Federal land manager may provide for the exchange of archaeological resources among suitable universities, museums, or other scientific or educational institutions, when such resources have been excavated or removed from public lands under the authority of a permit issued by the Federal land manager.

(e) Notwithstanding the provisions of paragraphs (a) through (d) of this section, the Federal land manager will follow the procedures required by NAGPRA and its implementing regulations for determining the disposition of Native American human remains and other ''cultural items'', as defined by NAGPRA, that have been excavated, removed, or discovered on public lands.

§ 229.14 Determination of archaeological or commercial value and cost of restoration and repair.

(a) *Archaeological value.* For purposes of this part, the archaeological value of any archaeological resource involved in a violation of the prohibitions in § 229.4 of this part or conditions of a permit issued pursuant to this part shall be the value of the information associated with the archaeological resource. This value shall be appraised in terms of the costs of the retrieval of the scientific information which would have been obtainable prior to the violation. These costs may include, but need not be limited to, the cost of preparing a research design, conducting field work, carrying out laboratory analysis, and preparing reports as would be necessary to realize the information potential.

(b) *Commercial value.* For purposes of this part, the commercial value of any archaeological resource involved in a violation of the prohibitions in § 229.4 of this part or conditions of a permit issued pursuant to this part shall be its fair market value. Where the violation has resulted in damage to the archaeological resource, the fair market value should be determined using the condition of the archaeological resource prior to the violation, to the extent that its prior condition can be ascertained.

(c) *Cost of restoration and repair.* For purposes of this part, the cost of restoration and repair of archaeological resources damaged as a result of a violation of prohibitions or conditions pursuant to this part, shall be the sum of the costs already incurred for emergency restoration or repair work, plus those costs projected to be necessary to complete restoration and repair, which may include, but need not be limited to, the costs of the following:

(1) Reconstruction of the archaeological resource;

(2) Stabilization of the archaeological resource;

(3) Ground contour reconstruction and surface stabilization;

(4) Research necessary to carry out reconstruction or stabilization;

(5) Physical barriers or other protective devices, necessitated by the disturbance of the archaeological resource, to protect it from further disturbance;

(6) Examination and analysis of the archaeological resource including recording remaining archaeological information, where necessitated by disturbance, in order to salvage remaining values which cannot be otherwise conserved;

(7) Reinterment of human remains in accordance with religious custom and State, local, or tribal law, where appropriate, as determined by the Federal land manager.

(8) Preparation of reports relating to any of the above activities.

§ 229.15 Assessment of civil penalties.

(a) The Federal land manager may assess a civil penalty against any person who has violated any prohibition contained in § 229.4 or who has violated any term or condition included in a permit issued in accordance with the Act and this part.

(b) *Notice of violation.* The Federal land manager shall serve a notice of violation upon any person believed to be subject to a civil penalty, either in person or by registered or certified mail (return receipt requested). The Federal land manager shall include in the notice:

(1) A concise statement of the facts believed to show a violation;

(2) A specific reference to the provision(s) of this part or to a permit issued pursuant to this part allegedly violated;

(3) The amount of penalty proposed to be assessed, including any initial proposal to mitigate or remit where appropriate, or a statement that notice of a proposed penalty amount will be served after the damages associated with the alleged violation have been ascertained;

(4) Notification of the right to file a petition for relief pursuant to paragraph (d) of this section, or to await the Federal land manager's notice of assessment, and to request a hearing in accordance with paragraph (g) of this section. The notice shall also inform the person of the right to seek judicial review of any final administrative decision assessing a civil penalty.

(c) The person served with a notice of violation shall have 45 calendar days from the date of its service (or the date of service of a proposed penalty amount,

if later) in which to respond. During this time the person may:

(1) Seek informal discussions with the Federal land manager;

(2) File a petition for relief in accordance with paragraph (d) of this section;

(3) Take no action and await the Federal land manager's notice of assessment;

(4) Accept in writing or by payment the proposed penalty, or any mitigation or remission offered in the notice. Acceptance of the proposed penalty or mitigation or remission shall be deemed a waiver of the notice of assessment and of the right to request a hearing under paragraph (g) of this section.

(d) *Petition for relief.* The person served with a notice of violation may request that no penalty be assessed or that the amount be reduced, by filing a petition for relief with the Federal land manager within 45 calendar days of the date of service of the notice of violation (or of a proposed penalty amount, if later). The petition shall be in writing and signed by the person served with the notice of violation. If the person is a corporation, the petition must be signed by an officer authorized to sign such documents. The petition shall set forth in full the legal or factual basis for the requested relief.

(e) *Assessment of penalty.* (1) The Federal land manager shall assess a civil penalty upon expiration of the period for filing a petition for relief, upon completion of review of any petition filed, or upon completion of informal discussions, whichever is later.

(2) The Federal land manager shall take into consideration all available information, including information provided pursuant to paragraphs (c) and (d) of this section or furnished upon further request by the Federal land manager.

(3) If the facts warrant a conclusion that no violation has occurred, the Federal land manager shall so notify the person served with a notice of violation, and no penalty shall be assessed. (4) Where the facts warrant a conclusion that a violation has occurred, the Federal land manager shall determine a penalty amount in accordance with § 229.16.

(f) *Notice of assessment.* The Federal land manager shall notify the person served with a notice of violation of the penalty amount assessed by serving a written notice of assessment, either in person or by registered or certified mail (return receipt requested). The Federal land manager shall include in the notice of assessment:

(1) The facts and conclusions from which it was determined that a violation did occur;

(2) The basis in § 229.16 for determining the penalty amount assessed and/or any offer to mitigate or remit the penalty; and

(3) Notification of the right to request a hearing, including the procedures to be followed, and to seek judicial review of any final administrative decision assessing a civil penalty.

(g) *Hearings.* (1) Except where the right to request a hearing is deemed to have been waived as provided in paragraph (c)(4) of this section, the person served with a notice of assessment may file a written request for a hearing with the adjudicatory body specified in the notice. The person shall enclose with the request for hearing a copy of the notice of assessment, and shall deliver the request as specified in the notice of assessment, personally or by registered or certified mail (return receipt requested).

(2) Failure to deliver a written request for a hearing within 45 days of the date of service of the notice of assessment shall be deemed a waiver of the right to a hearing.

(3) Any hearing conducted pursuant to this section shall be held in accordance with 5 U.S.C. 554. In any such hearing, the amount of civil penalty assessed shall be determined in accordance with this part, and shall not be limited by the amount assessed by the Federal land manager under paragraph (f) of this section or any offer of mitigation or remission made by the Federal land manager.

(h) *Final administrative decision.* (1) Where the person served with a notice of violation has accepted the penalty pursuant to paragraph (c)(4) of this section, the notice of violation shall constitute the final administrative decision;

(2) Where the person served with a notice of assessment has not filed a timely request for a hearing pursuant to paragraph (g)(1) of this section, the notice of assessment shall constitute the final administrative decision;

(3) Where the person served with a notice of assessment has filed a timely request for a hearing pursuant to paragraph (g)(1) of this section, the decision resulting from the hearing or any applicable administrative appeal therefrom shall constitute the final administrative decision.

(i) *Payment of penalty.* (1) The person assessed a civil penalty shall have 45 calendar days from the date of issuance of the final administrative decision in which to make full payment of the penalty assessed, unless a timely request for appeal has been filed with a U.S. District Court as provided in section 7(b)(1) of the Act.

(2) Upon failure to pay the penalty, the Federal land manager may request the Attorney General to institute a civil action to collect the penalty in a U.S. District Court for any district in which the person assessed a civil penalty is found, resides, or transacts business. Where the Federal land manager is not represented by the Attorney General, a civil action may be initiated directly by the Federal land manager.

(j) *Other remedies not waived.* Assessment of a penalty under this section shall not be deemed a waiver of the right to pursue other available legal or administrative remedies.

§ 229.16 Civil penalty amounts.

(a) *Maximum amount of penalty.* (1) Where the person being assessed a civil penalty has not committed any previous violation of any prohibition in § 229.4 or of any term or condition included in a permit issued pursuant to this part, the maximum amount of the penalty shall be the full cost of restoration and repair of archaeological resources damaged plus the archaeological or commercial value of archaeological resources destroyed or not recovered.

(2) Where the person being assessed a civil penalty has committed any previous violation of any prohibition in § 229.4 or of any term or condition included in a permit issued pursuant to this part, the maximum amount of the penalty shall be double the cost of restoration and repair plus double the archaeological or commercial value of archaeological resources destroyed or not recovered.

(3) Violations limited to the removal of arrowheads located on the surface of the ground shall not be subject to the penalties prescribed in this section.

(b) *Determination of penalty amount, mitigation, and remission.* The Federal land manager may assess a penalty amount less than the maximum amount of penalty and may offer to mitigate or remit the penalty.

(1) Determination of the penalty amount and/or a proposal to mitigate or remit the penalty may be based upon any of the following factors:

(i) Agreement by the person being assessed a civil penalty to return to the Federal land manager archaeological resources removed from public lands or Indian lands;

(ii) Agreement by the person being assessed a civil penalty to assist the Federal land manager in activity to preserve, restore, or otherwise contribute to the protection and study of

archaeological resources on public lands or Indian lands;

(iii) Agreement by the person being assessed a civil penalty to provide information which will assist in the detection, prevention, or prosecution of violations of the Act or this part;

(iv) Demonstration of hardship or inability to pay, provided that this factor shall only be considered when the person being assessed a civil penalty has not been found to have previously violated the regulations in this part;

(v) Determination that the person being assessed a civil penalty did not willfully commit the violation;

(vi) Determination that the proposed penalty would constitute excessive punishment under the circumstances;

(vii) Determination of other mitigating circumstances appropriate to consideration in reaching a fair and expeditious assessment.

(2) When the penalty is for a violation on Indian lands, the Federal land manager shall consult with and consider the interests of the Indian landowner and the Indian tribe having jurisdiction over the Indian lands prior to proposing to mitigate or remit the penalty.

(3) When the penalty is for a violation which may have had an effect on a known Indian tribal religious or cultural site on public lands, the Federal land manager should consult with and consider the interests of the affected tribe(s) prior to proposing to mitigate or remit the penalty.

§ 229.17 Other penalties and rewards.

(a) Section 6 of the Act contains criminal prohibitions and provisions for criminal penalties. Section 8(b) of the Act provides that archaeological resources, vehicles, or equipment involved in a violation may be subject to forfeiture.

(b) Section 8(a) of the Act provides for rewards to be made to persons who furnish information which leads to conviction for a criminal violation or to assessment of a civil penalty. The Federal land manager may certify to the Secretary of the Treasury that a person is eligible to receive payment. Officers and employees of Federal, State, or local government who furnish information or render service in the performance of their official duties, and persons who have provided information under § 229.16(b)(1)(iii) shall not be certified eligible to receive payment of rewards.

(c) In cases involving Indian lands, all civil penalty monies and any item forfeited under the provisions of this section shall be transferred to the appropriate Indian or Indian tribe.

§ 229.18 Confidentiality of archaeological resource information.

(a) The Federal land manager shall not make available to the public, under subchapter II of chapter 5 of title 5 of the U.S. Code or any other provision of law, information concerning the nature and location of any archaeological resource, with the following exceptions:

(1) The Federal land manager may make information available, provided that the disclosure will further the purposes of the Act and this part, or the Act of June 27, 1960, as amended (16 U.S.C. 469–469c), without risking harm to the archaeological resource or to the site in which it is located.

(2) The Federal land manager shall make information available, when the Governor of any State has submitted to the Federal land manager a written request for information, concerning the archaeological resources within the requesting Governor's State, provided that the request includes:

(i) The specific archaeological resource or area about which information is sought;

(ii) The purpose for which the information is sought; and

(iii) The Governor's written commitment to adequately protect the confidentiality of the information.

(b) [Reserved]

§ 229.19 Report.

(a) Each Federal land manager, when requested by the Secretary of the Interior, will submit such information as is necessary to enable the Secretary to comply with section 13 of the Act and comprehensively report on activities carried out under provisions of the Act.

(b) The Secretary of the Interior will include in the annual comprehensive report, submitted to the Committee on Interior and Insular Affairs of the United States House of Representatives and to the Committee on Energy and Natural Resources of the United States Senate under section 13 of the Act, information on public awareness programs submitted by each Federal land manager under § 229.20(b). Such submittal will fulfill the Federal land manager's responsibility under section 10(c) of the Act to report on public awareness programs.

(c) The comprehensive report by the Secretary of the Interior also will include information on the activities carried out under section 14 of the Act. Each Federal land manager, when requested by the Secretary, will submit any available information on surveys and schedules and suspected violations in order to enable the Secretary to summarize in the comprehensive report actions taken pursuant to section 14 of the Act.

§ 229.20 Public awareness programs.

(a) Each Federal land manager will establish a program to increase public awareness of the need to protect important archaeological resources located on public and Indian lands. Educational activities required by section 10(c) of the Act should be incorporated into other current agency public education and interpretation programs where appropriate.

(b) Each Federal land manager annually will submit to the Secretary of the Interior the relevant information on public awareness activities required by section 10(c) of the Act for inclusion in the comprehensive report on activities required by section 13 of the Act.

§ 229.21 Surveys and schedules.

(a) The Secretaries of the Interior, Agriculture, and Defense and the Chairman of the Board of the Tennessee Valley Authority will develop plans for surveying lands under each agency's control to determine the nature and extent of archaeological resources pursuant to section 14(a) of the Act. Such activities should be consistent with Federal agency planning policies and other historic preservation program responsibilities required by 16 U.S.C. 470 *et seq.* Survey plans prepared under this section will be designed to comply with the purpose of the Act regarding the protection of archaeological resources.

(b) The Secretaries of the Interior, Agriculture, and Defense and the Chairman of the Tennessee Valley Authority will prepare schedules for surveying lands under each agency's control that are likely to contain the most scientifically valuable archaeological resources pursuant to section 14(b) of the Act. Such schedules will be developed based on objectives and information identified in survey plans described in paragraph (a) of this section and implemented systematically to cover areas where the most scientifically valuable archaeological resources are likely to exist.

(c) Guidance for the activities undertaken as part of paragraphs (a) through (b) of this section is provided by the Secretary of the Interior's Standards and Guidelines for Archeology and Historic Preservation.

(d) Other Federal land managing agencies are encouraged to develop plans for surveying lands under their jurisdictions and prepare schedules for surveying to improve protection and management of archaeological resources.

(e) The Secretaries of the Interior, Agriculture, and Defense and the Chairman of the Tennessee Valley Authority will develop a system for documenting and reporting suspected violations of the various provisions of the Act. This system will reference a set of procedures for use by officers, employees, or agents of Federal agencies to assist them in recognizing violations, documenting relevant evidence, and reporting assembled information to the appropriate authorities. Methods employed to document and report such violations should be compatible with existing agency reporting systems for documenting violations of other appropriate Federal statutes and regulations. Summary information to be included in the Secretary's comprehensive report will be based upon the system developed by each Federal land manager for documenting suspected violations.

Dated: July 25, 2007.

BILLING CODE 5001–06–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[CGD05–07–025]

RIN 1625–AA09

Drawbridge Operation Regulations; Wicomico River (North Prong), Salisbury, MD

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the drawbridge operation regulations of two Maryland Department of Transportation (MDOT) bridges: The Main Street and U.S. 50 Bridges, at mile 22.4, across Wicomico River (North Prong) in Salisbury, MD. This final rule will allow the bridges to open on signal if four hours advance notice is given and eliminate the continual attendance of draw tender services while still providing the reasonable needs of navigation.

DATES: This rule is effective September 4, 2007.

ADDRESSES: Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, are part of docket CGD05–07–025 and are available for inspection or copying at Commander (dpb), Fifth Coast Guard District, Federal Building, 1st Floor, 431 Crawford Street, Portsmouth, VA 23704–5004 between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays. The Fifth Coast Guard District maintains the public docket for this rulemaking.

FOR FURTHER INFORMATION CONTACT: Waverly W. Gregory, Jr., Bridge Administrator, Fifth Coast Guard District, at (757) 398–6222.

SUPPLEMENTARY INFORMATION:

Regulatory History

On April 5, 2007, we published a notice of proposed rulemaking (NPRM) entitled ''Drawbridge Operation Regulations; Wicomico River (North Prong), Salisbury, MD'' in the **Federal Register** (72 FR 16752). We received no comments on the proposed rule. No public meeting was requested, and none was held.

Background and Purpose

The State Highway Administration (SHA), a division under MDOT, is responsible for the operation of both the Main Street and U.S. 50 Bridges, at mile 22.4, across Wicomico River in Salisbury. SHA requested advance notification for vessel openings and a reduction in draw tender services due to the infrequency of requests for vessel openings of the drawbridges.

The Main Street and U.S. 50 Bridges have vertical clearances of four feet, above mean high water, in the closed-to-navigation position. The existing operating regulations for these drawbridges are set out in 33 CFR § 117.579, which requires the draws to open on signal, except from 7 a.m. to 9 a.m., from 12 noon to 1 p.m. and from 4 p.m. to 6 p.m., the draw need not be opened for the passage of vessels, except for tugs with tows, if at least three hours of advance notice is given, and the reason for passage through the bridges during a closure period is due to delay caused by inclement weather or other emergency or unforeseen circumstances.

Bridge opening data supplied by SHA revealed a significant decrease in yearly openings. In the past three years from 2004 to 2006, the bridges opened for vessels 522, 282 and 157 times, respectively. Due to the infrequency of requests for vessel openings of the drawbridges, SHA requested to change the current operating regulations by requiring the draw spans to open on signal if at least four hours notice is given year-round by calling the contact telephone number at (410) 430–7561.

Discussion of Comments and Changes

The Coast Guard did not receive any comments on the NPRM. Therefore, no changes were made to the final rule.

Discussion of Rule

The Coast Guard is amending 33 CFR 117.579, which governs the Main Street and U.S. 50 Bridges, by revising the paragraph to read that the draws shall open on signal if at least four hours notice is given by calling the telephone contact number at (410) 430–7461. Under this revision, there will no longer be closure periods. All vessels will be required to provide at least four hours notice.

Regulatory Evaluation

This rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not ''significant'' under the regulatory policies and procedures of the Department of Homeland Security (DHS).

This conclusion is based on the fact that these changes have only a minimal impact on maritime traffic transiting the bridges. Mariners will no longer have to wait for closure periods to end, which will allow them to plan their trips without requiring a stop, so long as the four hour notice is provided. ″

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities.

This conclusion is based on the fact the rule would not have a significant economic impact on a substantial number of small entities because the rule relieves restrictions to the movement of navigation, as mariners will no longer have to wait for closure periods to end, which will allow them to plan their trips without requiring a stop, so long as the four hour notice is provided.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule so that they can better evaluate its effects on them and participate in the rulemaking process. No assistance was requested from any small entity.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminates ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.1D and Department of Homeland Security Management Directive 5100.1, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (32)(e) of the Instruction, from further environmental documentation because it has been determined that the promulgation of operating regulations for drawbridges are categorically excluded.

List of Subjects in 33 CFR Part 117

Bridges.

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; Department of Homeland Security Delegation No. 0170.1; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Pub. L. 102–587, 106 Stat. 5039.

■ 2. Revise § 117.579 to read as follows:

§ 117.579 Wicomico River (North Prong).

The draws of the Main Street and U.S. 50 bridges, mile 22.4, Salisbury, Maryland shall open on signal if at least four hours notice is given by calling the telephone contact number at (410) 430–7461.

Dated: July 24, 2007.

Fred M. Rosa, Jr.,

Rear Admiral, United States Coast Guard, Commander, Fifth Coast Guard District.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. COTP North Carolina CGD05–07–071]

RIN 1625–AA00

Safety Zone for Marine Events; New River, Jacksonville, NC

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary Safety Zone during the ''National Night Out'', an event to be held August 7, 2007 on the New River, Jacksonville, North Carolina. This safety zone is necessary to provide for the safety of life on navigable waters during the event. This action is intended to temporarily restrict vessel traffic in the New River to accommodate a Helicopter Search and Rescue demonstration and a fireworks display.

DATES: This rule is effective from 5:30 p.m. to 10 p.m. on August 7, 2007.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket CGD05–07–071 and are available for inspection or copying at Commander (dpi), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004, between 9 a.m. and 2 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: D. M. Sens, Project Manager, Inspections and Investigations Branch, at (757) 398–6204.

SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM. Publishing an NPRM would be impracticable and contrary to public interest because immediate action is needed to minimize potential danger to the public during the event. The necessary information to determine whether the marine event poses a threat to persons and vessels was not provided to the Coast Guard in sufficient time to publish an NPRM. The potential dangers posed by the helicopter demonstration and pyrotechnic fireworks display, make a safety zone necessary to provide for the safety of spectator craft and other vessels transiting the event area. The Coast Guard will issue a broadcast notice to mariners to advise mariners of the restriction and on scene Coast Guard and local law enforcement vessels will also provide notice to mariners.

Under 5 U.S.C. 553(d)(3) and for the same reasons, the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date would be contrary to the public interest, because immediate action is needed to ensure the safety of the event participants, spectator craft and other vessels transiting the event area. Advance notifications will be made to users of the New River, via marine information broadcasts, local notice to mariners, commercial radio stations and area newspapers.

Background and Purpose

On August 7, 2007, the Jacksonville Police Department will sponsor the ''National Night Out'' Helicopter Search and Rescue (SAR) demonstration and fireworks display. These events will take place on the New River near position 34°44′45″ N 077°26′18″ W. The Helicopter SAR Demonstration will consist of a basket hoist from a Coast Guard small boat. The fireworks display will be launched from shore and will have a fallout area over the waters of the New River. The safety zone is necessary to safe guard the SAR demonstration team as well as the spectator fleet expected by the sponsor. Due to the need for vessel control during these events, vessel traffic will be temporarily restricted to provide for the safety of SAR demonstration team, spectators and transiting vessels.

Discussion of Rule

The Coast Guard is establishing a safety zone on specified waters of the New River, Jacksonville, North Carolina. The regulated area includes all waters within a 300 yard radius of position 34°44′45″ N 077°26′18″ W or approximately one half nautical mile south of the Hwy 17 bridge, Jacksonville, North Carolina. The safety zone will be in effect from 5:30 p.m. to 10 p.m. on August 7, 2007. The effect will be to restrict general navigation in the regulated area during the SAR demonstration and the fireworks display. Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area during the enforcement period. The Patrol Commander will notify the public of specific enforcement times by Marine Radio Safety Broadcast. These regulations are needed to control vessel traffic during the event to enhance the safety of participants, spectators and transiting vessels.

Regulatory Evaluation

This rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order.

Although this regulation restricts vessel traffic from transiting the New River, near Jacksonville, North Carolina during the event, the effect of this regulation will not be significant due to the limited duration that the safety zone will be in effect and the extensive advance notifications that will be made to the maritime community via marine information broadcasts and area newspapers so mariners can adjust their plans accordingly.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule will affect the following entities, some of which may be small entities: The owners or operators of vessels intending to transit the New River, near Jacksonville, North Carolina during the event.

This rule will not have a significant economic impact on a substantial number of small entities for the following reasons. This rule will be in effect for only a short period, from 5:30 p.m. to 10 p.m. on August 7, 2007. Before the enforcement period, we will issue maritime advisories so mariners can adjust their plans accordingly.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the address listed under **ADDRESSES**.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This rule calls for no new collection of information under the Paperwork

Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.lD and Department of Homeland Security Management Directive 5100.1, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction, from further environmental documentation.

A final ''Environmental Analysis Check List'' and a final ''Categorical Exclusion Determination'' will be available in the docket where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1226, 1231; 46 U.S.C. Chapter 701; 50 U.S.C. 191, 195; 33 CFR 1.05–1(g), 6.04–1, 6.04–6 and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add temporary § 165.T05–071 to read as follows:

§ 165.T05–071 Safety zone; New River, approximate one half mile south of the HWY 17 Bridge, south of Jacksonville, North Carolina.

(a) *Regulated area.* The regulated area includes all waters within a 300 yard radius of position 34°44′45″ North 077°26′18″ West, approximately one half nautical mile south of the HWY 17 bridge, Jacksonville, North Carolina. All coordinates reference Datum NAD 1983.

(b) *Definitions. Coast Guard Patrol Commander* means a commissioned, warrant, or petty officer of the Coast Guard who has been designated by the Commander, Coast Guard Sector North Carolina.

(2) *Official Patrol* means any vessel assigned or approved by Commander, Coast Guard Sector North Carolina with a commissioned, warrant, or petty officer on board and displaying a Coast Guard ensign.

(c) *Safety Zone regulations.* (1) Except for persons or vessels authorized by the Coast Guard Patrol Commander, no person or vessel may enter or remain in the regulated area.

(2) The operator of any vessel in the regulated area shall: (i) Stop the vessel immediately when directed to do so by any Official Patrol.

(ii) Proceed as directed by any official patrol.

(d) *Enforcement period.* This section will be enforced from 5:30 p.m. to 10 p.m. on August 7, 2007.

Dated: July 9, 2007.

William D. Lee,

Captain of the Port, Coast Guard Sector North Carolina.

BILLING CODE 4910–15–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

46 CFR Part 67

[USCG–2007–28098]

RIN 1625–AB18

Vessel Documentation; Recording of Instruments

AGENCY: Coast Guard, DHS.

ACTION: Direct final rule; request for comments.

SUMMARY: By this direct final rule, the Coast Guard is amending the vessel documentation regulations to eliminate the requirement to provide certain original documents to the National Vessel Documentation Center (NVDC) for recording, and to eliminate the additional fee for filing by facsimile. We are undertaking this rulemaking to conform our business practices with similar functions provided by other governmental entities and to allow our customers to avail themselves of better service through electronic filing. This rulemaking is expected to improve efficiency at the NVDC and permit the use of improved information collection technology.

DATES: This rule is effective October 31, 2007, unless an adverse comment, or notice of intent to submit an adverse comment, reaches the Docket Management Facility on or before October 1, 2007. If an adverse comment, or notice of intent to submit an adverse comment, is received, we will withdraw this direct final rule and publish a timely notice of withdrawal in the **Federal Register**.

ADDRESSES: You may submit comments identified by Coast Guard docket number USCG–2007–28098 to the Docket Management Facility at the U.S. Department of Transportation. To avoid duplication, please use only one of the following methods:

(1) *Web Site: http://dms.dot.gov.*

(2) *Mail:* Docket Management Facility (M–30), U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

(3) *Fax:* 202–493–2251.

(4) *Delivery:* Room W12–140 on the Ground Floor of the West Building, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

(5) *Federal eRulemaking Portal: http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call Mr. Thomas L. Willis, Director, National Vessel Documentation Center, U.S. Coast Guard, telephone 304–271–2506. If you have questions on viewing or submitting material to the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Submitting comments: If you submit a comment, please include your name and address, identify the docket number for this rulemaking (USCG–2007–28098), indicate the specific section of this document to which each comment applies, and give the reason for each comment. You may submit your comments and material by electronic means, mail, fax, or delivery to the Docket Management Facility at the address under **ADDRESSES**; but please submit your comments and material by only one means. If you submit them by mail or delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit them by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this rule in view of them.

Viewing comments and documents: To view comments, as well as documents mentioned in this preamble as being available in the docket, go to *http://dms.dot.gov* at any time, click on ''Simple Search,'' enter the last five digits of the docket number for this rulemaking, and click on ''Search.'' You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy Act: Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the Department of Transportation's Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477), or you may visit *http://dms.dot.gov.*

Regulatory Information

We are publishing a direct final rule under 33 CFR 1.05–55 because we do not expect an adverse comment. If no adverse comment or notice of intent to submit an adverse comment is received by October 1, 2007, this rule will become effective as stated in the **DATES** section. In that case, approximately 30 days before the effective date, we will publish a document in the **Federal Register** stating that no adverse comment was received and confirming that this rule will become effective as scheduled. However, if we receive an adverse comment or notice of intent to submit an adverse comment, we will publish a document in the **Federal Register** announcing the withdrawal of all or part of this direct final rule. If an adverse comment applies only to part of this rule (e.g., to an amendment, a paragraph, or a section) and it is possible to remove that part without defeating the purpose of this rule, we may adopt, as final, those parts of this rule on which no adverse comment was received. We will withdraw the part of this rule that was the subject of an adverse comment. If we decide to proceed with a rulemaking following receipt of an adverse comment, we will publish a separate notice of proposed rulemaking (NPRM) and provide a new opportunity for comment.

A comment is considered ''adverse'' if the comment explains why this rule or a part of this rule would be inappropriate, including a challenge to its underlying premise or approach, or would be ineffective or unacceptable without a change.

Background and Purpose

We are undertaking this rulemaking to conform our business practices with similar functions provided by other governmental entities and to allow our customers to avail themselves of better service through electronic filing. It will also permit implementation of the Electronic Signature Act in maritime financial transactions. In addition, we are eliminating the need for multiple copies of instruments to conform to changing business practices within the Coast Guard.

The Coast Guard records bills of sale, mortgages, and related instruments in accordance with the provisions of Chapter 313 of Title 46 of the U.S. Code. This is similar to service provided by county registries of deeds for real estate. However, unlike county registries, the Coast Guard requires the submission of an originally signed instrument accompanied by one or more copies. In addition, it has kept originally signed instruments and returned the copy or copies after annotating them with information about the recording.

In 1982, the Coast Guard promulgated a rule which required original instruments to be provided (47 FR

27490, June 24, 1982). The Coast Guard reaffirmed that rule in 1993, following codification of the Ship Mortgage Act (58 FR 60256, November 15, 1993). The Coast Guard's practice and regulation was further buttressed in 1996 when Congress enacted section 305 of Public Law 104–324 providing clear authority to accept instruments by electronic means, but requiring submission of the originals within ten days of the electronic filing. However, after enactment of the Electronic Signatures in Global and National Commerce Act, Public Law 106–229, Congress in 2002 amended section 31321((a)(4) of Title 46, U.S. Code, by repealing the requirement to present original instruments within ten days following electronic filing (Pub. L. 107–295, section 420). (See also, 15 U.S.C. 7031 encouraging the use of electronic signatures and the elimination of paper-based obstacles to electronic transactions.)

In 2006, the Coast Guard began scanning all instruments into an electronic data base from which copies may be printed. Providing a copy from the data base rather than annotating a copy provided by the submitter is a better business practice for two primary reasons. First, it is no longer necessary to track copies of paperwork through the office. More importantly, however, it ensures that the copy returned to the submitter is a true copy of what appears in the electronic data base and not something that merely appears to be a true copy.

Discussion of Rule

Section 67.209 is amended to eliminate the need to submit originally signed instruments plus a copy. Section 67.219 is amended to eliminate the need to submit original instruments after filing by facsimile. Section 67.218 is a new section providing procedures for filing by submitting the instrument in Portable Document Filing, commonly referred to as ''pdf''. The fee for filing by facsimile is deleted. Instruments may be submitted to the National Vessel Documentation Center for filing by e-mailing them as .pdf attachments to *NVDC.pdf.filing@uscg.mil.*

Regulatory Evaluation

This rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. We expect the economic impact of this rule to be so minimal that a full Regulatory Evaluation is unnecessary.

There are no new costs or requirements associated with this rule. Although persons filing instruments need send only a single copy, the savings are insignificant.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

This rule will affect the following small entities: Small businesses, individuals, nonprofit organizations, and municipal governments currently owning documented vessels or seeking to document vessels in the future; brokers, attorneys, and law offices providing vessel documentation services; small shipbuilders building vessels which are subsequently documented; boat dealers selling vessels of at least five (5) net tons in size; and lending institutions engaging in preferred mortgage financing.

The changes in this rulemaking are procedural and administrative in nature. The changes are technical amendments which the affected small entities should have little difficulty understanding or adopting into their business practices. Moreover, there are no new reporting, recordkeeping or other requirements for compliance.

Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business qualifies as a small entity and that this proposal will have a significant impact on your business, please submit a comment [see ''**ADDRESSES**''] explaining why you think your business qualifies and in what way and to what degree this rulemaking will economically affect your business. Comments submitted in response to this finding will be evaluated under the criteria in the ''Regulatory Information'' section of this preamble.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule will affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult Mr. Thomas L. Willis, Director of the National Vessel Documentation Center, 792 TJ Jackson Drive, Falling Waters, WV 25419, telephone 304 271–2400. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). Additionally, the Coast Guard estimates this rule will result in no change to the information collection burden associated with the existing collection of information entitled, ''Vessel Documentation,'' Office of Management and Budget Control Number 1625–0027, which expires on January 31, 2010.

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if the rule has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.lD, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA)(42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (34)(d), of the Instruction from further environmental documentation. These regulations concern the documentation of vessels. Under figure 2–1, paragraph (34)(d), of the Instruction, an ''Environmental Analysis Check List'' and a ''Categorical Exclusion Determination'' are not required for this rule.

List of Subjects in 46 CFR Part 67

Reporting and recordkeeping requirements, Vessels.

■ For the reasons discussed in the preamble, the Coast Guard amends 46 CFR part 67 as follows:

Title 46—Shipping

PART 67—DOCUMENTATION OF VESSELS

■ 1. The authority citation for part 67 continues to read as follows:

Authority: 14 U.S.C. 1664; 31 U.S.C. 9701; 42 U.S.C. 9118; 46 U.S.C. 2103, 2107, 2110, 12106, 12120, 12122; 46 U.S.C. app. 841a, 876; Department of Homeland Delegation No. 0170.1.

■ 2. Revise § 67.209 to read as follows:

§ 67.209 No original instrument requirement.

A copy of the original signed and acknowledged instrument must be presented. The original instrument itself may be presented but is not required. The copy may be delivered to the National Vessel Documentation Center or transmitted by facsimile or in portable document format (.pdf) in accordance with the procedures in §§ 67.218 and 67.219 of this part. Signatures may be affixed manually or digitally.

■ 3. Add new § 67.218 to subpart O to read as follows:

§ 67.218 Optional filing of instruments in portable document format as attachments to electronic mail.

(a) Any instrument identified as eligible for filing and recording under § 67.200 may be submitted in portable document format (.pdf) as an attachment to electronic mail (e-mail) for filing at the National Vessel Documentation Center. The e-mail address to be used for instrument filing may be obtained from the National Vessel Documentation Center Web site. If the instrument submitted for filing in .pdf format pertains to a vessel that is not a currently documented vessel, a completed Application for Initial Issue, Exchange, or Replacement Certificate of Documentation, or Return to Documentation (form CG–1258) or a letter application for deletion from documentation must already be on file with the National Vessel Documentation Center or must be submitted in .pdf format with the instrument being submitted in .pdf format for filing.

(b) All instruments submitted for filing in .pdf format must be clearly legible, be submitted from 8½ inch by 11 inch paper in not less than 10-point type size, and submitted as an attachment to e-mail.

(c) The e-mail required by paragraph (b) should indicate:

(1) The name, address, telephone number, and e-mail address of the person submitting the instrument for filing in .pdf format;

(2) The number of pages submitted for filing in .pdf format; and

(3) The name of the vessel, official number or hull identification number of the vessel(s), and the name(s) of the owner(s) of the vessel(s) to which the instrument relates.

(d) The filing of any instrument submitted for filing in .pdf format is terminated and the instrument will be returned to the submitter if the instrument is subject to termination for any cause under § 67.217(a).

■ 4. Revise § 67.219 to read as follows:

§ 67.219 Optional filing of instruments by facsimile.

(a) Any instrument identified as eligible for filing and recording under § 67.200 may be submitted for filing to the National Vessel Documentation Center by facsimile at (304) 271–2405. If the instrument submitted by facsimile for filing pertains to a vessel that is not a currently documented vessel, a completed Application for Initial Issue, Exchange, or Replacement Certificate of Documentation, or Return to Documentation (form CG–1258) or a letter application for deletion from documentation must already be on file with the National Vessel Documentation Center or must be submitted by facsimile with the instrument being submitted by facsimile for filing.

(b) All instruments submitted by facsimile for filing must be clearly legible, be submitted from 81/2 inch by 11 inch paper in not less than 10-point type size, and accompanied by a cover sheet.

(c) The cover sheet required by paragraph (b) should indicate:

(1) The name, address, telephone number, and facsimile telephone number of the person submitting the instrument by facsimile;

(2) The number of pages submitted by facsimile; and

(3) The name of the vessel, official number or hull identification number of the vessel(s), and the name(s) of the owner(s) of the vessel(s) to which the instrument relates.

(d) The filing of any instrument submitted by facsimile is terminated and the instrument will be returned to the submitter if the instrument is subject to termination for any cause under § 67.217(a).

§ 67.540 [Removed]

■ 5. Remove § 67.540.

§ 67.550 [Amended]

■ 6. Amend § 67.550 by removing from Table 67.550–Fees, the entry reading: ''Facsimile submission handling Subpart O 2.00 [1].''

Dated: July 26, 2007.

J.G. Lantz,

Acting Assistant Commandant For Prevention, U.S. Coast Guard.

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

48 CFR Parts 202 and 204

Defense Federal Acquisition Regulation Supplement; Technical Amendments

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD is making technical amendments to the Defense Federal Acquisition Regulation Supplement (DFARS) to update organization names, office symbols, and an Internet address.

DATES: *Effective Date:* August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Ms. Michele Peterson, Defense Acquisition Regulations System, OUSD(AT&L)DPAP(DARS), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0311; facsimile (703) 602–7887.

SUPPLEMENTARY INFORMATION: This final rule amends DFARS text as follows:

• *Section 202.101.* Updates the lists of Army and Defense Logistics Agency contracting activities.

• *Section 204.7005.* Updates the Internet address for DoD order code assignment listings, and updates the office symbol for the Air Force order code monitor.

List of Subjects in 48 CFR Parts 202 and 204

Government procurement.

Michele P. Peterson,

Editor, Defense Acquisition Regulations System.

■ Therefore, 48 CFR Parts 202 and 204 are amended as follows:

PART 202—DEFINITIONS OF WORDS AND TERMS

■ 1. The authority citation for 48 CFR Parts 202 and 204 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

■ 2. Section 202.101 is amended in the definition of ''Contracting activity'' as follows:

■ a. By revising the list with the heading ''ARMY''; and

■ b. Under the heading ''DEFENSE LOGISTICS AGENCY'', by removing ''Office of the Deputy Director, Logistics Operations'' and adding in its place ''Acquisition Management Directorate''. The revised list reads as follows:

202.101 Definitions.

* * * * *

Army

Headquarters, U.S. Army Contracting Agency Joint Contracting Command—Iraq/Afghanistan
National Guard Bureau
Program Executive Office for Simulation, Training, and Instrumentation
U.S. Army Aviation and Missile Command
U.S. Army Communications-Electronics Command

RIN 0750–AF36

Defense Federal Acquisition Regulation Supplement; Limitations on Tiered Evaluation of Offers (DFARS Case 2006–D009)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has adopted as final, with changes, an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Section 816 of the National Defense Authorization Act for Fiscal Year 2006. Section 816 requires DoD to prescribe guidance on the use of tiered evaluation of offers for contracts and for task or delivery orders under contracts.

DATES: *Effective Date:* August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah Tronic, Defense Acquisition Regulations System, OUSD(AT&L)DPAP(DARS), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0289; facsimile (703) 602–7887. Please cite DFARS Case 2006–D009.

SUPPLEMENTARY INFORMATION:

A. Background

DoD published an interim rule at 71 FR 53042 on September 8, 2006, to implement Section 816 of the National Defense Authorization Act for Fiscal Year 2006 (Pub. L. 109–163). Section

816 requires DoD to prescribe guidance on the use of tiered evaluation of offers for contracts and for task or delivery orders under contracts. The guidance must include a prohibition on the use of tiered evaluation of offers unless the contracting officer (1) has conducted market research in accordance with Part 10 of the Federal Acquisition Regulation (FAR); (2) is unable, after conducting market research, to determine whether or not a sufficient number of qualified small businesses are available to justify limiting competition for the contract or order; and (3) includes in the contract file a written explanation of why the contracting officer was unable to make the determination.

Four sources submitted comments on the interim rule. A discussion of the comments is provided below. In addition to the changes addressed in the DoD response to Comment 1, the final rule revises section 213.106–1–70 to provide a cross-reference to section 215.203–70, instead of duplicating the text found in that section.

1. *Comment:* The rule failed to include an explicit prohibition.

DoD Response: While DoD believes that stating the actions that the contracting officer must take before using tiered evaluation is an implied prohibition, the final rule contains amendments at 215.203–70 to explicitly prohibit the contracting officer from using tiered evaluation unless those actions have been taken.

2. *Comment:* Defining the technique of tiered evaluation in the DFARS legitimizes the use of tiered evaluation.

DoD Response: The statute does not completely prohibit the use of tiered evaluation; it requires that certain actions be taken before this technique may be used. To permit an understanding of the statutory requirements, the technique must first be defined.

3. *Comment:* FAR Part 10 already requires the market research required by the statute, and no additional research is necessary.

DoD Response: DoD agrees that the FAR already requires agencies to conduct market research appropriate to the circumstances before soliciting offers for acquisitions in excess of the simplified acquisition threshold and, when necessary and cost-effective, below the simplified acquisition threshold. However, DoD believes the additional language in DFARS Part 210 is appropriate to reinforce the statutory requirement for market research before conducting a tiered evaluation of offers.

4. *Comment:* The phrase ''appropriate to the circumstances'' at DFARS 210.001(a)(i), with regard to requirements for conducting market research, should be deleted. Although the phrase is consistent with the FAR, it is not in the statute being implemented and creates ambiguity.

DoD Response: The text at DFARS 210.001 is consistent with both the statute and FAR Part 10. The statute prohibits the use of tiered evaluation of offers unless, among other things, the contracting officer has conducted market research in accordance with Part 10 of the FAR. The implementing DFARS language reflects the policy in FAR Part 10, requiring the conduct of market research ''appropriate to the circumstances.'' The DFARS language recognizes that there are many ways to conduct market research, and that the methods employed should be those that will be effective for the particular acquisition.

5. *Comment:* The rule states that the tiered evaluation of offers order of precedence shall be consistent with FAR Part 19. However, FAR Part 19 does not provide an ''order of precedence'' among the various small business goals.

DoD Response: FAR Part 19 does not specifically state an order of precedence. However, it does provide direction on the circumstances under which acquisitions may or must be set aside for various categories of small businesses. For example, FAR 19.1305 states that the contracting officer must consider HUBZone set-asides for acquisitions at a certain dollar level before considering small business set-asides. DoD believes that, in establishing an order of precedence in a tiered evaluation of offers, that order of precedence must be consistent with the direction in FAR Part 19.

6. *Comment:* Guidance to the contracting officer can be addressed in the Procedures, Guidance, and Information (PGI), consistent with the law.

DoD Response: PGI guidance to supplement this rule is considered unnecessary at this time.

7. *Comment:* The rule should include coverage stating that a large business involved in an 8(a) mentor-protege agreement shall not offer itself as a large business in competition against the 8(a) mentor-protege agreement. In a recent cascading set-aside, a large business offered itself as a large entity, as a subcontractor to a small business, and as a mentor in an 8(a) mentor-protege joint venture.

DoD Response: The issue of a mentor firm competing against a protege firm is not specific to tiered evaluation of offers. Therefore, the final rule contains no change relating to this comment.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD certifies that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule relates to market research and documentation requirements performed by the Government.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply, because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 202, 210, 213, 215, and 219

Government procurement.

Michele P. Peterson,

Editor, Defense Acquisition Regulations System.

■ Accordingly, the interim rule amending 48 CFR parts 202, 210, 213, 215, and 219, which was published at 71 FR 53042 on September 8, 2006, is adopted as a final rule with the following changes:

■ 1. The authority citation for 48 CFR parts 202, 210, 213, 215, and 219 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 213—SIMPLIFIED ACQUISITION PROCEDURES

■ 2. Section 213.106–1–70 is revised to read as follows:

213.106–1–70 Soliciting competition—tiered evaluation of offers.

See limitations on the use of tiered evaluation of offers at 215.203–70.

PART 215—CONTRACTING BY NEGOTIATION

■ 3. Section 215.203–70 is amended by revising paragraph (c) introductory text, paragraph (c)(1) introductory text, and paragraph (c)(2) to read as follows:

215.203–70 Requests for proposals—tiered evaluation of offers.

* * * * *

(c) The contracting officer is prohibited from issuing a solicitation with a tiered evaluation of offers unless—

(1) The contracting officer conducts market research, in accordance with

FAR Part 10 and Part 210, to determine—

* * * * *

(2) If the contracting officer cannot determine whether the criteria in paragraph (c)(1) of this section are met, the contracting officer includes a written explanation in the contract file as to why such a determination could not be made (Section 816 of Public Law 109–163).

Defense Federal Acquisition Regulation Supplement; Berry Amendment Notification Requirement (DFARS Case 2006–D006)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has adopted as final, without change, an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Section 833(a) of the National Defense Authorization Act for Fiscal Year 2006. Section 833(a) requires the posting of a notice on the FedBizOpps Internet site, when certain exceptions to domestic source requirements apply to an acquisition.

DATES: *Effective Date:* August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Ms. Amy Williams, Defense Acquisition Regulations System, OUSD(AT&L)DPAP(DARS), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0328; facsimile (703) 602–7887. Please cite DFARS Case 2006–D006.

SUPPLEMENTARY INFORMATION:

A. Background

DoD published an interim rule at 71 FR 58536 on October 4, 2006, to implement Section 833(a) of the National Defense Authorization Act for Fiscal Year 2006 (Pub. L. 109–163). Section 833(a) amended 10 U.S.C. 2533a to add a requirement for the posting of a notice on the FedBizOpps Internet site, within 7 days after award of a contract exceeding the simplified acquisition threshold, for the acquisition of (1) certain clothing, fiber, yarn, or fabric items, when DoD has determined that adequate domestic items are not available; or (2) chemical warfare protective clothing, when an exception to domestic source requirements applies because the acquisition furthers an agreement with a qualifying country.

One source submitted comments on the interim rule, as discussed below.

Comments: The respondent strongly supported the initiative to insert transparency into the process of waiving domestic source requirements. Although the law allows posting within 7 days after contract award, the respondent encouraged a more immediate notice to industry, preferably before contract award. The respondent also suggested that there should be a permanent posting of current domestic nonavailability determinations, so that industry (especially a company just entering the contracting arena) would have information regarding the materials or components for which a waiver has been granted. The respondent recommended that this information be available in an easily accessible and permanent location to permit better compliance with domestic source requirements.

DoD Response: When drafting the interim rule, DoD determined that the least burdensome approach for posting the notice would be to make it part of the synopsis that is published after contract award in accordance with FAR 5.301. Therefore, the final rule continues to provide for posting of the notice within 7 days after contract award, consistent with the statutory provisions. A listing of current domestic nonavailability determinations is available on the Defense Procurement and Acquisition Policy Web site, at *http://www.acq.osd.mil/dpap/paic/dnad.htm.*

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD certifies that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule relates to a notification requirement that is performed by the Government.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply, because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

Defense Federal Acquisition Regulation Supplement; Berry Amendment Restrictions—Clothing Materials and Components Covered (DFARS Case 2006–D031)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: DoD has adopted as final, without change, an interim rule amending the Defense Federal Acquisition Regulation Supplement (DFARS) to implement Section 833(b) of the National Defense Authorization Act for Fiscal Year 2006. Section 833(b) expands the foreign source restrictions applicable to the acquisition of clothing to also include clothing materials and components, other than sensors, electronics, or other items added to, and not normally associated with, clothing and the materials and components thereof.

DATES: *Effective Date:* August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Ms. Amy Williams, Defense Acquisition Regulations System, OUSD(AT&L)DPAP(DARS), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062. Telephone (703) 602–0328; facsimile (703) 602–7887. Please cite DFARS Case 2006–D031.

SUPPLEMENTARY INFORMATION:

A. Background

DoD published an interim rule at 72 FR 2637 on January 22, 2007, to implement Section 833(b) of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163). Section 833(b) amended 10 U.S.C. 2533a (the Berry Amendment) to expand the foreign source restrictions applicable to the acquisition of clothing to also include clothing materials and components, other than sensors, electronics, or other items added to, and not normally associated with, clothing and the materials and components thereof.

DoD received no comments on the interim rule. Therefore, DoD has adopted the interim rule as a final rule without change.

This rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD has prepared a final regulatory flexibility analysis consistent with 5 U.S.C. 604. A copy of the analysis may be obtained from the point of contact specified herein. The analysis is summarized as follows:

The objective of the rule is to provide for the acquisition of clothing, and clothing materials and components, from domestic sources in accordance with statutory requirements. The rule applies to entities interested in receiving DoD contracts or subcontracts for the acquisition of clothing. Based on data collected through the DoD contract action reporting system, DoD awarded 6,072 contract actions relating to the acquisition of clothing items during fiscal year 2005. These actions had a total dollar value of $1.868 billion and involved 1,110 contractors. Of these actions, 4,087 totaling $.81 billion involved 906 contractors that were small business concerns. This rule may have a positive impact on small businesses that manufacture clothing materials and components, by reducing foreign competition. However, the rule could have a negative impact on small businesses that have been using foreign components in the manufacture of clothing products.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply, because the rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 225 and 252

15 CFR Part 922

[Docket No. 0612242956–7411–02]

RIN 0648–AT18

Establishment of Marine Reserves and a Marine Conservation Area Within the Channel Islands National Marine Sanctuary; Correction

AGENCY: National Marine Sanctuary Program (NMSP), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Final rule; correction.

SUMMARY: NOAA published a final rule on May 24, 2007 that established marine reserves and a marine conservation area in the Channel Islands Natioal Marine Sanctuary. That document contained a few clerical and printing errors. This document corrects and clarifies those three errors.

DATES: Pursuant to section 304(b) of the National Marine Sanctuaries Act, the final rule published on May 24, 2007 and the revised terms of designation shall take effect and become final after the close of a review period of 45 days of continuous session of Congress, that began on May 24, 2007. This correction only makes three non-substantive corrections and clarifications to that rule and does not change the calculation of the effective date. Announcement of the effective date of the final rule will be published in the **Federal Register** at a later date.

FOR FURTHER INFORMATION CONTACT: Sean Hastings, (805) 884–1472; e-mail: *Sean.Hastings@noaa.gov.*

SUPPLEMENTARY INFORMATION: NOAA published a document in the **Federal Register** on May 24, 2007 (72 FR 29208) establishing marine reserves and a marine conservation area in the Channel Islands National Marine Sanctuary. There was a printing error that requires clarification and two clerical errors that are being corrected by this document as described below.

Clarification of Changes to the Designation Document

The printing error affected the way in which the changes to the original designation document were portrayed to the reader. They did not, however, affect the substance of the actual revision. The following clarifies for the reader the changes that were made to the designation document by the May 24, 2007 **Federal Register** notice. In this notice, certain conventions have been used to highlight the revisions that were made via the preamble to the May 24, 2007 rule. New language is shown inside boldfaced arrows while language that was deleted is set off with bold-faced brackets:

Beginning of Revised Designation Document

Preamble

Under the authority of the Marine Protection, Research and Sanctuaries Act of 1972, Pub. L. 92–532, (the Act) the waters surrounding the northern Channel Islands and Santa Barbara Island are hereby designated a Marine Sanctuary for the purposes of preserving and protecting this unique and fragile ecological community.

Article 1. Effect of Designation

Within the area designated as the Channel Islands National Marine Sanctuary (the Sanctuary), described in Article 2, the Act authorizes the promulgation of such regulations as are reasonable and necessary to protect the values of the Sanctuary. Article 4 of this Designation lists those activities which may require regulation, but the listing of any activity does not by itself prohibit or restrict it. Restrictions or prohibitions may be accomplished only through regulation, and additional activities may be regulated only by amending Article 4.

Article 2. Description of the Area

The Sanctuary consists of an area of the waters off the coast of California, of approximately [1252.5] >1,128< square nautical miles [(nm)] >(nmi)< adjacent to the northern Channel Islands and Santa Barbara Island seaward to a distance of [6nm] >approximately 6

nmi<. The precise boundaries are defined by regulation.

Article 3. Characteristics of the Area That Give it Particular Value

The Sanctuary is located in an area of upwelling and in a transition zone between the cold waters of the California Current and the warmer Southern California Countercurrent. Consequently, the Sanctuary contains an exceptionally rich and diverse biota, including 30 species of marine mammals and several endangered species of marine mammals and sea birds. The Sanctuary will provide recreational experiences and scientific research opportunities and generally will have special value as an ecological, recreational, and esthetic resource.

Article 4. Scope of Regulation

Section 1. Activities Subject to Regulation

In order to protect the distinctive values of the Sanctuary, the following activities may be regulated within the Sanctuary to the extent necessary to ensure the protection and preservation of its marine features and the ecological, recreational, and esthetic value of the area:

a. Hydrocarbon operations

b. Discharging or depositing any substance

c. Dredging or alteration of, or construction on, the seabed

d. Navigation of vessels except fishing vessels or vessels [travelling] >traveling< within a Vessel Traffic Separation Scheme or Port Access Route designated by the Coast Guard outside of 1 nmi from any island

e. Disturbing marine mammals or birds by overflights below 1000 feet

f. Removing or otherwise deliberately harming cultural or historical resources

>g. Within a marine reserve, marine park, or marine conservation area, harvesting, removing, taking, injuring, destroying, possessing, collecting, moving, or causing the loss of any Sanctuary resource, including living or dead organisms or historical resources, or attempting any of these activities

h. Within a marine reserve, marine park, or marine conservation area, possessing fishing gear<

Section 2. Consistency With International Law

The regulations governing the activities listed in Section 1 of this article will apply to foreign flag vessels and persons not citizens of the United States only to the extent consistent with recognized principles of international law including treaties and international agreements to which the United States is signatory.

Section 3. Emergency Regulations

Where essential to prevent immediate, serious and irreversible damage to the ecosystem of the area, activities other than those listed in Section 1 may be regulated within the limits of the Act on an emergency basis for an interim period not to exceed 120 days, during which an appropriate amendment of this article would be proposed in accordance with the procedures specified in Article 6.

Article 5. Relation to Other Regulatory Programs

Section 1. Fishing

The regulation of fishing is not authorized under Article 4>, except within portions of the Sanctuary designated as marine reserves, marine parks, or marine conservation areas established pursuant to the goals and objectives of the Sanctuary and within the scope of the State of California's Final Environmental Document ''Marine Protected Areas in NOAA's Channel Islands National Marine Sanctuary'' (California Department of Fish and Game, October 2002), certified by the California Fish and Game Commission<. However, fishing vessels may be regulated with respect to discharges in accordance with Article 4, Section 1, paragraph (b) and aircraft conducting kelp bed surveys below 1000 feet can be regulated in accordance with Article 4, Section 1, paragraph (e). All regulatory programs pertaining to fishing, including particularly regulations promulgated under the California Fish and Game Code and Fishery Management Plans promulgated under the Fishery Conservation and Management Act of 1976, 16 U.S.C. 1801 et seq., shall remain in effect. All permits, licenses and other authorizations issued pursuant thereto shall be valid within the Sanctuary unless authorizing any activity prohibited by any regulation implementing Article 4. Fishing as used in this article and in Article 4 includes kelp harvesting.

Section 2. Defense Activities

The regulation of those activities listed in Article 4 shall not prohibit any activity conducted by the Department of Defense that is essential for national defense or because of emergency. Such activities shall be consistent with the regulations to the maximum extent practicable.

Section 3. Other Programs

All applicable regulatory programs shall remain in effect and all permits, licenses and other authorizations issued pursuant thereto shall be valid within the Sanctuary unless authorizing any activity prohibited by any regulation implementing Article 4. The Sanctuary regulations shall set forth any necessary certification procedures.

Article 6. Alterations to This Designation

This Designation can be altered only in accordance with the same procedures by which it has been made, including public hearings, consultation with interested federal and state agencies and the Pacific Regional Fishery Management Council, and approval by the President of the United States.

End of Revised Designation Document

Corrections

In FR Doc. E7–10096 (published on May 24, 2007) make the following corrections:

■ 1. Amend instruction number eight (page 29233) to read: ''Add Appendix B and Appendix C to subpart G to read as follows:''

■ 2. Amend the heading for Appendix C to read: ''Appendix C to Subpart G of Part 922—Marine Conservation Area Boundary''

Dated: July 26, 2007.

Elizabeth R. Scheffler,

Chief Financial Officer, Chief Administrator Officer, National Ocean Service.

9 CFR Part 93

[Docket No. APHIS–2006–0164]

RIN 0579–AC35

Temporary Importation of Horses; Noncompetitive Entertainment Horses From Countries Affected With Contagious Equine Metritis

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the regulations to allow noncompetitive entertainment horses from countries affected with contagious equine metritis to be temporarily imported into the United States under certain conditions. The regulations currently provide for the temporary importation of horses from countries affected with contagious equine metritis to compete in specified events. In recent years it has become evident that similar provisions are needed for noncompetitive entertainment horses. This action would allow the temporary importation of horses into the United States solely for public exhibition and entertainment purposes while continuing to protect against the introduction and dissemination of contagious equine metritis.

DATES: We will consider all comments that we receive on or before October 1, 2007.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov,* select ''Animal and Plant Health Inspection Service'' from the agency drop-down menu, then click ''Submit.'' In the Docket ID column, select APHIS–2006–0164 to submit or view public comments and to view supporting and related materials available electronically. Information on using Regulations.gov, including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's ''User Tips'' link.
- *Postal Mail/Commercial Delivery:* Please send four copies of your comment (an original and three copies) to Docket No. APHIS–2006–0164, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2006–0164.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov.*

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 93 (referred to below as the regulations) prohibit or restrict the importation of certain animals into the United States to prevent the introduction of communicable diseases of livestock and poultry. Subpart C—Horses, §§ 93.300 through 92.326 of the regulations, pertains to the importation of horses into the United States.

Section 93.301 of the regulations contains specific provisions for the quarantine and testing of horses from regions affected with contagious equine metritis (CEM), a highly contagious bacterial venereal disease that affects breeding and fertility. This section also identifies regions where CEM exists and regions that trade horses freely with those where CEM exists without testing for CEM.

To prevent the introduction of CEM into the United States, § 93.301(c)(1) prohibits the importation of horses into the United States from listed regions unless the horses are imported in accordance with certain requirements. To be eligible for importation, the horses must fall into one of the following categories:

- Wild (non-domesticated) species of equidae if captured in the wild or imported from a zoo or other facility where it would be unlikely that the animal would come in contact with domesticated horses used for breeding;
- Geldings;
- Weanlings or yearlings whose age is certified on the import health certificate required under § 93.314(a);
- Horses imported in accordance with conditions prescribed by the Administrator as provided in § 93.301(a);
- Spanish Pure Breed horses imported for permanent entry from Spain or thoroughbred horses imported for permanent entry from France, Germany, Ireland, or the United Kingdom as provided in § 93.301(d);
- Stallions or mares over 731 days of age imported for permanent entry as provided in § 93.301(e);
- Horses over 731 days of age imported into the United States for no more than 90 days to compete in specified events as provided in § 93.301(f); and
- U.S. horses returning to the United States as provided in § 93.301(g).

The Animal and Plant Health Inspection Service (APHIS) has used the provisions in § 93.301(f), relating to the temporary importation of horses for competition, to allow the temporary importation of noncompetitive entertainment horses into the United States. Several performance horse groups have asked APHIS to extend the 90-day limit provided for in § 93.301(f) so that they may exhibit and show their horses in the United States for longer periods of time. In addition, the United States Animal Health Association has recommended that APHIS amend the regulations to establish a category for noncompetitive entertainment horses.

APHIS has conducted a risk assessment to evaluate the risk of allowing the extended importation of noncompetitive entertainment horses

from countries affected by CEM without requiring CEM testing, and the risk of the U.S. Department of Agriculture (USDA) losing track of these horses during extended importation. The risk assessment, titled ''Assessment of the Risk of Introduction of Contagious Equine Metritis (CEM) through the Extended Importation of Noncompetitive Entertainment Horses from CEM-affected countries,'' may be viewed on the Regulations.gov Web site (see **ADDRESSES** at the beginning of this document for instructions for accessing Regulations.gov). Copies of the risk assessment may be obtained by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**.

The risk assessment concluded that the risk posed by allowing the extended importation of noncompetitive entertainment horses from CEM-affected countries would be extremely low, with the application of the restrictions described in this proposed rule. In addition, the risk assessment concluded that the risk of USDA losing track of the animals was extremely low due to the extensive supervision and involvement of APHIS personnel and the accredited veterinarian.

Accordingly, we are proposing to amend the regulations in § 93.301 to establish conditions under which noncompetitive entertainment horses from CEM-affected regions may be imported into the United States for longer than 90 days solely for public exhibition and entertainment purposes. Because the conditions would be very similar to the conditions in § 93.301(f), which provides for the temporary importation of horses to compete in specified events, we would amend § 93.301(f) to apply to both types of imported horses. We would also amend the regulations pertaining to import permits in § 93.304 to require the submission of additional information with the application for an import permit.

As with horses imported for competition, we are proposing to provide two primary safeguards against the horses transmitting CEM while in the United States. First, a representative of APHIS would monitor the horses whenever they are not in transit in the United States. Second, we would require stringent measures to ensure that the horses are kept apart from other horses, except when performing or being exhibited or exercised. Because CEM is a venereal disease transmitted by sexual contact, there is virtually no risk that a horse will transmit the disease through casual contact with other horses during a performance, exhibition, or exercise.

Import Permit and Health Certificate

In addition to the current requirements in § 93.304(a) for an import permit, we are proposing that the owner or importer would have to supply the following information to APHIS with the application for the permit:

- The individual identifying information for all horses to be imported;
- The permanent electronic identification of each horse to be imported, if applicable;
- Photographs (head and lateral views) of each horse that are sufficient to identify the horse on an electronic medium approved by APHIS;
- The proposed total length of stay in the United States;
- A description of the shows or events in which the horse would perform while in the United States;
- The names and locations of the venues in which the horse would perform while in the United States, and the dates the horse would perform at each venue;
- The names and locations of the premises on which the horse would be kept while in the United States, and the dates the horse would be kept on each premises;
- The methods and routes by which the horse would be transported while in the United States;
- A written plan for handling sick or injured horses that includes the name, address, and phone number of each accredited veterinarian who would provide veterinary services in the United States; the name, address, and phone number of medical facilities to be used to diagnose or treat sick or injured horses while in the United States; and a plan to return sick or injured horses to performance condition; and
- An application for a trust fund or escrow account agreement with APHIS.

This information would allow APHIS to monitor the location of the horse while it is in the United States and to confirm compliance with the required isolation and handling procedures to ensure that the horse does not transmit CEM to any other horse while in this country.

Given the potential for long stays in the United States for noncompetitive entertainment horses, APHIS must have current information about the horses and their itinerary in order to effectively monitor the horses for compliance with the regulations. Therefore, we would require that while in the United States, the owner or importer apply for and obtain from APHIS an import permit each year prior to the anniversary date of the horse's arrival in the United States. This would ensure that APHIS has current information about the horses and their itinerary for monitoring purposes.

As with horses imported for competition, we would require that, at the time of importation, each horse be accompanied by an import permit in accordance with § 93.304 and a health certificate in accordance with § 93.314. However, we would also require the health certificates for noncompetitive entertainment horses to certify that cultures negative for CEM have been collected from each horse on three separate occasions within a 7-day period, with the last set of specimens collected within 30 days of exportation. This would help to ensure that horses infected with CEM do not enter this country and jeopardize the health of the U.S. horse population.

Restrictions Following Arrival in the United States

We are proposing to allow horses over 731 days of age to be imported into the United States solely for noncompetitive public exhibition and entertainment purposes. Such horses would be allowed to remain in the United States indefinitely as long as the conditions in the regulations are met. While in the United States, the horse would be prohibited from entering competitions and would have to be regularly used in performances or exhibitions, unless sick or injured. A horse that is no longer performing or being exhibited would be required to be exported or made eligible for permanent entry. In addition, a noncompetitive entertainment horse would have to be kept with the other horses listed on the import permit, unless otherwise approved by an APHIS representative. We expect that such approvals would be granted for diagnosis or treatment of a medical condition, pre-export isolation, or quarantine for permanent entry.

As with horses imported for competition, we would require a noncompetitive entertainment horse to be moved according to the itinerary and methods of transport specified in the import permit. However, we are proposing to allow horses imported for competition and noncompetitive entertainment horses to be moved for diagnosis or treatment of a medical condition with the prior approval of an APHIS representative. APHIS has always allowed such movements; however, we are proposing to add that provision to the regulations to make it clear to the public.

We are proposing that, while in the United States, the horse would be monitored by an accredited veterinarian

or APHIS representative to ensure that the horse is moved according to the itinerary and methods specified in the import permit, kept separated from other horses not listed on the import permit, and not used for breeding purposes (including artificial insemination or semen collection) or has any other sexual contact with other horses. The horse could not be kept on a breeding premises.

We would require that the horse be kept in a pasture or stall separate from other horses not listed on the import permit, except when actually performing or being exhibited or exercised. The stall in which the horse is kept would have to be separated from other stalls containing horses that are not listed on the import permit, either by an empty stall, by an open area across which horses cannot touch each other, or by a solid wall that is at least 8 feet (2.4 meters) high. The premises on which the horse is kept would have to be approved in writing by an APHIS representative.

As noted above, we would require that the horse not be used for breeding purposes or have any other sexual contact with other horses. However, in contrast to horses imported for competition, we would allow a noncompetitive entertainment horse to undergo genital examinations necessary for diagnosis or treatment of a medical condition with the prior approval of an APHIS representative. This provision would allow the horse to receive appropriate medical care during its extended stay in the country.

We are also proposing to apply the transportation and cleaning and disinfection requirements for horses imported for competition that are contained in the current regulations to noncompetitive entertainment horses. Thus, we would require that, while the horse is in transit, it would have to be moved either in an aircraft or a sealed van or trailer and, except in situations where the horse's life is in danger, only an APHIS representative would be permitted to break the seal on a van or trailer used to move the horse. Additionally, we would require that after the horse is transported anywhere in the United States, any vehicle in which the horse was transported would have to be cleaned and disinfected in the presence of an APHIS representative, according to the procedures for cleaning and disinfection specified in 9 CFR 71.7 through 71.12 of the regulations. We would also require that, in most instances, the cleaning and disinfection would have to be done before the vehicle is moved from the place where the horse is unloaded. However, in cases where there are inadequate facilities or equipment for cleaning and disinfection at the place where the horse is unloaded, the Administrator would have the discretion to allow the vehicle to be moved to another location for cleaning and disinfection, when the move would not pose a disease risk to other horses in the United States.

Change in Itinerary

We are proposing that if the owner or importer wishes to change the horse's itinerary or the methods by which the horse is transported from those specified in the import permit, the owner or importer would have to make the request for change in writing to the Administrator. Such requests would have to be submitted at least 15 days before the proposed date of any change. We propose that this provision would also apply to horses imported for competition. This would ensure that APHIS has enough time to process the request, including inspecting any new premises, and to arrange for the required monitoring before the date of the proposed change. The change in itinerary or means of transport would not be permitted without the written approval of the Administrator, who would have the discretion to grant the request for change when he or she determines that granting the request would not endanger other horses in the United States, and that sufficient APHIS personnel would be available to provide the services requested by the owner or importer.

Permanent Entry

We are proposing that noncompetitive entertainment stallions or mares over 731 days of age would be eligible to remain in the United States if the horse meets the provisions for permanent entry in the current regulations. Specifically, the horse's owner or importer would have to: (1) Apply for and receive a new import permit from APHIS that specifies that the stallion or mare would be moved to an approved State; and (2) transport the stallion or mare in a sealed vehicle that has been cleaned and disinfected to an approved facility in an approved State where it is quarantined under State or Federal supervision until the stallion or mare has met the testing and treatment requirements of § 93.301(e)(3) or (e)(5).

Cancellation of Import Permit

We are proposing to apply to noncompetitive entertainment horses the provisions relating to the cancellation of an import permit and the appeals process that currently appear in the regulations pertaining to horses imported for competition. Specifically, we are proposing that if the provisions described in this proposed rule are not met, the Administrator would cancel the import permit that allows the importation of the horse into the United States and that allows the horse to stay in this country. If the cancellation is oral, the decision and the reason for cancellation of the permit would be confirmed in writing as promptly as circumstances allow. The owner or importer would be able to appeal the cancellation of the permit in writing to the Administrator within 10 days after receiving either oral or written notification of the cancellation, whichever is earlier. If the appeal is sent by mail, it would have to be postmarked within 10 days after the owner or importer receives the notification of cancellation. The appeal would have to include all of the facts and reasons upon which the person relies to show that the import permit was wrongfully canceled. If there is a conflict as to any material fact, a hearing would be held to resolve the conflict. These provisions would satisfy due process requirements pertaining to the cancellation of an import permit.

We are also proposing that, except in those cases where an appeal is in process, any person whose import permit is canceled would have to move his or her horse out of the United States within 10 days after receiving an oral or written notice of cancellation, whichever is earlier. The horse would not be permitted to perform or be exhibited from the date the owner or importer receives the notice of cancellation until the horse is moved out of the United States or until resolution of an appeal in favor of the owner or importer. Except when being exercised, the horse would have to be kept in a stall that is separated from other stalls containing horses that are not listed on the import permit, either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet (2.4 meters) high.

Until the horse is removed from the United States or an appeal is resolved in favor of the owner or importer, the horse would have to be kept, at the expense of the owner or importer, either on the premises at which the horse is located when the notice of cancellation is received or, if the horse is in transit when the notice of cancellation is received, on the premises at which it is next scheduled to perform or be exhibited. However, in cases where the owners of the premises do not permit the horse to stay on those premises, or

when the Administrator determines that keeping the horse at the premises would pose a disease risk to other horses in the United States, the horse would have to be kept, at the expense of the owner or importer, on an alternative premises approved by the Administrator.

Trust Fund Agreement and Cost of Government-Provided Services

We are proposing to require that noncompetitive entertainment horses be imported and maintained in the United States in accordance with a trust fund agreement executed by the horse's owner or importer. The current regulations already require that a trust fund agreement be executed for horses imported into the United States to compete in specified events. We would extend these provisions to noncompetitive entertainment horses to ensure that the government is reimbursed for the services it provides.

Under the trust fund agreement, the owner or importer would have to deposit with APHIS an amount equal to the estimated cost, including travel, subsistence, administrative expenses, and incidental expenses, as determined by APHIS, for an APHIS representative to: (1) Inspect the premises at which the horse would perform or be exhibited; (2) conduct the required monitoring of the horse at the premises at which it competes; and (3) supervise cleaning and disinfecting the means of conveyance in which the horses travels while in the United States. The estimated costs would be based on the following factors:

- Number of hours needed for an APHIS representative to conduct the required inspection and monitoring;
- For services provided during regular business hours (8 a.m. to 4:30 p.m., Monday through Saturday, except holidays), the average salary, per hour, for an APHIS representative;
- For services provided outside regular business hours, the applicable rate for overtime, night differential, or Sunday or holiday pay, based on the average salary, per hour, for an APHIS representative;
- Number of miles from the premises at which the horse competes, performs, or is exhibited to the APHIS office or facility that is monitoring the activities;
- Government rate per mile for automobile travel or, if appropriate, cost of other means of transportation between the premises at which the horse competes, performs, or is exhibited and the APHIS office or facility;
- Number of trips between the premises at which the horse competes, performs, or is exhibited and the APHIS office or facility that APHIS representatives are required to make in order to conduct the required inspection and monitoring;
- Number of days the APHIS representative conducting the inspection and monitoring must be in ''travel status;''
- Applicable government per diem rate; and
- Cost of related administrative support services.

During the horse's stay in the United States, if we determine that the amount deposited would not fully cover the services we are scheduled to provide during the remainder of the horse's stay, we would issue a bill for the difference to the horse's owner or importer. The horse's owner or importer would have to pay amounts billed within 14 days after receiving the bill. If the bill is not paid within that time, we would cease to perform the services provided for in this proposed rule until the bill is paid. The Administrator would inform the owner or importer of the cessation of services orally or in writing. If the notice is oral, it would be confirmed in writing as soon as circumstances permit, along with the reasons for it.

In such a case, the horse would have to be kept, at the expense of the owner or importer and until the bill is paid, either on the premises at which the horse is located when the notice of cessation of services is received or, if the horse is in transit when the notice of cessation is received, on the premises at which it is next scheduled to perform or be exhibited according to the import permit. The horse would have to be kept in a stall that is separated from other stalls containing horses that are not listed on the import permit either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet (2.4 meters) high. In cases where the owners of the premises where the horse would be expected to stay do not permit the horse to be kept on those premises, or when the Administrator determines that keeping the horse on the premises would pose a disease risk to other horses in the United States, the horse would have to be kept, at the expense of the owner or importer, on an alternative premises approved by the Administrator. Until the bill is paid, the horse would not be permitted to perform or be exhibited. Any amount deposited in excess of the cost to APHIS of providing the services required would be refunded to the owner or importer.

Miscellaneous

In this document, we are also updating the name of the breed association in Spain that is specifically approved by the U.S. Department of Agriculture to provide factual, current information regarding the activities of Spanish Pure Breed horses for the purposes of § 93.301(d). The current regulations identify the breed association in Spain as ''Jefatura de Cria Caballar Registro Matricula.'' The Spanish Government has notified APHIS that the name of the breed association has been changed to ''Asociacion Nacional de Criadores de Caballos de Pura Raza Espanola.''

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

Currently, § 93.301(f) provides that mares and stallions over 731 days old from CEM-affected countries may be temporarily imported into the United States to compete in specified events for no longer than 90 days without meeting CEM quarantine and testing requirements that would otherwise apply to such horses. These same provisions have been used to authorize the temporary importation of noncompetitive entertainment horses. Several performance horse groups have requested that APHIS extend the 90-day limit so that they may exhibit and show their horses in the United States for longer periods.

We are proposing to amend the regulations to establish conditions under which noncompetitive entertainment horses (stallions and mares) over 731 days of age from CEM-affected countries could remain in the United States for longer than 90 days for public exhibition and entertainment purposes without undergoing the CEM quarantine and testing prescribed in the regulations.

The horse industry plays an important role in the U.S. economy. There were 542,223 farms with 3.644 million horses valued at $9.9 billion in the U.S. in 2002.[1] According to a recent study done for the American Horse Council, the number and value of horses are much larger than those reported in the 2002 Census of Agriculture: 2 million people owning 9.2 million horses with direct

[1] 2002 Census of Agriculture (NASS).

value of about $39 billion.[2] Both sets of data underscore the importance of the equine industry. In addition, other agricultural and non-agricultural sectors are dependent on the horse industry for their economic activity. Horses are a highly valued asset, especially those with a specific pedigree.

Horses also play an important role in U.S. international trade. The value of U.S. horse exports ($449 million) was more than the combined export value of cattle, hogs and sheep and goats ($65 million) between 2003 and 2005.[3]

The United States imported a total of 31,198 horses in 2005. Nearly 67 percent of horses imported were from Canada and 7.6 percent were from Mexico. Of the total imports, 25,564 were from non-CEM countries and the remaining 5,634 were from CEM countries. The proportion of horse imports that are pure breeding horses is small. Of the above total, 2,341 were purebred breeding horses. Only 340 purebred breeding horses were imported from CEM countries.[4] However, horses supplied by CEM-affected countries are generally highly valued. In 2005, for example, the average value of purebred breeding horses imported from CEM-affected regions was $41,220, whereas the average value of purebred breeding horses imported from countries not affected by CEM was $17,180.

Although the disease does not result in death, CEM can be economically costly. The direct consequence may include the closing of breeding operations, production losses as a result of abortion, and costs of disease control. A CEM outbreak would result in the quarantine of affected horse farms, temporary cessation of breeding operations, and restriction of both intrastate and interstate movement. For some breeders, this could mean the loss of thousands or even millions of dollars in stud fees and breeding losses. Other consequences include trade restrictions that may be imposed by international trading partners.

The noncompetitive entertainment horses that would be affected by this rule would not be allowed to have direct contact with horses outside those listed on their permit and could not be used for breeding purposes at any time while in the United States, including breeding with horses in the same show. Additionally, these horses may not undergo any genital examinations (unless required for diagnosis and treatment of a medical condition with prior approval of an APHIS representative), semen collection, or artificial insemination. Furthermore, since these are very specialized performance animals, domestic breeders would not be affected if this rule were to increase the amount of time the imported horses are in the United States.

Horses arriving in the United States from abroad are quarantined at a USDA Animal Import Center, generally for 3 days. Horses temporarily imported are required to exit the United States and be readmitted, following quarantine and testing, every 90 days. Each entry after 90 days is considered a new entry into the United States. The USDA charges a minimum of $810 for the 3-day quarantine. In addition to this facility charge, user fees of $80 are paid for blood testing, resulting in a total quarantine and testing cost per horse of $890. The proposed rule would allow imported performance horses to stay in the U.S. longer than 90 days without their owners having again to pay USDA import quarantine and testing costs. This is a saving that accrues to the importing entities and is likely to counterbalance their costs associated with supervisory activities of APHIS and/or an accredited veterinarian.

The number of entities and horses expected to be directly affected by this rule is not large. We anticipate that between 1 and 10 performing groups varying in size from 5 to 40 horses (or a total of between 5 and 400 horses) would utilize the proposed exception each year. Given that there are over a million domestic show horses, even the upper quantity represents a very small fraction of the total supply (0.04 percent).

The Small Business Administration (SBA) has established guidelines for determining which types of firms are to be considered small under the Regulatory Flexibility Act. This rule may affect operations such as zoological parks (North American Industry Classification System [NAICS] code 712130), and animal performances including circuses, carnivals, and amusement parks (NAICS code 711190). SBA classifies these operations as small entities if their annual receipts are not more than $6.5 million. Of the approximately 850 such establishments, about 12.5 percent are considered to be large. The subset of these entities that temporarily import noncompetitive entertainment horses from CEM countries would benefit from the forgone costs of having the horses exit and reenter the United States every 90 days. On the other hand, they would bear the cost of supervisory activities by APHIS and/or an accredited veterinarian. The overall impact is expected to be insignificant, given the relatively small number of noncompetitive entertainment horses imported from CEM countries. Other operations that may remotely be affected are domestic suppliers of similar horses (NAICS code 112920). According to the 2002 Census of Agriculture, that year there were 542,223 horse farms with 3,644,278 horses in the United States, of which 124,596 farms sold 470,423 horses that had a total value of over $1.13 billion.[5] An unknown share of these farms supply show horses that could be comparable to the noncompetitive entertainment horses imported temporarily from CEM affected countries. SBA classifies horse farms as small entities if their annual receipts are not more than $750,000;[6] over 99 percent are considered to be small.

Entities that may be affected by the rule are principally small businesses, but the impact of the rule is not expected to be significant. Because the pool of noncompetitive entertainment horses that are temporarily imported is a small fraction of the total number of show horses in the United States, any effects of the proposed rule for U.S. entities would be very small.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

[4] Id.

[5] As stated above, the census total is much less than the total reported by the American Horse Council Foundation. According to that report, there were 9,222,847 horses in 2005 (Deloitte Consulting LLP, National Economic Impact of the U.S. Horse Industry). Of this total, 9 percent were racing, 30 percent showing, 42 percent recreation and 19 percent other (*http://www.horsecouncil.org/statistics.htm*).

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB). Please send written comments to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for APHIS, Washington, DC 20503. Please state that your comments refer to Docket No. APHIS–2006–0164. Please send a copy of your comments to: (1) Docket No. APHIS–2006–0164, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238, and (2) Clearance Officer, OCIO, USDA, room 404–W, 14th Street and Independence Avenue, SW., Washington, DC 20250. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this proposed rule.

We are proposing to amend the regulations to allow noncompetitive entertainment horses from countries affected with CEM to be temporarily imported into the United States under conditions very similar to the conditions in § 93.301(f), which provides for the temporary importation of horses to compete in specified events. In addition, we are proposing to require the submission of additional information with the application for an import permit.

We are soliciting comments from the public (as well as affected agencies) concerning our proposed information collection and recordkeeping requirements. These comments will help us:

(1) Evaluate whether the proposed information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond (such as through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses).

Estimate of burden: Public reporting burden for this collection of information is estimated to average 1.4 hours per response.

Respondents: Importers of noncompetitive entertainment horses.

Estimated annual number of respondents: 15.

Estimated annual number of responses per respondent: 1.333333333.

Estimated annual number of responses: 20.

Estimated total annual burden on respondents: 28 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

Copies of this information collection can be obtained from Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

E-Government Act Compliance

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this proposed rule, please contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

List of Subjects in 9 CFR Part 93

Animal diseases, Imports, Livestock, Poultry and poultry products, Quarantine, Reporting and recordkeeping requirements.

Accordingly, we propose to amend 9 CFR part 93 as follows:

PART 93—IMPORTATION OF CERTAIN ANIMALS, BIRDS, FISH, AND POULTRY, AND CERTAIN ANIMAL, BIRD, AND POULTRY PRODUCTS; REQUIREMENTS FOR MEANS OF CONVEYANCE AND SHIPPING CONTAINERS

1. The authority citation for part 93 continues to read as follows:

Authority: 7 U.S.C. 1622 and 8301–8317; 21 U.S.C. 136 and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.4.

2. Section 93.301 is amended as follows:

a. In paragraph (c)(2)(vii), by removing the words ''paragraph (f)'' and adding the words ''paragraph (f)(1)'' in their place, and by removing the word ''and'' at the end of the sentence.

b. By redesignating paragraph (c)(2)(viii) as paragraph (c)(2)(ix) and adding a new paragraph (c)(2)(viii) to read as set forth below.

c. In footnote 6, by removing the words ''Jefatura de Cria Caballar Registro Matricula for Spain'' and adding the words ''Asociacion National de Criadores de Caballos de Pura Raza Espanola for Spain'' in their place.

d. By revising paragraph (f) to read as set forth below.

§ 93.301 General prohibitions; exceptions.

* * * * *

(c) * * *

(2) * * *

(viii) Horses over 731 days of age imported into the United States for noncompetitive public exhibition and entertainment purposes if the horses meet the requirements of paragraph (f)(2) of this section; and

* * * * *

(f) *Special provisions for temporary importation for competition or entertainment purposes.* (1) Horses over 731 days of age may be imported into the United States for no more than 90 days to compete in specified events provided that the conditions in paragraphs (f)(3) through (f)(12) of this section are met.

(2) Horses over 731 days of age may be temporarily imported into the United States solely for noncompetitive public exhibition and entertainment purposes provided that the conditions in paragraphs (f)(3) through (f)(12) of this section are met.

(3) At the time of importation, each horse must be accompanied by an import permit in accordance with § 93.304 and a health certificate issued in accordance with § 93.314. For horses imported in accordance with paragraph (f)(2) of this section, the health certificate must also certify that cultures negative for CEM were obtained from sets of specimens collected on three separate occasions within a 7-day period from the mucosal surfaces of the clitoral fossa and the clitoral sinuses of any female horses and from the surfaces of the prepuce, the urethral sinus, and the fossa glandis, including the diverticulum of the fossa glandis, of any male horses. For both female and male horses, the sets of specimens must be collected on days 1, 4, and 7 of the 7-day period, and the last of these sets of specimens must be collected within 30 days of exportation. All specimens required by this paragraph must be collected by a licensed veterinarian who either is, or is acting in the presence of, the veterinarian signing the certificate.

(4) Following the horse's arrival in the United States:

(i) A horse imported in accordance with paragraph (f)(1) of this section may remain in the United States for not more

than 90 days, except as provided in paragraph (f)(9) of this section.

(ii) A horse imported in accordance with paragraph (f)(2) of this section may remain in the United States indefinitely, except as provided in paragraph (f)(9) of this section, as long as the conditions of paragraphs (f)(3) through (f)(12) of this section are met and the horse's owner or importer applies for and obtains from APHIS an import permit, as provided for in § 93.304, each year prior to the anniversary date of the horse's arrival in the United States.

(5) While the horse is in the United States, the following conditions must be met:

(i) A horse imported in accordance with paragraph (f)(2) of this section:

(A) Must not be entered in competitions.

(B) Must be regularly used in performances or exhibitions, unless sick or injured. A horse that is no longer performing or being exhibited must be exported or made eligible for permanent entry in accordance with paragraph (f)(9) of this section.

(C) Must be kept with the other horses listed on the import permit, unless otherwise approved by an APHIS representative.

(ii) Except as provided in paragraph (f)(5)(viii) of this section, the horse must be moved according to the itinerary and methods of transport specified in the import permit provided for in § 93.304.

(iii) The horse must be monitored by an accredited veterinarian or APHIS representative to ensure that the provisions of paragraphs (f)(5)(ii), (f)(5)(vi), and (f)(5)(vii) of this section are met. If the monitoring is performed by an accredited veterinarian, the Veterinarian in Charge will ensure that the accredited veterinarian is familiar with the requirements of this section and spot checks will be conducted by an APHIS representative to ensure that the requirements of this section are being met. If an APHIS representative finds that requirements are not being met, the Administrator may require that all remaining monitoring be conducted by APHIS representatives to ensure compliance.

(iv) Except when in transit, the horse must be kept on a premises that has been approved by an APHIS representative. For horses imported in accordance with paragraph (f)(1) of this section, such approval may be oral or in writing. If the approval is oral, it will be confirmed in writing by the Administrator as soon as circumstances permit. For horses imported in accordance with paragraph (f)(2) of this section, the approval will be in writing. To receive approval, the premises:

(A) Must not be a breeding premises; and

(B) Must be or contain a building in which the horse can be kept in a stall that is separated from other stalls that contain horses that are not listed on the import permit, either by an empty stall, by an open area across which horses cannot touch each other, or by a solid wall that is at least 8 feet (2.4 meters) high.

(v) While in transit, the horse must be moved in either an aircraft or a sealed van or trailer. If the horse is moved in a sealed van or trailer, the seal may be broken only by an APHIS representative at the horse's destination, except in situations where the horse's life is in danger.

(vi) Except when actually competing, performing, or being exhibited or exercised, the horse must be kept in a pasture approved by APHIS or in a stall that is separated from other stalls containing horses that are not listed on the import permit, either by an empty stall, by an open area across which horses cannot touch each other, or by a solid wall that is at least 8 feet (2.4 meters) high.

(vii) The horse may not be used for breeding purposes (including artificial insemination or semen collection) and may not have any other sexual contact with other horses. The horse may not undergo any genital examinations, except that a horse imported in accordance with paragraph (f)(2) of this section may undergo genital examinations for diagnosis or treatment of a medical condition with the prior approval of an APHIS representative.

(viii) The horse may be moved for diagnosis or treatment of a medical condition with the prior approval of an APHIS representative.

(ix) After the horse is transported anywhere in the United States, any vehicle in which the horse was transported must be cleaned and disinfected in the presence of an APHIS representative, according to the procedures specified in §§ 71.7 through 71.12 of this chapter, before any other horse is transported in the vehicle.

(x) The cleaning and disinfection specified in paragraph (f)(5)(ix) of this section must be completed before the vehicle is moved from the place where the horse is unloaded. In those cases where the facilities or equipment for cleaning and disinfection are inadequate at the place where the horse is unloaded, the Administrator may allow the vehicle to be moved to another location for cleaning and disinfection when the move will not pose a disease risk to other horses in the United States.

(xi) The owner or importer of the horse must comply with any other provisions of this part applicable to him or her.

(6) If the owner or importer wishes to change the horse's itinerary or the methods by which the horse is transported from that which he or she specified in the application for the import permit, the owner or importer must make the request for change in writing to the Administrator. Requests for change must be submitted to APHIS no less than 15 days before the proposed date of the change. Requests should be sent to the Administrator, c/o Import-Export Animals Staff, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD 20737–1231. The change in itinerary or method of transport may not be made without the written approval of the Administrator, who may grant the request for change when he or she determines that granting the request will not endanger other horses in the United States and that sufficient APHIS personnel are available to provide the services required by the owner or importer.

(7) The Administrator may cancel, orally or in writing, the import permit provided for under § 93.304 whenever the Administrator finds that the owner or importer of the horse has not complied with the provisions of paragraphs (f)(3) through (f)(6) of this section or any conditions imposed under those provisions. If the cancellation is oral, the Administrator will confirm the cancellation and the reasons for the cancellation in writing as soon as circumstances permit. Any person whose import permit is cancelled may appeal the decision in writing to the Administrator within 10 days after receiving oral or written notification of the cancellation, whichever is earlier. If the appeal is sent by mail, it must be postmarked within 10 days after the owner or importer receives oral or written notification of the cancellation, whichever is earlier. The appeal must include all of the facts and reasons upon which the person relies to show that the import permit was wrongfully cancelled. The Administrator will grant or deny the appeal in writing as promptly as circumstances permit, stating the reason for his or her decision. If there is a conflict as to any material fact, a hearing will be held to resolve the conflict. Rules of practice concerning the hearing will be adopted by the Administrator.

(8) Except in those cases where an appeal is in process, any person whose import permit is cancelled must move the horse identified in the import permit out of the United States within 10 days

after receiving oral or written notification of cancellation, whichever is earlier. The horse is not permitted to enter competition, perform, or be exhibited from the date the owner or importer receives the notice of cancellation until the horse is moved out of the United States or until resolution of an appeal in favor of the owner or importer. Except when being exercised, the horse must be kept, at the expense of the owner or importer, in a stall on the premises where the horse is located when the notice of cancellation is received or, if the horse is in transit when the notice of cancellation is received, on the premises where it is next scheduled to compete, perform, or be exhibited according to the import permit. The stall in which the horse is kept must be separated from other stalls containing horses that are not listed on the import permit, either by an empty stall, by an open area across which horses cannot touch each other, or a by solid wall that is at least 8 feet (2.4 meters) high. In cases where the owners of the above specified premises do not permit the horse to be kept on those premises, or when the Administrator determines that keeping the horse on the above specified premises will pose a disease risk to horses in the United States, the horse must be kept, at the expense of the owner or importer, on an alternative premises approved by the Administrator.

(9) Stallions or mares over 731 days of age that are imported in accordance with paragraphs (f)(1) or (f)(2) of this section may be eligible to remain in the United States if the following is completed:

(i) Following completion of the itinerary specified in the import permit provided for in § 93.304, the horse's owner or importer applies for and receives a new import permit that specifies that the stallion or mare will be moved to an approved State listed in paragraph (h)(6) or (h)(7) of this section; and

(ii) The stallion or mare is transported in a sealed vehicle that has been cleaned and disinfected to an approved facility in an approved State where it is quarantined under State or Federal supervision until the stallion or mare has met the testing and treatment requirements of paragraph (e)(3) or (e)(5) of this section.

(10) All costs and charges associated with the supervision and maintenance of a horse imported under paragraphs (f)(1) or (f)(2) of this section will be borne by the horse's owner or importer. The costs associated with the supervision and maintenance of the horse by an APHIS representative at his or her usual places of duty will be reimbursed by the horse's owner or importer through user fees payable under part 130 of this chapter.

(11) In the event that an APHIS representative must be temporarily detailed from his or her usual place of duty in connection with the supervision and maintenance of a horse imported under this paragraph (f), the owner or importer of the horse must execute a trust fund agreement with APHIS to reimburse all expenses (including travel costs, salary, per diem or subsistence, administrative expenses, and incidental expenses) incurred by the Department in connection with the temporary detail. Under the trust fund agreement, the horse's owner or importer must deposit with APHIS an amount equal to the estimated cost, as determined by APHIS, for the APHIS representative to inspect the premises at which the horse will compete, perform, or be exhibited; to conduct the monitoring required by paragraph (f)(5)(iii) of this section; and to supervise the cleaning and disinfection required by paragraph (f)(5)(ix) of this section. The estimated costs will be based on the following factors:

(i) Number of hours needed for an APHIS representative to conduct the required inspection and monitoring;

(ii) For services provided during regular business hours (8 a.m. to 4:30 p.m., Monday through Saturday, except holidays), the average salary, per hour, for an APHIS representative;

(iii) For services provided outside regular business hours, the applicable rate for overtime, night differential, or Sunday or holiday pay, based on the average salary, per hour, for an APHIS representative;

(iv) Number of miles from the premises at which the horse competes, performs, or is exhibited to the APHIS office or facility that is monitoring the activities;

(v) Government rate per mile for automobile travel or, if appropriate, cost of other means of transportation between the premises at which the horse competes, performs, or is exhibited and the APHIS office or facility;

(vi) Number of trips between the premises at which the horse competes, performs, or is exhibited and the APHIS office or facility that APHIS representatives are required to make in order to conduct the required inspection and monitoring;

(vii) Number of days the APHIS representative conducting the inspection and monitoring must be in ''travel status;''

(viii) Applicable government per diem rate; and

(ix) Cost of related administrative support services.

(12) If a trust fund agreement with APHIS has been executed by the owner or importer of a horse in accordance with paragraph (f)(11) of this section and APHIS determines, during the horse's stay in the United States, that the amount deposited will be insufficient to cover the services APHIS is scheduled to provide during the remainder of the horse's stay, APHIS will issue to the horse's owner or importer a bill to restore the deposited amount to a level sufficient to cover the estimated cost to APHIS for the remainder of the horse's stay in the United States. The horse's owner or importer must pay the amount billed within 14 days after receiving the bill. If the bill is not paid within 14 days after its receipt, APHIS will cease to perform the services provided for in paragraph (f)(5) of this section until the bill is paid. The Administrator will inform the owner or importer of the cessation of services orally or in writing. If the notice of cessation is oral, the Administrator will confirm, in writing, the notice of cessation and the reason for the cessation of services as soon as circumstances permit. In such a case, the horse must be kept, at the expense of the owner or importer and until the bill is paid, in a stall either on the premises at which the horse is located when the notice of cessation of services is received or, if the horse is in transit when the notice of cessation of services is received, on the premises at which it is next scheduled to compete, perform, or be exhibited according to the import permit. The stall in which the horse is kept must be separated from other stalls containing horses that are not listed on the import permit either by an empty stall, an open area across which horses cannot touch each other, or a solid wall that is at least 8 feet (2.4 meters) high. In cases where the owners of the premises where the horse would be kept following a cessation of services do not permit the horse to be kept on those premises, or when the Administrator determines that keeping the horse on the premises will pose a disease risk to other horses in the United States, the horse must be kept, at the expense of the owner or importer, on an alternative premises approved by the Administrator. Until the bill is paid, the horse is not permitted to enter competition, perform, or be exhibited. Any amount deposited in excess of the costs to APHIS to provide the required

services will be refunded to the horse's owner or importer.

* * * * *

3. Section 93.304 is amended as follows:

a. In paragraph (a)(1)(ii), by removing the citation ''§ 93.301(f)'' and adding the citation ''§ 93.301(f)(1)'' in its place.

b. By redesignating paragraph (a)(1)(iii) as paragraph (a)(1)(iv) and adding a new paragraph (a)(1)(iii) to read as set forth below.

§ 93.304 Import permits for horses from regions affected with CEM and for horse specimens for diagnostic purposes; reservation fees for space at quarantine facilities maintained by APHIS.

(a) *Application for permit; reservation required.* (1) * * *

(iii) Horses intended for importation under § 93.301(f)(2) must meet the permit requirements of paragraph (a)(1)(i) of this section. Additionally, for horses intended for importation under § 93.301(f)(2), the horse's owner or importer must include the following information with the application for permit that is required by paragraph (a)(1)(i) of this section:

(A) The individual identifying information required in paragraph (a)(1)(i) of this section for all horses to be imported.

(B) The permanent electronic identification of each horse to be imported, if applicable. In the event that a horse has permanent electronic identification, the horse must be accompanied by a compatible reader.

(C) Photographs (head and lateral views) that are sufficient to identify each horse on an electronic medium approved by APHIS.

(D) The proposed total length of stay in the United States.

(E) A description of the shows or events in which the horse will perform while in the United States.

(F) The names, dates, and locations of the venues in which the horse will perform while in the United States.

(G) The names and locations of the premises on which the horse will be kept while in the United States, and the dates the horse will be kept on each premises.

(H) The methods and routes by which the horse will be transported while in the United States.

(I) A written plan for handling sick or injured horses that includes:

(*1*) The name, address, and phone number of each accredited veterinarian who will provide veterinary services in the United States;

(*2*) The name, address, and phone number of medical facilities to be used to diagnose or treat sick or injured horses while in the United States; and

(*3*) A plan to return sick or injured horses to performance condition.

(J) An application for a trust fund or escrow account agreement with APHIS in accordance with § 93.301(f)(11).

Done in Washington, DC, this 27th day of July 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. E7–14994 Filed 8–1–07; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2007–28854; Directorate Identifier 2007–NM–109–AD]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 777–200, –200LR, –300, and –300ER Series Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for all Boeing Model 777–200, –200LR, –300, and –300ER series airplanes. This proposed AD would require doing initial and repetitive inspections for cracking of the elevator actuator fittings, and replacing any cracked fitting with a new fitting. This proposed AD results from a report that a cracked left elevator actuator fitting was found on a Model 777 airplane. We are proposing this AD to detect and correct a cracked actuator fitting, which could detach from the elevator and lead to an unrestrained elevator and an unacceptable flutter condition, which could result in loss of airplane control.

DATES: We must receive comments on this proposed AD by September 17, 2007.

ADDRESSES: Use one of the following addresses to submit comments on this proposed AD.

- DOT Docket Web site: Go to *http://dms.dot.gov* and follow the instructions for sending your comments electronically.
- Government-wide rulemaking Web site: Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- Mail: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- Fax: (202) 493–2251.
- Hand Delivery: Room W12–140 on the ground floor of the West Building, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Contact Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124–2207, for the service information identified in this proposed AD.

FOR FURTHER INFORMATION CONTACT: Gary Oltman, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 917–6443; fax (425) 917–6590.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to submit any relevant written data, views, or arguments regarding this proposed AD. Send your comments to an address listed in the **ADDRESSES** section. Include the docket number ''FAA–2007–28854; Directorate Identifier 2007–NM–109–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of the proposed AD. We will consider all comments received by the closing date and may amend the proposed AD in light of those comments.

We will post all comments we receive, without change, to *http://dms.dot.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact with FAA personnel concerning this proposed AD. Using the search function of that Web site, anyone can find and read the comments in any of our dockets, including the name of the individual who sent the comment (or signed the comment on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78), or you may visit *http://dms.dot.gov*.

Examining the Docket

You may examine the AD docket on the Internet at *http://dms.dot.gov*, or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Operations office (telephone (800) 647–5527) is located on the

ground floor of the West Building at the DOT street address stated in the **ADDRESSES** section. Comments will be available in the AD docket shortly after the Docket Management System receives them.

Discussion

We have received a report indicating that a cracked left elevator actuator fitting was found on a Model 777 airplane with 17,346 total flight hours and 14,043 total flight cycles. The crack extended through the lower inboard flange of the fitting and into the vertical flange. Analysis by Boeing indicates that this crack resulted from fatigue due to higher than anticipated stress levels in the fitting flanges. Cracked elevator actuator fittings could lack adequate residual strength to react to design flight loads and become detached from the elevator. This condition, if not corrected, could allow a cracked actuator fitting to detach from the elevator and lead to an unrestrained elevator and an unacceptable flutter condition, which could result in loss of airplane control.

Relevant Service Information

We have reviewed Boeing Alert Service Bulletin 777–55A0015, dated April 19, 2007. The service bulletin describes procedures for doing an initial dye penetrant or high-frequency eddy current (HFEC) inspection to detect cracking of the elevator actuator fittings; repetitive dye penetrant, HFEC, or detailed inspections of the fittings thereafter; and replacing any cracked fitting with a new fitting having the same part number or an approved optional part number. Compliance times for the initial inspections, depending upon airplane condition, are:

- For airplanes having 14,000 total flight-cycles or more as of the date on the service bulletin, within 90 days after the date on the service bulletin;
- For airplanes having 10,000 total flight-cycles or more, but less than 14,000 total flight-cycles, as of the date on the service bulletin, within 12 months after the date on the service bulletin or within 90 days after the airplane reaches 14,000 total flight-cycles, whichever occurs first; or
- For airplanes having less than 10,000 total flight-cycles as of the date on the service bulletin, before the accumulation of 10,000 total flight cycles or within 12 months after the date on the service bulletin, whichever occurs first.

The next inspection, depending upon the type of initial inspection, is to be done at 1,000 or 1,200 flight cycles after the initial inspection, and repetitive inspections thereafter are to be done at intervals not to exceed 350 to 1,200 flight cycles. Any fitting found cracked during any inspection must be replaced before further flight. Any replacement fitting must receive an initial inspection before the accumulation of 10,000 total flight cycles after the replacement date, and repetitive inspections thereafter as described in this paragraph.

FAA's Determination and Requirements of the Proposed AD

We have evaluated all pertinent information and identified an unsafe condition that is likely to exist or develop on other airplanes of this same type design. For this reason, we are proposing this AD, which would require accomplishing the actions specified in the service information described previously.

Interim Action

We consider this proposed AD interim action. The manufacturer is currently developing a modification that will address the unsafe condition identified in this AD. Once this modification is developed, approved, and available, we might consider additional rulemaking.

Costs of Compliance

There are about 619 airplanes of the affected design in the worldwide fleet. This proposed AD would affect about 138 airplanes of U.S. registry. The proposed inspections would take about 4 work hours per airplane, per inspection cycle, at an average labor rate of $80 per work hour. Based on these figures, the estimated cost of the proposed AD for U.S. operators is $44,160, or $320 per airplane, per inspection cycle.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket. See the **ADDRESSES** section for a location to examine the regulatory evaluation.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The Federal Aviation Administration (FAA) amends § 39.13 by adding the following new airworthiness directive (AD):

Boeing: Docket No. FAA–2007–28854; Directorate Identifier 2007–NM–109–AD.

Comments Due Date

(a) The FAA must receive comments on this AD action by September 17, 2007.

Affected ADs

(b) None.

Applicability

(c) This AD applies to all Boeing Model 777–200, –200LR, –300, and –300ER series airplanes, certificated in any category.

Unsafe Condition

(d) This AD results from a report that a cracked left elevator actuator fitting was found on a Model 777 airplane. We are issuing this AD to detect and correct a cracked actuator fitting, which could detach from the elevator and lead to an unrestrained elevator and an unacceptable flutter condition, which could result in loss of airplane control.

Compliance

(e) You are responsible for having the actions required by this AD performed within the compliance times specified, unless the actions have already been done.

Inspections

(f) At the applicable time specified in paragraph 1.E. ''Compliance'' of Boeing Alert Service Bulletin 777–55A0015, dated April 19, 2007, do an initial dye penetrant or high-frequency eddy current (HFEC) inspection for cracking of the elevator actuator fittings, and, thereafter, do repetitive dye penetrant, HFEC, or detailed inspections at the applicable times specified in paragraph 1.E. ''Compliance.'' Before further flight, replace any fitting found to be cracked during any inspection required by this AD with a new fitting having the same part number, or an optional part number as identified in the service bulletin. Thereafter, do initial and repetitive inspections of the replacement fitting as described in paragraph 1.E. of the service bulletin. Do all inspections and actions described in this paragraph in accordance with the Accomplishment Instructions of the alert service bulletin; except, where the service bulletin specifies a compliance time after the date on the service bulletin, this AD requires compliance within the specified compliance time after the effective date of this AD.

Alternative Methods of Compliance (AMOCs)

(g)(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested in accordance with the procedures found in 14 CFR 39.19.

(2) To request a different method of compliance or a different compliance time for this AD, follow the procedures in 14 CFR 39.19. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD, if it is approved by an Authorized Representative for the Boeing Commercial Airplanes Delegation Option Authorization Organization who has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

Issued in Renton, Washington, on July 25, 2007.

Stephen P. Boyd,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; EMBRAER Model EMB–120, –120ER, –120FC, –120QC, and –120RT Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for the products listed above. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

Icing tunnel tests on an EMB–120 wing section, conducted under a joint Embraer–NASA–(National Aeronautics and Space Administration) FAA–CTA (Centro Técnico Aeroespacial) research program well after the EMB–120( ) was type-certificated, have shown that stick shaker to stick pusher speed margins may drop below the minimum required by the applicable regulations in certain icing conditions. Although flight tests have shown that the aircraft handling qualities are not adversely affected, these reduced speed margins may significantly increase crew workload in certain flight phases.

The unsafe condition is reduced ability of the flightcrew to maintain the safe flight and landing of the airplane. The proposed AD would require actions that are intended to address the unsafe condition described in the MCAI.

DATES: We must receive comments on this proposed AD by September 4, 2007.

ADDRESSES: You may send comments by any of the following methods:

- DOT Docket Web Site: Go to *http://dms.dot.gov* and follow the instructions for sending your comments electronically.
- Fax: (202) 493–2251.
- Mail: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.
- Hand Delivery: Room W12–140 on the ground floor of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- Federal eRulemaking Portal: *http://www.regulations.gov*. Follow the instructions for submitting comments.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://dms.dot.gov*; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received and other information. The street address for the Docket Operations office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98057–3356; telephone (425) 227–2125; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Streamlined Issuance of AD

The FAA is implementing a new process for streamlining the issuance of ADs related to MCAI. This streamlined process will allow us to adopt MCAI safety requirements in a more efficient manner and will reduce safety risks to the public. This process continues to follow all FAA AD issuance processes to meet legal, economic, Administrative Procedure Act, and **Federal Register** requirements. We also continue to meet our technical decision-making responsibilities to identify and correct unsafe conditions on U.S.-certificated products.

This proposed AD references the MCAI and related service information that we considered in forming the engineering basis to correct the unsafe condition. The proposed AD contains text copied from the MCAI and for this reason might not follow our plain language principles.

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2007–28855; Directorate Identifier 2007–NM–098–AD'' at the beginning of

your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://dms.dot.gov*, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The Agência Nacional de Aviaçãao Civil (ANAC), which is the airworthiness authority for Brazil, has issued Brazilian Airworthiness Directive 2007–03–03, effective April 10, 2007 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

> Icing tunnel tests on an EMB–120 wing section, conducted under a joint Embraer–NASA—(National Aeronautics and Space Administration) FAA–CTA (Centro Técnico Aeroespacial) research program well after the EMB–120( ) was type-certificated, have shown that stick shaker to stick pusher speed margins may drop below the minimum required by the applicable regulations in certain icing conditions. Although flight tests have shown that the aircraft handling qualities are not adversely affected, these reduced speed margins may significantly increase crew workload in certain flight phases.

The unsafe condition is reduced ability of the flightcrew to maintain the safe flight and landing of the airplane. The corrective action includes modification of certain electrical wiring and installation of a new Stall Warning Computer. You may obtain further information by examining the MCAI in the AD docket.

Relevant Service Information

EMBRAER has issued Service Bulletins 120–27–0091, Change 02, dated September 29, 2003; and 120–27–0092, Revision 01, dated December 29, 2006. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have proposed different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a NOTE within the proposed AD.

Costs of Compliance

Based on the service information, we estimate that this proposed AD would affect about 107 products of U.S. registry. We also estimate that it would take about 58 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is $80 per work-hour. Required parts would cost up to $2,000 per product, depending on airplane configuration. Where the service information lists required parts costs that are covered under warranty, we have assumed that there will be no charge for these costs. As we do not control warranty coverage for affected parties, some parties may incur costs higher than estimated here. Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be up to $710,480, or $6,640 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and

3. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

We prepared a regulatory evaluation of the estimated costs to comply with this proposed AD and placed it in the AD docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. The FAA amends § 39.13 by adding the following new AD:

Empresa Brasileira de Aeronautica S.A. (EMBRAER): Docket No. FAA–2007–28855; Directorate Identifier 2007–NM–098–AD.

Comments Due Date

(a) We must receive comments by September 4, 2007.

Affected ADs

(b) None.

Applicability

(c) This AD applies to all EMBRAER Model EMB–120, –120ER, –120FC, –120QC, and –120RT airplanes; certificated in any category.

Subject

(d) Air Transport Association (ATA) of America Code 27: Flight controls.

Reason

(e) The mandatory continuing airworthiness information (MCAI) states:

Icing tunnel tests on an EMB–120 wing section, conducted under a joint Embraer–NASA—(National Aeronautics and Space Administration) FAA–CTA (Centro Técnico Aeroespacial) research program well after the EMB–120( ) was type-certificated, have shown that stick shaker to stick pusher speed margins may drop below the minimum required by the applicable regulations in certain icing conditions. Although flight tests have shown that the aircraft handling qualities are not adversely affected, these reduced speed margins may significantly increase crew workload in certain flight phases.

The unsafe condition is reduced ability of the flightcrew to maintain the safe flight and landing of the airplane. The corrective action includes modification of certain electrical wiring and installation of a new Stall Warning Computer.

Actions and Compliance

(f) Within 36 months after the effective date of this AD, unless already done, do the following actions.

(1) Replace the current Stall Warning Computers with new improved ones in accordance with detailed instructions and procedures described in the Embraer Service Bulletin 120–27–0092, Revision 01, dated December 29, 2006.

(2) Before installing the improved Stall Warning Computers, accomplish the detailed instructions and procedures described in the Embraer Service Bulletin 120–27–0091, Change 02, dated September 29, 2003.

(3) As of 36 months after the effective date of this AD, no person may install a Stall Warning Computer; part number C–81806–1 or –2, Mod. A, or C–81806–3, on any airplane.

FAA AD Differences

Note: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(g) The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Dan Rodina, Aerospace Engineer, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 227–2125; fax (425) 227–1149. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act, the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

(h) Refer to MCAI Brazilian Airworthiness Directive 2007–03–03, effective April 10, 2007; and Embraer Service Bulletins 120–27–0091, Change 02, dated September 29, 2003; and 120–27–0092, Revision 01, dated December 29, 2006; for related information.

Issued in Renton, Washington, on July 25, 2007.

Stephen P. Boyd,

Acting Manager,Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 385

[Docket No. RM07–16–000]

Filing Via the Internet

July 23, 2007.

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission is proposing to amend its regulations to implement the latest version of its eFiling system. The upgraded system will permit most documents filed with the Commission to be submitted via the Internet. This will include, among other things, large documents such as maps and some confidential documents.

DATES: Comments are due October 1, 2007.

ADDRESSES: You may submit comments, identified by docket number by any of the following methods:

- *Agency Web Site: http://ferc.gov/docs-filing/efiling.asp*. Documents created electronically using word processing software should be filed in native applications or print-to-PDF format and not in a scanned format.
- *Mail/Hand Delivery:* Commenters unable to file comments electronically must mail or hand deliver an original and 14 copies of their comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street, NE., Washington, DC 20426.

Instructions: For detailed instructions on submitting comments and additional information on the rulemaking process, see the Comment Procedures Section of this document.

FOR FURTHER INFORMATION CONTACT: Wilbur Miller, 888 First Street, NE., Washington, DC 20426, telephone: (202) 502–8953, e-mail: *wtmiller@ferc.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

1. On September 21, 2000, the Commission issued Order No. 619, which implemented the use of the Internet for submission of documents to the Commission for filing.[1] Such submissions were limited to categories of documents specified by the Secretary of the Commission, with the intention of gradually expanding the range of eligible documents.[2] The eFiling system plays an important role in the Commission's efforts to comply with the Government Paperwork Elimination Act, which requires that agencies provide the option to submit information electronically, when practicable, as a substitute for paper.[3] The Commission also has established a system of electronic registration, or eRegistration, which is required for users of its eFiling system and other specified activities.[4] Filing via the Internet is optional for eligible documents.[5] The eFiling system now is receiving approximately one third of all documents filed at the Commission. The system is accessible through the Commission's Web site at *http://www.ferc.gov/docs-filing/efiling.asp*.

2. The Commission is proposing to implement, in late 2007, eFiling 7.0, which will significantly expand the capabilities of the system. As part of this implementation, the Commission proposes to expand the range of documents that may be filed via the Internet to include all filings, with specified exceptions. Most notably, it will be possible for regulated entities to make complex filings in their entireties in electronic format.[6] The Commission

also proposes to implement other changes and technical enhancements, and is seeking comments on the advisability of these changes and the best methods of implementing them.

II. Discussion

A. Eligible Documents

3. Under the Commission's regulations, only ''qualified documents'' may be filed via the Internet, and the Secretary is authorized to specify which documents are qualified.[7] A list of qualified documents is published on the Commission's web site. Currently, there are over forty categories of qualified documents.[8] The Secretary also is authorized to issue filing instructions.[9]

4. To implement eFiling 7.0, the Commission proposes to revise its regulations to permit users to submit via the Internet all documents filed in Commission proceedings pursuant to Chapter I of Title 18 of the Code of Federal Regulations, with specified exceptions. As before, the Secretary will specify the documents that may be submitted to the eFiling system, but now the Secretary would list exceptions rather than eligible documents. The Secretary would continue to issue filing instructions for allowable file formats, electronic document formats and electronic filings having multiple components. However, where specific regulations require that a filing include particular content, those regulations will continue to apply. Similarly, where specific regulations or other instructions contain requirements applicable to electronic documents, such as allowable file formats,[10] those instructions also will continue to apply. The Commission invites comment on the proposals described below and generally on which documents should be accepted through the eFiling system.

5. The Commission proposes to revise Rule 2003(c) of the its Rules of Practice and Procedure [11] to provide specifically that all documents may be filed via the Internet unless excluded by the Secretary. It is not necessary, however, to revise the regulations to allow the Secretary to issue instructions regarding allowable file formats and other aspects of eFiling, as that authority is already included in Rule 2003(c)(2). Although they will not be the subject of revisions to the regulations, this notice of proposed rulemaking seeks comment on issues such as appropriate file formats and the filing of paper copies of oversized documents. Matters such as file formats and filing instructions would be contained in the instructions to be issued by the Secretary rather than being covered by regulations.

6. There are several types of filings that the Commission anticipates will not be made initially through eFiling 7.0. Electronic filing of tariffs, tariff revisions and rate change applications is the subject of a separate rulemaking.[12] Certain forms will not be accepted through eFiling. For example, the following forms are currently, and would continue to be, submitted through eForms: FERC Form No.1, FERC Form No. 2, FERC Form No. 2–A, FERC Form No. 3–Q, FERC Form No. 6, FERC Form No. 6–Q, Form 60, Form 714, and Electric Quarterly Reports.[13] Requests for extensions of time to file these forms, however, would be submitted through eFiling.

7. Finally, the Commission proposes to begin accepting, through eFiling, documents for which participants request confidential treatment pursuant to the Commission's regulations,[14] including critical energy infrastructure information (CEII).[15] Although the Commission proposes to begin accepting confidential documents with the eFiling 7.0 release, it does not propose to accept documents that are subject to protective order. There likely will be separate file uploads for Public, Confidential, and CEII files. Filers also will be able to revise security designations—for example, move a file from Confidential to Public. Filers will be able to load multiple files under each security class or they may upload .zip files containing numerous files if the files all have the same security class. The Commission will create separate accession numbers for the files uploaded under each security class and pass the files under each accession number to eLibrary with the appropriate security designation. This mirrors the current process for paper filings containing non-public material.

8. In some cases, the Commission will require paper copies of filings although it will also be possible to submit the documents through eFiling 7.0. This paper back-up will apply most notably to oversized documents such as maps, diagrams and drawings. Due to the size of standard monitors and other hardware and software limitations, it is impractical at this time for Commission staff to review such documents in electronic form. The Commission therefore anticipates that it will continue to need paper copies of most documents that are larger than 8.5 x 11 inches. As the Commission upgrades its resources, it expects to be able to reduce or eliminate the requirement for paper copies. The Commission also is considering whether to require paper copies of long documents, such as those exceeding 500 pages. The instructions posted by the Secretary will include directions specifying whether, and how many, paper copies of electronically filed documents are required. Appendix A contains examples of some documents that participants will be able to file via the Internet, but for which the Commission will also require paper copies.

B. File Formats

9. The acceptance through eFiling 7.0 of documents that are not in standard word processing formats will present some issues involving file formats. As noted above, the Commission has issued instructions regarding file formats for specific documents in some regulations. In addition, staff has provided instructions in specific instances. Those requirements will continue to apply. The Secretary will specify formats in filing instructions that will apply in all other cases. The need for specific formatting may arise in connection with oversized documents, spreadsheets and other documents that contain data, to ensure that the documents will be in formats that users can reasonably be expected to find accessible.

10. The Secretary has already issued instructions specifying acceptable file formats for filings submitted on CD–ROM, DVD and other electronic media. These can be found at *http://www.ferc.gov/help/submission-guide/electronic-media/acceptable.asp*. The Commission anticipates that these instructions will be updated concurrent with eFiling 7.0 and will apply to documents submitted through the eFiling system via the Internet. The Commission is required to establish standards for the creation, use, preservation, and disposition of

[13] FERC Form 1–F is currently not included in eForms, so it could be efiled. The same is true with OATTs, as explained in footnote 6.

[14] 18 CFR 388.112.

[15] 18 CFR 388.113.

electronic records to retain them in a usable format until their authorized disposition dates. The Commission therefore invites comment on the current instructions, particularly on the question whether they provide adequate accessibility and accuracy. Based on guidance from the National Archives and Records Administration (NARA), the Commission is considering accepting exclusively waveform audio (.wav) format files for audio content and either audio-video interleave (.avi) or quicktime (.mov) format files for video content except where specific regulations contain requirements for other file formats. Also, the Commission intends to enforce, to the extent it is technically able to do so, the instructions issued with the eFiling 7.0 system rather than rely on voluntary compliance. We also plan to continue to improve our technical ability to enforce the instructions. For example, when the Commission has a technical solution for reliably and rapidly detecting a password-protected document, it will prevent the uploading of that document through eFiling.

11. In some instances, the Commission may issue more detailed instructions requiring particular document formats in connection with specific types of filings. For example, the Commission's regulations set out required exhibits for applications under section 7 of the Natural Gas Act,[16] such as articles of incorporation and a statement showing state authorization to do business,[17] as well as various types of data.[18] The Commission anticipates that the Secretary will issue instructions specifying required formats for many exhibits that must be included in section 7 applications. For documents such as Articles of Incorporation, it is likely that PDF versions would be required. For documents containing data, the Secretary likely will specify that they shall be filed in native spreadsheet application.[19]

12. Another formatting issue concerns the presentation of filed documents in eLibrary. In the original conception of e-Library, the Commission would convert filings in native application to PDF and to Text.[20] This is intended to make filings accessible to the public in an open format without the need for purchasing proprietary software. As eFiling has increased and more complex documents have been filed, the conversion tools used by the Commission have not always been able to produce accurate renditions of filed documents. The degree of reliability decreases as the complexity of the electronic files increases and the costs of staff intervention to ensure reliability are prohibitive. For example, electronic spread sheets commonly contain multiple worksheets, with each worksheet containing many potential paper pages of data in many different formats. The conversion tools however frequently convert only the first worksheet.

13. The Commission therefore is considering whether to discontinue creating PDF and Text versions of submitted documents and post only the electronic files as filed with the Commission, although it intends to continue providing PDF versions of its own issuances. We are requesting comments on the effect this would have on public accessibility to the files. Discontinuing the conversion to open formats could require users to purchase proprietary software. There would also be some inconvenience to participants in Commission proceedings when they are citing to page numbers, as the vast majority of filers do not use paragraph numbers. The Commission requests comments on this proposal.

14. Should the Commission discontinue the practice of creating PDF versions of submissions, it could implement several measures. It could require that all word processing filings be made in open file formats, such as text, html, rtf, or possibly PDF. Open source file types would be the most easily accessible to all users. Alternatively, the Commission could permit filings in open file formats as well as in certain Microsoft Office formats. The Commission notes that Microsoft provides a free viewer that can be downloaded and used to view these files. Alternatively, the Commission could require that documents created with proprietary software be filed in the proprietary software along with an open source format to ensure that all viewers are able to download and read that document. Such filings would duplicate the current Commission practice of scanning all filings to create PDF formats.

15. Spreadsheets may be even more complicated because spreadsheet conversions do not retain formulas and may be difficult for the public to use. Thus, while spreadsheets need to be filed in native application, the Commission could require the filer to provide a PDF or open source file that could be used, at least, to obtain the numbers presented in the spreadsheet. The Commission invites comment on these alternatives, as well as on the possibility of discontinuing the Commission's practice of creating PDF and Text versions.

16. As a related issue, the Commission seeks input on whether the Secretary should require that documents created electronically by the filer using word processing software be filed in native applications or print-to-PDF format and not in a scanned format. The Commission has found that many ordinary text documents are being scanned and then converted to PDF formats. This removes the advantages of the native application, most notably the ability to search the text of the document and to copy and paste. It is unclear what advantage is derived from the submission of scanned PDF versions in such instances.[21] The Commission's regulations regarding signatures are intended to allow participants to submit pleadings, sworn statements and the like without the need for physical signatures or notarization,[22] which in turn should eliminate the need for scanned versions to ensure authenticity. The Commission understands that, in some situations, a scanned, non-searchable document is the only reasonable alternative. For instance, a filer may possess an exhibit only in hard copy and therefore cannot submit it in text-searchable form. The Commission would allow for such situations.

C. Documentless Intervention

17. As part of eFiling 7.0, the Commission is proposing to permit documentless intervention. This proposal will permit users to intervene in Commission proceedings via the Internet through an online form or web interface, without actually uploading a document to serve as the motion or

[16] 18 CFR 157.14.

[17] 18 CFR 157.14(1)–(2) (Exhibits A and B).

[18] *E.g.*, 18 CFR 157.14(11) (Exhibit I—Market Data), (13) (Exhibit K—Cost of Facilities).

[19] The Commission anticipates that spreadsheet files in native application would be required for Exhibit K and the data portions of Exhibits I, L, and N through P of Section 157.14.

[20] *See* Electronic Filing of the Application for Authorization for the Issuance of Securities or the Assumption of Liabilities, 70 FR 35372 (June 20, 2005), FERC Stats. & Regs. Regulations Preambles 2001–2005 ¶ 31,188 at p. 6 (May 27, 2005); Electronic Filing of Documents, 65 FR 57088 (September 21, 2000), FERC Stats. & Regs. Regulations Preambles July 1996–December 2000 ¶ 31,107, at 31,820 (September 14, 2000).

[21] Many courts prohibit or discourage the filing of scanned PDF documents. *E.g.*, *http://www.txs.uscourts.gov/attorneys/cmecf/dcfaq.htm*; *http://www.utd.uscourts.gov/documents/utahdraftadminproc.pdf*; *http://www.med.uscourts.gov/ecf/adminprocedures.htm*.

[22] *See* Rule 2005(b)(3) of the Commission's Rules of Practice and Procedure, 18 CFR 385.2005(b)(3) (permitting declaration under oath pursuant to 28 U.S.C. 1746); Rule 2005(c) of the Commission's Rules of Practice and Procedure, 18 CFR 385.2005(c) (in electronic documents, typed characters suffice as signature).

notice.[23] This change would not, however, affect in any way the issue of whether a participant is entitled to intervene. The Commission does not propose revising any regulation in connection with this proposed change. Instructions relating to this proposal would be issued by the Secretary.[24] The Commission invites comment on the proposal as described below.

18. The current online system allows the entry of only the docket number, the party or parties, and at least one registered contact for each party. If a person who has not eRegistered attempts to file a motion/notice to intervene with the Commission online, the system will prompt the user first to eRegister.[25] Under the current system the user must then attach a document that contains the basis for intervention. The proposed change to online filing of interventions will add a section for the user to enter the basis for intervention directly into the system without attaching a separate document.[26] The system would allow users to submit online only motions/notices of intervention and would require that users file protests, substantive comments and other matters besides the intervention as separate documents using the existing eFiling process.

19. As a part of the proposed change regarding interventions, the Commission will issue a confirmation via electronic mail for receipt of each motion/notice of intervention that it receives online. This confirmation will identify the information submitted by the filer, including the filing date and time. The Commission will also create a placeholder document in eLibrary that will specify the date and time the filing was submitted, the docket number, the name of the applicant in the docket, the name of the intervening party(ies), contact information for the intervening party, and the basis for intervening. Anyone eSubscribed to the docket will receive an eSubscription e-mail with a link to the ''document'' that the Commission created and added to eLibrary on behalf of the submitter. This placeholder document will also be stamped with the Commission's standard watermark. The intervening party(ies), as identified, will be added to the service list for the specified docket. Where intervention is late or is opposed on other grounds, the party(ies) attempting to intervene would be removed from the service list if and when intervention was denied.

D. Quick Comment

20. As part of eFiling 7.0, the Commission is proposing to create a ''quick comment'' feature that will operate in a manner similar to documentless intervention by allowing users to submit comments without uploading documents. The Commission believes that this feature will be particularly helpful to individuals who do not participate routinely in Commission proceedings and wish to make brief comments in certain proceedings, such as users impacted by a single project. To submit a documentless, or quick, comment the user will first fill out a form with name and e-mail address, and send this information to FERC. If the e-mail address provided is valid, an e-mail will be sent to the user, which will include a link to the quick comment form. The form will be pre-filled with the contact information captured during the prior step. The user will be required to input a docket number for the proceeding to which the comment will apply. At this time, the Commission anticipates that the quick comment feature will be available only for P (Hydropower Project), PF (Pre-Filing NEPA activities for proposed gas pipelines), and CP (Certificates for Interstate Natural Gas Pipelines) proceedings. After the user has identified the docket(s), he or she would enter a comment in the text box by typing or copying and pasting. Once the information is submitted to the Commission, a PDF document will be created and added to eLibrary, where it will be searchable in the same manner as all other documents in the system. As with documentless intervention, the Commission does not propose to revise any regulation in connection with this proposed change. Instructions relating to quick comment would be issued by the Secretary.[27] The Commission invites comments on this proposal.

E. Filing Deadlines for Documents Submitted Via the Internet

21. In connection with the conversion to eFiling 7.0, the Commission seeks comment on the advisability of extending hours for filing online to allow Internet filers to make submissions until midnight Eastern Standard or Daylight Savings Time. For example, a document filed via the Internet would be considered received by the Commission on the date of filing as long as the last byte of information is received by midnight Eastern Standard or Daylight Savings Time on that date.[28] Currently, both Internet and paper filings must be received by the close of business, *i.e.*, 5 p.m., to be considered to have been filed on that date. Otherwise, the document is considered to have been filed on the next business day.[29]

22. Paper filings must be received by close of business because there must be staff available to stamp the date and time of receipt. However, internet submissions have no such limitation because the eFiling system records the date and time of the submission separately from the actual file date. The Commission is interested in receiving public comments on the effect of bifurcated filing deadlines.

F. Technical Conference

23. Commission staff may conduct one or more technical conferences to discuss issues relating to electronic file format and electronic document standards. Any conference will be held prior to the deadline for filing comments on this proposal and will be separately noticed.

III. Information Collection Statement

24. Office of Management and Budget (OMB) regulations require OMB to approve certain information collection requirements imposed by agency rule.[30] This Final Rule does not contain any information collection requirements and compliance with the OMB regulations is thus not required.

IV. Environmental Analysis

25. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.[31] Issuance of this Final Rule does not represent a major federal action having a significant adverse effect on the quality of the human environment under the Commission's regulations implementing the National Environmental Policy Act. Part 380 of the Commission's regulations lists exemptions to the requirement to draft an Environmental Analysis or

[23] *See* Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214.

[24] 24 *See* Rule 2003 of the Commission's Rules of Practice and Procedure, 18 CFR 385.2003 (Secretary's authority for issuing instructions for filings made via the Internet).

[25] Rule 2010 requires persons eligible to receive service under that rule to eRegister pursuant to 18 C.F.R. 390.1. A person may eRegister through the FERC Online page at *http://www.ferc.gov/docs-filing/ferconline.asp.*

[26] *See* 18 CFR 385.214(3)(b), setting forth the acceptable bases for intervention.

[27] *See* Rule 2003.

[28] *See* Rule 2003(c)(3).

[31] Order No. 486, Regulations Implementing the National Environmental Policy Act, 52 FR 47897 (Dec. 17, 1987), FERC Stats. & Regs., Regulations Preambles 1986–1990 ¶ 30,783 (1987).

Environmental Impact Statement. Included is an exemption for procedural, ministerial or internal administrative actions.[32] This rulemaking is exempt under that provision.

V. Regulatory Flexibility Act Certification

26. The Regulatory Flexibility Act of 1980 (RFA) [33] generally requires a description and analysis of final rules that will have significant economic impact on a substantial number of small entities. This Final Rule concerns procedural matters and is expected to increase the ease and convenience of filing. The Commission certifies that it will not have a significant economic impact upon participants in Commission proceedings. An analysis under the RFA is not required.

VI. Comment Procedures

27. The Commission invites interested persons to submit comments on the matters and issues proposed in this notice to be adopted, including any related matters or alternative proposals that commenters may wish to discuss. Comments are due October 1, 2007. Comments must refer to Docket No. RM07–16–000, and must include the commenter's name, the organization he/she represents, if applicable, and his/her address in the comments.

28. The Commission encourages comments to be filed electronically via the eFiling link on the Commission's Web site at *http://ferc.gov/docs-filing/efiling.asp.* The Commission accepts most standard word processing formats. Documents created electronically using word processing software should be filed in native applications or print-to-PDF format and not in a scanned format. Commenters filing electronically do not need to make paper filings. It is not necessary to serve copies of rulemaking comments on other commenters.

29. Commenters that are not able to file comments electronically must send an original and 14 copies of their comments to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street, NE., Washington, DC 20426.

30. All comments will be placed in the Commission's public files and may be viewed, printed, or downloaded remotely as described in the Document Availability section below.

VII. Document Availability

31. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page (*http://www.ferc.gov*) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5 p.m. Eastern time) at 888 First Street, NE., Room 2A, Washington, DC 20426.

32. From FERC's Home Page on the Internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

33. User assistance is available for eLibrary and the FERC's website during normal business hours from our Help line at (202) 502–8222 or the Public Reference Room at (202) 502–8371 Press 0, TTY (202) 502–8659. E-mail the Public Reference Room at *public.referenceroom@ferc.gov.*

List of Subjects in 18 CFR Part 385

Administrative practice and procedure, Electric utilities, Penalties, Pipelines, Reporting and recordkeeping requirements.

By direction of the Commission.

Kimberly D. Bose,

Secretary.

In consideration of the foregoing, the Commission proposes to amend part 385, Chapter I, Title 18, *Code of Federal Regulations,* as follows.

PART 385—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for part 385 continues to read as follows:

Authority: 5 U.S.C. 551–557; 15 U.S.C. 717–717z, 3301–3432; 16 U.S.C. 791a–825v, 2601–2645; 28 U.S.C. 2461; 31 U.S.C. 3701, 9701; 42 U.S.C. 7101–7352, 16441, 16451–16463; 49 U.S.C. 60502; 49 App. U.S.C. 1–85 (1988).

2. Section 385.2001 is amended by revising paragraph (a)(1)(iii) to read as follows:

§ 385.2001 Filings (Rule 2001).

(a) * * *

(1) * * *

(iii) By filing via the Internet pursuant to Rule 2003 through the links provided at *http://www.ferc.gov.*

* * * * *

3. Section 385.2003 is amended by revising paragraph (c) to read as follows:

§ 385.2003 Specifications (Rule 2003).

* * * * *

(c) *Filing via the Internet.* (1) All documents filed under this Chapter may be filed via the Internet except those listed by the Secretary. Except as otherwise specifically provided in this Chapter, filing via the Internet is in lieu of other methods of filing. Internet filings must be made in accordance with instructions issued by the Secretary and made available online at *http://www.ferc.gov.* Provisions of this chapter or directions from the Commission containing requirements as to the content and format of specific types of filings remain applicable.

(2) The Secretary will make available on the Commission's web site a list of document types that may not be filed via the Internet, as well as instructions pertaining to allowable electronic file and document formats, the filing of complex documents, whether paper copies are required, and procedural guidelines.

(3) For purposes of statutes or regulations governing timeliness, a document filed via the Internet will be deemed to have been received by the Commission at the time the last byte of the document is received by the Commission.

Note: The following appendix will not appear in the Code of Federal Regulations.

APPENDIX A

(Partial list of eFiling-eligible documents for which paper copies may be required.)

Environmental and Electric Transmission Filings

- USGS 7.5 minute topographic maps.
- National Wetland Inventory maps.
- Alignment sheets.
- Aerial photographs.
- Major waterbody crossing plans and HDD (horizontal directional drill) diagrams.
- Drawings/figures showing project boundaries, footprints, building locations, etc.
- Drawings of valve and piping details at compressor stations, meter stations and pipeline interconnections.

Liquefied Natural Gas (LNG)

- Engineering diagrams and plot plans.
- Process flow diagrams.
- Detailed piping and instrumentation diagrams (PSID's).
- Equipment/tank detailed drawings of LNG storage tanks and process equipment.
- Hazard detection and control location diagrams/plot plans.

Pipeline Engineering

- Flow diagrams required under Exhibits G and G–1 (18 CFR 157.14).

Storage

- Isopach, isobaric, structural, and stratigraphic maps.

[32] 18 CFR 380.4(1) and (5).

[33] 5 U.S.C. 601–612.

- Well logs.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–155929–06]

RIN 1545–BG31

Payout Requirements for Type III Supporting Organizations That Are Not Functionally Integrated

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This document describes rules that the Treasury Department and the IRS anticipate proposing, in a notice of proposed rulemaking, regarding the payout requirements for Type III supporting organizations that are not functionally integrated, the criteria for determining whether a Type III supporting organization is functionally integrated, the modified requirements for Type III supporting organizations that are organized as trusts, and the requirements regarding the type of information a Type III supporting organization must provide to its supported organization(s) to demonstrate that it is responsive to its supported organization(s). Sections 1241 and 1243 of the Pension Protection Act of 2006 amended the law with respect to Type III supporting organizations prompting a need to revise the Treasury Regulations regarding the four matters mentioned above. These new requirements and criteria would apply to Type III supporting organizations as defined under sections 509(a)(3)(B)(iii) and 4943(f)(5) of the Internal Revenue Code (Code). This document also invites comments from the public regarding the proposed payout requirement and the proposed criteria for qualifying as functionally integrated. All materials submitted will be available for public inspection and copying.

DATES: Written or electronic comments must be submitted by October 31, 2007.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–155929–06), room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG–155929–06), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC, or sent electronically via the Federal eRulemaking Portal at *http://www.regulations.gov/* (IRS REG–155929–06).

FOR FURTHER INFORMATION CONTACT: Concerning submissions, Richard A. Hurst at (202) 622–2949 (TDD Telephone) and his e-mail address is *Richard.A.Hurst@irscounsel.treas.gov;* concerning the proposed rules, Philip T. Hackney or Michael B. Blumenfeld at (202) 622–6070 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

The Pension Protection Act of 2006, Public Law 109–280, 120 Stat. 780 (2006) (PPA), amended the requirements that an organization exempt from tax under section 501(c)(3) of the Code must meet to qualify as a Type III supporting organization under section 509(a)(3) of the Code. This advanced notice of proposed rulemaking describes the rules that the Treasury Department and the IRS expect to propose to implement the new qualification requirements for Type III supporting organizations enacted by Congress and solicits comments from the public.

Public Charities Versus Private Foundations

Under section 509(a), an organization described in section 501(c)(3) is a private foundation unless it meets the requirements of section 509(a)(1), (2), (3), or (4). Organizations described in section 501(c)(3) that meet the requirements of section 509(a)(1), (2), (3), or (4) are referred to as public charities.

Private foundations, which are generally divided into two categories, operating and non-operating, depending on the type of activity in which the foundation engages, are subject to a different set of requirements than those applicable to public charities. Sections 4940 through 4948 impose various restrictions and excise taxes on private foundations along with their disqualified persons and foundation managers, that are generally not applicable to public charities. Furthermore, more stringent deduction limitations apply to contributions made to private non-operating foundations than apply to contributions to public charities. For example, under section 170(b)(1)(A), an individual who makes a cash contribution to a public charity may deduct up to fifty percent of his or her contribution base (a modified adjusted gross income amount) in the year of his or her contribution, while the same contribution to a private non-operating foundation would be limited to thirty percent of the individual's contribution base under section 170(b)(1)(B). In addition, deductions for contributions of certain appreciated property to a private non-operating foundation are limited to the contributor's basis in the property under section 170(e)(1)(A), while the same contribution to a public charity could result in a deduction based on the property's fair market value under section 170(e)(1)(B)(ii).

Supporting Organizations

Public charities that meet the requirements of section 509(a)(3) are known as supporting organizations. To be classified as a supporting organization, an organization must satisfy an organizational test, an operational test, a relationship test, and a disqualified person control test. The organizational and operational tests require that the organization be organized and at all times thereafter operated exclusively for the benefit of, to perform the functions of, or to conduct the purposes of one or more publicly supported organizations described in section 509(a)(1) or (2). The relationship test requires that the organization be operated, supervised, or controlled by or in connection with one or more publicly supported organizations. Finally, the disqualified person control test requires that the organization not be controlled directly or indirectly by certain disqualified persons.

Relationship Test

Treasury Regulation (Treas. Reg.) § 1.509(a)–4(f)(2) sets forth three structural or operational relationships a supporting organization is permitted to have with its supported organization(s). Each supporting organization must have one of the three types of relationships with the organization(s) it supports to be a supporting organization described in section 509(a)(3) of the Code. The purpose of the relationship requirement is to ensure that a supporting organization has a sufficiently close tie to one or more publicly supported organizations such that the supporting organization will be accountable to a broader public constituency.

A supporting organization that is operated, supervised or controlled by one or more publicly supported organizations is commonly known as a Type I supporting organization. The relationship a Type I supporting organization has with its supported

organization(s) is comparable to that of a parent-subsidiary relationship. A supporting organization supervised or controlled in connection with one or more publicly supported organizations is commonly known as a Type II supporting organization. The relationship a Type II supporting organization has with its supported organization(s) is comparable to a brother-sister corporate relationship. A supporting organization that is operated in connection with one or more publicly supported organizations is commonly known as a Type III supporting organization.

Qualification Requirements for Type III Supporting Organizations Prior to Enactment of the Pension Protection Act

In general, Treas. Reg. § 1.509(a)–4(i)(1) requires an organization to meet a ''responsiveness test'' and an ''integral part test'' to satisfy the relationship requirement for a Type III supporting organization.

Responsiveness Test: General Rule. Treas. Reg. § 1.509(a)–4(i)(2)(i) provides that an organization is ''considered to meet the 'responsiveness test' if the organization is responsive to the needs or demands of'' its publicly supported organizations. Treas. Reg. § 1.509(a)–4(i)(2)(ii) provides that a supporting organization may demonstrate responsiveness to its publicly supported organization(s) if: (1)(a) One or more of its officers, directors, or trustees are elected or appointed by the officers, directors, trustees, or membership of its publicly supported organization(s), (b) one or more members of the governing bodies of its publicly supported organization(s) are also officers, directors, or trustees of, or hold other important offices in, the supporting organization, or (c) the officers, directors, or trustees of the supporting organization maintain a close, continuous working relationship with the officers, directors, or trustees of its publicly supported organization(s); and (2) by reason of such arrangement, the officers, directors, or trustees of its publicly supported organization(s) have a significant voice in the investment policies of the supporting organization, the timing and the manner of making grants, the selection of the grant recipients by the supporting organization, and otherwise directing the use of the income or assets of the supporting organization.

In addition, with respect to an organization that was supporting a publicly supported organization before November 20, 1970, Treas. Reg. § 1.509(a)–4(i)(1)(ii) provides that additional facts and circumstances, such as a historic and continuing relationship between the supporting organization and its supported organization(s), may be taken into account, in addition to the factors described in the general responsiveness test above, to establish compliance with the responsiveness test.

Responsiveness Test: Charitable Trusts. Before enactment of the PPA, one way of satisfying the responsiveness test, under Treas. Reg. § 1.509(a)–4(i)(2)(iii), required that (1) the supporting organization be a charitable trust under state law, (2) each publicly supported organization that the trust supports be named as a beneficiary under the charitable trust's governing instrument, and (3) each beneficiary organization have the power to enforce the trust and compel an accounting under State law. As described below, this method of satisfying the responsiveness test was effectively removed by the PPA.

Integral Part Test. Treas. Reg. § 1.509(a)–4(i)(3)(i) provides that a supporting organization is required to establish that ''it maintains a significant involvement in the operations of one or more publicly supported organizations and such publicly supported organizations are in turn dependent upon the supporting organization for the type of support which it provides.'' Treas. Reg. § 1.509(a)–4(i)(3)(ii) and (iii) sets forth two alternative ways to meet the integral part test. The first method is typically referred to as the ''but for'' test. In this advance notice of proposed rulemaking, the second method of meeting the integral part test will be referred to as the ''attentiveness'' test.

Integral Part Test, Alternative I: the ''but for'' test. Under Treas. Reg. § 1.509(a)–4(i)(3)(ii) the ''but for'' test is satisfied if ''the activities engaged in [by the supporting organization] for or on behalf of the publicly supported organizations are activities to perform the functions of, or to carry out the purposes of, such organizations, and, but for the involvement of the supporting organization, would normally be engaged in by the publicly supported organizations themselves.''

Integral Part Test, Alternative II: the ''attentiveness'' test. The ''attentiveness'' test, under Treas. Reg. § 1.509(a)–4(i)(3)(iii), requires a supporting organization to (1) make payments of substantially all of its income to or for the use of one or more publicly supported organizations, (2) provide enough support to one or more publicly supported organizations to insure the attentiveness of such organizations to the operations of the supporting organization, and (3) pay a substantial amount of the total support of the supporting organization to those publicly supported organizations that meet the attentiveness requirement. Rev. Rul. 76–208, 1976–1 CB 161, (see § 601.601(d)(2) of this chapter), provides that the phrase ''substantially all of its income'' in Treas. Reg. § 1.509(a)–4(i)(3)(iii) means at least 85 percent of its adjusted net income.

PPA Amendments to Qualification Requirements for Type III Supporting Organizations

The PPA amended the qualification requirements for Type III supporting organizations, modifying both the integral part test and the responsiveness test.

Sections 1241 and 1243 of the PPA enacted Code sections 509(d) and 4943(f)(5). These provisions define the term Type III supporting organization and distinguish between functionally integrated and non-functionally integrated Type III supporting organizations. These two new categories appear to reflect the distinction drawn in the Treasury Regulations between those organizations that meet the integral part test by meeting the ''but for'' test and those that meet the integral part test by meeting the ''attentiveness'' test.

In conformity with existing Treasury Regulations, new section 4943(f)(5)(A) defines a Type III supporting organization as a supporting organization that is operated in connection with one or more section 509(a)(1) or (2) organizations. New section 4943(f)(5)(B) defines a functionally integrated Type III supporting organization as a Type III supporting organization that is not required under regulations established by the Secretary to make payments to supported organizations due to the activities of the organization related to performing the functions of, or carrying out the purposes of, such supported organizations. Although this language appears similar to the ''but for'' prong of the integral part test, the Staff of the Joint Committee on Taxation in its technical explanation of the provision notes that there is ''concern that the current regulatory standards for satisfying the integral part test not by reason of a payout [i.e., the existing ''but for'' test] are not sufficiently stringent to ensure that there is a sufficient nexus between the supporting and supported organizations.'' See Staff of the Joint Committee on Taxation, Technical Explanation of H.R. 4, the ''Pension Protection of 2006,'' as Passed by the House on July 28, 2006, and as Considered by the Senate on August 3,

2006 (JCX–38–06) at 360 n. 571, August 3, 2006 (Technical Explanation). In particular, the Technical Explanation states that in revising the Type III supporting organization regulations the Secretary ''shall strengthen the standard for qualification as [a Type III supporting] organization that is not required to pay out.'' *Id.*

Section 1241(d)(1) of the PPA directed the Secretary to promulgate new regulations on the payments required by Type III supporting organizations that are not functionally integrated. Section 1241(d)(1) of the PPA provides that such regulations shall require non-functionally integrated Type III supporting organizations to make distributions of a ''percentage of either income or assets to supported organizations (defined in new section 509(f)(3) of [the] Code) in order to ensure that a significant amount is paid'' to their supported organizations. The Technical Explanation notes that there is concern that merely requiring a Type III supporting organization to pay out substantially all of its net income (as under the ''attentiveness'' prong of the integral part test) does not necessarily result in significant distributions to publicly supported organizations relative to the value of the assets held by the Type III supporting organization and ''as compared to amounts paid out by nonoperating private foundations.'' See Technical Explanation at 360 n. 571.

Section 1241(c) of the PPA modified the responsiveness test as it applies to charitable trusts. Effectively, section 1241(c) provides that having each organization that the trust supports be a publicly supported organization named as a beneficiary under the trust's governing instrument and establishing that each beneficiary organization has the power to enforce the trust and compel an accounting is no longer sufficient to satisfy the responsiveness test as provided in Treas. Reg. § 1.509(a)–4(i)(2)(iii). The Technical Explanation states that a Type III supporting organization organized as a trust must now ''establish to the satisfaction of the Secretary, that it has a close and continuous relationship with the supported organization such that the trust is responsive to the needs or demands of the supported organization.'' Technical Explanation at 362. Under section 1241(e)(2)(A) of the PPA, trusts that operated in connection with a publicly supported organization on August 17, 2006, have until August 17, 2007 to satisfy the modified responsiveness test under Treas. Reg. 1.509(a)–4(i)(2)(ii). For other trusts, the provision was effective on August 17, 2006.

Finally, section 1241(b) added section 509(f)(1)(A), which contains another requirement for Type III supporting organizations. The provision requires a Type III supporting organization to provide each of its supported organizations with ''such information as the Secretary may require to ensure that such organization is responsive to the needs or demands of the supported organization.''

As described in this advanced notice of proposed rulemaking, the Treasury Department and the IRS intend to propose regulations that provide (1) the payout requirements for Type III supporting organizations that are not functionally integrated, (2) the criteria for determining whether a Type III supporting organization is functionally integrated, (3) the modified responsiveness test for Type III supporting organizations that are organized as charitable trusts, and (4) the type of information a Type III supporting organization will be required to provide to its supported organization(s) to demonstrate that it is responsive.

Explanation of Provisions

Summary of Proposed Criteria for Qualifying as a Type III Supporting Organization

The Treasury Department and the IRS expect that all Type III supporting organizations will be required to meet the responsiveness test under Treas. Reg. § 1.509(a)–4(i)(2)(ii). In addition, it is expected that Type III supporting organizations that are functionally integrated will be required to meet: (A) The ''but for'' test in existing Treas. Reg. § 1.509(a)–4(i)(3)(ii); (B) an expenditure test that will resemble the qualifying distributions test for private operating foundations; and (C) an assets test that will resemble the alternative assets test for private operating foundations. Finally, it is expected that a Type III supporting organization that is not functionally integrated will be required to meet a payout requirement equal to the qualified distribution requirement of a private non-operating foundation. In addition, there will be a limit on the number of publicly supported organizations a non-functionally integrated Type III supporting organization may support. These proposed criteria for qualifying as a Type III supporting organization will replace the integral part test in the existing regulations. These provisions are explained in more detail below.

Definition of Functionally Integrated Type III Supporting Organization and the Applicability of Private Operating Foundation Rules

Private operating foundations under section 4942(j)(3) share strong similarities with Type III functionally integrated supporting organizations under section 4943(f)(5)(B) in that both are expected to be directly engaged in the active conduct of charitable activities rather than only making grants to, or for the use of, charitable organizations. The Code and Treasury Regulations provide extensive rules used to determine whether a private foundation is a private operating foundation. See section 4942(j)(3) and Treas. Reg. § 53.4942(b). The Treasury Department and the IRS believe that these rules provide a useful model for developing standards to determine whether a Type III supporting organization is functionally integrated, and that adoption of similar rules under section 4943(f)(5)(B) will further the Congressional purpose articulated in the Technical Explanation of strengthening the nexus between a functionally integrated Type III supporting organization and the publicly supported organization(s) it supports.

To qualify as a private operating foundation under section 4942(j)(3), an organization must satisfy a qualifying distributions test and one of three alternative tests described below. Under the qualifying distributions test, a private operating foundation must make qualifying distributions ''directly for the active conduct of the activities constituting the purpose or function for which it is organized and operated,'' equal to substantially all (at least 85 percent) of the lesser of its adjusted net income or its minimum investment return. Under section 4942(e)(1), the minimum investment return is equal to 5 percent of the excess of (A) the aggregate fair market value of all the foundation's assets other than those used (or held for use) directly in carrying out the organization's exempt purpose over (B) the acquisition indebtedness with respect to such assets. Under Treas. Reg. § 53.4942(b)–1(b)(1), a qualifying distribution directly for the active conduct of activities constituting the foundation's exempt purpose is a distribution that is used by the foundation itself to carry out its exempt activities rather than paid to other organizations to help them carry out their exempt activities.

In addition, a private operating foundation must meet one of three alternative tests: An assets test, an endowment test or a support test. The

assets test, under section 4942(j)(3)(B)(i) and Treas. Reg. § 53.4942(b)–2(a), requires that substantially more than half (at least 65 percent) of the assets of an operating foundation must be devoted directly to the private operating foundation's exempt purpose activities, or to functionally related businesses (see section 4942(j)(4)), or both, or are stock of a corporation controlled by, and substantially all (at least 85 percent) of the assets of which are devoted to, the foundation. The endowment test, under Treas. Reg. § 53.4942(b)–2(b), requires a foundation to make qualifying distributions directly for the active conduct of its exempt activities in an amount not less than two thirds of its minimum investment return. The support test, under Treas. Reg. § 53.4942(b)–2(c), is satisfied if substantially all (85 percent) of a foundation's support (other than gross investment income) is normally received from the general public and from five or more exempt organizations that are not related to each other or the recipient foundation, if the foundation does not normally receive more than 25 percent of its support from any one such exempt organization; and if the foundation does not normally receive more than 50 percent of its support from gross investment income.

Description of the Proposed Functionally Integrated Test

The Treasury Department and the IRS anticipate that the proposed regulations will define the term functionally integrated Type III supporting organization as a Type III supporting organization that meets: (A) The ''but for'' test in existing Treas. Reg. § 1.509(a)–4(i)(3)(ii); (B) an expenditure test consistent with section 4942(j)(3)(A); and (C) an assets test consistent with section 4942(j)(3)(B)(i). It is expected that the expenditure test will require a functionally integrated Type III supporting organization to use substantially all of the lesser of (a) its adjusted net income or (b) five percent of the aggregate fair market value of all its assets (other than assets that are used, or held for use, directly in supporting the charitable programs of the supported organizations) directly for the active conduct of activities that directly further the exempt purposes of the organizations it supports. The assets test will require the organization to devote at least 65 percent of the aggregate fair market value of all its assets directly for the active conduct of activities that directly further the exempt purposes of the organizations it supports. The Treasury Department and the IRS believe that requiring functionally integrated Type III supporting organizations to satisfy the expenditure and assets tests, in addition to the ''but for'' test, will be stronger than the existing integral part test and ensure a sufficient nexus between a supporting organization and the organization(s) it supports. These tests also will ensure that a sufficient amount is being dedicated directly to the active conduct of activities that further the exempt purposes of publicly supported organizations.

The term ''adjusted net income'' is expected to have substantially the same meaning as that term has in section 4942(f) and Treas. Reg. § 53.4942(a)–2(d). The valuation of assets is expected to be determined in a manner similar to the rules under section 4942(e)(2) and Treas. Reg. § 53.4942(a)–2(c)(4).

The Treasury Department and the IRS also intend that certain Type III supporting organizations that oversee or facilitate the operation of an integrated system that includes one or more charities and that may be unable to satisfy the ''direct active conduct'' and ''directly further'' requirements of the expenditure and assets tests, such as certain hospital systems, will be classified as functionally integrated in the proposed regulations if they satisfy the existing ''but for'' test.

The proposed regulations will not permit a functionally integrated Type III supporting organization to qualify as functionally integrated by using the endowment or support tests that are available to private operating foundations as alternatives to the proposed assets test. Because the endowment test is similar to the expenditure test, the Treasury Department and the IRS believe that the endowment test would not provide sufficient additional assurances of a tight nexus between a functionally integrated supporting organization and its supported organizations. Furthermore the support test, which focuses on sources of support received by a private foundation rather than on its activities, appears to be inapplicable to the functionally integrated concept. By requiring at least 65 percent of the value of all assets of each functionally integrated supporting organization to be devoted directly for the active conduct of the activities of its supported organizations, the proposed assets test is intended to ensure that the connection between the supporting and supported organizations is significant.

Payout Requirement for Type III Supporting Organizations That Are Not Functionally Integrated

In establishing a payout requirement for non-functionally integrated Type III supporting organizations, the Treasury Department and the IRS expect to follow the framework of the existing section 4942 qualifying distribution regulations applicable to private non-operating foundations. Private non-operating foundations have operated under these qualifying distribution regulations for many years. The Treasury Department and the IRS believe these rules are appropriate for Type III grant-making organizations, and would further the Congressional purpose articulated in the Technical Explanation of ensuring that, as compared to amounts paid out by private non-operating foundations, significant amounts are being paid to supported organizations even if the supporting organization's assets produce little or no income.

A private non-operating foundation is required under section 4942 to make certain qualifying distributions or pay an excise tax. A private non-operating foundation is generally liable for this excise tax under section 4942(a) and (b) if it does not make qualifying distributions each year equal to its minimum investment return. The minimum investment return is five percent of the aggregate fair market value of all the foundation's assets other than those used (or held for use) directly in carrying out the organization's exempt purpose over the acquisition indebtedness with respect to such assets. Qualifying distributions under section 4942(g) are generally those distributions (including reasonable and necessary administrative expenses) paid to accomplish charitable purposes.

Description of the Proposed Payout Rule

The Treasury Department and the IRS anticipate that the proposed regulations will (A) require a non-functionally integrated Type III supporting organization to meet a payout requirement and (B) limit the number of publicly supported organizations a non-functionally integrated Type III supporting organization may support.

The payout requirement will call for a Type III supporting organization that is not functionally integrated to distribute annually to or for the use of its supported organizations an amount equal to at least five percent of the aggregate fair market value of all its assets (other than assets that are used, or held for use, directly in supporting the charitable programs of its supported organizations). Additionally, the

Treasury Department and the IRS are concerned that a supporting organization's relationship with and accountability to its supported organizations is diminished as the number of its supported organizations increases. Accordingly, except for organizations in existence on or before the date the regulations are proposed, it is expected that the proposed regulations will also provide that non-functionally integrated Type III supporting organizations will be limited to supporting no more than five publicly supported organizations. An organization in existence on or prior to the date regulations are proposed may support more than five supported organizations only if the organization distributes at least 85 percent of its total required payout amount to, or for the use of, publicly supported organizations to which the supporting organization is responsive pursuant to Treas. Reg. § 1.509(a)–4(i)(2)(ii). The anticipated proposed payout rules are intended to ensure that a non-functionally integrated Type III supporting organization has a tight nexus with its supported organization(s).

The Treasury Department and the IRS recognize that requiring an existing Type III supporting organization that supports more than five supported organizations to provide 85 percent of its total required payout to those supported organizations to which it is responsive may affect existing donee relationships. The Treasury Department and the IRS solicit comments on whether transitional rules are needed with respect to this proposed limitation regarding distributions to supported organizations.

The valuation of assets for purposes of the payout requirement is expected to be determined in a manner similar to that under section 4942(e)(2) and Treas. Reg. § 53.4942(a)–2(c)(4). The proposed distribution rules will be similar to the distribution rules under section 4942. It is expected that amounts paid by an organization to accomplish the exempt purposes of its supported organizations will be considered as distributed to or for the use of its supported organization(s).

Responsiveness Test

Except as explained below with respect to charitable trusts, the Treasury Department and the IRS do not expect to modify the responsiveness test. Thus, all Type III supporting organizations will be expected to meet the responsiveness test under Treas. Reg. § 1.509(a)–4(i)(2)(ii). Accordingly, a Type III supporting organization will be expected to demonstrate the necessary relationship between its officers, directors or trustees and those of its supported organization(s), and further show that this relationship results in the officers, directors or trustees of its supported organization(s) having a significant voice in the operations of the supporting organization.

Responsiveness Test for Charitable Trusts

Consistent with section 1241(c) of the PPA, discussed in the Background section above, the proposed regulations will provide that charitable trusts must satisfy the responsiveness test under Treas. Reg. § 1.509(a)–4(i)(2)(ii). Thus, for instance, a trust would be expected to show that its trustees have a close, continuous working relationship with the officers, directors, or trustees of the publicly supported organization(s) it supports and that through such relationship the officers, directors or trustees of its publicly supported organization(s) have a significant voice in the operations of the supporting organization. Comments are requested with respect to potential transition relief given that the statute directs that this modified test apply as of August 17, 2007 to trusts already in existence on the date of enactment of the PPA.

Requirement To Provide Supported Organizations With Information Regarding Responsiveness

The proposed regulations will provide rules for the form, content and timing of the information Type III supporting organizations are required to provide their supported organization(s) under section 509(f)(1)(A). The Treasury Department and the IRS solicit comments as to what information the Secretary should require a Type III supporting organization to provide to each of its supported organizations to ensure that such supporting organization is responsive to the needs or demands of its supported organization(s).

Consequences for Failing To Satisfy the Proposed Tests

The proposed regulations will clarify that an organization that would otherwise be classified as a Type III supporting organization, but either does not establish that it is functionally integrated or does not satisfy the payout requirement for non-functionally integrated organizations in a taxable year, will be classified as a private foundation for such taxable year and all subsequent taxable years until it terminates its private foundation status under section 507. The Treasury Department and the IRS solicit comments on how the requirements for a private foundation termination under section 507 should apply in these circumstances.

Transitional Issues

Implementation of the new qualification requirements for Type III supporting organizations enacted in the PPA will raise transitional issues for certain organizations. For instance, an organization that currently qualifies as a Type III supporting organization by meeting the attentiveness prong of the integral part test might be prohibited by its current governing instrument from distributing capital or corpus, thus preventing it from being able to satisfy the new payout requirement for non-functionally integrated Type III supporting organizations without a change to such instrument. The Treasury Department and the IRS invite comments regarding potential transition rules for supporting organizations in existence as of the date of enactment of the PPA that will provide such organizations a reasonable opportunity to amend their governing instruments or make other changes to comply with the law as amended by the PPA.

Proposed Effective Date

Except as otherwise noted, the Treasury Department and the IRS anticipate that these new proposed rules for Type III supporting organizations would apply to taxable years with respect to each organization beginning after the date these rules are published in the **Federal Register** as final or temporary regulations.

Request for Comments

Before the notice of proposed rulemaking is issued, consideration will be given to any written comments (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. All comments will be available for public inspection and copying.

Drafting Information

The principal authors of this advance notice of proposed rulemaking are Philip T. Hackney and Michael B. Blumenfeld, Office of the Chief Counsel (Tax-exempt and Government Entities), however, other personnel from the IRS and the Treasury Department participated in its development.

Kevin M. Brown,

Deputy Commissioner for Services and Enforcement.

RIN 1545–BE70

Severance of a Trust for Generation-Skipping Transfer (GST) Tax Purposes II

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: These proposed regulations provide guidance regarding the generation-skipping transfer (GST) tax consequences of the severance of trusts in a manner that is effective under state law, but that does not meet the requirements of a qualified severance under section 2642(a)(3) of the Internal Revenue Code. These proposed regulations also provide guidance regarding the GST tax consequences of a qualified severance of a trust with an inclusion ratio between zero and one into more than two resulting trusts. These proposed regulations also provide special funding rules applicable to the non pro rata division of certain assets between or among resulting trusts. The regulations will affect trusts that are subject to the GST tax.

DATES: Written or electronic comments and requests for a public hearing must be received by October 31, 2007.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–128843–05), room 5203, Internal Revenue Service, PO Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to: CC:PA:LPD:PR (REG–128843–05), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC, or sent electronically, via the Federal eRulemaking Portal at *http://www.regulations.gov* (IRS REG–128843–05).

FOR FURTHER INFORMATION CONTACT: Mayer R. Samuels, (202) 622–3090 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On August 24, 2004, proposed regulations under section 2642(a)(3) regarding qualified severances were published in the **Federal Register** (REG–145987–03, 2004–39 IRB 519, 69 FR 51967). Final regulations were published on August 2, 2007. The Treasury Department and the IRS determined that certain comments received in response to the proposed regulations under section 2642(a)(3) should be addressed in a separate notice of proposed rulemaking, instead of in the final regulations published on August 2, 2007. Accordingly, this notice of proposed rulemaking proposes additional changes to the regulations in response to those comments.

Section 2642(a)(3) was added to the Internal Revenue Code (Code) by the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA), Public Law 107–16 (115 Stat. 38 (2001)). Under section 2642(a)(3), if a trust is divided into two or more trusts in a ''qualified severance,'' the trusts resulting from the severance (resulting trusts), which may have different inclusion ratios, will be recognized as separate trusts for GST tax purposes. Once the resulting trusts are recognized as separate trusts, the transferor's lifetime GST tax exemption may be allocated separately to either trust. In addition, whether or not a GST taxable event occurs is determined separately for each resulting trust.

One commentator with respect to the notice of proposed rulemaking under section 2642(a)(3) suggested that those regulations should expressly address the GST tax consequences of dividing a trust in a manner that does not satisfy the regulatory requirements of a qualified severance, but nonetheless is effective to create separate trusts under applicable state law. Specifically, the commentator requested that the regulations be amended to provide that the separate trusts created as the result of a trust's division that is effective under state law, but that does not qualify as a qualified severance, will be respected prospectively as separate trusts for GST tax purposes, but that the inclusion ratio of each of the resulting trusts will be the same as the inclusion ratio of the original trust immediately before its severance.

As noted by a commentator, however, such a result would require an amendment to the existing regulations under section 2654. Generally, section 2654(b)(2) provides that ''substantially separate and independent shares'' of different beneficiaries in a trust will be treated as separate trusts for GST tax purposes. Section 26.2654–1(a)(1)(i) provides that, for purposes of section 2654(b)(2), the term ''substantially separate and independent shares'' generally has the same meaning as provided in § 1.663(c)(3). However, these regulations further provide that a portion of a trust is not a separate share ''unless such share exists from and at all times after creation of the trust.''

Section 26.2654–1(a)(5), *Example 8,* illustrates this rule. In *Example 8,* T creates a discretionary trust with discretionary power in the trustee to distribute income and principal among T's children and grandchildren. The trust agreement directs that, when T's youngest child reaches age 21, the trust be divided into separate shares, with one such share for each child of T; the income from a particular share is to be paid to T's child (for whom that share was created) for life, with the remainder from that share to be distributed to that child's own children. The example concludes that the separate shares that come into existence when the youngest child reaches age 21 are not recognized as separate trusts for GST tax purposes because the separate shares did not constitute separate and independent shares of a single trust at all times from the date of creation of the original trust, as required by § 26.2654–1(a)(1). Thus, any allocation of GST tax exemption to the original trust, or to any of the separate shares after the division, will apply with respect to the entire trust. The example provides that the result would be the same if the original trust was divided into separate trusts rather than separate shares.

Another commentator with respect to the notice of proposed rulemaking under section 2642(a)(3) requested that the regulations provide additional flexibility in severing a trust that has an inclusion ratio between zero and one. Generally, the final regulations apply section 2642(a)(3)(B)(ii) by requiring that the trust first be severed into two identical trusts, one of which would then have an inclusion ratio of zero and the other an inclusion ratio of one. The final regulations confirm that either or both of these trusts may then be further severed into a trust for the benefit of the skip person(s) and a trust for the benefit of the non-skip person(s). However, under this two-step procedure, one of the resulting trusts for the benefit of skip persons would have an inclusion ratio of one, and one of the trusts for the benefit of the non-skip persons would have an inclusion ratio of zero. The commentator requested that the regulations allow severances in a manner that would permit a more effective utilization of the exemption.

The Treasury Department and the IRS believe that each of these suggestions merits further consideration in a new notice of proposed rulemaking. In addition, the new proposed regulations clarify the rules in the final regulations regarding the funding of resulting trusts.

Explanation of Provisions

The proposed regulations amend the regulations under § 26.2642–6 to provide that trusts resulting from a severance that does not meet the requirements of a qualified severance nevertheless will be treated, after the severance, as separate trusts for GST tax purposes, provided that the resulting trusts are recognized as separate trusts under applicable state law. Because the severance is not a qualified severance, each such resulting trust will have the same inclusion ratio immediately after the severance as the original trust immediately before the severance. Nevertheless, GST tax exemption allocated after the severance may be separately allocated to one or more of the resulting trusts and the trusts will otherwise be treated as separate trusts for GST tax purposes. An example of a nonqualified severance is added to the regulations.

The proposed regulations also revise § 26.2654–1(a)(1)(i) and (a)(5), *Example 8*.

In addition, pursuant to the authority granted in section 2642(a)(3)(B)(iii), these proposed regulations provide for an additional type of qualified severance. Specifically, the proposed regulations provide that a trust with an inclusion ratio between zero and one may be severed in a qualified severance into more than two resulting trusts. One or more of the resulting trusts in the aggregate must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the applicable fraction used to determine the inclusion ratio of the original trust immediately before the severance. The trust or trusts receiving such fractional share shall have an inclusion ratio of zero, and each of the other resulting trust or trusts shall have an inclusion ratio of one. Further, the trustee may designate the beneficiary of each separate resulting trust, provided that the designation results in each beneficiary having the same beneficial interest (within the meaning of § 26.2642–6(d)(5)) after the severance as that beneficiary had in the original trust corpus. Guidance illustrating the application of this rule is included in § 26.2642–6(d)(7)(ii) and *Example 9* of § 26.2642–6(j) of these proposed regulations.

Finally, these proposed regulations clarify a provision of the final regulations issued contemporaneously with these proposed regulations. Specifically, § 26.2642–6(d)(4) requires that each resulting trust be funded with a fraction or percentage of the entire trust and that, although particular assets may be divided among the resulting trusts on a non pro rata basis based on the fair market value of the assets on the date of severance, the sum of those fractions or percentages must be one or one hundred percent, respectively. Thus, if the resulting trusts are funded on a non pro rata basis, the sum of the values distributed to the resulting trusts must equal the fair market value of the trust being severed. These proposed regulations clarify that no discounts or other reductions from the value of an asset owned by the original trust, arising by reason of the division of the original trust's interest in the asset between or among the resulting trusts, are permitted in funding the resulting trusts. Instead, solely for funding purposes, each resulting trust's interest in the stock of a closely held corporation, partnership interest, or other single asset must be valued by multiplying the fair market value of the asset held in the original trust as of the date of severance by the fractional or percentage interest in that asset being distributed to that resulting trust. This clarification is proposed to be effective with respect to severances occurring on or after the date these proposed regulations are published in the **Federal Register**.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) applies only to § 26.2642–6(d)(7)(ii) of these regulations. It is hereby certified that this provision will not have a significant economic impact on a substantial number of small entities. Accordingly, a Regulatory Flexibility Analysis is not required. This provision directly affects individuals, not entities. Because the remaining sections of these regulations do not impose on small entities a collection of information requirement, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The IRS and Treasury Department request comments on the substance of the proposed regulations, as well as on the clarity of the proposed rules and how they may be made easier to understand. All comments will be available for public inspection and copying. A public hearing will be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Mayer R. Samuels, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. Other personnel from the IRS and the Treasury Department participated in their development.

Estate taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 26 is proposed to be amended as follows:

PART 26—GENERATION-SKIPPING TRANSFER TAX REGULATIONS UNDER THE TAX REFORM ACT OF 1986

Paragraph 1. The authority citation for part 26 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. In § 26.2600–1, the table of contents is amended by adding the entry for § 26.2642–6(h) to read as follows:

§ 26.2600–1 Table of contents.

* * * * *

§ 26.2642–6 Qualified severance.

* * * * *

(h) Treatment of trusts resulting from a severance that is not a qualified severance.

* * * * *

Par. 3. Section 26.2642–6 is amended as follows:

1. Paragraphs (d)(4) and (d)(7) are revised.

2. Paragraph (h) is added.

3. Paragraph (j) *Examples 6, 9, 12* and *13* are added.

4. Paragraph (k)(1) is revised.

The additions and revisions read as follows:

§ 26.2642–6 Qualified severance.

* * * * *

(d) * * *

(4) The single trust (original trust) is severed on a fractional basis, such that each new trust (resulting trust) is funded with a fraction or percentage of the original trust, and the sum of those fractions or percentages is one or one hundred percent, respectively. For this purpose, the fraction or percentage may be determined by means of a formula (for example, that fraction of the trust the numerator of which is equal to the transferor's unused GST tax exemption, and the denominator of which is the fair market value of the original trust's assets on the date of severance). The severance of a trust based on a pecuniary amount does not satisfy this requirement. For example, the severance of a trust is not a qualified severance if the trust is divided into two trusts, with one trust to be funded with $1,500,000 and the other trust to be funded with the balance of the original trust's assets. With respect to the particular assets to be distributed to each resulting trust, each resulting trust may be funded with the appropriate fraction or percentage (pro rata portion) of each asset held by the original trust. Alternatively, the assets may be divided among the resulting trusts on a non-pro rata basis, based on the fair market value of the assets on the date of severance. However, if a resulting trust is funded on a non-pro rata basis, each asset received by a resulting trust must be valued, solely for funding purposes, by multiplying the fair market value of the asset held in the original trust as of the date of severance by the fraction or percentage of that asset received by that resulting trust. Thus, the assets must be valued without taking into account any discount or premium arising from the severance, for example, any valuation discounts that might arise because the resulting trust receives less than the entire interest held by the original trust. See paragraph (j), *Example 6* of this section.

* * * * *

(7) In the case of a qualified severance occurring after GST tax exemption has been allocated to the trust (whether by an affirmative allocation, a deemed allocation, or an automatic allocation pursuant to the rules contained in section 2632), if the trust has an inclusion ratio as defined in § 26.2642–1 that is greater than zero and less than one, then either paragraph (d)(7)(i) or (ii) of this section must be satisfied.

(i) The trust is severed initially into only two resulting trusts. One resulting trust must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the applicable fraction, as defined in § 26.2642–1(b) and (c), used to determine the inclusion ratio of the original trust immediately before the severance. The other resulting trust must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the excess of one over the fractional share described in the preceding sentence. The trust receiving the fractional share equal to the applicable fraction shall have an inclusion ratio of zero, and the other trust shall have an inclusion ratio of one. If the applicable fraction with respect to the original trust is .50, then, with respect to the two equal trusts resulting from the severance, the Trustee may designate which of the resulting trusts will have an inclusion ratio of zero and which will have an inclusion ratio of one. Each separate trust resulting from the severance then may be further divided in accordance with the rules of this section. See paragraph (j), *Example 7* of this section.

(ii) The trust is severed initially into more than two resulting trusts. One or more of the resulting trusts in the aggregate must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the applicable fraction used to determine the inclusion ratio of the original trust immediately before the severance. The trust or trusts receiving such fractional share shall have an inclusion ratio of zero, and each of the other resulting trust or trusts shall have an inclusion ratio of one. (If, however, two or more of the resulting trusts each receives the fractional share of the total value of the original trust equal to the applicable fraction, the trustee may designate which of those resulting trusts will have an inclusion ratio of zero and which will have an inclusion ratio of one.) The resulting trust or trusts with an inclusion ratio of one must receive in the aggregate that fractional share of the total value of the original trust as of the date of severance that is equal to the excess of one over the fractional share described in the second sentence of this paragraph. See paragraph (j), *Example 9* of this section.

* * * * *

(h) *Treatment of trusts resulting from a severance that is not a qualified severance.* Trusts resulting from a severance (other than a severance under § 26.2654–1) that does not meet the requirements of a qualified severance under paragraph (b) of this section will be treated, after the date of severance, as separate trusts for purposes of the generation-skipping transfer (GST) tax, provided that the trusts resulting from such severance are recognized as separate trusts under applicable state law. The post-severance treatment of the resulting trusts as separate trusts for GST tax purposes generally permits the allocation of GST tax exemption, the making of various elections permitted for GST tax purposes, and the occurrence of a taxable distribution or termination with regard to a particular resulting trust, with no GST tax impact on any other trust resulting from that severance. Each trust resulting from a severance described in this paragraph, however, will have the same inclusion ratio immediately after the severance as that of the original trust immediately before the severance. (See § 26.2654–1 for the inclusion ratio of each trust resulting from a severance described in that section.)

* * * * *

(j) * * *

Example 6. Funding of severed trusts on a non-pro rata basis. T's will establishes an irrevocable trust, Trust, for the benefit of T's descendants. As a result of the allocation of GST tax exemption, the applicable fraction with respect to Trust is .60 and Trust's inclusion ratio is .40 [1–.60]. Pursuant to authority granted under applicable state law, on August 1, 2008, the trustee executes a document severing Trust into two trusts, Trust 1 and Trust 2, each of which is identical to Trust. The instrument of severance provides that the severance is intended to qualify as a qualified severance within the meaning of section 2642(a)(3) and designates August 3, 2008, as the date of severance (within the meaning of paragraph (d)(3) of this section). The instrument further provides that Trust 1 and Trust 2 are to be funded on a non-pro rata basis with Trust 1 funded with assets having a fair market value on the date of severance equal to 40% of the value of Trust's assets on that date and Trust 2 funded with assets having a fair market value equal to 60% of the value of Trust's assets on that date. The fair market value of the assets used to fund each trust is to be determined in compliance with the requirements of paragraph (d)(4) of this section. On August 3, 2008, the fair market value of the Trust assets totals $4,000,000, consisting of 52% of the outstanding common stock in Company, a closely-held corporation, valued at $3,000,000 and $1,000,000 in cash and marketable securities. Trustee proposes to divide the Company stock equally between Trust 1 and Trust 2, and thus transfer 26% of the Company stock to Trust 1 and 26% of the stock to Trust 2. In addition, the appropriate amount of cash and marketable securities will be distributed to each trust. In accordance with paragraph (d)(4) of this section, for funding purposes, the interest in the Company stock distributed to each trust is valued as a pro rata portion of the value of the 52% interest in Company held by Trust before severance, without taking into account, for example, any valuation discount that might otherwise apply in valuing the noncontrolling interest

distributed to each resulting trust. Accordingly, for funding purposes, each 26% interest in Company stock distributed to Trust 1 and Trust 2 is valued at $1,500,000 (.5 × $3,000,000). Therefore, Trust 1, which is to be funded with $1,600,000 (.40 × $4,000,000), receives $100,000 in cash and marketable securities valued as of August 3, 2008, in addition to the Company stock, and Trust 2, which is to be funded with $2,400,000 (.60 × $4,000,000), receives $900,000 in cash and marketable securities in addition to the Company stock. Therefore, the severance is a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

* * * * *

Example 9. Regulatory qualified severance. In 2004, T establishes an inter vivos irrevocable trust (Trust) providing that Trust income is to be paid annually in equal shares to T's children, A and B, for 10 years. If either (or both) dies prior to the expiration of the 10-year term, the deceased child's share of trust income is to be paid to the child's then living descendants, per stirpes, for the balance of the trust term. At the expiration of the 10-year trust term, the corpus is to be distributed equally to A and B; if A and B (or either or them) is not then living, then such decedent's share is to be distributed instead to such decedent's then living descendants, per stirpes. T allocates GST tax exemption to Trust such that Trust's applicable fraction is .25 and its inclusion ratio is .75. In 2006, pursuant to applicable state law, the trustee severs the trust into three trusts: Trust 1, Trust 2, and Trust 3. The instrument severing Trust provides that Trust 1 is to receive 50% of Trust's assets, Trust 2 is to receive 25% of Trust's assets, and Trust 3 is to receive 25% of Trust's assets. All three resulting trusts are identical to Trust, except that each has different beneficiaries: A and A's issue are designated as the beneficiaries of Trust 1, and B and B's issue are designated as the beneficiaries of Trust 2 and Trust 3. The severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied. Trust 1 will have an inclusion ratio of 1. Because both Trust 2 and Trust 3 have each received the fractional share of Trust's assets equal to Trust's applicable fraction of .25, trustee designates that Trust 2 will have an inclusion ratio of one and that Trust 3 will have an inclusion ratio of zero.

* * * * *

Example 12. Mandatory severance that does not qualify as a qualified severance. In 1996, T creates an irrevocable inter vivos trust (Trust) that provides the trustee with the discretionary power to distribute income or corpus from time to time to one or more of T's children and grandchildren. Trust provides that, when T's youngest child reaches age 30, Trust is to be divided equally into separate trusts (resulting trusts), with one resulting trust for each child of T who is then living, and one resulting trust for each child of T who is then deceased and who has then living descendants. The income from a child's resulting trust will be paid to that child during the child's life, with the remainder passing to such child's descendants (grandchildren and younger generation descendants of T). On a timely filed Form 709, ''United States Gift (and Generation-Skipping Transfer) Tax Return,'' reporting the transfer, T allocates all of T's remaining GST tax exemption to Trust. As a result of the allocation, the applicable fraction with respect to Trust is .20, so Trust's inclusion ratio is .80 [1 –.20]. T's youngest child reaches age 30 in 2008. (No additional gifts are made through 2008 and Trust's inclusion ratio does not change.) In accordance with Trust's terms, Trust is divided in 2008 into three separate trusts (Trust 1, Trust 2, and Trust 3), one trust for each of T's three children, each of whom is then living. Trust 1, Trust 2, and Trust 3 are each recognized as a separate trust under applicable state law. With the consent of all interested parties, each resulting trust is funded with assets different from the assets distributed to the other two resulting trusts in a manner that does not meet the requirements of paragraph (d)(3) of this section. As a result, the severance does not satisfy the requirements of a qualified severance under this section. Under paragraph (h) of this section, however, Trust 1, Trust 2, and Trust 3 are each recognized as a separate trust for GST tax purposes prospectively from the date of severance, because the severance was effective to create three separate trusts under applicable state law. Therefore, after the severance, if T becomes entitled to any additional GST tax exemption pursuant to subsequent changes in applicable Federal tax law, T may allocate that additional GST tax exemption to any one or more of these three resulting trusts. Because the severance is not a qualified severance, however, the inclusion ratio of each of the three new trusts immediately after the severance will be .80, the same as Trust's inclusion ratio immediately before the severance.

Example 13. Other severance that does not qualify as a qualified severance. In 2004, T establishes an irrevocable inter vivos trust (Trust) providing that Trust income is to be paid to T's children, A and B, in equal shares for their joint lives. Upon the death of the first to die of A and B, all Trust income will be paid to the survivor of A and B. At the death of the survivor, the corpus is to be distributed in equal shares to T's grandchildren, W and X (with any then-deceased grandchild's share being paid in accordance with that grandchild's testamentary general power of appointment). W is A's child and X is B's child. T elects under section 2632(c)(5) not to have the automatic allocation rules contained in section 2632(c) apply with respect to T's transfers to Trust, and T does not otherwise allocate GST tax exemption to Trust. In 2006, the trustee of Trust, as permitted by applicable state law, divides Trust into two separate trusts, Trust 1 and Trust 2. Trust 1 provides that trust income is to be paid to A for life and, on A's death, the remainder is to be distributed to W (or pursuant to W's testamentary general power of appointment). Trust 2 provides that trust income is to be paid to B for life and, on B's death, the remainder is to be distributed to X (or pursuant to X's testamentary general power of appointment). Because Trust 1 and Trust 2 do not provide A and B with the contingent survivor income interests that were provided to A and B under the terms of Trust, Trust 1 and Trust 2 do not provide for the same succession of interests in the aggregate as provided by Trust. Therefore, the severance does not satisfy the requirements of this section and is not a qualified severance. However, under paragraph (h) of this section, provided that Trust 1 and Trust 2 are recognized as separate trusts under applicable state law, Trust 1 and Trust 2 will be recognized as separate trusts for GST tax purposes, prospectively from the date of the severance. Trust 1 and Trust 2 each have the same inclusion ratio immediately after the severance as Trust's inclusion ratio immediately before the severance.

(k) * * *

(1) *In general.* Except as otherwise provided, this section applies to severances occurring on or after August 2, 2007. Paragraph (d)(7)(ii), paragraph (h), and *Examples 9, 12,* and *13* of paragraph (j) of this section apply to severances occurring on or after [DATE THIS DOCUMENT IS PUBLISHED IN THE **Federal Register** AS FINAL REGULATIONS]. Paragraph (d)(4) and *Example 6* of paragraph (j) apply to severances occurring on or after August 2, 2007.

Par. 4. Section 26.2654–1 is amended as follows:

1. Paragraph (a)(1)(i) is revised.

2. A new paragraph (a)(1)(iii) is added.

3. In paragraph (a)(5), *Example 8* is revised.

The additions and revisions read as follows:

§ 26.2654–1 Certain trusts treated as separate trusts.

(a) *Single trust treated as separate trusts*—(1) *Substantially separate and independent shares*—(i) *In general.* If a single trust consists solely of substantially separate and independent shares for different beneficiaries, the share attributable to each beneficiary (or group of beneficiaries) is treated as a separate trust for purposes of chapter 13. The phrase ''substantially separate and independent shares'' generally has the same meaning as provided in § 1.663(c)–3 of this chapter. However, except as provided in paragraph (a)(1)(iii) of this section, a portion of a trust is not a separate share unless such share exists from and at all times after the creation of the trust. For purposes of this paragraph (a)(1), a trust is treated as created at the date of death of the grantor if the trust is includible in its entirety in the grantor's gross estate for Federal estate tax purposes. Further, treatment of a single trust as separate trusts under this paragraph (a)(1) does

not permit treatment of those portions as separate trusts for purposes of filing returns and payment of tax or for purposes of computing any other tax imposed under the Internal Revenue Code. Also, additions to, and distributions from, such trusts are allocated pro rata among the separate trusts, unless the governing instrument expressly provides otherwise. See § 26.2642–6 and paragraph (b) of this section regarding the treatment, for purposes of chapter 13, of separate trusts resulting from the actual severance of a single trust.

* * * * *

(iii) *Mandatory severances.* For purposes of this section, if the governing instrument of a trust requires the division or severance of a single trust into separate trusts upon the future occurrence of a particular event not within the discretion of the trustee or any other person, and if the trusts resulting from such a division or severance are recognized as separate trusts under applicable state law, then each resulting trust is treated as a separate trust for purposes of chapter 13. For this purpose, the rules of paragraph (b)(1)(ii)(C) of this section apply with respect to the severance and funding of the trusts. Similarly, if the governing instrument requires the division of a single trust into separate shares under the circumstances described in this paragraph, each such resulting share is treated as a separate trust for purposes of chapter 13. The post-severance treatment of the resulting trusts or shares as separate trusts for GST tax purposes generally permits the allocation of GST tax exemption, the making of various elections permitted for GST tax purposes, and the occurrence of a taxable distribution or termination with regard to a particular resulting trust or share, with no GST tax impact on any other trust or share resulting from that severance. The treatment of a single trust as separate trusts under this paragraph (a)(1), however, does not permit treatment of those portions as separate trusts for purposes of filing returns and payment of tax or for purposes of computing any other tax imposed under the Internal Revenue Code. Also, additions to, and distributions from, such trusts are allocated pro rata among the separate trusts, unless the governing instrument expressly provides otherwise. Each separate share and each trust resulting from a mandatory division or severance described in this paragraph will have the same inclusion ratio immediately after the severance as that of the original trust immediately before the division or severance.

* * * * *

(5) * * *

Example 8. Subsequent mandatory division into separate trusts. T creates an irrevocable trust that provides the trustee with the discretionary power to distribute income or corpus to T's children and grandchildren. The trust provides that, when T's youngest child reaches age 21, the trust will be divided into separate shares, one share for each child of T. The income from a respective child's share will be paid to the child during the child's life, with the remainder passing on the child's death to such child's children (grandchildren of T). The separate shares that come into existence when the youngest child reaches age 21 will be recognized as of that date as separate trusts for purposes of Chapter 13. Any allocation of GST tax exemption to the trust after T's youngest child reaches age 21 may be made to any one or more of the separate shares. The result would be the same if the trust instrument provided that the trust was to be divided into separate trusts when T's youngest child reached age 21, provided that the severance and funding of the separate trusts meets the requirements of this section.

Acting Deputy Commissioner for Services and Enforcement.

[FR Doc. E7–14850 Filed 8–1–07; 8:45 am]

BILLING CODE 4830–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2007–0360–200717; FRL–8449–2]

Approval of Implementation Plans of Florida: Clean Air Interstate Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a revision to the Florida State Implementation Plan (SIP) submitted on March 16, 2007. This revision addresses the requirements of EPA's Clean Air Interstate Rule (CAIR), promulgated on May 12, 2005, and subsequently revised on April 28, 2006, and December 13, 2006. EPA is proposing to determine that the SIP revision fully implements the CAIR requirements for Florida. Therefore, as a consequence of the SIP approval, EPA will also withdraw the CAIR Federal Implementation Plans (CAIR FIPs) concerning sulfur dioxide (SO_2), nitrogen oxides (NO_X) annual, and NO_X ozone season emissions for Florida. The CAIR FIPs for all States in the CAIR region were promulgated on April 28, 2006, and subsequently revised on December 13, 2006.

CAIR requires States to reduce emissions of SO_2 and NO_X that significantly contribute to nonattainment of, and interfere with maintenance of, the national ambient air quality standards (NAAQS) for fine particulates and/or ozone in any downwind state. CAIR establishes State budgets for SO_2 and NO_X and requires States to submit SIP revisions that implement these budgets in States that EPA concluded did contribute to nonattainment in downwind states. States have the flexibility to choose which control measures to adopt to achieve the budgets, including participating in the EPA-administered cap-and-trade programs. In the SIP revision that EPA is proposing to approve, Florida would meet CAIR requirements by participating in the EPA-administered cap-and-trade programs addressing SO_2, NO_X annual, and NO_X ozone season emissions.

DATES: Comments must be received on or before September 4, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2007–0360 by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.

2. *E-mail: harder.stacy@epa.gov.*

3. *Fax:* 404–562–9019.

4. *Mail:* ''EPA–R04–OAR–2007–0360,'' Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960.

5. *Hand Delivery or Courier:* Stacy Harder, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

Instructions: Direct your comments to Docket ID No. ''EPA–R04–OAR–2007–0360.'' EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential

Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *http://www.regulations.gov* or e-mail, information that you consider to be CBI or otherwise protected. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information, unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov*, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters and any form of encryption and should be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the electronic docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 to 4:30, excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions concerning this proposal, please contact Ms. Stacy Harder, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9042. Ms. Harder can also be reached via electronic mail at *harder.stacy@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. What Action Is EPA Proposing To Take?

EPA is proposing to approve a revision to Florida's SIP, submitted on March 16, 2007. In its SIP revision, Florida would meet CAIR requirements by requiring certain electric generating units (EGUs) to participate in the EPA-administered State CAIR cap-and-trade programs addressing SO_2, NO_X annual, and NO_X ozone season emissions. EPA is proposing to determine that the SIP, as revised, will meet the applicable requirements of CAIR. Any final action approving the SIP will be taken by the Regional Administrator for Region 4. As a consequence of the SIP approval, the Administrator of EPA will also issue a final rule to withdraw the FIPs concerning SO_2, NO_X annual, and NO_X ozone season emissions for Florida. This action will delete and reserve 40 CFR 52.540 and 40 CFR 52.541. The withdrawal of the CAIR FIPs for Florida is a conforming amendment that must be made once the SIP is approved because EPA's authority to issue the FIPs was premised on a deficiency in the SIP for Florida. Once the SIP is fully approved, EPA no longer has authority for the FIPs. Thus, EPA will not have the option of maintaining the FIPs following the full SIP approval. Accordingly, EPA does not intend to offer an opportunity for a public hearing or an additional opportunity for written public comment on the withdrawal of the FIPs.

II. What Is the Regulatory History of the CAIR and the CAIR FIPs?

The CAIR was published by EPA on May 12, 2005 (70 FR 25162). In this rule, EPA determined that 28 States and the District of Columbia contribute significantly to nonattainment and interfere with maintenance of the NAAQS for fine particles ($PM_{2.5}$) and/or 8-hour ozone in downwind States in the eastern part of the country. As a result, EPA required those upwind States to revise their SIPs to include control measures that reduce emissions of SO_2, which is a precursor to $PM_{2.5}$ formation, and/or NO_X, which is a precursor to both ozone and $PM_{2.5}$ formation. For jurisdictions that contribute significantly to downwind $PM_{2.5}$ nonattainment, CAIR sets annual State-wide emission reduction requirements (i.e., budgets) for SO_2 and annual State-wide emission reduction requirements for NO_X. Similarly, for jurisdictions that contribute significantly to 8-hour ozone nonattainment, CAIR sets State-wide emission reduction requirements for NO_X for the ozone season (May 1st to September 30th). Under CAIR, States may implement these reduction requirements by participating in the EPA-administered cap-and-trade programs or by adopting any other control measures.

CAIR explains to subject States what must be included in SIPs to address the requirements of section 110(a)(2)(D) of the Clean Air Act (CAA) with regard to interstate transport with respect to the 8-hour ozone and $PM_{2.5}$ NAAQS. EPA made national findings, effective on May 25, 2005, that the States had failed to submit SIPs meeting the requirements of section 110(a)(2)(D). The SIPs were due in July 2000, three years after the promulgation of the 8-hour ozone and $PM_{2.5}$ NAAQS. These findings started a two-year clock for EPA to promulgate a FIP to address the requirements of section 110(a)(2)(D). Under CAA section 110(c)(1), EPA may issue a FIP anytime after such findings are made and must do so within two years, unless a SIP revision correcting the deficiency is approved by EPA before the FIP is promulgated.

On April 28, 2006, EPA promulgated FIPs for all States covered by CAIR in order to ensure the emissions reductions required by CAIR are achieved on schedule. Each CAIR State is subject to the FIPs until the State fully adopts, and EPA approves, a SIP revision meeting the requirements of CAIR. The CAIR FIPs require EGUs to participate in the EPA-administered CAIR SO_2, NO_X annual, and NO_X ozone season trading programs, as appropriate. The CAIR FIP SO_2, NO_X annual, and NO_X ozone season trading programs impose essentially the same requirements as, and are integrated with, the respective CAIR SIP trading programs. The

integration of the FIP and SIP trading programs means that these trading programs will work together to create effectively a single trading program for each regulated pollutant (SO_2, NO_X annual, and NO_X ozone season) in all States covered by the CAIR FIP or SIP trading program for that pollutant. The CAIR FIPs also allow States to submit abbreviated SIP revisions that, if approved by EPA, will automatically replace or supplement certain CAIR FIP provisions (e.g., the methodology for allocating NO_X allowances to sources in the State), while the CAIR FIP remains in place for all other provisions.

On April 28, 2006, EPA published two additional CAIR-related final rules that added the States of Delaware and New Jersey to the list of States subject to CAIR for $PM_{2.5}$ and announced EPA's final decisions on reconsideration of five issues, without making any substantive changes to the CAIR requirements.

III. What Are the General Requirements of CAIR and the CAIR FIPs?

CAIR establishes State-wide emission budgets for SO_2 and NO_X and is to be implemented in two phases. The first phase of NO_X reductions starts in 2009 and continues through 2014, while the first phase of SO_2 reductions starts in 2010 and continues through 2014. The second phase of reductions for both NO_X and SO_2 starts in 2015 and continues thereafter. CAIR requires States to implement the budgets by either: (1) Requiring EGUs to participate in the EPA-administered cap-and-trade programs; or (2) adopting other control measures of the State's choosing and demonstrating that such control measures will result in compliance with the applicable State SO_2 and NO_X budgets.

The May 12, 2005, and April 28, 2006, CAIR rules provide model rules that States must adopt (with certain limited changes, if desired) if they want to participate in the EPA-administered trading programs.

With two exceptions, only States that choose to meet the requirements of CAIR through methods that exclusively regulate EGUs are allowed to participate in the EPA-administered trading programs. One exception is for States that adopt the opt-in provisions of the model rules to allow non-EGUs individually to opt into the EPA-administered trading programs. The other exception is for States that include all non-EGUs from their NO_X SIP Call trading programs in their CAIR NO_X ozone season trading programs.

IV. What Are the Types of CAIR SIP Submittals?

States have the flexibility to choose the type of control measures they will use to meet the requirements of CAIR. EPA anticipates that most States will choose to meet the CAIR requirements by selecting an option that requires EGUs to participate in the EPA-administered CAIR cap-and-trade programs. For such States, EPA has provided two approaches for submitting and obtaining approval for CAIR SIP revisions. States may submit full SIP revisions that adopt the model CAIR cap-and-trade rules. If approved, these SIP revisions will fully replace the CAIR FIPs. Alternatively, States may submit abbreviated SIP revisions. These SIP revisions will not replace the CAIR FIPs; however, the CAIR FIPs provide that, when approved, the provisions in these abbreviated SIP revisions will be used instead of or in conjunction with, as appropriate, the corresponding provisions of the CAIR FIPs (e.g., the NO_X allowance allocation methodology).

A State submitting a full SIP revision may either adopt regulations that are substantively identical to the model rules or incorporate by reference the model rules. CAIR provides that States may only make limited changes to the model rules if the States want to participate in the EPA-administered trading programs. A full SIP revision may change the model rules, only by altering their applicability and allowance allocation provisions to:

1. Include NO_X SIP Call trading sources that are not EGUs under CAIR in the CAIR NO_X ozone season trading program;

2. Provide for State allocation of NO_X annual or ozone season allowances using a methodology chosen by the State;

3. Provide for State allocation of NO_X annual allowances from the compliance supplement pool (CSP) using the State's choice of allowed, alternative methodologies; or

4. Allow units that are not otherwise CAIR units to opt individually into the CAIR SO_2, NO_X annual, or NO_X ozone season trading programs under the opt-in provisions in the model rules.

An approved CAIR full SIP revision addressing EGUs' SO_2, NO_X annual, or NO_X ozone season emissions will replace the CAIR FIP for that State for the respective EGU emissions.

V. Analysis of Florida's CAIR SIP Submittal

A. State Budgets for Allowance Allocations

The CAIR NO_X annual and ozone season budgets were developed from historical heat input data for EGUs. Using these data, EPA calculated annual and ozone season regional heat input values, which were multiplied by 0.15 pounds per million British thermal units (lb/mmBtu), for phase 1, and 0.125 lb/mmBtu, for phase 2, to obtain regional NO_X budgets for 2009–2014 and for 2015 and thereafter, respectively. EPA derived the State NO_X annual and ozone season budgets from the regional budgets using State heat input data adjusted by fuel factors.

The CAIR State SO_2 budgets were derived by discounting the tonnage of emissions authorized by annual allowance allocations under the Acid Rain Program under title IV of the CAA. Under CAIR, each allowance allocated in the Acid Rain Program for the years in phase 1 of CAIR (2010 through 2014) authorizes 0.5 ton of SO_2 emissions in the CAIR trading program, and each Acid Rain Program allowance allocated for the years in phase 2 of CAIR (2015 and thereafter) authorizes 0.35 ton of SO_2 emissions in the CAIR trading program.

In this action, EPA is proposing approval of Florida's SIP revision that adopts the budgets established for the State in CAIR, i.e., 99,445 (2009–2014) and 82,871 (2015–thereafter) tons for NO_X annual emissions, 47,912 (2009–2014) and 39,926 (2015–thereafter) tons for NO_X ozone season emissions, and 253,450 (2010–2014) and 177,415 (2015–thereafter) tons for SO_2 emissions. Florida's SIP revision sets these budgets as the total amounts of allowances available for allocation for each year under the EPA-administered cap-and-trade programs.

Florida has committed to revising the definitions of ''permitting authority'' and ''State'' in its CAIR rules in order to ensure that allowances issued by all States with approved rules providing for participation in the respective EPA-administered cap-and-trade programs are fungible and can be traded and used by all sources in all these States, as intended. EPA discovered after review of other States' rules, but after Florida had adopted its CAIR rules, that there was an issue related to these definitions when they are revised to refer only to a specific State.

In Florida's rules for CAIR, the EPA model trading rules were revised to limit all references to ''permitting authority'' to refer to the Florida

Department of Environmental Protection. Similarly, references to ''State'' were limited to refer to Florida. These changes are acceptable in most, but not all, instances under the current model rules. In certain definitions in the model rules incorporated by Florida (i.e., ''allocate'' or ''allocation,'' ''CAIR NO_X allowance,'' ''CAIR SO_2 allowance,'' and ''CAIR NO_X Ozone Season allowance''), it is important that the term ''permitting authority'' cover permitting authorities in all States that choose to participate in the respective EPA-administered trading programs and that the term ''State'' cover all such States. This is necessary to ensure that all allowances issued in each EPA-administered trading program are fungible and can be traded and used for compliance with the allowance-holding requirement in any State in the program.

On May 24, 2007, EPA participated in a teleconference with Florida and outlined necessary definition revisions. EPA received a letter from Florida dated June 22, 2007, and a supplemental electronic mail submission on July 11, 2007, that provide a commitment to make these rule revisions in its CAIR rules in early 2008. Specifically, in the June 22, 2007, letter and supplemental submission on July 11, 2007, Florida commits to revising section 62–296.470(1) of Florida's rule to state that: the limitation of the ''permitting authority'' definition only to Florida does not apply when this term is used in the definitions of '''allocate' or 'allocation','' ''CAIR NO_X allowance,'' ''CAIR SO_2 allowance,'' and ''CAIR NO_X Ozone Season allowance;'' and the limitation of the ''State'' definition only to Florida does not apply when the term is used in the definitions of ''CAIR NO_X allowance,'' ''CAIR SO_2 allowance,'' and ''CAIR NO_X Ozone Season allowance.''

B. CAIR Cap-and-Trade Programs

The CAIR NO_X annual and ozone-season model trading rules both largely mirror the structure of the NO_X SIP Call model trading rule in 40 CFR part 96, subparts A through I. While the provisions of the NO_X annual and ozone-season model rules are similar, there are some differences. For example, the NO_X annual model rule (but not the NO_X ozone season model rule) provides for a CSP, which is discussed below and under which allowances may be awarded for early reductions of NO_X annual emissions. As a further example, the NO_X ozone season model rule reflects the fact that the CAIR NO_X ozone season trading program replaces the NO_X SIP Call trading program after the 2008 ozone season and is coordinated with the NO_X SIP Call program. The NO_X ozone season model rule provides incentives for early emissions reductions by allowing banked, pre-2009 NO_X SIP Call allowances to be used for compliance in the CAIR NO_X ozone-season trading program. In addition, States have the option of continuing to meet their NO_X SIP Call requirement by participating in the CAIR NO_X ozone season trading program and including all their NO_X SIP Call trading sources in that program.

The provisions of the CAIR SO_2 model rule are also similar to the provisions of the NO_X annual and ozone season model rules. However, the SO_2 model rule is coordinated with the ongoing Acid Rain SO_2 cap-and-trade program under CAA title IV. The SO_2 model rule uses the title IV allowances for compliance, with each allowance allocated for 2010–2014 authorizing only 0.5 ton of emissions and each allowance allocated for 2015 and thereafter authorizing only 0.35 ton of emissions. Banked title IV allowances allocated for years before 2010 can be used at any time in the CAIR SO_2 cap-and-trade program, with each such allowance authorizing 1 ton of emissions. Title IV allowances are to be freely transferable among sources covered by the Acid Rain Program and sources covered by the CAIR SO_2 cap-and-trade program.

EPA also used the CAIR model trading rules as the basis for the trading programs in the CAIR FIPs. The CAIR FIP trading rules are virtually identical to the CAIR model trading rules, with changes made to account for federal rather than state implementation. The CAIR model SO_2, NO_X annual, and NO_X ozone season trading rules and the respective CAIR FIP trading rules are designed to work together as integrated SO_2, NO_X annual, and NO_X ozone season trading programs.

In the SIP revision, Florida chooses to implement its CAIR budgets by requiring EGUs to participate in EPA-administered cap-and-trade programs for SO_2, NO_X annual, and NO_X ozone season emissions. Florida has adopted a full SIP revision that adopts, with certain allowed changes discussed below, the CAIR model cap-and-trade rules for SO_2, NO_X annual, and NO_X ozone season emissions.

C. Applicability Provisions for Non-EGU NO_X SIP Call Sources

In general, the CAIR model trading rules apply to any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990, or the start-up of the unit's combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

States have the option of bringing in, for the CAIR NO_X ozone season program only, those units in the State's NO_X SIP Call trading program that are not EGUs as defined under CAIR. EPA advises States exercising this option to add the applicability provisions in the State's NO_X SIP Call trading rule for non-EGUs to the applicability provisions in 40 CFR 96.304 in order to include in the CAIR NO_X ozone season trading program all units required to be in the State's NO_X SIP Call trading program that are not already included under 40 CFR 96.304. Under this option, the CAIR NO_X ozone season program must cover all large industrial boilers and combustion turbines, as well as any small EGUs (i.e. units serving a generator with a nameplate capacity of 25 MWe or less) that the State currently requires to be in the NO_X SIP Call trading program.

Because Florida was not included in the NO_X SIP Call trading program, Florida did not have an option of expanding the applicability provisions of the CAIR NO_X ozone season trading program.

D. NO_X Allowance Allocations

Under the NO_X allowance allocation methodology in the CAIR model trading rules and in the CAIR FIP, NO_X annual and ozone season allowances are allocated to units that have operated for five years, based on heat input data from a three-year period that are adjusted for fuel type by using fuel factors of 1.0 for coal, 0.6 for oil, and 0.4 for other fuels. The CAIR model trading rules and the CAIR FIP also provide a new unit set-aside from which units without five years of operation are allocated allowances based on the units' prior year emissions.

States may establish in their SIP submissions a different NO_X allowance allocation methodology that will be used to allocate allowances to sources in the States, if certain requirements are met concerning the timing of submission of units' allocations to the Administrator for recordation and the total amount of allowances allocated for each control period. In adopting alternative NO_X allowance allocation methodologies, States have flexibility with regard to:

1. The cost to recipients of the allowances, which may be distributed for free or auctioned;

2. The frequency of allocations;

3. The basis for allocating allowances, which may be distributed, for example, based on historical heat input or electric and thermal output; and

4. The use of allowance set-asides and, if used, their size.

Florida has chosen to replace the provisions of the CAIR NO_X annual model trading rule concerning the allocation of NO_X annual allowances with its own methodology. Florida has chosen to distribute NO_X annual allowances based upon a methodology that is similar, but not identical, to that in the CAIR model trading rule for existing and new units. Under Florida's rule and the CAIR model rule, existing units are allocated NO_X allowances in proportion to their ''fuel-adjusted control period heat input'' during the baseline period. However, in addition to the fuel adjustment factors used to calculate adjusted heat input in the CAIR model rule, Florida has also developed a separate 150% fuel factor for existing biomass-fired units that use best available control technology (BACT). Further, in Florida's rule, as in the CAIR model rule, new units are allocated NO_X allowances in proportion to their ''converted control period heat input.'' However, unlike the CAIR model rule, Florida's rule categorizes new units as those commencing operation on or after January 1, 2007, (rather than January 1, 2001), and establishes a new unit set set-aside of five percent for all control years (rather than five percent through 2014 and three percent thereafter). Moreover, under Florida's rule, allocations are scheduled to be made in 2006, 2009, and every three years thereafter, with three-year blocks of allocations being made generally four years in advance. Florida's rule also limits the number of years for which permanently retired units are allocated allowances after retirement.

Florida has chosen to replace the provisions of the CAIR NO_X ozone season model trading rule concerning allowance allocations with its own methodology. Florida has chosen to distribute NO_X ozone season allowances based upon the same allowance allocation methodology described above for NO_X annual allowances.

E. Allocation of NO_X Allowances From Compliance Supplement Pool

The CAIR rule establishes a CSP to provide an incentive for early reductions in NO_X annual emissions. The CSP consists of 200,000 CAIR NO_X annual allowances of vintage 2009 for the entire CAIR region, and a State's share of the CSP is based upon the projected magnitude of the emission reductions required by CAIR in that State. States may distribute CSP allowances, one allowance for each ton of early reduction, to sources that make NO_X reductions during 2007 or 2008 beyond what is required by any applicable State or Federal emission limitation. States also may distribute CSP allowances based upon a demonstration of need for an extension of the 2009 deadline for implementing emission controls.

The CAIR annual NO_X model trading rule establishes specific methodologies for allocations of CSP allowances. States may choose an allowed, alternative CSP allocation methodology to be used to allocate CSP allowances to sources in the States.

Florida has not chosen to modify the provisions of the CAIR NO_X annual model trading rule concerning the allocation of allowances from the CSP. Florida has chosen to distribute CSP allowances using an allocation methodology that is the same as EPA's model rule. The CSP is an additional 8,335 annual NO_X allowances given to the State for 2009, and there is no CSP for ozone-season allowances.

F. Individual Opt-In Units

The opt-in provisions of the CAIR SIP model trading rules allow certain non-EGUs (i.e., boilers, combustion turbines, and other stationary fossil-fuel-fired devices) that do not meet the applicability criteria for a CAIR trading program to participate voluntarily in (i.e., opt into) the CAIR trading program. A non-EGU may opt into one or more of the CAIR trading programs. In order to qualify to opt into a CAIR trading program, a unit must vent all emissions through a stack and be able to meet monitoring, recordkeeping, and recording requirements of 40 CFR part 75. The owners and operators seeking to opt a unit into a CAIR trading program must apply for a CAIR opt-in permit. If the unit is issued a CAIR opt-in permit, the unit becomes a CAIR unit, is allocated allowances, and must meet the same allowance-holding and emissions monitoring and reporting requirements as other units subject to the CAIR trading program. The opt-in provisions provide for two methodologies for allocating allowances for opt-in units, one methodology that applies to opt-in units in general and a second methodology that allocates allowances only to opt-in units that the owners and operators intend to repower before January 1, 2015.

States have several options concerning the opt-in provisions. States may adopt the CAIR opt-in provisions entirely or may adopt them but exclude one of the methodologies for allocating allowances. States may also decline to adopt the opt-in provisions at all.

Florida has chosen not to allow non-EGUs meeting certain requirements to opt into the CAIR NO_X annual trading program.

Florida has chosen not to allow non-EGUs meeting certain requirements to opt into the CAIR NO_X ozone season trading program.

Florida has chosen not to allow certain non-EGUs to opt into the CAIR SO_2 trading program.

VI. Proposed Actions

EPA is proposing to approve Florida's full CAIR SIP revision submitted on March 16, 2007. Under this SIP revision, Florida is choosing to participate in the EPA-administered cap-and-trade programs for SO_2, NO_X annual, and NO_X ozone season emissions. The SIP revision (revised as discussed above) meets the applicable requirements in 40 CFR 51.123(o) and (aa), with regard to NO_X annual and NO_X ozone season emissions, and 40 CFR 51.124(o), with regard to SO_2 emissions. Further, Florida has agreed to make the technical corrections to certain definitions as discussed above. Therefore, EPA is proposing to determine that the SIP, as revised, will meet the requirements of CAIR. As a consequence of the SIP approval, the Administrator of EPA will also issue, without providing an opportunity for a public hearing or an additional opportunity for written public comment, a final rule to withdraw the CAIR FIPs concerning SO_2, NO_X annual, NO_X ozone season emissions for Florida. This action will delete and reserve 40 CFR 52.540 and 40 CFR 52.541.

VII. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001). This action merely proposes to approve State law as meeting Federal requirements and would impose no additional requirements beyond those imposed by State law. Accordingly, the Administrator certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this action proposes to approve pre-existing requirements under State law and would not impose any additional

enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

This proposal also does not have tribal implications because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This proposed action also does not have Federalism implications because it would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely proposes to approve a State rule implementing a Federal standard and will result, as a consequence of that approval, in the Administrator's withdrawal of the CAIR FIP. It does not alter the relationship or the distribution of power and responsibilities established in the CAA. This proposed rule also is not subject to Executive Order 13045 ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it would approve a State rule implementing a Federal Standard.

In reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This proposed rule would not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Approval of Implementation Plans of Georgia: Clean Air Interstate Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a revision to the Georgia State Implementation Plan (SIP) submitted on March 28, 2007. This revision addresses the requirements of EPA's Clean Air Interstate Rule (CAIR), promulgated on May 12, 2005, and subsequently revised on April 28, 2006, and December 13, 2006. EPA is proposing to determine that the SIP revision fully implements the CAIR requirements for Georgia. Therefore, as a consequence of the SIP approval, EPA will also withdraw the CAIR Federal Implementation Plans (CAIR FIPs) concerning sulfur dioxide (SO_2) and nitrogen oxides (NO_X) annual emissions for Georgia. The CAIR FIPs for all States in the CAIR region were promulgated on April 28, 2006, and subsequently revised on December 13, 2006.

CAIR requires States to reduce emissions of SO_2 and NO_X that significantly contribute to nonattainment of, and interfere with maintenance of, the national ambient air quality standards (NAAQS) for fine particulates and/or ozone in any downwind state. CAIR establishes State budgets for SO_2 and NO_X and requires States to submit SIP revisions that implement these budgets in States that EPA concluded did contribute to nonattainment in downwind states. States have the flexibility to choose which control measures to adopt to achieve the budgets, including participating in the EPA-administered cap-and-trade programs. In the SIP revision that EPA is proposing to approve, Georgia would meet CAIR requirements by participating in the EPA-administered cap-and-trade programs addressing SO_2 and NO_X annual emissions.

DATES: Comments must be received on or before September 4, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2007–0251, by one of the following methods:

1. *http://www.regulations.gov*: Follow the online instructions for submitting comments.
2. *E-mail: harder.stacy@epa.gov*.
3. *Fax:* 404–562–9019.
4. *Mail:* ''EPA–R04–OAR–2007–0251,'' Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960.
5. *Hand Delivery or Courier:* Stacy Harder, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

Instructions: Direct your comments to Docket ID No. ''EPA–R04–OAR–2007–0251.'' EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *http://www.regulations.gov* or e-mail, information that you consider to be CBI or otherwise protected. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information, unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov*, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact

you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters and any form of encryption and should be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the electronic docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions concerning this proposal, please contact Ms. Stacy Harder, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9042. Ms. Harder can also be reached via electronic mail at *harder.stacy@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. What Action Is EPA Proposing to Take?

EPA is proposing to approve a revision to Georgia's SIP, submitted on March 28, 2007. In its SIP revision, Georgia would meet CAIR requirements by requiring certain electric generating units (EGUs) to participate in the EPA-administered State CAIR cap-and-trade programs addressing SO_2 and NO_X annual emissions. EPA is proposing to determine that the SIP, as revised, will meet the applicable requirements of CAIR. Any final action approving the SIP will be taken by the Regional Administrator for Region 4. As a consequence of the SIP approval, the Administrator of EPA will also issue a final rule to withdraw the FIPs concerning SO_2 and NO_X annual emissions for Georgia. This action will delete and reserve 40 CFR 52.584 and 40 CFR 52.585. The withdrawal of the CAIR FIPs for Georgia is a conforming amendment that must be made once the SIP is approved because EPA's authority to issue the FIPs was premised on a deficiency in the SIP for Georgia. Once the SIP is fully approved, EPA no longer has authority for the FIPs. Thus, EPA will not have the option of maintaining the FIPs following the full SIP approval. Accordingly, EPA does not intend to offer an opportunity for a public hearing or an additional opportunity for written public comment on the withdrawal of the FIPs.

II. What Is the Regulatory History of the CAIR and the CAIR FIPs?

CAIR was published by EPA on May 12, 2005 (70 FR 25162). In this rule, EPA determined that 28 States and the District of Columbia contribute significantly to nonattainment and interfere with maintenance of the NAAQS for fine particles ($PM_{2.5}$) and/or 8-hour ozone in downwind States in the eastern part of the country. As a result, EPA required those upwind States to revise their SIPs to include control measures that reduce emissions of SO_2, which is a precursor to $PM_{2.5}$ formation, and/or NO_X, which is a precursor to both ozone and $PM_{2.5}$ formation. For jurisdictions that contribute significantly to downwind $PM_{2.5}$ nonattainment, CAIR sets annual State-wide emission reduction requirements (i.e., budgets) for SO_2 and annual State-wide emission reduction requirements for NO_X. Similarly, for jurisdictions that contribute significantly to 8-hour ozone nonattainment, CAIR sets State-wide emission reduction requirements for NO_X for the ozone season (May 1st to September 30th). Under CAIR, States may implement these reduction requirements by participating in the EPA-administered cap-and-trade programs or by adopting any other control measures.

CAIR explains to subject States what must be included in SIPs to address the requirements of section 110(a)(2)(D) of the Clean Air Act (CAA) with regard to interstate transport with respect to the 8-hour ozone and $PM_{2.5}$ NAAQS. EPA made national findings, effective on May 25, 2005, that the States had failed to submit SIPs meeting the requirements of section 110(a)(2)(D). The SIPs were due in July 2000, three years after the promulgation of the 8-hour ozone and $PM_{2.5}$ NAAQS. These findings started a two-year clock for EPA to promulgate a FIP to address the requirements of section 110(a)(2)(D). Under CAA section 110(c)(1), EPA may issue a FIP anytime after such findings are made and must do so within two years, unless a SIP revision correcting the deficiency is approved by EPA before the FIP is promulgated.

On April 28, 2006, EPA promulgated FIPs for all States covered by CAIR in order to ensure the emissions reductions required by CAIR are achieved on schedule. Each CAIR State is subject to the FIPs until the State fully adopts, and EPA approves, a SIP revision meeting the requirements of CAIR. The CAIR FIPs require EGUs to participate in the EPA-administered CAIR SO_2, NO_X annual, and NO_X ozone season trading programs, as appropriate. The CAIR FIP SO_2, NO_X annual, and NO_X ozone season trading programs impose essentially the same requirements as, and are integrated with, the respective CAIR SIP trading programs. The integration of the FIP and SIP trading programs means that these trading programs will work together to create effectively a single trading program for each regulated pollutant (SO_2, NO_X annual, and NO_X ozone season) in all States covered by the CAIR FIP or SIP trading program for that pollutant. The CAIR FIPs also allow States to submit abbreviated SIP revisions that, if approved by EPA, will automatically replace or supplement certain CAIR FIP provisions (e.g., the methodology for allocating NO_X allowances to sources in the State), while the CAIR FIP remains in place for all other provisions.

On April 28, 2006, EPA published two additional CAIR-related final rules that added the States of Delaware and New Jersey to the list of States subject to CAIR for $PM_{2.5}$ and announced EPA's final decisions on reconsideration of five issues, without making any substantive changes to the CAIR requirements.

III. What are the General Requirements of CAIR and the CAIR FIPs?

CAIR establishes State-wide emission budgets for SO_2 and NO_X and is to be implemented in two phases. The first phase of NO_X reductions starts in 2009 and continues through 2014, while the first phase of SO_2 reductions starts in 2010 and continues through 2014. The second phase of reductions for both NO_X and SO_2 starts in 2015 and continues thereafter. CAIR requires States to implement the budgets by either: (1) Requiring EGUs to participate in the EPA-administered cap-and-trade programs; or (2) adopting other control measures of the State's choosing and demonstrating that such control measures will result in compliance with the applicable State SO_2 and NO_X budgets.

The May 12, 2005, and April 28, 2006, CAIR rules provide model rules that States must adopt (with certain limited changes, if desired) if they want to participate in the EPA-administered trading programs.

With two exceptions, only States that choose to meet the requirements of CAIR through methods that exclusively regulate EGUs are allowed to participate in the EPA-administered trading programs. One exception is for States that adopt the opt-in provisions of the model rules to allow non-EGUs individually to opt into the EPA-administered trading programs. The other exception is for States that include all non-EGUs from their NO_X SIP Call trading programs in their CAIR NO_X ozone season trading programs.

IV. What are the Types of CAIR SIP Submittals?

States have the flexibility to choose the type of control measures they will use to meet the requirements of CAIR. EPA anticipates that most States will choose to meet the CAIR requirements by selecting an option that requires EGUs to participate in the EPA-administered CAIR cap-and-trade programs. For such States, EPA has provided two approaches for submitting and obtaining approval for CAIR SIP revisions. States may submit full SIP revisions that adopt the model CAIR cap-and-trade rules. If approved, these SIP revisions will fully replace the CAIR FIPs. Alternatively, States may submit abbreviated SIP revisions. These SIP revisions will not replace the CAIR FIPs; however, the CAIR FIPs provide that, when approved, the provisions in these abbreviated SIP revisions will be used instead of or in conjunction with, as appropriate, the corresponding provisions of the CAIR FIPs (e.g., the NO_X allowance allocation methodology).

A State submitting a full SIP revision may either adopt regulations that are substantively identical to the model rules or incorporate by reference the model rules. CAIR provides that States may only make limited changes to the model rules, if the States want to participate in the EPA-administered trading programs. A full SIP revision may change the model rules only by altering their applicability and allowance allocation provisions to:

1. Include NO_X SIP Call trading sources that are not EGUs under CAIR in the CAIR NO_X ozone season trading program;

2. Provide for State allocation of NO_X annual or ozone season allowances using a methodology chosen by the State;

3. Provide for State allocation of NO_X annual allowances from the compliance supplement pool (CSP) using the State's choice of allowed, alternative methodologies; or

4. Allow units that are not otherwise CAIR units to opt individually into the CAIR SO_2, NO_X annual, or NO_X ozone season trading programs under the opt-in provisions in the model rules.

An approved CAIR full SIP revision addressing EGUs' SO_2, NO_X annual, or NO_X ozone season emissions will replace the CAIR FIP for that State for the respective EGU emissions.

V. Analysis of Georgia's CAIR SIP Submittal

A. State Budgets for Allowance Allocations

The CAIR NO_X annual and ozone season budgets were developed from historical heat input data for EGUs. Using these data, EPA calculated annual and ozone season regional heat input values, which were multiplied by 0.15 pounds per million British thermal units (0.15lb/mmBtu), for phase 1, and 0.125 lb/mmBtu, for phase 2, to obtain regional NO_X budgets for 2009–2014 and for 2015 and thereafter, respectively. EPA derived the State NO_X annual and ozone season budgets from the regional budgets using State heat input data adjusted by fuel factors.

The CAIR State SO_2 budgets were derived by discounting the tonnage of emissions authorized by annual allowance allocations under the Acid Rain Program under title IV of the CAA. Under CAIR, each allowance allocated in the Acid Rain Program for the years in phase 1 of CAIR (2010 through 2014) authorizes 0.5 ton of SO_2 emissions in the CAIR trading program, and each Acid Rain Program allowance allocated for the years in phase 2 of CAIR (2015 and thereafter) authorizes 0.35 ton of SO_2 emissions in the CAIR trading program.

In this action, EPA is proposing approval of Georgia's SIP revision that adopts the budgets established for the State in CAIR, i.e., 66,321 (2009–2014) and 55,268 (2015–thereafter) tons for NO_X annual emissions, and 213,057 (2010–2014) and 149,140 (2015–thereafter) tons for SO_2 emissions. Georgia's SIP revision sets these budgets as the total amounts of allowances available for allocation for each year under the EPA-administered cap-and-trade programs.

B. CAIR Cap-and-Trade Programs

The CAIR NO_X annual and ozone-season model trading rules both largely mirror the structure of the NO_X SIP Call model trading rule in 40 CFR part 96, subparts A through I. While the provisions of the NO_X annual and ozone-season model rules are similar, there are some differences. For example, the NO_X annual model rule (but not the NO_X ozone season model rule) provides for a CSP, which is discussed below and under which allowances may be awarded for early reductions of NO_X annual emissions. As a further example, the NO_X ozone season model rule reflects the fact that the CAIR NO_X ozone season trading program replaces the NO_X SIP Call trading program after the 2008 ozone season and is coordinated with the NO_X SIP Call program. The NO_X ozone season model rule provides incentives for early emissions reductions by allowing banked, pre-2009 NO_X SIP Call allowances to be used for compliance in the CAIR NO_X ozone-season trading program. In addition, States have the option of continuing to meet their NO_X SIP Call requirement by participating in the CAIR NO_X ozone season trading program and including all their NO_X SIP Call trading sources in that program.

The provisions of the CAIR SO_2 model rule are also similar to the provisions of the NO_X annual and ozone season model rules. However, the SO_2 model rule is coordinated with the ongoing Acid Rain SO_2 cap-and-trade program under CAA title IV. The SO_2 model rule uses the title IV allowances for compliance, with each allowance allocated for 2010–2014 authorizing only 0.50 ton of emissions and each allowance allocated for 2015 and thereafter authorizing only 0.35 ton of emissions. Banked title IV allowances allocated for years before 2010 can be used at any time in the CAIR SO_2 cap-and-trade program, with each such allowance authorizing one ton of

emissions. Title IV allowances are to be freely transferable among sources covered by the Acid Rain Program and sources covered by the CAIR SO_2 cap-and-trade program.

EPA also used the CAIR model trading rules as the basis for the trading programs in the CAIR FIPs. The CAIR FIP trading rules are virtually identical to the CAIR model trading rules, with changes made to account for federal rather than state implementation. The CAIR model SO_2, NO_X annual, and NO_X ozone season trading rules and the respective CAIR FIP trading rules are designed to work together as integrated SO_2, NO_X annual, and NO_X ozone season trading programs.

In the SIP revision, Georgia chooses to implement its CAIR budgets by requiring EGUs to participate in EPA-administered cap-and-trade programs for SO_2 and NO_X annual emissions. Georgia has adopted a full SIP revision that adopts, with certain allowed changes discussed below, the CAIR model cap-and-trade rules for SO_2, and NO_X annual emissions.

C. Applicability Provisions for Non-EGU NO_X SIP Call Sources

In general, the CAIR model trading rules apply to any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine serving at any time, since the later of November 15, 1990, or the start-up of the unit's combustion chamber, a generator with nameplate capacity of more than 25 MWe producing electricity for sale.

States have the option of bringing in, for the CAIR NO_X ozone season program only, those units in the State's NO_X SIP Call trading program that are not EGUs as defined under CAIR. EPA advises States exercising this option to add the applicability provisions in the State's NO_X SIP Call trading rule for non-EGUs to the applicability provisions in 40 CFR 96.304 in order to include in the CAIR NO_X ozone season trading program all units required to be in the State's NO_X SIP Call trading program that are not already included under 40 CFR 96.304. Under this option, the CAIR NO_X ozone season program must cover all large industrial boilers and combustion turbines, as well as any small EGUs (i.e. units serving a generator with a nameplate capacity of 25 MWe or less) that the State currently requires to be in the NO_X SIP Call trading program.

Because Georgia is not subject to the CAIR NO_X ozone season requirements, Georgia will not participate in the CAIR NO_X ozone season trading program and therefore did not have an option of expanding the applicability provisions of the CAIR NO_X ozone season trading program to include all non-EGUs in the State's NO_X SIP Call trading program.

D. NO_X Allowance Allocations

Under the NO_X allowance allocation methodology in the CAIR model trading rules and in the CAIR FIP, NO_X annual and ozone season allowances are allocated to units that have operated for five years, based on heat input data from a three-year period that are adjusted for fuel type by using fuel factors of 1.0 for coal, 0.6 for oil, and 0.4 for other fuels. The CAIR model trading rules and the CAIR FIP also provide a new unit set-aside from which units without five years of operation are allocated allowances based on the units' prior year emissions.

States may establish in their SIP submissions a different NO_X allowance allocation methodology that will be used to allocate allowances to sources in the States, if certain requirements are met concerning the timing of submission of units' allocations to the Administrator for recordation and the total amount of allowances allocated for each control period. In adopting alternative NO_X allowance allocation methodologies, States have flexibility with regard to:

1. The cost to recipients of the allowances, which may be distributed for free or auctioned;
2. The frequency of allocations;
3. The basis for allocating allowances, which may be distributed, for example, based on historical heat input or electric and thermal output; and
4. The use of allowance set-asides and, if used, their size.

Georgia has chosen to replace the provisions of the CAIR NO_X annual model trading rule concerning the allocation of NO_X annual allowances with its own methodology. Georgia has chosen to distribute NO_X annual allowances based upon allocation methods for both existing and new units. Georgia defines an existing unit as one that commences operation prior to January 1, 2006, rather than 2001 as in EPA's model rule. Georgia defines new sources as those that have commenced operation on or after January 1, 2006, and do not yet have a baseline heat input. Under Georgia's cap and trade program, allowances will be allocated to EGUs in an amount no greater than the NO_X budget established in EPA's model rule. Allocations are based on the highest annual amount of heat input during a baseline period, using heat input figures that are fuel-adjusted as set forth in EPA's model rule. Allowances are initially allocated for 2010 through 2011 and are allocated on a year-by-year basis, about three years in advance, for 2012 and each subsequent year. The baseline period for initial allocations is 2001–2005, and will be updated annually for subsequent allocations. For years 2010 and thereafter, 97 percent of the budget will be allocated to existing sources, with the remaining three percent allocated to new sources. A new-unit set aside will be established for each control period, and will be allocated CAIR NO_X allowances equal to 1,990 and 1,658 for control periods 2009–2014, and 2015 and thereafter, respectively.

However, the new-unit set aside provisions in Georgia's rule contain certain cross-citation errors and, for example (in Rule 391–3–1.02(12)(f)(3)(iii)), inadvertently fail to reference the provisions establishing the size of the new-unit set aside. Further, the allowance recordation provisions in Georgia's rule contain certain citation errors and establish deadlines for the EPA Administrator's recordation of the allowance allocations in the allowance tracking system that are inconsistent with the allocation schedule established in Georgia's rule. While the allocation schedule requires allocations to be made about three years in advance, the recordation schedule (in Rule 391–3–1–.02(g)(1)(i) and (ii)) does not require allocations to be recorded in advance at all. Georgia indicated in its response to comments in its CAIR SIP rulemaking that the State will revise the rule to correct all of these errors. *See* Responses to Comments Received During the Public Comment Period Regarding Proposed Revisions to Air Quality Rules, Chapter 391–3–1 at C.–10 through C–11 (February 12, 2007). Moreover, EPA interprets Georgia's existing rule to limit total annual allocations to new units to the amount of the allowances in the applicable new-unit set aside and intends to record allowances in a manner consistent with the allocation schedule.

E. Allocation of NO_X Allowances From Compliance Supplement Pool

The CAIR rule establishes a CSP to provide an incentive for early reductions in NO_X annual emissions. The CSP consists of 200,000 CAIR NO_X annual allowances of vintage 2009 for the entire CAIR region, and a State's share of the CSP is based upon the projected magnitude of the emission reductions required by CAIR in that State. States may distribute CSP allowances, one allowance for each ton of early reduction, to sources that make NO_X reductions during 2007 or 2008 beyond what is required by any applicable State or Federal emission limitation. States also may distribute

CSP allowances based upon a demonstration of need for an extension of the 2009 deadline for implementing emission controls.

The CAIR annual NO_X model trading rule establishes specific methodologies for allocations of CSP allowances. States may choose an allowed, alternative CSP allocation methodology to be used to allocate CSP allowances to sources in the States.

Georgia has not chosen to modify the provisions of the CAIR NO_X annual model trading rule concerning the allocation of allowances from the CSP. Georgia has chosen to distribute CSP allowances using an allocation methodology that is the same as EPA's model rule. The CSP provides up to 12,397 CAIR NO_X annual allowances to be allocated by the State for 2009.

F. Individual Opt-In Units

The opt-in provisions of the CAIR SIP model trading rules allow certain non-EGUs (i.e., boilers, combustion turbines, and other stationary fossil-fuel-fired devices) that do not meet the applicability criteria for a CAIR trading program to participate voluntarily in (i.e., opt into) the CAIR trading program. A non-EGU may opt into one or more of the CAIR trading programs. In order to qualify to opt into a CAIR trading program, a unit must vent all emissions through a stack and be able to meet monitoring, recordkeeping, and recording requirements of 40 CFR part 75. The owners and operators seeking to opt a unit into a CAIR trading program must apply for a CAIR opt-in permit. If the unit is issued a CAIR opt-in permit, the unit becomes a CAIR unit, is allocated allowances, and must meet the same allowance-holding and emissions monitoring and reporting requirements as other units subject to the CAIR trading program. The opt-in provisions provide for two methodologies for allocating allowances for opt-in units, one methodology that applies to opt-in units in general and a second methodology that allocates allowances only to opt-in units that the owners and operators intend to repower before January 1, 2015.

States have several options concerning the opt-in provisions. States may adopt the CAIR opt-in provisions entirely or may adopt them but exclude one of the methodologies for allocating allowances. States may also decline to adopt the opt-in provisions at all.

Georgia has chosen not to allow non-EGUs meeting certain requirements to opt into the CAIR NO_X annual trading program.

Georgia has chosen not to allow certain non-EGUs to opt into the CAIR SO_2 trading program.

VI. Proposed Actions

EPA is proposing to approve Georgia's full CAIR SIP revision submitted on March 28, 2007. Under this SIP revision, Georgia is choosing to participate in the EPA-administered cap-and-trade programs for SO_2 and NO_X annual emissions. The SIP revision (interpreted by EPA as discussed above) meets the applicable requirements in 40 CFR 51.123(o) and (aa), with regard to NO_X annual emissions, and 40 CFR 51.124(o), with regard to SO_2 emissions. Further, Georgia has agreed to make the technical corrections discussed above to clarify the allowance allocation procedures and make the allowance recordation procedures consistent with the allocation procedures. Therefore, EPA is proposing to determine that the SIP, as revised, will meet the requirements of CAIR. As a consequence of the SIP approval, the Administrator of EPA will also issue, without providing an opportunity for a public hearing or an additional opportunity for written public comment, a final rule to withdraw the CAIR FIPs concerning SO_2 and NO_X annual emissions for Georgia. This action will delete and reserve 40 CFR 52.584 and 40 CFR 52.585.

VII. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001). This action merely proposes to approve State law as meeting Federal requirements and would impose no additional requirements beyond those imposed by State law. Accordingly, the Administrator certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this action proposes to approve pre-existing requirements under State law and would not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

This proposal also does not have tribal implications because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This proposed action also does not have Federalism implications because it would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely proposes to approve a State rule implementing a Federal standard and will result, as a consequence of that approval, in the Administrator's withdrawal of the CAIR FIP. It does not alter the relationship or the distribution of power and responsibilities established in the CAA. This proposed rule also is not subject to Executive Order 13045 ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it would approve a State rule implementing a Federal Standard.

In reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the CAA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This proposed rule would not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Approval and Promulgation of Implementation Plans and Designations of Areas for Air Quality Planning Purposes; Georgia: Redesignation of the Macon 8-Hour Ozone Nonattainment Area to Attainment for Ozone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On June 15, 2007, the State of Georgia, through the Georgia Environmental Protection Division (EPD), submitted a request to redesignate the Macon 8-hour ozone nonattainment area to attainment for the 8-hour ozone National Ambient Air Quality Standard (NAAQS); and to approve a State Implementation Plan (SIP) revision containing a maintenance plan for the Macon Area. The Macon 8-hour ozone area is comprised of Bibb County, and a portion of Monroe County located in middle Georgia (hereafter referred to as the ''Macon Area''). In this action, EPA is proposing to approve Georgia's 8-hour ozone redesignation request for the Macon Area. Additionally, EPA is proposing to approve the 8-hour ozone maintenance plan for the Macon Area, including the regional motor vehicle emissions budgets (MVEBs) for nitrogen oxides (NO_X) and volatile organic compounds (VOCs). This proposed approval of Georgia's redesignation request is based on EPA's determination that Georgia has demonstrated that the Macon Area has met the criteria for redesignation to attainment specified in the Clean Air Act (CAA), including the determination that the entire Macon 8-hour ozone nonattainment area has attained the 8-hour ozone standard. In this action, EPA is also describing the status of its transportation conformity adequacy determination for the new regional MVEBs for 2020 that are contained in the 8-hour ozone maintenance plan for the Macon Area.

DATES: Comments must be received on or before September 4, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2007–0548, by one of the following methods:

(a) *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.

(b) *E-mail: Harder.Stacy@epa.gov.*

(c) *Fax:* (404) 562–9019.

(d) *Mail:* EPA–R04–OAR–2007–0548, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960.

(e) *Hand Delivery or Courier:* Stacy Harder, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

Instructions: Direct your comments to Docket ID No. EPA–R04–OAR–2007–0548. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *http://www.regulations.gov* or e-mail, information that you consider to be CBI or otherwise protected. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov*, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the electronic docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ms. Stacy Harder of the Regulatory Development Section at the Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Ms. Harder's telephone number is (404) 562–9042. She can also be reached via electronic mail at *harder.stacy@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. What Proposed Actions Is EPA Taking?

EPA is proposing to take three related actions which are summarized below and described in greater detail throughout this notice of proposed

rulemaking: (1) To redesignate the Macon Area to attainment for the 8-hour ozone NAAQS; (2) to approve Georgia's 8-hour ozone maintenance plan into the Georgia SIP, including the associated MVEBs; and (3) to notify the public of the status of EPA's adequacy determination for the Macon Area MVEBs.

First, EPA is proposing to determine that the Macon Area has attained the 8-hour ozone standard, and that the Macon Area has met the requirements for redesignation under section 107(d)(3)(E) of the CAA. EPA is now proposing to approve a request to change the legal designation of the Macon Area from nonattainment to attainment for the 8-hour ozone NAAQS.

Second, EPA is proposing to approve Georgia's 8-hour ozone maintenance plan for the Macon Area (such approval being one of the CAA criteria for redesignation to attainment status). The maintenance plan is designed to help keep the Macon Area in attainment for the 8-hour ozone NAAQS through 2020. Consistent with the CAA, the maintenance plan that EPA is proposing to approve today also includes 2020 regional MVEBs for NO_X and VOCs. Therefore, EPA is proposing to approve into the Georgia SIP the 2020 regional MVEBs that are included as part of Georgia's maintenance plan. These regional MVEBs apply to the entire Macon Area.

Third, EPA is notifying the public of the status of EPA's adequacy process for the newly-established 2020 MVEBs for the Macon Area. The adequacy comment period for the Macon Area's 2020 MVEBs began on June 21, 2007, with EPA's posting of the availability of this submittal on EPA's Adequacy Web site (*http://www.epa.gov/otaq/stateresources/transconf/currsips.htm*). The adequacy comment period for these MVEBs closed on July 23, 2007. No adverse comments were received on this submittal during the adequacy public comment period. Please see section VIII of this rulemaking for further explanation of this process, and for more details on the MVEBs.

Today's notice of proposed rulemaking is in response to Georgia's June 15, 2007, SIP submittal. The June 15, 2007, submittal requested redesignation of the Macon Area, and included a SIP revision addressing the specific issues summarized above, and the necessary elements for redesignation described in section 107(d)(3)(E) of the CAA.

II. What Is the Background for EPA's Proposed Actions?

Ground-level ozone is not emitted directly by sources. Rather, emissions of NO_X and VOCs react in the presence of sunlight to form ground-level ozone. NO_X and VOCs are referred to as precursors of ozone. The CAA establishes a process for air quality management through the NAAQS.

On July 18, 1997, EPA promulgated a revised 8-hour ozone standard of 0.08 parts per million (ppm). This new standard is more stringent than the previous 1-hour ozone standard. Under EPA regulations at 40 CFR part 50, the 8-hour ozone standard is attained when the 3-year average of the annual fourth highest daily maximum 8-hour average ambient air quality ozone concentration is less than or equal to 0.08 ppm (i.e., 0.084 ppm when rounding is considered). (See, 69 FR 23857 (April 30, 2004) for further information.) Ambient air quality monitoring data for the 3-year period must meet a data completeness requirement. The ambient air quality monitoring data completeness requirement is met when the average percent of days with valid ambient monitoring data is greater than 90 percent, and no single year has less than 75 percent data completeness as determined in Appendix I of part 50. Specifically, section 2.3 of 40 CFR part 50, Appendix I, ''Comparisons with the Primary and Secondary Ozone Standards'' states:

> ''The primary and secondary ozone ambient air quality standards are met at an ambient air quality monitoring site when the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentration is less than or equal to 0.08 ppm. The number of significant figures in the level of the standard dictates the rounding convention for comparing the computed 3-year average annual fourth-highest daily maximum 8-hour average ozone concentration with the level of the standard. The third decimal place of the computed value is rounded, with values equal to or greater than 5 rounding up. Thus, a computed 3-year average ozone concentration of 0.085 ppm is the smallest value that is greater than 0.08 ppm.''

The CAA required EPA to designate as nonattainment any area that was violating the 8-hour ozone NAAQS based on the three most recent years of ambient air quality data. The Macon 8-hour ozone nonattainment area was designated using 2001–2003 ambient air quality data. The **Federal Register** document making these designations was signed on April 15, 2004, and published on April 30, 2004 (69 FR 23857). The CAA contains two sets of provisions—subpart 1 and subpart 2—that address planning and control requirements for ozone nonattainment areas. (Both are found in title I, part D.) Subpart 1 (which EPA refers to as ''basic'' nonattainment) contains general, less prescriptive, requirements for nonattainment areas for any pollutant—including ozone—governed by a NAAQS. Subpart 2 (which EPA refers to as ''classified'' nonattainment) provides more specific requirements for certain ozone nonattainment areas. Some 8-hour ozone nonattainment areas are subject only to the provisions of subpart 1. Other 8-hour ozone nonattainment areas are also subject to the provisions of subpart 2. Under EPA's Phase 1 8-hour ozone implementation rule (69 FR 23857) (Phase 1 Rule), signed on April 15, 2004, and published April 30, 2004, an area was classified under subpart 2 based on its 8-hour ozone design value (i.e., the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentrations), if it had a 1-hour design value at or above 0.121 ppm (the lowest 1-hour design value in Table 1 of subpart 2). All other areas are covered under subpart 1, based upon their 8-hour ambient air quality design values.

On April 30, 2004, EPA designated the Macon Area as a ''basic'' 8-hour ozone nonattainment area (see, 69 FR 23857, April 30, 2004). On June 15, 2007, when Georgia submitted its final redesignation request, the Macon Area was classified under subpart 1 of the CAA, and was obligated to meet only the subpart 1 requirements.

Various aspects of EPA's Phase 1 8-hour ozone implementation rule were challenged in court. On December 22, 2006, the U.S. Court of Appeals for the District of Columbia Circuit (DC Circuit Court) vacated EPA's Phase 1 Implementation Rule for the 8-hour Ozone Standard (69 FR 23951, April 30, 2004). *South Coast Air Quality Management Dist. (SCAQMD)* v. *EPA,* 472 F.3d 882 (DC Cir. 2006). On June 8, 2007, in response to several petitions for rehearing, the DC Circuit Court clarified that the Phase 1 Rule was vacated only with regard to those parts of the Rule that had been successfully challenged. Therefore, the Phase 1 Rule provisions related to classifications for areas currently classified under subpart 2 of title I, part D of the CAA as 8-hour nonattainment areas, the 8-hour attainment dates and the timing for emissions reductions needed for attainment of the 8-hour ozone NAAQS remain effective. The June 8th decision left intact the Court's rejection of EPA's reasons for implementing the 8-hour standard in certain nonattainment areas

under subpart 1 in lieu of subpart 2. By limiting the vacatur, the Court let stand EPA's revocation of the 1-hour standard and those anti-backsliding provisions of the Phase 1 Rule that had not been successfully challenged. The June 8th decision reaffirmed the December 22, 2006, decision that EPA had improperly failed to retain measures required for 1-hour nonattainment areas under the anti-backsliding provisions of the regulations: (1) Nonattainment area New Source Review (NSR) requirements based on an area's 1-hour nonattainment classification; (2) Section 185 penalty fees for 1-hour severe or extreme nonattainment areas; and (3) measures to be implemented pursuant to section 172(c)(9) or 182(c)(9) of the CAA, on the contingency of an area not making reasonable further progress toward attainment of the 1-hour NAAQS, or for failure to attain that NAAQS. The June 8th decision clarified that the Court's reference to conformity requirements for anti-backsliding purposes was limited to requiring the continued use of 1-hour motor vehicle emissions budgets until 8-hour budgets were available for 8-hour conformity determinations, which is already required under EPA's conformity regulations. The Court thus clarified that 1-hour conformity determinations are not required for anti-backsliding purposes.

This section sets forth EPA's views on the potential effect of the Court's rulings on this proposed redesignation action. For the reasons set forth below, EPA does not believe that the Court's rulings alter any requirements relevant to this redesignation action so as to preclude redesignation, and do not prevent EPA from proposing or ultimately finalizing this redesignation. EPA believes that the Court's December 22, 2006, and June 8, 2007, decisions impose no impediment to moving forward with redesignation of the Macon Area to attainment. Even in light of the Court's decisions, redesignation is appropriate under the relevant redesignation provisions of the CAA and long-standing policies regarding redesignation requests.

With respect to the 8-hour standard, the Court's ruling rejected EPA's reasons for classifying areas under subpart 1 for the 8-hour standard, and remanded that matter to the Agency. Consequently, it is possible that this Area could, during a remand to EPA, be reclassified under subpart 2. Although any future decision by EPA to classify this area under subpart 2 might trigger additional future requirements for the area, EPA believes that this does not mean that redesignation of the area cannot now go forward. This belief is based upon (1) EPA's long-standing policy of evaluating redesignation requests in accordance with the requirements due at the time the request is submitted; and (2) consideration of the inequity of applying retroactively any requirements that might in the future be applied.

First, at the time the redesignation request was submitted, the Macon Area was classified under subpart 1 and was obligated to meet only subpart 1 requirements. Under EPA's long-standing interpretation of section 107(d)(3)(E) of the CAA to qualify for redesignation, states requesting redesignation to attainment must meet only the relevant SIP requirements that came due prior to the submittal of a complete redesignation request. September 4, 1992, Calcagni Memorandum (''Procedures for Processing Requests to Redesignate Areas to Attainment,'' Memorandum from John Calcagni, Director, Air Quality Management Division). See also, Michael Shapiro Memorandum, September 17, 1993, and 60 FR 12459, 12465–66 (March 7, 1995) (Redesignation of Detroit-Ann Arbor, Michigan). See, *Sierra Club* v. *EPA,* 375 F.3d 537 (7th Cir. 2004), which upheld this interpretation. See, *e.g.* also, 68 FR 25418, 25424, 25427 (May 12, 2003) (redesignation of St. Louis, Missouri).

Moreover, it would be inequitable to retroactively apply any new SIP requirements that were not applicable at the time the request was submitted. The DC Circuit Court has recognized the inequity in such retroactive rulemaking, (See, *Sierra Club* v. *Whitman,* 285 F.3d 63 (DC Cir. 2002)), in which the Court upheld a district court's ruling refusing to make retroactive an EPA determination of nonattainment that was past the statutory due date. Such a determination would have resulted in the imposition of additional requirements on the area. The Court stated, ''Although EPA failed to make the nonattainment determination within the statutory time frame, Sierra Club's proposed solution only makes the situation worse. Retroactive relief would likely impose large costs on the States, which would face fines and suits for not implementing air pollution prevention plans in 1997, even though they were not on notice at the time.'' *Id.* at 68. Similarly, with regard to Georgia's redesignation request, it would be unfair to penalize the Macon Area by applying to it for purposes of redesignation, additional SIP requirements under subpart 2 that were not in effect at the time it submitted its redesignation request.

As noted earlier, in 2005, the ambient ozone data for the Macon Area indicated no further violations of the 8-hour ozone NAAQS, using data from the 3-year period of 2003–2005 to demonstrate attainment. As a result, on June 15, 2007, Georgia requested redesignation of the Macon Area to attainment for the 8-hour ozone NAAQS. The redesignation request included three years of complete, quality-assured ambient air quality data for the ozone seasons (March 1st until October 31st) of 2003–2005, indicating that the 8-hour ozone NAAQS has been achieved for the entire Macon Area. Under the CAA, nonattainment areas may be redesignated to attainment if sufficient, complete, quality-assured data is available for the Administrator to determine that the area has attained the standard and the area meets the other CAA redesignation requirements in section 107(d)(3)(E).

III. What Are the Criteria for Redesignation?

The CAA provides the requirements for redesignating a nonattainment area to attainment. Specifically, section 107(d)(3)(E) of the CAA allows for redesignation providing that: (1) The Administrator determines that the area has attained the applicable NAAQS; (2) the Administrator has fully approved the applicable implementation plan for the area under section 110(k); (3) the Administrator determines that the improvement in air quality is due to permanent and enforceable reductions in emissions resulting from implementation of the applicable SIP and applicable Federal air pollutant control regulations and other permanent and enforceable reductions; (4) the Administrator has fully approved a maintenance plan for the area as meeting the requirements of section 175A; and, (5) the state containing such area has met all requirements applicable to the area under section 110 and part D of the CAA.

EPA provided guidance on redesignation in the General Preamble for the Implementation of Title I of the CAA Amendments of 1990, on April 16, 1992 (57 FR 13498), and supplemented this guidance on April 28, 1992 (57 FR 18070). EPA has provided further guidance on processing redesignation requests in the following documents:

1. ''Ozone and Carbon Monoxide Design Value Calculations,'' Memorandum from Bill Laxton, Director, Technical Support Division, June 18, 1990;

2. ''Maintenance Plans for Redesignation of Ozone and Carbon Monoxide Nonattainment Areas,'' Memorandum from G. T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, April 30, 1992;

3. ''Contingency Measures for Ozone and Carbon Monoxide (CO) Redesignations,'' Memorandum from G. T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, June 1, 1992;

4. ''Procedures for Processing Requests to Redesignate Areas to Attainment,'' Memorandum from John Calcagni, Director, Air Quality Management Division, September 4, 1992 (hereafter referred to as the ''Calcagni Memorandum'');

5. ''State Implementation Plan (SIP) Actions Submitted in Response to Clean Air Act (ACT) Deadlines,'' Memorandum from John Calcagni, Director, Air Quality Management Division, October 28, 1992;

6. ''Technical Support Documents (TSD's) for Redesignation of Ozone and Carbon Monoxide (CO) Nonattainment Areas,'' Memorandum from G. T. Helms, Chief, Ozone/Carbon Monoxide Programs Branch, August 17, 1993;

7. ''State Implementation Plan (SIP) Requirements for Areas Submitting Requests for Redesignation to Attainment of the Ozone and Carbon Monoxide (CO) National Ambient Air Quality Standards (NAAQS) On or After November 15, 1992,'' Memorandum from Michael H. Shapiro, Acting Assistant Administrator for Air and Radiation, September 17, 1993;

8. ''Use of Actual Emissions in Maintenance Demonstrations for Ozone and CO Nonattainment Areas,'' Memorandum from D. Kent Berry, Acting Director, Air Quality Management Division, November 30, 1993;

9. ''Part D New Source Review (Part D NSR) Requirements for Areas Requesting Redesignation to Attainment,'' Memorandum from Mary D. Nichols, Assistant Administrator for Air and Radiation, October 14, 1994; and

10. ''Reasonable Further Progress, Attainment Demonstration, and Related Requirements for Ozone Nonattainment Areas Meeting the Ozone National Ambient Air Quality Standard,'' Memorandum from John S. Seitz, Director, Office of Air Quality Planning and Standards, May 10, 1995.

IV. Why Is EPA Proposing These Actions?

On June 15, 2007, Georgia requested redesignation of the Macon 8-hour ozone nonattainment area to attainment for the 8-hour ozone standard. EPA's evaluation indicates that Georgia has demonstrated that the Macon Area has attained the standard and has met the requirements for redesignation set forth in section 107(d)(3)(E) of the CAA. EPA is also announcing the status of its adequacy determination for the 2020 regional MVEBs, which is relevant to the requested redesignation.

V. What Is the Effect of EPA's Proposed Actions?

EPA's proposed actions establish the basis upon which EPA may take final action on the issues being proposed for approval today. Approval of Georgia's redesignation request would change the official designation of the Macon Area for the 8-hour ozone NAAQS found at 40 CFR part 81. Approval of Georgia's request would also incorporate into the Georgia SIP, a plan for the Macon Area for maintaining the 8-hour ozone NAAQS in the area through 2020. This maintenance plan includes contingency measures to remedy future violations of the 8-hour ozone NAAQS. The maintenance plan also establishes regional MVEBs for the year 2020 of 7.8744 tpd for VOCs and 14.7712 tpd for NO_X, for the Macon Area. Approval of Georgia's maintenance plan would also result in approval of the regional MVEBs. Additionally, EPA is notifying the public of the status of its adequacy determination for the 2020 regional MVEBs, pursuant to 40 CFR 93.118(f)(1).

VI. What Is EPA's Analysis of the Request?

EPA is proposing to make the determination that the Macon Area has attained the 8-hour ozone standard, and that all other redesignation criteria have been met for the Macon Area. The basis for EPA's determination for the area is discussed in greater detail below.

Criteria (1)—The Macon Area Has Attained the 8-hour Ozone NAAQS

EPA is proposing to determine that the Macon Area has attained the 8-hour ozone NAAQS. For ozone, an area may be considered to be attaining the 8-hour ozone NAAQS if there are no violations, as determined in accordance with 40 CFR 50.10 and Appendix I of part 50, based on three complete, consecutive calendar years of quality-assured air quality monitoring data. To attain this standard, the 3-year average of the fourth-highest daily maximum 8-hour average ozone concentrations measured at each monitor within an area over each year must not exceed 0.08 ppm. Based on the rounding convention described in 40 CFR part 50, Appendix I, the standard is attained if the design value is 0.084 ppm or below. The data must be collected and quality-assured in accordance with 40 CFR part 58, and recorded in the EPA Air Quality System (AQS). The monitors generally should have remained at the same location for the duration of the monitoring period required for demonstrating attainment.

EPA reviewed ozone monitoring data from the ambient ozone monitoring station in the Macon Area for the ozone season from 2003–2005. This data has been quality assured and is recorded in AQS. The fourth high average for 2003, 2004, and 2005, and the 3-year average of these values (i.e., design values), are summarized in Table 1 below. The 2006 data continues to demonstrate attainment.

TABLE 1.—ANNUAL 4TH MAX HIGH AND DESIGN VALUE CONCENTRATION FOR 8-HOUR OZONE FOR THE MACON AREA

(In parts per million)

Site name	4th Highest value (ppm)				3-year average	
	2003	2004	2005	2006	2003–2005	2004–2006
Macon SE	0.081	0.086	0.082	0.077	0.083	0.082

As discussed above, the design value for an area is the highest design value recorded at any monitor in the area. Therefore, the design value for the Macon Area is (0.083) ppm, which meets the standard as described above. As discussed in more detail below, Georgia has committed to continue monitoring in this area in accordance with 40 CFR part 58. The data submitted by Georgia provides an adequate demonstration that the Macon Area has attained the 8-hour ozone NAAQS.

Criteria (2)—Georgia Has a Fully Approved SIP Under Section 110(k) for the Macon Area and Criteria (5)—Has Met All Applicable Requirements Under Section 110 and Part D of the CAA

Below is a summary of how these two criteria were met.

EPA has determined that Georgia has met all applicable SIP requirements for the Macon Area under section 110 of the CAA (general SIP requirements). EPA has also determined that the Georgia SIP satisfies the criterion that it meet applicable SIP requirements under part D of title I of the CAA (requirements specific to subpart 1 basic 8-hour ozone nonattainment areas) in accordance with section 107(d)(3)(E)(v). In addition, EPA has determined that the SIP is fully approved with respect to all applicable requirements in accordance with section 107(d)(3)(E)(ii). In making these determinations, EPA ascertained which requirements are applicable to the area and that if applicable, they are fully approved under section 110(k). SIPs must be fully approved only with respect to applicable requirements.

a. The Macon Area has met all applicable requirements under section 110 and part D of the CAA.

The September 4, 1992, Calcagni Memorandum (see ''Procedures for Processing Requests to Redesignate Areas to Attainment,'' Memorandum from John Calcagni, Director, Air Quality Management Division, September 4, 1992) describes EPA's interpretation of section 107(d)(3)(E). Under this interpretation, to qualify for redesignation, states requesting redesignation to attainment must meet only the relevant CAA requirements that come due prior to the submittal of a complete redesignation request. See also, Michael Shapiro Memorandum, (''SIP Requirements for Areas Submitting Requests for Redesignation to Attainment of the Ozone and Carbon Monoxide NAAQS On or After November 15, 1992,'' September 17, 1993), and 60 FR 12459, 12465–66 (March 7, 1995) (redesignation of Detroit-Ann Arbor, Michigan). Applicable requirements of the CAA that come due subsequent to the area's submittal of a complete redesignation request remain applicable until a redesignation is approved, but are not required as a prerequisite to redesignation. See, section 175A(c) of the CAA; *Sierra Club,* 375 F.3d 537 (7th Cir. 2004); see also, 68 FR 25424, 25427 (May 12, 2003) (redesignation of St. Louis, Missouri).

General SIP requirements. Section 110(a)(2) of title I of the CAA delineates the general requirements for a SIP, which include enforceable emissions limitations and other control measures, means, or techniques, provisions for the establishment and operation of appropriate devices necessary to collect data on ambient air quality, and programs to enforce the limitations. General SIP elements and requirements are delineated in section 110(a)(2) of title I, part A of the CAA. These requirements include, but are not limited to, the following: Submittal of a SIP that has been adopted by the state after reasonable public notice and hearing; provisions for establishment and operation of appropriate procedures needed to monitor ambient air quality; implementation of a source permit program; provisions for the implementation of part C requirements (Prevention of Significant Deterioration (PSD)) and provisions for the implementation of part D requirements (NSR permit programs); provisions for air pollution modeling; and provisions for public and local agency participation in planning and emission control rule development.

Section 110(a)(2)(D) requires that SIPs contain certain measures to prevent sources in a state from significantly contributing to air quality problems in another state. To implement this provision, EPA has required certain states to establish programs to address the transport of air pollutants (NO_X SIP Call, Clean Air Interstate Rule (CAIR)). EPA has also found, generally, that states have not submitted SIPs under section 110(a)(1) to meet the interstate transport requirements of section 110(a)(2)(D)(i). However, the section 110(a)(2)(D) requirements for a state are not linked with a particular nonattainment area's designation and classification in that state. EPA believes that the requirements linked with a particular nonattainment area's designation and classifications are the relevant measures to evaluate in reviewing a redesignation request. The transport SIP submittal requirements, where applicable, continue to apply to a state regardless of the designation of any one particular area in the state. Thus, we do not believe that the CAA's interstate transport requirements should be construed to be applicable requirements for purposes of redesignation.

In addition, EPA believes that the other section 110 elements not connected with nonattainment plan submissions and not linked with an area's attainment status are not applicable requirements for purposes of redesignation. The area will still be subject to these requirements after the area is redesignated. The section 110 and part D requirements, which are linked with a particular area's designation and classification, are the relevant measures to evaluate in reviewing a redesignation request. This approach is consistent with EPA's existing policy on applicability (i.e., for redesignations) of conformity and oxygenated fuels requirements, as well as with section 184 ozone transport requirements. See, Reading, Pennsylvania, proposed and final rulemakings (61 FR 53174–53176, October 10, 1996), (62 FR 24826, May 7, 1997); Cleveland-Akron-Loraine, Ohio, final rulemaking (61 FR 20458, May 7, 1996); and Tampa, Florida, final rulemaking at (60 FR 62748, December 7, 1995). See also, the discussion on this issue in the Cincinnati, Ohio redesignation (65 FR 37890, June 19, 2000), and in the Pittsburgh, Pennsylvania redesignation (66 FR 50399, October 19, 2001).

EPA believes that section 110 elements not linked to the area's nonattainment status are not applicable for purposes of redesignation. Any section 110 requirements that are linked to the part D requirements for 8-hour ozone nonattainment areas are not yet due, since, as explained below, no part D requirements for 8-hour standard became due prior to submission of the redesignation request. Therefore, as discussed above, for purposes of redesignation, they are both not considered applicable requirements. Nonetheless, EPA notes it has previously approved provisions in the Georgia SIP addressing section 110 elements under the 1-hour ozone NAAQS (70 FR 34660, June 15, 2005). EPA believes that the section 110 SIP approved for the 1-hour ozone NAAQS is also sufficient to meet the requirements under the 8-hour ozone NAAQS (as well as satisfying the issues raised by the D.C. Circuit Court in the *SCAQMD* case).

Part D requirements. EPA has also determined that the Georgia SIP meets applicable SIP requirements under part D of the CAA since no requirements became due prior to the submission of the area's redesignation request. Sections 172–176 of the CAA, found in subpart 1 of part D, set forth the basic nonattainment requirements applicable to all nonattainment areas.

Section 182 of the CAA, found in subpart 2 of part D, establishes additional specific requirements depending on the area's nonattainment classification. Subpart 2 is not applicable to the Macon Area.

Part D, subpart 1 applicable SIP requirements. For purposes of evaluating this redesignation request,

the applicable part D, subpart 1 SIP requirements for all nonattainment areas are contained in sections 172(c)(1)–(9). A thorough discussion of the requirements contained in section 172 can be found in the General Preamble for Implementation of title I (57 FR 13498). No requirements applicable for purposes of redesignation under part D became due prior to the submission of the redesignation request, and therefore none are applicable to the area for purposes of redesignation. For example, the requirements for an attainment demonstration that meets the requirements of section 172(c)(1) are not yet applicable, nor are the requirements for Reasonably Achievable Control Technology (RACT) and Reasonably Available Control Measures (RACM) (section 172(c)(1)), reasonable further progress (RFP) (section 172(c)(2)), and contingency measures (section 172(c)(9)).

In addition to the fact that no part D requirements applicable for purposes of redesignation became due prior to submission of the redesignation request and therefore are not applicable, EPA believes it is reasonable to interpret the conformity and NSR requirements as not requiring approval prior to redesignation.

Section 176 Conformity Requirements. Section 176(c) of the CAA requires states to establish criteria and procedures to ensure that Federally supported or funded projects conform to the air quality planning goals in the applicable SIP. The requirement to determine conformity applies to transportation plans, programs and projects developed, funded or approved under title 23 of the United States Code (U.S.C.) and the Federal Transit Act (transportation conformity) as well as to all other Federally supported or funded projects (general conformity). State conformity revisions must be consistent with Federal conformity regulations relating to consultation, enforcement and enforceability that the CAA required the EPA to promulgate.

EPA believes it is reasonable to interpret the conformity SIP requirements as not applying for purposes of evaluating the redesignation request under section 107(d) because state conformity rules are still required after redesignation and Federal conformity rules apply where state rules have not been approved. See, *Wall*, 265 F.3d 426 ((upholding this interpretation). See also, 60 FR 62748 (December 7, 1995, Tampa, Florida.)

EPA has also determined that areas being redesignated need not comply with the requirement that a NSR program be approved prior to redesignation, provided that the area demonstrates maintenance of the standard without a part D NSR program in effect since PSD requirements will apply after redesignation. The rationale for this view is described in a memorandum from Mary Nichols, Assistant Administrator for Air and Radiation, dated October 14, 1994, entitled ''Part D New Source Review (Part D NSR) Requirements for Areas Requesting Redesignation to Attainment.'' Georgia has demonstrated that the area will be able to maintain the standard without a part D NSR program in effect, and therefore, Georgia need not have a fully approved part D NSR program prior to approval of the redesignation request. Georgia's PSD program will become effective in the Macon Area upon redesignation to attainment. See, rulemakings for Detroit, Michigan (60 FR 12467–12468, March 7, 1995); Cleveland-Akron-Lorraine, Ohio (61 FR 20458, 20469–70, May 7, 1996); Louisville, Kentucky (66 FR 53665, October 23, 2001); Grand Rapids, Michigan (61 FR 31834–31837, June 21, 1996). Thus, the Macon Area has satisfied all applicable requirements for purposes of redesignation under section 110 and part D of the CAA.

b. The area has a fully approved applicable SIP under section 110(k) of the CAA.

EPA has fully approved the applicable Georgia SIP for the Macon Area (including Bibb and a portion of Monroe County) under section 110(k) of the CAA for all requirements applicable for purposes of redesignation. EPA may rely on prior SIP approvals in approving a redesignation request, see Calcagni Memorandum at p. 3; *Southwestern Pennsylvania Growth Alliance* v. *Browner,* 144 F.3d 984, 989–90 (6th Cir. 1998); *Wall*, 265 F.3d 426, plus any additional measures it may approve in conjunction with a redesignation action. See, 68 FR 25426 (May 12, 2003) and citations therein. Following passage of the CAA of 1970, Georgia has adopted and submitted, and EPA has fully approved at various times, provisions addressing the various 1-hour ozone standard SIP elements applicable in Macon, Georgia (70 FR 34660, June 15, 2005).

As indicated above, EPA believes that the section 110 elements not connected with nonattainment plan submissions and not linked to the area's nonattainment status are not applicable requirements for purposes of redesignation. EPA also believes that since the part D requirements applicable for purposes of redesignation did not become due prior to submission of the redesignation request, they also are therefore not applicable requirements for purposes of redesignation.

Criteria (3)—The Air Quality Improvement in the Macon Area Is Due to Permanent and Enforceable Reductions in Emissions Resulting From Implementation of the SIP and Applicable Federal Air Pollution Control Regulations and Other Permanent and Enforceable Reductions

EPA believes that Georgia has demonstrated that the observed air quality improvement in the Macon Area is due to permanent and enforceable reductions in emissions resulting from implementation of the SIP, Federal measures, and other state adopted measures. Additionally, new emissions control programs for fuels and motor vehicles will help ensure a continued decrease in emissions throughout the region.

TABLE 2.—MACON AREA EMISSION REDUCTIONS PROGRAMS

Onboard Refueling Vapor Recovery for Light-Duty Vehicles.
Architectural and Industrial Maintenance Coatings.
Automobile Refinishing.
The National Emission Standards for Hazardous Air Pollutants (NESHAP); the majority of which are also VOCs.
Phase II Acid Rain Program for NO_X.
Tier 2 Motor Vehicle Emissions Standards and Gasoline Sulfur Control Requirements.
Regional NO_X SIP Call.

Notably, no credit specific emission reduction is being claimed in the SIP for the NO_X SIP Call reductions although this program has resulted in measurable emissions reductions.

Criteria (4)—The Area Has a Fully Approved Maintenance Plan Pursuant to Section 175A of the CAA

In its request to redesignate the Macon Area to attainment, EPD submitted a SIP revision to provide for the maintenance of the 8-hour ozone NAAQS for at least 10 years after the effective date of redesignation to attainment.

a. What is required in a maintenance plan?

Section 175A of the CAA sets forth the elements of a maintenance plan for areas seeking redesignation from nonattainment to attainment. Under section 175A, the plan must demonstrate continued attainment of the applicable NAAQS for at least 10 years after the Administrator approves a redesignation to attainment. Eight years after the redesignation, the State of Georgia must submit a revised

maintenance plan which demonstrates that attainment will continue to be maintained for the 10 years following the initial 10-year period. To address the possibility of future NAAQS violations, the maintenance plan must contain such contingency measures, with a schedule for implementation as EPA deems necessary to assure prompt correction of any future 8-hour ozone violations. Section 175A of the CAA sets forth the elements of a maintenance plan for areas seeking redesignation from nonattainment to attainment. The Calcagni Memorandum provides additional guidance on the content of a maintenance plan. The Calcagni Memorandum explains that an ozone maintenance plan should address five requirements: the attainment emissions inventory, maintenance demonstration, monitoring, verification of continued attainment, and a contingency plan. As is discussed more fully below, Georgia's maintenance plan includes all the necessary components and is approvable as part of the redesignation request.

b. Attainment Emissions Inventory

Georgia selected 2005 as ''the attainment year'' for the Macon Area for the purposes of demonstrating attainment of the 8-hour ozone NAAQS. This attainment inventory identifies the level of emissions in the area which is sufficient to attain the 8-hour ozone standard. Georgia began development of this attainment inventory by first developing a baseline emissions inventory for the Macon Area. The year 2003 was chosen as the base year for developing a comprehensive ozone precursor emissions inventory for which projected emissions could be developed for 2005, 2008, 2011, 2014, 2017, and 2020. Non-road mobile emissions estimates were based on the EPA's NONROAD2005 model. On-road mobile source emissions were calculated using EPA's MOBILE6.2 emission factors model. The 2005 VOCs and NO_X emissions, as well as the emissions for other years, for the Macon Area were developed consistent with EPA guidance, and are summarized in Tables 3 and 4 in the following subsection.

c. Maintenance Demonstration

The June 15, 2007, final submittal includes a maintenance plan for the Macon Area. This demonstration:

(i) Shows compliance and maintenance of the 8-hour ozone standard by providing information to support the demonstration that current and future emissions of VOCs and NO_X remain at or below attainment year 2005 emissions levels. The year 2005 was chosen as the attainment year because it is one of the most recent three years (i.e., 2003, 2004, and 2005) for which the Macon Area has clean air quality data for the 8-hour ozone standard.

(ii) Uses 2005 as the attainment year and includes future emission inventory projections for 2005, 2008, 2011, 2014, 2017, and 2020.

(iii) Identifies an ''out year,'' at least 10 years after the time necessary for EPA to review and approve the maintenance plan. Per 40 CFR part 93, MVEBs were established for the last year (2020) of the maintenance plan. See, section VII below.

(iv) Provides the following actual and projected emissions inventories for the Macon nonattainment Area. See, Tables 3 and 4.

TABLE 3.—MACON AREA EMISSIONS OF VOCS

[Tons per summer day]

Source category	2003	2005	2008	2011	2014	2017	2020
Non-EGU	5.4752	4.9767	4.2290	4.1672	4.4484	4.7295	4.8890
EGU	1.0197	0.9818	0.9249	0.9060	0.9060	0.9060	0.9060
Area	16.7094	16.6437	16.5452	17.1532	18.1145	19.0758	19.1643

Total	43.8711	41.8180	38.7385	36.9105	35.7084	34.9894	33.4058
Safety Margin**	N/A	2.0531	5.1326	6.9606	8.1627	8.8817	10.4653

*Calculated using MOBILE 6.2.
**After assigning 2.6163 TPD of the 2020 VOCs safety margin to the MVEB, the revised 2020 safety margin will be 7.8490 TPD.

TABLE 4.—MACON AREA NO_X EMISSIONS

[Tons per summer day]

Source category	2003	2005	2008	2011	2014	2017	2020
Non-EGU	5.9471	5.6213	5.1325	5.0792	5.2435	5.4079	5.5590
EGU	74.9781	67.7887	57.0046	53.4099	53.4099	53.4099	53.4099
Area	1.5008	1.5136	1.5328	1.5641	1.6013	1.6385	1.6609
Mobile*	18.4512	16.8661	14.4883	11.8974	9.2000	7.2225	5.6051
Nonroad	4.1467	3.9555	3.6687	3.3229	2.9475	2.5722	2.1246
Total	105.0239	95.7452	81.8270	75.2734	72.4022	70.2509	68.3595
Safety Margin**	N/A	9.2787	23.1969	29.7505	32.6217	34.7730	36.6644

*Calculated using MOBILE 6.2.
**After assigning 9.1661 TPD of the 2020 NO_X safety margin to the MVEB, the revised 2020 safety margin will be 27.4983 TPD.

A safety margin is the difference between the attainment level of emissions (from all sources) and the projected level of emissions (from all sources) in the maintenance plan. The attainment level of emissions is the

level of emissions during one of the years in which the area met the NAAQS. Georgia has decided to allocate a portion of the available safety margin to the regional 2020 MVEBs for NO_X and VOCs for the Macon Area, and has calculated the safety margin in its submittal. See, Tables 3 and 4 above. This allocation and the resulting available safety margin for the Macon Area are discussed further in section VII of this rulemaking.

d. Monitoring Network

There are currently two monitors measuring ozone in the Macon Area. Only one of the monitors was in place during the 2003–2005 monitoring period. The second monitor was installed and began collecting data for the 2005 ozone season. Georgia has committed in the maintenance plan to continue operation of these monitors in compliance with 40 CFR part 58, and has addressed the requirement for monitoring.

e. Verification of Continued Attainment

Georgia has the legal authority to enforce and implement the requirements of the ozone maintenance plan for the Macon Area. This includes the authority to adopt, implement and enforce any subsequent emissions control contingency measures determined to be necessary to correct future ozone attainment problems.

Georgia will track the progress of the maintenance plan by performing future reviews of actual emissions for the area using the latest emissions factors, models and methodologies. For these periodic inventories Georgia will review the assumptions made for the purpose of the maintenance demonstration concerning projected growth of activity levels. If any of these assumptions appear to have changed substantially, Georgia will re-project emissions.

f. Contingency Plan

The contingency plan provisions are designed to promptly correct a violation of the NAAQS that occurs after redesignation. Section 175A of the CAA requires that a maintenance plan include such contingency measures as EPA deems necessary to assure that the state will promptly correct a violation of the NAAQS that occurs after redesignation. The maintenance plan should identify the contingency measures to be adopted, a schedule and procedure for adoption and implementation, and a time limit for action by the state. A state should also identify specific indicators to be used to determine when the contingency measures need to be implemented. The maintenance plan must include a requirement that a state will implement all measures with respect to control of the pollutant that were contained in the SIP before redesignation of the area to attainment in accordance with section 175A(d).

In the June 15, 2007, submittal, Georgia affirms that all programs instituted by the State and EPA will remain enforceable, and that sources are prohibited from reducing emissions controls following the redesignation of the Macon Area. In the submittal, if there is a measured violation of the 8-hour ozone NAAQS in the Macon Area, contingency measures would be adopted and implemented as expeditiously as possible, but no later than eighteen to twenty four months after the triggering event. The proposed schedule for these actions would be as follows:

- Six months to perform a comprehensive analysis;
- Three months to identify potential sources for reductions;
- Three months to identify applicable control measures;
- Three months to initiate a stakeholder process;
- Three months to draft SIP regulations; and
- Six months to initiate the rulemaking process. This step would include the time required to hold a public comment period, hearing, and board adoption, and submit the final plans to EPA. This process may be initiated simultaneous with drafting the regulations.

Georgia will consider one or more of the following contingency measures to re-attain the standard.

- RACM for all sources of NO_X
- RACT for all existing point sources of NO_X
- Expansion of RACM/RACT to area(s) of transport within the State
- Mobile Source Measures
- Additional NO_X reduction measures yet to be identified

EPA has concluded that the maintenance plan adequately addresses the five basic components of a maintenance plan: attainment inventory, maintenance demonstration, monitoring network, verification of continued attainment, and a contingency plan. The maintenance plan SIP revision submitted by Georgia for the Macon Area meets the requirements of section 175A of the CAA and is approvable.

VII. What Are the Proposed Regional MVEBs for the Macon Area?

Under the CAA, states are required to submit, at various times, control strategy SIPs and maintenance plans in ozone areas. These control strategy SIPs (reasonable further progress SIPs and attainment demonstration SIPs etc.) and maintenance plans create MVEBs for criteria pollutants and/or their precursors to address pollution from cars and trucks. Per 40 CFR part 93, an MVEB is established for the last year of the maintenance plan. The MVEB is the portion of the total allowable emissions in the maintenance demonstration that is allocated to highway and transit vehicle use and emissions. See, 40 CFR 93.101. The MVEB serves as a ceiling on emissions from an area's planned transportation system. The MVEB concept is further explained in the preamble to the November 24, 1993, transportation conformity rule (58 FR 62188). The preamble also describes how to establish the MVEB in the SIP and revise the MVEB.

Georgia, after interagency consultation with the transportation partners for the Macon Area, has elected to develop regional MVEBs for NO_X and VOCs for this entire area. Georgia is developing these MVEBs, as required, for the last year of its maintenance plan (2020). The MVEBs reflect the total on-road emissions for 2020, plus an allocation from the available VOCs and NO_X safety margin. Under 40 CFR 93.101, the term safety margin is the difference between the attainment level (from all sources) and the projected level of emissions (from all sources) in the maintenance plan. The safety margin can be allocated to the transportation sector; however, the total emissions must remain below the attainment level. These MVEBs and allocation from the safety margin were developed in consultation with the transportation partners and were added to account for uncertainties in population growth, changes in model VMT and new emission factor models. The regional MVEBs for the Macon Area are defined in Table 5, below.

TABLE 5.—MACON AREA MVEBS

[Tons per day]

	2020*
NO_X	14.7712
VOCs	7.8744

*Includes an allocation for the available NO_X and VOCs safety margins.

As mentioned above, Georgia has chosen to allocate a portion of the available safety margin to the 2020 MVEBs. This allocation is 9.1661 tpd for NO_X and 2.6163 tpd for VOCs. The 2020 regional MVEBs are derived as follows for NO_X: (5.6051 tpd for total mobile

emissions) + (9.1661 tpd from available safety margin) = 14.7712 tpd; and for VOCs: (5.2581 tpd for total mobile emissions) + (2.6163 tpd from available safety margin) = 7.8744 tpd. Thus, the remaining safety margin in 2020 is 27.4983 tpd for NO_X and 7.8490 tpd for VOCs.

Through this rulemaking, EPA is proposing to approve the 2020 regional MVEBs for NO_X and VOCs for the Macon Area because EPA has determined that the Area maintains the 8-hour ozone standard with the emissions at the levels of the budgets. As mentioned above, these MVEBs are regional MVEBs for the entire Macon Area. Once the new regional MVEBs for the Macon Area (the subject of this rulemaking) are approved or found adequate (whichever is done first), they must be used for future conformity determinations. As is discussed in greater detail below, EPA is also announcing the status of its adequacy determination for the proposed 2020 MVEBs for the Macon Area pursuant to 40 CFR 93.118(f)(1).

VIII. What Is the Status of EPA's Adequacy Determination for MVEBs for the Year 2020 for the Macon Area?

Under section 176(c) of the CAA, new transportation projects, such as the construction of new highways, must ''conform'' to (i.e., be consistent with) the part of the State's air quality plan that addresses pollution from cars and trucks. ''Conformity'' to the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS. If a transportation plan does not ''conform,'' most new projects that would expand the capacity of roadways cannot go forward. Regulations at 40 CFR part 93 set forth EPA policy, criteria, and procedures for demonstrating and assuring conformity of such transportation activities to a SIP. The regional emissions analysis is one, but not the only, requirement for implementing transportation conformity. Transportation conformity is a requirement for nonattainment and maintenance areas. Maintenance areas are areas that were previously nonattainment for a particular NAAQS but have since been redesignated to attainment with a maintenance plan for that NAAQS.

When reviewing submitted ''control strategy'' SIPs or maintenance plans containing MVEBs, EPA must affirmatively find the MVEB contained therein ''adequate'' for use in determining transportation conformity. Once EPA affirmatively finds the submitted MVEB is adequate for transportation conformity purposes, that MVEB can be used by state and Federal agencies in determining whether proposed transportation projects ''conform'' to the SIP as required by section 176(c) of the Clean Air Act.

EPA's substantive criteria for determining ''adequacy'' of an MVEB are set out in 40 CFR 93.118(e)(4). The process for determining ''adequacy'' consists of three basic steps: public notification of a SIP submission, a public comment period, and EPA's adequacy finding. This process for determining the adequacy of submitted SIP MVEBs was initially outlined in EPA's May 14, 1999, guidance, ''Conformity Guidance on Implementation of March 2, 1999, Conformity Court Decision.'' This guidance was finalized in the Transportation Conformity Rule Amendments for the ''New 8-Hour Ozone and $PM_{2.5}$ National Ambient Air Quality Standards and Miscellaneous Revisions for Existing Areas; Transportation Conformity Rule Amendments—Response to Court Decision and Additional Rule Change,'' on July 1, 2004 (69 FR 40004). EPA follows this guidance and rulemaking in making its adequacy determinations.

Georgia's maintenance plan submission contained new regional MVEBs for VOCs and NO_X for the Macon Area for the year 2020. The availability of the Georgia SIP submission with the Macon MVEBs was available for public comment on EPA's adequacy Web site on June 21, 2007, at: *http://www.epa.gov/otaq/stateresources/transconf/currsips.htm.* The EPA public comment period on adequacy of the 2020 regional MVEBs for the Macon Area closed on July 23, 2007. EPA did not receive any comments or requests for the submittal.

EPA intends to make its determination of the adequacy of the 2020 MVEBs for the Macon Area for transportation conformity purposes in the final rulemaking on the redesignation of the Macon Area. If EPA finds the 2020 MVEBs adequate and approves these MVEBs in the final rulemaking action, the new MVEBs must be used for future transportation conformity determinations. The new 2020 MVEBs, if found adequate and approved in the final rulemaking, will be effective on the date of publication of EPA's final rulemaking in the **Federal Register**. For required regional emissions analysis years that involve the year 2019 or before, the area will continue to use the interagency consultation group for this area to determine the appropriate interim test to use to demonstrate conformity. For required regional emissions analysis years that involve 2020 or beyond, the applicable budgets will be the new 2020 MVEBs. The 2020 MVEBs are defined in section VII of this rulemaking.

IX. Proposed Actions on the Redesignation Request and the Maintenance Plan SIP Revision Including Proposed Approval of the 2020 MVEBs

EPA is now proposing to make the determination that the Macon Area has met the criteria for redesignation from nonattainment to attainment for the 8-hour ozone NAAQS. Further, EPA is proposing to approve Georgia's redesignation request for the Macon Area. After evaluating Georgia's SIP submittal requesting redesignation, EPA has determined that it meets the redesignation criteria set forth in section 107(d)(3)(E) of the CAA. EPA believes that the redesignation request and monitoring data demonstrate that the Macon Area has attained, and will continue to maintain the 8-hour ozone standard.

EPA is also proposing to approve the June 15, 2007, SIP revision containing Georgia's 8-hour ozone maintenance plan for the Macon Area. The maintenance plan includes regional MVEBs for 2020 for NO_X and VOCs, among other requirements. EPA is proposing to approve the 2020 MVEBs for the Macon Area, because the maintenance plan demonstrates that expected emissions for all other source categories will continue to maintain the 8-hour ozone standard.

Further, as part of today's action, EPA is describing the status of its adequacy determination for the 2020 MVEBs in accordance with 40 CFR 93.118(f)(1). Within 24 months from the effective date of EPA's adequacy finding for the MVEBs, or the publication date for the final rule for this action, the transportation partners will need to demonstrate conformity to these new MVEBs pursuant to 40 CFR 93.104(e) as effectively amended by section 172(c)(2)(E) of the CAA as added by the Safe, Accountable, Flexible, Efficient Transportation Equity Act—A Legacy for Users (SAFETEA–LU), which was signed into law on August 10, 2005.

X. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this proposed action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order

13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001). This proposed action merely proposes to approve state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Redesignation of an area to attainment under section 107(d)(3)(e) of the CAA does not impose any new requirements on small entities. Redesignation is an action that affects the status of a geographical area and does not impose any new regulatory requirements on sources. Accordingly, the Administrator certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule proposes to approve pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

This proposed rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely affects the status of a geographical area, does not impose any new requirements on sources, or allow a state to avoid adopting or implementing other requirements and does not alter the relationship or the distribution of power and responsibilities established in the CAA. This proposed rule also is not subject to Executive Order 13045 ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997); because it is not economically significant and because the Agency does not have reason to believe that the rule concerns an environmental health risk or safety risk that may disproportionately affect children.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission; to use VCS in place of a SIP submission that otherwise satisfies the provisions of the CAA. Redesignation is an action that affects the status of a geographical area but does not impose any new requirements on sources. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This proposed rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

40 CFR Part 81

Environmental protection, Air pollution control, National parks, Wilderness areas.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 25, 2007.

BILLING CODE 6560–50–P

LEGAL SERVICES CORPORATION

45 CFR Part 1626

Restrictions on Legal Assistance to Aliens

AGENCY: Legal Services Corporation.

ACTION: Termination of Rulemaking and Notice of Proposed Rulemaking.

SUMMARY: LSC is terminating a rulemaking it initiated in 2001 to consider broad revisions to its regulation on restrictions on legal assistance. Contemporaneously, LSC is initiating a new rulemaking to consider a proposal of limited scope to amend section 1626.10(a) of this regulation to permit LSC grant recipients to provide legal assistance to otherwise financially eligible citizens of the Federated States of Micronesia, the Republic of the Marshall Islands and the Republic of Palau legally residing in the United States.

DATES: The open rulemaking published on September 10, 2001 (66 FR 46977) is terminated as of August 2, 2007. Comments on this NPRM are due on September 4, 2007.

ADDRESSES: Written comments on the NPRM may be submitted by mail, fax or e-mail to Mattie Cohan, Senior Assistant General Counsel, Office of Legal Affairs, Legal Services Corporation, 3333 K Street, NW., Washington, DC 20007; 202–295–1624 (ph); 202–337–6519 (fax); *mcohan@lsc.gov.*

FOR FURTHER INFORMATION CONTACT: Mattie Cohan, Senior Assistant General Counsel, 202–295–1624 (ph); *mcohan@lsc.gov.*

SUPPLEMENTARY INFORMATION:

Termination of Open Rulemaking

The LSC Board of Directors identified 45 CFR Part 1626 as an appropriate subject for rulemaking on January 27, 2001. On June 30, 2001, the LSC President and the Chair of the Operations and Regulations Committee made a determination to proceed with the initiation of a Negotiated Rulemaking to consider amendments to Part 1626. In accordance with the LSC Rulemaking Protocol, LSC published a notice in the **Federal Register** formally soliciting suggestions for appointment to the Negotiated Rulemaking Working Group from the regulated community, its clients, advocates, the organized bar and other interested parties (66 FR 46977, September 10, 2001). After receiving submissions of interest, a Working Group was appointed. Each organization which timely requested to participate was appointed to the Working Group. The Working Group met three times without coming to consensus on several issues. Subsequently, work on the 2001 rulemaking was deferred in 2003 by the previous Board of Directors pending the appointment and confirmation of the present Board. No further action on the rulemaking has been taken since that time.

During the past several years as LSC has considered its rulemaking agenda, neither Management nor recipients have suggested reinitiating work on this broad rulemaking. As such, LSC is of the opinion that consideration of broad revision of Part 1626 is no longer necessary or appropriate. Accordingly, with the publication of this notice LSC is terminating the open rulemaking.

New Notice of Proposed Rulemaking

LSC-funded legal services providers are permitted to provide legal assistance only to citizens of the United States and aliens upon whom eligibility has been expressly conferred by statute. LSC regulations at 45 CFR Part 1626 implement the various existing statutory authorities and set forth the eligibility standards based on citizenship and eligible alien status. Since 1996 Part 1626 has limited the eligibility of citizens of the Republic of the Marshall Islands (''RMI'') and the Federated States of Micronesia (''FSM'') and the Republic of Palau to services provided in those respective nations (unless the applicant is otherwise eligible under Part 1626). In connection with LSC's development of a 2007 Rulemaking Agenda, the Legal Aid Society of Hawai'i (LASH) and Legal Aid of Arkansas (LAA) have both requested that LSC engage in rulemaking to change the section 1626.10(a) to provide for the eligibility of citizens of RMI, FSM and Palau legally residing in the United States for legal assistance from LSC-funded programs.

LSC agrees that there is sufficient reason and authority for LSC to amend its regulation in this regard. To that end, the Operations and Regulations Committee of the LSC Board of Directors considered a Draft NPRM and the Board of Directors approved this NPRM for publication and comment at their respective meetings on July 28, 2007.

History of FAS Eligibility for Legal Assistance From LSC-Funded Programs

At the time of the creation of LSC in 1974, the countries that are now the sovereign nations of the Republic of the Marshall Islands (''RMI''), the Federated States of Micronesia (''FSM''), and the Republic of Palau were possessions of the United States, known as the Trust Territories of the Pacific Islands (''the Trust Territories''). The LSC Act defined the Trust Territories as a ''State'' for the purposes of the Act. The Act thus conferred eligibility for LSC-funded legal services to Trust Territory residents to the same extent provided to residents of any other State of the United States. Section 1002(8) of the LSC Act, 42 U.S.C. 2996a(8).

In 1983, Congress placed the first statutory restrictions on representation of aliens on LSC recipients in LSC's appropriations bill for that year, Public Law 97–377. That law provided that none of the funds appropriated could be expended to provide legal assistance for or on behalf of any alien unless the alien was a resident of the U.S. and otherwise met certain statutorily specified criteria. On its face, this language would have appeared to imply that all non-U.S. citizens, including residents of RMI, FSM and Palau would be subject to these restrictions, notwithstanding their eligibility under the LSC Act. To deal with this problem, LSC included a ''special eligibility section'' (§ 1626.10) in the implementing regulations on representation of aliens, 45 CFR part 1626, to exempt residents of the Trust Territory from the alien restrictions imposed by Congress.

In 1986 the trust governing the relationship between the U.S. and the Trust Territories was terminated. At that time the former Trust Territories were recognized as independent nations and a new relationship with RMI, FSM and Palau was created by the signing of two Compacts of Free Association, one with RMI and FSM and the other with Palau. The Compact with RMI and FSM contemplates the provision of certain services and programs of the U.S. to those nations. Specifically, section 224 of the Compact of Free Association with RMI and FSM provides that:

> The Government of the United States and the Government of the Marshall Islands or the Federated States of Micronesia may agree from time to time to the extension of additional United States grant assistance, services and programs as provided by the laws of the United States, to the Marshall Islands or the Federated States of Micronesia, respectively.

The Compact of Free Association Act of 1985 (''CFA Act'') (Pub. L. 99–239, codified at 48 U.S.C. 1901 *et seq.*), which implemented the Compact, provides express authority for the provision of LSC-funded legal services. Specifically, section 105(h)(1)(A) of the CFA Act provides that:

> * * * pursuant to section 224 of the Compact the programs and services of the [Legal Services Corporation] shall be made available to the Federated States of Micronesia and to the Marshall Islands.

The implementing act for the Compact with Palau makes section 105 of the CFA Act applicable to the Republic of Palau. 48 U.S.C. 1932(b).[1]

After the signing of the respective Compacts and the corresponding implementing statutes, the FAS remained covered by the special eligibility section of Part 1626, notwithstanding their change in legal status vis-à-vis their relationship with the United States. In 1989 that section of the regulation was amended to make the section more precise in light of the termination of the trust. Under this version of the rule, the special eligibility section provided:

> (a) *Micronesia.* The alien restriction stated in the appropriations acts is not applicable to the legal services program in the following Pacific island entities:
> (1) Commonwealth of the Northern Marianas;
> (2) Republic of Palau;
> (3) Federated States of Micronesia;
> (4) Republic of the Marshall Islands
> All citizens of these entities are eligible to receive legal assistance, provided they are otherwise eligible under the [LSC] Act.

54 FR 18812 (April 29, 1989). The preamble to the Final Rule adopting this language explained that this change was intended to ''restate[] congressional intent that residents of these political entities be eligible to be clients of a legal services program.'' Id. at 18110. The special eligibility section addressing the FAS remained as set forth above until 1996.

As a result of new statutory restrictions contained in the LSC FY 1996 appropriations legislation (Pub. L. 104–134), additional changes to Part 1626 were made in 1996. Although the statutory amendments did not address this issue, § 1626.10(a) was again revised, this time in response to comments from the LSC Office of Inspector General (OIG). As explained in the preamble to the 1996 Final Rule:

> The OIG suggested that both the prior rule and the interim rule dealt with the question of special eligibility incorrectly and urged that the final rule refer only to the legal services programs serving people who were citizens of those jurisdictions. The effect of this change would be to make financially eligible citizens of the Federated States of Micronesia, the Republic of the Marshall Islands and the Republic of Palau only eligible for legal services from the recipients serving those areas * * *. They would not be eligible for services from any other recipients unless they also came within one of the categories of eligible aliens listed in section 1626.5 * * *.

62 FR 19413 (April 21, 1997). The OIG's comments were based upon its interpretation of the CFA Act that the language of the CFA Act provides authority for the provision of services within those nations, but does not expressly confer individual eligibility for services to the citizens of those nations without reference to where the service is to be provided. The Board considered the matter, agreed with the OIG analysis, and revised § 1626.10(a) as follows.

> This part [1626] is not applicable to recipients providing services in the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated

[1] RMI, FSM and Palau are collectively referred to as the ''Freely Associated States'' or ''FAS.'' This designation will be used throughout the remainder of the supplementary information section.

States of Micronesia, or the Republic of the Marshall Islands.

62 FR 19413 (April 21, 1997); 45 CFR 1626.10(a). Thus, since 1996 otherwise financially eligible residents of the FAS seeking assistance from legal services providers in the United States may only receive such assistance if they meet the alien eligibility requirements of § 1626.5.

Alternative Interpretation of the Compact Act

During the last session of Congress, legislation was passed in the Senate by unanimous consent on September 29, 2006, which would have definitively clarified the issue by clearly stating that LSC services were to be available to the citizens of the FAS. Specifically, section 5 of S.1830, provided:

SEC. 5. AVAILABILITY OF LEGAL SERVICES.

Section 105(f)(1)(C) of the Compact of Free Association Amendments Act of 2003 (48 U.S.C. 1921d(f)(1)(C)) is amended by inserting before the period at the end the following: '', which shall also continue to be available to the citizens of the Federated States of Micronesia, the Republic of Palau, and the Republic of the Marshall Islands who legally reside in the United States (including territories and possessions)''.

The report accompanying S.1830 explained that:

Section 5 clarifies that section 105(f)(1)(C) of the CFAAA is intended to continue eligibility for the programs and services of the Legal Services Corporation for FSM and RMI migrants who legally reside in the United States. Legal Services Corporation eligibility was extended by the first Compact Act in 1986 (Pub. L. 99–239), but in 1996, without any further action by Congress, the Legal Services Corporation, by rule, terminated the eligibility of FSM and RMI migrants. Section 104(e) of the original Compact Act, and of the CFAAA, state that it is 'not the intent of Congress to cause any adverse consequences for an affected area,' which are defined as Hawaii, Guam, the CNMI, and American Samoa. The Legal Services Corporation is one of those programs which had assisted local communities, in both the 'affected areas' and in the mainland U.S., in responding to the impacts and needs of FSM and RMI citizens who were residing in U.S. communities. This section would restore eligibility as it existed from 1986 to 1996.

Similar legislation was introduced in the House, but was not acted on during the course of the 109th Congress. Accordingly, there was no final legislation enacted into law on this subject in the last Congress. More recently, on January 12, 2007, S. 283, the Compact of Free Association Amendments Act was introduced in the Senate. On February 15, 2007, the bill was reported out of the Senate Committee on Energy and Natural Resources, accompanied by a written report. The operative language of the bill and report dealing with the availability of legal assistance from LSC recipients to citizens of the FAS, regardless of where they are obtaining those services, is the same as in last year's Senate bill (quoted above). A similar bill, H.R. 2705, has also been introduced in the House. As of the publication of this notice, both of the bills are still pending.

In addition, LSC received a letter dated June 1, 2007, from David Cohen, Deputy Assistant Secretary for Insular Affairs at the Department of Interior. In his letter, Deputy Assistant Secretary Cohen stated:

I can assure you that it is consistent with Federal policy under the Compacts and the [implementing] public laws * * * to allow FAS citizens lawfully resident in the United States to receive LSC services. * * * We are not aware of any intention to permit the extension of LSC benefits to FAS citizens in the FAS but to prevent the extension of those benefits to FAS citizens during their lawful residence in the United States.

Subsequently, representatives of LSC met with the Deputy Assistant Secretary, several members of his staff and an attorney from the Department of State. They reiterated their understanding of the Compact and the CFA Act. In particular, they explained that the United States and the FAS countries negotiated the Compacts as essentially an aid package and that the Departments of Interior and State, as well as the FAS nations themselves, consider the extension of benefits to the FAS to include the extension of benefits to FAS citizens, regardless of where those citizens are lawfully residing (in the FAS or the United States). As an example, they noted that the CFA Act extends the Pell Grant (educational grants) program to the FAS and that the grants are provided to FAS citizens regardless of whether they are attending institutions of higher education in the FAS or in the United States. Similarly, FAS citizens are eligible for Job Corps services being provided in the United States.

In light of the above, it would appear that LSC's interpretation of the CFA Act, while permissible, was not the only permissible reading and perhaps, in hindsight, not the best available reading. Moreover, LSC appears to be within its legal authority under the law to amend § 1626.10 to permit FAS citizens to receive legal assistance anywhere LSC services are provided without requiring independent eligibility under Part 1626.

Need for Amendment of the Regulation—FAS Citizens in the United States

When LSC was created in 1974, there were probably no more than a few thousand Micronesians living in Guam and Hawai'i, and a scattering in the continental United States. Even when the first Compact was negotiated in 1986, there were probably still less than ten thousand Micronesians living within U.S. territory, still mostly in Guam and Honolulu. However, when the Compact was renegotiated and extended in 2002 it was then known that the migration pattern was showing greatly increased numbers in the continental United States. According to the Embassy of FSM there are, in addition to the traditionally high populations of Micronesians in Guam and Hawai'i, at least 30,000 to 40,000 FSM citizens living or going to school in the continental U.S. Further, LAA has noted in its request to LSC for rulemaking on this issue that there are also 6,000 to 10,000 Marshallese living in Northwest Arkansas alone.

Thus, while there was relatively little demand for legal services among FAS citizens in the United States in 1996, the increased migration of FAS citizens to the United States has significantly increased the potential demand for legal services among members of that community. The inability of financially eligible FAS citizens in the U.S. to access legal services from LSC programs assistance is a growing problem for the U.S. FAS community. LASH, for example, has noted that that FAS citizens working in Hawai'i are more likely to be victims of unscrupulous employers because they believe that such citizens have little recourse to legal services to protect their employment rights.

Proposed Amendment of Section 1626.10(a)

LSC is proposing to amend section 1626.10(a) to redesignate the existing language in paragraph (a) as paragraph (a)(1) and to add a new paragraph (a)(2) to read as follows: ''All citizens of the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands residing in the United States are eligible to receive legal assistance provided that are they otherwise eligible under the Act.'' This language makes explicit that FAS citizens are eligible under Part 1626 for legal assistance and is consistent with the other eligibility provision in section 1626.10 addressing the eligibility of Canadian-born American Indians at least 50% Indians by blood, members of

the Texas Band of Kickapoo and foreign nationals seeing assistance pursuant to the Hague Convention. 45 CFR 1626.10(b); 1626.10(c); and 1626.10(d). The ''otherwise eligible'' language is meant to refer to financial eligibility (for the provision of LSC-funded legal assistance'') and to the permissibility of the legal assistance provided under applicable law and regulation.

List of Subjects in 45 CFR Part 1626

Aliens, Grant programs—law, Legal services, Migrant labor, Reporting and recordkeeping requirements.

For reasons set forth above, and under the authority of 42 U.S.C. 2996g(e), LSC proposes to amend 45 CFR Part 1626 as follows:

PART 1626—Restrictions on Legal Assistance to Aliens

1. The authority citation for part 1626 continues to read as follows:

Authority: Pub. L. 104–208, 110 Stat 1321; Pub L. 104–134, 110 Stat. 3009.

2. Amend § 1626.10 by revising paragraph (a) to read as follows:

§ 1626.10 Special eligibility questions.

(a)(1) This part is not applicable to recipients providing services in the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Federated States of Micronesia, or the Republic of the Marshall Islands.

(2) All citizens of the Republic of Palau, the Federated States of Micronesia, and the Republic of the Marshall Islands residing in the United States are eligible to receive legal assistance provided that are they otherwise eligible under the Act.

* * * * *

Victor M. Fortuno,

Vice President and General Counsel.

48 CFR Parts 216, 232, and 252

RIN 0750–AF71

Defense Federal Acquisition Regulation Supplement; Payments on Cost-Reimbursement Contracts for Services (DFARS Case 2006–D066)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Proposed rule with request for comments.

SUMMARY: DoD is proposing to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to provide for interim payments under cost-reimbursement contracts for services within 30 days, instead of the current DoD policy of making payments within 14 days. The change will not apply to small business concerns.

DATES: Comments on the proposed rule should be submitted in writing to the address shown below on or before October 1, 2007, to be considered in the formation of the final rule.

ADDRESSES: You may submit comments, identified by DFARS Case 2006–D066, using any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *E-mail: dfars@osd.mil.* Include DFARS Case 2006–D066 in the subject line of the message.
- *Fax:* (703) 602–7887.
- *Mail:* Defense Acquisition Regulations System, Attn: Mr. John McPherson, OUSD(AT&L)DPAP(CPF), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062.
- *Hand Delivery/Courier:* Defense Acquisition Regulations System, Crystal Square 4, Suite 200A, 241 18th Street, Arlington, VA 22202–3402.

Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Mr. John McPherson, (703) 602–0296.

SUPPLEMENTARY INFORMATION:

A. Background

DFARS 232.906 presently provides for interim payments on cost-reimbursement contracts for services within 14 days after receipt of a proper payment request. The proposed rule would revise this policy to provide for payment to other than small business concerns within 30 days. The proposed change will allow DoD to better cash manage payments without having a significant impact on small business concerns. The proposed change is consistent with the policies of other Government agencies, which do not pay in 14 days. These payments are subject to the Prompt Payment Act.

This proposed rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD does not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the proposed rule makes no change to payment procedures for small business concerns. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subparts in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2006–D066.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply, because the proposed rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 216, 232, and 252

Government procurement.

Michele P. Peterson,

Editor, Defense Acquisition Regulations System.

Therefore, DoD proposes to amend 48 CFR Parts 216, 232, and 252 as follows:

1. The authority citation for 48 CFR Parts 216, 232, and 252 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

PART 216—TYPES OF CONTRACTS

2. Section 216.307 is added to read as follows:

216.307 Contract clauses.

(a)(i) The following apply to interim payments on cost-reimbursement contracts for services:

(A) For contracts with other than small business concerns, insert the standard due date of the ''30th'' day in paragraph (a)(3) of the clause at FAR 52.216–7.

(B) For contracts with small business concerns, insert the ''14th'' day in paragraph (a)(3) of the clause at FAR 52.216–7.

(ii) For interim payments on cost-reimbursement contracts for other than services, insert the ''14th'' day in paragraph (a)(3) of the clause at FAR 52.216–7.

PART 232—CONTRACT FINANCING

3. Section 232.906 is revised to read as follows:

232.906 Making payments.

(a)(i) The restrictions of FAR 32.906 prohibiting early payment do not apply to interim payments made to small business concerns. However, contractors shall not be entitled to interest penalties if the Government fails to make early payment.

(ii) It is DoD policy to make payments within 14 days for cost-reimbursement contracts for services with small business concerns.

4. Section 232.908 is added to read as follows:

232.908 Contract clauses.

(c)(3) For cost-reimbursement contracts for services with small business concerns, use the clause at 252.232–7XXX, Payments on Cost-Reimbursement Contracts for Services with Small Business Concerns, instead of Alternate I of the clause at FAR 52.232–25.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

5. Section 252.232–7XXX is added to read as follows:

252.232–7XXX Payments on Cost-Reimbursement Contracts for Services with Small Business Concerns.

As prescribed in 232.908(c)(3), use the following clause:

PAYMENTS ON COST-REIMBURSEMENT CONTRACTS FOR SERVICES WITH SMALL BUSINESS CONCERNS (XXX 2007)

(a) Paragraphs (a)(2), (a)(3), (a)(4)(ii), (a)(4)(iii), and (a)(5)(i) of the Allowable Cost and Payment clause (FAR 52.216–7) do not apply to this contract.

(b) Although accelerated payments may be made in 14 days in accordance with section 232.906(a)(ii) of the Defense Federal Acquisition Regulation Supplement, for purposes of computing late payment interest penalties that may apply, the due date for payment is the 30th day after the designated billing office receives a proper payment request.

(c) The Contractor shall submit requests for interim payments in accordance with paragraph (a) of FAR 52.216–7, Allowable Cost and Payment. If the payment request does not comply with contract requirements, it will be returned within 7 days after the date the designated billing office received the request.

(End of clause)

RIN 0750–AF73

Defense Federal Acquisition Regulation Supplement; Item Identification and Valuation Clause Update (DFARS Case 2007–D007)

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Proposed rule with request for comments.

SUMMARY: DoD is proposing to amend the Defense Federal Acquisition Regulation Supplement (DFARS) to update and clarify requirements for unique identification and valuation of items delivered under DoD contracts. The proposed rule revises the applicable contract clause to reflect the current requirements.

DATES: Comments on the proposed rule should be submitted in writing to the address shown below on or before October 1, 2007, to be considered in the formation of the final rule.

ADDRESSES: You may submit comments, identified by DFARS Case 2007–D007, using any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

E-mail: dfars@osd.mil. Include DFARS Case 2007–D007 in the subject line of the message.

Fax: (703) 602–7887.

Mail: Defense Acquisition Regulations System, Attn: Mr. Gary Delaney, OUSD(AT&L)DPAP(DARS), IMD 3C132, 3062 Defense Pentagon, Washington, DC 20301–3062.

Hand Delivery/Courier: Defense Acquisition Regulations System, Crystal Square 4, Suite 200A, 241 18th Street, Arlington, VA 22202–3402.

Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Mr. Gary Delaney, (703) 602–8384.

SUPPLEMENTARY INFORMATION:

A. Background

The contract clause at DFARS 252.211–7003, Item Identification and Valuation, requires unique identification for all delivered items for which the Government's unit acquisition cost is $5,000 or more, and for other items designated by the Government. In addition, the clause requires identification of the Government's unit acquisition cost for all delivered items, and provides instructions to contractors regarding the identification and valuation processes.

This proposed rule revises the clause at DFARS 252.211–7003 to update and clarify instructions for the identification and valuation processes. The changes include: Updating of references to standards and other documents; clarification of the definition of unique item identifier; specifically addressing the DoD recognized unique identification equivalent, where applicable; clarification of data submission requirements for end items and embedded items; and clarification of requirements for inclusion of the clause in subcontracts.

This proposed rule was not subject to Office of Management and Budget review under Executive Order 12866, dated September 30, 1993.

B. Regulatory Flexibility Act

DoD does not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the proposed rule does not significantly change existing requirements relating to the identification and valuation of items delivered under DoD contracts. Therefore, DoD has not performed an initial regulatory flexibility analysis. DoD invites comments from small businesses and other interested parties. DoD also will consider comments from small entities concerning the affected DFARS subpart in accordance with 5 U.S.C. 610. Such comments should be submitted separately and should cite DFARS Case 2007–D007.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply, because the proposed rule does not impose any information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 252

Government procurement.

Michele P. Peterson,

Editor, Defense Acquisition Regulations System.

Therefore, DoD proposes to amend 48 CFR Part 252 as follows:

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

1. The authority citation for 48 CFR Part 252 continues to read as follows:

Authority: 41 U.S.C. 421 and 48 CFR Chapter 1.

2. Section 252.211–7003 is amended as follows:

a. By revising the clause date;

b. In paragraph (a), by revising the definitions of ''Issuing agency'' and ''Unique item identifier''; and

c. By revising paragraphs (c) through (g) to read as follows:

252.211–7003 Item Identification and Valuation.

* * * * *

Item Identification and Valuation (XXX 2007)

(a) * * *

Issuing agency means an organization responsible for assigning a non-repeatable identifier to an enterprise (i.e., Dun & Bradstreet's Data Universal Numbering System (DUNS) Number, GS1 Company Prefix, or Defense Logistics Information System (DLIS) Commercial and Government Entity (CAGE) Code).

* * * * *

Unique item identifier means a set of data elements marked on items that is globally unique and unambiguous. The term includes a concatenated unique item identifier or a DoD recognized unique identification equivalent.

* * * * *

(c) *Unique item identifier.*

(1) The Contractor shall provide a unique item identifier for—(i) All delivered items for which the Government's unit acquisition cost is $5,000 or more;

(ii) The following items for which the Government's unit acquisition cost is less than $5,000:

Contract line, subline, or exhibit line item number	Item description

(iii) Subassemblies, components, and parts embedded within delivered items as specified in Attachment Number _.

(2) The unique item identifier and the component data elements of the DoD unique item identification shall not change over the life of the item.

(3) *Data syntax and semantics of unique item identifiers.* The Contractor shall ensure that—

(i) The encoded data elements (except issuing agency code) of the unique item identifier are marked on the item using one of the following three types of data qualifiers, as determined by the Contractor:

(A) Application Identifiers (AIs) (Format Indicator 05 of ISO/IEC International Standard 15434), in accordance with ISO/IEC International Standard 15418, Information Technology—EAN/UCC Application Identifiers and Fact Data Identifiers and Maintenance and ANSI MH 10.8.2 Data Identifier and Application Identifier Standard.

(B) Data Identifiers (DIs) (Format Indicator 06 of ISO/IEC International Standard 15434), in accordance with ISO/IEC International Standard 15418, Information Technology—EAN/UCC Application Identifiers and Fact Data Identifiers and Maintenance and ANSI MH 10.8.2 Data Identifier and Application Identifier Standard.

(C) Text Element Identifiers (TEIs) (Format Indicator 12 of ISO/IEC International Standard 15434), in accordance with the Air Transport Association Common Support Data Dictionary; and

(ii) The encoded data elements of the unique item identifier conform to the transfer structure, syntax, and coding of messages and data formats specified for Format Indicators 05, 06, and 12 in ISO/IEC International Standard 15434, Information Technology—Transfer Syntax for High Capacity Automatic Data Capture Media.

(4) *Unique item identifier.*

(i) The Contractor shall—(A) Determine whether to—(1) Serialize within the enterprise identifier;

(2) Serialize within the part, lot, or batch number; or

(3) Use a DoD recognized unique identification equivalent; and

(B) Place the data elements of the unique item identifier (enterprise identifier; serial number; DoD recognized unique identification equivalent; and for serialization within the part, lot, or batch number only: original part, lot, or batch number) on items requiring marking by paragraph (c)(1) of this clause, based on the criteria provided in the version of MIL–STD–130, Identification Marking of U.S. Military Property, cited in the contract Schedule.

(ii) The issuing agency code—

(A) Shall not be placed on the item; and

(B) Shall be derived from the data qualifier for the enterprise identifier.

(d) For each item that requires unique item identification under paragraph (c)(1)(i) or (ii) of this clause, in addition to the information provided as part of the Material Inspection and Receiving Report specified elsewhere in this contract, the Contractor shall report at the time of delivery, either as part of, or associated with, the Material Inspection and Receiving Report, the following information:

(1) Unique item identifier.

(2) Unique item identifier type.

(3) Issuing agency code (if concatenated unique item identifier is used).

(4) Enterprise identifier (if concatenated unique item identifier is used).

(5) Original part number (if there is serialization within the original part number).

(6) Lot or batch number (if there is serialization within the lot or batch number).

(7) Current part number (optional and only if not the same as the original part number).

(8) Current part number effective date (optional and only if current part number is used).

(9) Serial number (if concatenated unique item identifier is used).

(10) Government's unit acquisition cost.

(11) Unit of measure.

(e) For embedded subassemblies, components, and parts that require DoD unique item identification under paragraph (c)(1)(iii) of this clause, the Contractor shall report as part of, or

associated with, the Material Inspection and Receiving Report specified elsewhere in this contract, the following information:

(1) Unique item identifier of the parent item under paragraph (c)(1) of this clause that contains the embedded subassembly, component, or part.

(2) Unique item identifier of the embedded subassembly, component, or part.

(3) Unique item identifier type.**

(4) Issuing agency code (if concatenated unique item identifier is used).**

(5) Enterprise identifier (if concatenated unique item identifier is used).**

(6) Original part number (if there is serialization within the original part number).**

(7) Lot or batch number (if there is serialization within the lot or batch number).**

(8) Current part number (optional and only if not the same as the original part number).**

(9) Current part number effective date (optional and only if current part number is used).**

(10) Serial number (if concatenated unique item identifier is used).**

(11) Description.

** Once per item.

(f) The Contractor shall submit the information required by paragraphs (d) and (e) of this clause in accordance with the data submission procedures at *http://www.acq.osd.mil/dpap/UID/DataSubmission.htm.*

(g) *Subcontracts.* If the Contractor acquires by subcontract, any item(s) for which unique item identification is required in accordance with paragraph (c)(1) of this clause, the Contractor shall include this clause, including this paragraph (g), in the applicable subcontract(s).

* * * * *

[I.D. 013006I]

RIN 0648–AU93

Fisheries of the Exclusive Economic Zone Off Alaska; Groundfish, Crab, Salmon, and Scallop Fisheries of the Bering Sea and Aleutian Islands Management Area and Gulf of Alaska, Essential Fish Habitat Rule Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of reopening of a comment period.

SUMMARY: On June 19, 2007, NMFS published a proposed rule in the **Federal Register** to correct certain provisions of a June 28, 2006, essential fish habitat (EFH) rule for Alaska fisheries. The comment period deadline for written comments for the proposed rule was June 19, 2007. NMFS is reopening the comment period on this proposed rule because the E-mail account listed in the proposed rule for the submission of comments was in error and did not accept comments as intended. The proposed rule would clarify that portions of EFH management areas in the vicinity of the Aleutian Islands are located in State of Alaska waters. The proposed action also would apply EFH vessel monitoring system and closure requirements to federally permitted vessels operating in State of Alaska waters adjacent to the Gulf of Alaska (GOA) and Aleutian Islands subarea. This action is necessary to ensure federally permitted vessels operating in State of Alaska waters comply with EFH protection measures.

DATES: Written comments must be received by September 4, 2007.

ADDRESSES: Send comments to Sue Salveson, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region, NMFS, Attn: Records Officer. Comments may be submitted by:

- Mail: P.O. Box 21668, Juneau, AK 99802;
- Hand delivery: 709 West 9th Street, Room 420A, Juneau, AK;
- Fax: 907–586–7557;
- E-mail: *VMS-PR–0648–AU93@noaa.gov*. Include in the subject line the following document identifier: ''VMS PR.'' E-mail comments, with or without attachments, are limited to 5 megabytes; or
- Webform at the Federal eRulemaking Portal: *http://www.regulations.gov*. Follow the instructions at that site for submitting comments.

FOR FURTHER INFORMATION CONTACT: Melanie Brown, 907–586–7228 or e-mail at *melanie.brown@noaa.gov*.

SUPPLEMENTARY INFORMATION: The proposed rule was published in the **Federal Register** on June 19, 2007 (72 FR 33732). Additional information on the proposed management measures are described in the proposed rule.

Dated: July 30, 2007.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

July 30, 2007.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments regarding (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal and Plant Health Inspection Service,

Title: Blood and Tissue Collection at Slaughtering Establishments

OMB Control Number: 0579–0212

Summary of Collection: Title 21, U.S.C. 117, Animal Industry Act of 1884, authorizes the Secretary to prevent, control and eliminate domestic diseases such as brucellosis and chronic wasting disease, as well as to take action to prevent and to manage exotic diseases such as foot-and-mouth disease, rinderpest, and other foreign animal diseases. Regulations in 9 CFR, subchapter C, part 71, provide for the collection of blood and tissue samples from livestock (horses, cattle, bison, captive cervids, sheep and goats, swine, and other farmed animals) and poultry at slaughter. Disease surveillance plays an important role in the APHIS mission of protecting the health of the U.S. livestock and poultry population, and testing animals for disease is an important surveillance tool. The Animal and Plant Health Inspection Service (APHIS) will collect information using VS form 10–4 and 10–4A, Specimen Submission Form and Supplemental Sheet and VS form 10–5, Facility Inspection Report.

Need and Use of the Information: APHIS will collect information to identify specimens (blood and tissue) submitted for laboratory analysis and to identify the individual animal from which the specimen was taken as well as the animal's herd or flock; the type of specimen submitted, and the purpose for submitting the specimen. Without the information contained on the form, personnel at the National Veterinary Services Laboratories or other Federal laboratories would have no way of identifying or processing the specimens being sent to them for analysis.

Description of Respondents: Business or other for-profit.

Number of Respondents: 155.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 4,209.

Ruth Brown,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2007–0083]

Notice of Request for Extension of Approval of an Information Collection; Virus-Serum-Toxin Act and Regulations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the Virus-Serum-Toxin Act and regulations.

DATES: We will consider all comments that we receive on or October 1, 2007.

ADDRESSES: You may submit comments by either of the following methods: *Federal eRulemaking Portal:* Go to *http://www.regulations.gov,* select ''Animal and Plant Health Inspection Service'' from the agency drop-down menu, then click ''Submit.'' In the Docket ID column, select APHIS–2007–0083 to submit or view public comments and to view supporting and related materials available electronically. Information on using Regulations.gov, including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's ''User Tips'' link.

Postal Mail/Commercial Delivery: Please send four copies of your comment (an original and three copies) to Docket No. APHIS–2007–0083, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2007–0083.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room

hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov.*

FOR FURTHER INFORMATION CONTACT: For information on the Virus-Serum-Toxin Act and regulations, contact Dr. Albert Morgan, Section Leader, Operational Support Staff, Center for Veterinary Biologics, VS, APHIS, 4700 River Road Unit 148, Riverdale MD 20737, (301) 734–8245. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Virus-Serum-Toxin Act and Regulations.

OMB Number: 0579–0013.

Type of Request: Extension of approval of an information collection.

Abstract: The Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is responsible for ensuring that veterinary biological products are pure, safe, potent, and effective. This program is conducted under the Virus-Serum-Toxin Act (21 U.S.C. 151 *et seq.*) and the regulations in 9 CFR, chapter I, subchapter E. Veterinary biological products are defined as all viruses, serums, toxins (excluding substances that are selectively toxic to microorganisms, e.g., antibiotics), or analogous products at any stage of production, shipment, distribution, or sale, which are intended for use in the treatment of animals and which act primarily through the direct stimulation, supplementation, enhancement, or modulation of the immune system or immune response. The term ''biological products'' includes, but is not limited to, vaccines, bacterins, allergens, antibodies, antitoxins, toxoids, immunostimulants, certain cytokines, antigenic or immunizing components of live organisms, and diagnostic components that are of natural or synthetic origin or that are derived from synthesizing or altering various substances or components of substances, such as microorganisms, genes or genetic sequences, carbohydrates, proteins, antigens, allergens, or antibodies.

To accomplish its mission, APHIS issues licenses to qualified establishments that produce biological products and issues permits to importers of such products. We also enforce requirements concerning production, packaging, labeling, and shipping of these products and set standards for the testing of these products.

Fulfilling this responsibility requires us to use certain information collection activities such as establishment license applications, product license applications, product import permit applications, product and test report forms, and field study summaries. This information helps us to ensure that biological products used in the United States are pure, safe, potent, and effective. If we did not collect this information, we would be unable to carry out this mission.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning these information collection activities. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 4.337559606 hours per response.

Respondents: U.S. importers, exporters, and shippers of veterinary biological products; State veterinary authorities; and operators of establishments that produce or test veterinary biological products or that engage in product research and development.

Estimated Annual Number of Respondents: 500.

Estimated Annual Number of Responses per Respondent: 43.452.

Estimated Annual Number of Responses: 21,726.

Estimated Total Annual Burden on Respondents: 94,237.82 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of August 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2007–0076]

Notice of Request for Extension of Approval of an Information Collection; Importation of Tomatoes From Spain, Chile, France, Morocco, and Western Sahara

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with our regulations governing the importation of tomatoes from Spain, Chile, France, Morocco, and Western Sahara.

DATES: We will consider all comments that we receive on or before October 1, 2007.

ADDRESSES: You may submit comments by either of the following methods:

Federal eRulemaking Portal: Go to *http://www.regulations.gov,* select ''Animal and Plant Health Inspection Service'' from the agency drop-down menu, then click ''Submit.'' In the Docket ID column, select APHIS–2007–0076 to submit or view public comments and to view supporting and related materials available electronically. Information on using *http://www.Regulations.gov,* including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's ''User Tips'' link.

Postal Mail/Commercial Delivery: Please send four copies of your comment (an original and three copies)

to Docket No. APHIS–2007–0076, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2007–0076.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming.

Other Information: Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov.*

FOR FURTHER INFORMATION CONTACT: For information regarding foreign quarantine regulations, contact Ms. Sharon Porsche, Import Specialist, Commodity Import Analysis and Operations, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737–1236; (301) 734–5281. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS* Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Importation of Tomatoes from Spain, Chile, France, Morocco, and Western Sahara.

OMB Number: 0579–0131.

Type of Request: Extension of Approval of an Information Collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests, including fruit flies, into the United States or their dissemination within the United States. Regulations authorized by the PPA concerning the importation of fruits and vegetables into the United States from certain parts of the world are contained in ''Subpart—Fruits and Vegetables'' (7 CFR 319.56 through 319.56–46).

The regulations in 319.56–28 allow tomatoes from Spain, Chile, France, Morocco, and Western Sahara to be imported into the United States subject to certain conditions designed to protect the tomatoes from infestation by the Mediterranean fruit fly (Medfly). Allowing tomatoes to be imported necessitates the use of certain information collection activities, including completing phytosanitary inspection certificates and maintaining records regarding trap placement and Medfly captures. The information we collect serves as the supporting documentation needed to confirm that the tomatoes meet the conditions set forth in the regulations.

We are asking the Office of Management and Budget (OMB) to approve our use of this information collection activity for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 0.6960 hour per response.

Respondents: Importers, foreign officials, shippers.

Estimated Annual Number of Respondents: 34.

Estimated Annual Number of Responses Per Respondent: 72.

Estimated Annual Number of Responses: 2,448.

Estimated Total Annual Burden on Respondents: 1,704 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of July 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

[Docket No. APHIS–2007–0077]

Notice of Request for Extension of Approval of an Information Collection; Black Stem Rust; Identification Requirements for Addition of Rust-Resistant Varieties

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Extension of Approval of an Information Collection; Comment Request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request an extension of approval of an information collection associated with the black stem rust quarantine and regulations.

DATES: We will consider all comments that we receive on or before October 1, 2007.

ADDRESSES: You may submit comments by either of the following methods:

Federal eRulemaking Portal: Go to *http://www.regulations.gov*, select ''Animal and Plant Health Inspection Service'' from the agency drop-down menu, then click ''Submit.'' In the Docket ID column, select APHIS–2007–0077 to submit or view public comments and to view supporting and related materials available electronically. Information on using Regulations.gov, including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's ''User Tips'' link.

Postal Mail/Commercial Delivery: Please send four copies of your comment (an original and three copies) to Docket No. APHIS–2007–0077, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238. Please state that your comment refers to Docket No. APHIS–2007–0077.

Reading Room: You may read any comments that we receive on this docket in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you,

please call (202) 690–2817 before coming.

Other Information: Additional information about APHIS and its programs is available on the Internet at *http://www.aphis.usda.gov.*

FOR FURTHER INFORMATION CONTACT: For information regarding regulations for the black stem rust quarantine and regulations, contact Dr. Vedpal S. Malik, Agriculturist, Emergency and Domestic Programs, PPQ, APHIS, 4700 River Road Unit 134, Riverdale MD 20737; (301) 734–6774. For copies of more detailed information on the information collection, contact Mrs. Celeste Sickles, APHIS' Information Collection Coordinator, at (301) 734–7477.

SUPPLEMENTARY INFORMATION:

Title: Black Stem Rust; Identification Requirements for Addition of Rust-Resistant Varieties.

OMB Number: 0579–0186.

Type of Request: Extension of approval of an information collection.

Abstract: The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to prohibit or restrict the importation, entry, or interstate movement of plants and plant products to prevent the introduction of plant pests into the United States or their dissemination within the United States.

Black stem rust is one of the most destructive plant diseases of small grains that is known to exist in the United States. The disease is caused by a fungus that reduces the quality and yield of infected wheat, oat, barley, and rye crops by robbing host plants of food and water. In addition to infecting small grains, the fungus lives on a variety of alternate host plants that are species of the genera *Berberis*, *Mahoberberis*, and *Mahonia.* The fungus is spread from host to host by wind-borne spores.

The black stem rust quarantine and regulations, contained in 7 CFR 301.38 through 301.38–8 (referred to below as the regulations), quarantine the conterminous 48 States and the District of Columbia and govern the interstate movement of certain plants of the genera *Berberis*, *Mahoberberis*, and *Mahonia*, known as barberry plants. The species of these plants are categorized as either rust-resistant or rust-susceptible. Rust-resistant plants do not pose a risk of spreading black stem rust or of contributing to the development of new races of the rust; rust-susceptible plants do pose such risks.

Persons who request the Animal and Plant Health Inspection Service to add a variety to the list of rust-resistant barberry varieties in the regulations must provide the Agency with a description of the variety, including a written description and color pictures that can be used by State nursery inspectors to clearly identify the variety and distinguish it from other varieties. This requirement helps to ensure that State plant inspectors can clearly determine whether plants moving into or through their States are rust-resistant varieties listed in 7 CFR 301.38–2.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection activity. APHIS needs this outside input to help accomplish the following:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, *e.g.*, permitting electronic submission of responses.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 4 hours per response.

Respondents: Nurseries.

Estimated Annual Number of Respondents : 4.

Estimated Annual Number of Responses per Respondent: 2.

Estimated Annual Number of Responses: 8.

Estimated Total Annual Burden on Respondents: 32 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 27th day of July 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2006–0195]

Monsanto Company; Determination of Nonregulated Status for Soybean Genetically Engineered for Glyphosate Herbicide Tolerance

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of our determination that a soybean line developed by the Monsanto Company, designated as transformation event MON 89788, which has been genetically engineered for tolerance to the herbicide glyphosate, is no longer considered a regulated article under our regulations governing the introduction of certain genetically engineered organisms. Our determination is based on our evaluation of data submitted by the Monsanto Company in its petition for a determination of nonregulated status, our analysis of other scientific data, and comments received from the public in response to a previous notice announcing the availability of the petition for nonregulated status and an environmental assessment. This notice also announces the availability of our written determination and finding of no significant impact.

DATES: *Effective Date:* July 23, 2007.

ADDRESSES: You may read the petition, environmental assessment, determination, finding of no significant impact, the comments we received on our previous notice, and our responses to those comments in our reading room. The reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue, SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690–2817 before coming. To view those documents on the Internet, go to *http://www.regulations.gov,* click on the ''Advanced Search'' tab, and select ''Docket Search.'' In the Docket ID field, enter APHIS–2006–0195, then click ''Submit.'' Clicking on the Docket ID link in the search results page will produce a list of all documents in the docket.

FOR FURTHER INFORMATION CONTACT: Dr. Virgil Meier, Biotechnology Regulatory Services, APHIS, 4700 River Road, Unit 147, Riverdale, MD 20737–1236; (301) 734–3363. To obtain copies of the

petition, environmental assessment, or the finding of no significant impact, contact Ms. Cynthia Eck at (301) 734–0667; *cynthia.a.eck@aphis.usda.gov.* Those documents may also be viewed on the Internet at *http://www.aphis.usda.gov/brs/aphisdocs/06_17801p.pdf* and *http://www.aphis.usda.gov/brs/aphisdocs/06_17801p_ea.pdf*.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 7 CFR part 340, ''Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests,'' regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered organisms and products are considered ''regulated articles.''

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. Paragraphs (b) and (c) of § 340.6 describe the form that a petition for a determination of nonregulated status must take and the information that must be included in the petition.

On June 27, 2006, APHIS received a petition seeking a determination of nonregulated status (APHIS Petition Number 06–178–01p) from Monsanto Company of St. Louis, MO (Monsanto), for soybean (*Glycine max* L.) designated as transformation event MON 89788, which has been genetically engineered for tolerance to the herbicide glyphosate, stating that soybean line MON 89788 does not present a plant pest risk and, therefore, should not be a regulated article under APHIS' regulations in 7 CFR part 340.

As described in the petition, MON 89788 soybean plants have been genetically engineered to express a 5-enolpyruvylshikimate-3-phosphate synthase protein from *Agrobacterium* sp. strain CP4 (CP4 EPSPS), which confers tolerance to the herbicide glyphosate. Expression of the added gene is controlled, in part, by gene sequences derived from *Arabidopsis thaliana* and the plant pathogen figwort mosaic virus. The *Agrobacterium tumefaciens* transformation method was used to transfer the added genetic material into the recipient parental soybean line A3244.

MON 89788 soybean plants have been considered regulated articles under the regulations in 7 CFR part 340 because they contain gene sequences from plant pathogens. MON 89788 soybean plants have been field tested in the United States since 2001 under notifications authorized by APHIS. In the process of reviewing the notifications for field trials of the subject soybean plants, APHIS determined that the vectors and other elements were disarmed and that field trials, which were conducted under conditions of reproductive and physical confinement or isolation, would not present a risk of plant pest introduction or dissemination.

In a notice [1] published in the **Federal Register** on February 5, 2007 (72 FR 5261–5263, Docket No. APHIS–2006–0195), APHIS announced the availability of Monsanto's petition and the associated environmental assessment (EA). APHIS solicited comments on whether the subject soybean would present a plant pest risk for 60 days ending April 6, 2007. APHIS received 23 comments during the comment period, with 12 comments submitted in support of the conclusions drawn in the EA and 11 opposed. APHIS' responses to these comments can be found in an attachment to the finding of no significant impact.

Determination

Based on APHIS' analysis of field, greenhouse, and laboratory data submitted by Monsanto, references provided in the petition, other relevant information described in the EA, and comments provided by the public, APHIS has determined that Monsanto's soybean line, designated as MON 89788, will not pose a plant pest risk for the following reasons: (1) Gene introgression from MON 89788 soybean into its sexually compatible relatives in the United States and its territories is extremely unlikely and consequently the potential impact of introgression is not foreseeable; (2) the subgenus *Glycine max,* on which MON 89788 is based, is not considered to be a weed and does not persist in unmanaged ecosystems; (3) it does not pose a risk to non-target organisms, including beneficial organisms and threatened or endangered species, because the CP4 EPSPS protein is not known to have any toxic properties and has minimal potential to be a food allergen; (4) MON 89788 exhibits no traits that should cause increased weediness, and that its unconfined cultivation should not lead to increased weediness of other sexually compatible relatives (of which there are none in the United States); (5) if MON 89788 were to be grown commercially, the effect on agricultural practices from introducing MON 89788 into the environment should be no different than for the previously deregulated Roundup Ready 40–3–2 soybean line expressing the same CP4 EPSPS protein from *Agrobacterium* sp. Strain CP4, with which APHIS has over 10 years of experience; (6) APHIS does not expect MON 89788 to have any impacts on the development of herbicide resistant weeds or a cumulative impact in combination with other glyphosate tolerant crops; (7) there should be no significant impact from the stacking of herbicide resistant traits; (8) if MON 89788 were to be grown commercially, the potential impact on organic farming should not change from the current situation where close to 90 percent of soybeans produced are Roundup Ready and organic farmers or other farmers who choose not to plant or sell Roundup Ready soybean or other transgenic soybeans will still be able to purchase and grow nontransgenic soybeans and will be able to coexist with biotech soybean producers as they do now; (9) APHIS' analysis of data on agronomic performance, disease and insect susceptibility, and compositional profiles of MON 89788 and its non-genetically engineered counterpart indicates no significant differences between the two that would be expected to cause either a direct or indirect plant pest effect on raw or processed plant commodities from the deregulation of MON 89788; (10) APHIS has reviewed field performance data submitted by the petitioner, and these data indicate that the engineered plant is not different in any fitness characteristics from its parent that might cause MON 89788 to become invasive; and (11) none of the alternatives proposed in the EA are expected to have significant human health or environmental effects.

National Environmental Policy Act

To provide the public with documentation of APHIS' review and analysis of any potential environmental impacts associated with the determination of nonregulated status for MON 89788, an EA was prepared. The EA was prepared in accordance with (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions

[1] To view the notice, the EA, and the comments we received, go to *http://www.regulations.gov/fdmspublic/component/main?main=DocketDetail&d=APHIS–2006–0195.*

of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372). Based on that EA, APHIS has reached a finding of no significant impact with regard to the determination that Monsanto soybean line MON 89788 and lines developed from it are no longer regulated articles under its regulations in 7 CFR part 340. Copies of the EA and finding of no significant impact are available as indicated in the **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** sections of this notice.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2007–0106]

Secretary's Advisory Committee on Foreign Animal and Poultry Diseases; Meeting

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (5 U.S.C. App. II), we are giving notice of a meeting of the Secretary's Advisory Committee on Foreign Animal and Poultry Diseases.

DATES: A session open to the public will be held on August 21, 2007, from 8 a.m. to 5 p.m.

ADDRESSES: The meeting will be held in the Jamie L. Whitten Federal Building, 12th Street and Jefferson Drive, SW., Washington, DC, in room 107A.

FOR FURTHER INFORMATION CONTACT: Dr. Bethany O'Brien, Acting Director Interagency Coordination, National Center for Animal Health Emergency Management, VS, APHIS, 4700 River Road, Unit 41, Riverdale, MD 20737; (301) 734–0825.

SUPPLEMENTARY INFORMATION: The Secretary's Advisory Committee on Foreign Animal and Poultry Diseases (the Committee) advises the Secretary of Agriculture on actions necessary to prevent the introduction of foreign diseases of livestock and poultry into the United States. In addition, the Committee advises the Secretary on contingency planning and on maintaining a state of preparedness to deal with these diseases, if introduced.

The meeting will focus on the U.S. animal health emergency management system and on the foreign animal disease situation worldwide and its relevance to the United States. The session will be open to the public. However, due to time constraints, the public will not be allowed to participate in the Committee's discussions.

You may obtain an agenda for the meeting by contacting Dr. Bethany O'Brien at the address listed under **FOR FURTHER INFORMATION CONTACT**. Written statements on meeting topics may be filed with the Committee before or after the meeting by sending them to the person listed under **FOR FURTHER INFORMATION CONTACT**. Written statements may also be filed at the meeting. Please refer to Docket No. APHIS–2007–0106 when submitting your statements.

Upon entering the Whitten Building, visitors should inform security personnel that they are attending the Advisory Committee meeting on Foreign Animal and Poultry Diseases. Photo identification is required. Visitor badges must be worn at all times while inside the building.

Done in Washington, DC, this 27th day of July 2007.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2007–0027]

National Advisory Committee on Meat and Poultry Inspection

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., the National Advisory Committee on Meat and Poultry Inspection (NACMPI) will hold a public meeting on August 8–9, 2007, to review and discuss the following issues: (1) Data Collection and Analysis at the Food Safety and Inspection Service (FSIS): Standard Operating Procedures, (2) Linking FSIS Activities to its Public Health Goals, and (3) Pilot Project to Explore Mechanisms for Sharing Industry Data with FSIS.

The first issue, Data Collection and Analysis at FSIS: Standard Operating Procedures, will be presented to the entire Committee for discussion during the morning session on August 8, 2007. The other two issues will be presented to the entire Committee in the afternoon session. The committee will then divide into two subcommittees. These subcommittees will meet in the afternoon of August 8, 2007, to discuss the issues Linking FSIS Activities to its Public Health Goals and Pilot Project to Explore Mechanisms for Sharing Industry Data with FSIS. Each subcommittee will provide a report of their comments and recommendations to the full committee on the morning of August 9, 2007.

DATES: The full Committee will hold a public meeting on Wednesday, August 8, and Thursday, August 9, 2007, from 8:30 a.m. to 2 p.m. Subcommittees will hold open meetings on Wednesday, August 8, 2007, from 2 p.m. to 6 p.m.

ADDRESSES: All Committee meetings will take place at George Mason University, 3401 N. Fairfax Drive, Arlington, VA 22201. A meeting agenda is available on the Internet at the NACMPI Web site, *http://www.fsis.usda.gov/about_fsis/nacmpi/index.asp.* The NACMPI meeting agenda, together with information and resource materials on public health-based inspection, is also available on the Internet at, *http://www.fsis.usda.gov/Regulations_&_Policies/Risk_Based_Inspection/index.asp.* FSIS welcomes comments on the topics to be discussed at the NACMPI public meeting. Comments may be submitted by any of the following methods:

Electronic mail: NACMPI@fsis.usda.gov.

Mail, including floppy disks or CD–ROMs: Send to National Advisory Committee on Meat and Poultry Inspection, United States Department of Agriculture, Food Safety and Inspection Service, 14th & Independence Avenue, SW., Mail Drop 405 Aerospace, Washington, DC 20250.

Hand- or courier-delivered items: Deliver to Loraine Cannon at 901 D Street SW., Washington, DC. To deliver these items, the building security guard must first call (202) 690–6520.

Facsimile: Send to Loraine Cannon, (202) 690–6519. All submissions received must include the Agency name and docket number FSIS–2007–0027.

FOR FURTHER INFORMATION CONTACT: Robert Tynan for technical information at (202) 720–3884, or e-mail *robert.tynan@fsis.usda.gov* and Loraine Cannon for meeting information at (202)

690–6647, Fax (202) 690–6519, or e-mail *NACMPI@fsis.usda.gov.* Persons requiring a sign language interpreter or other special accommodations should notify Loraine Cannon at the numbers above or by e-mail.

SUPPLEMENTARY INFORMATION:

Background

The NACMPI provides advice and recommendations to the Secretary of Agriculture pertaining to the Federal and State meat and poultry inspection programs, pursuant to sections 7(c), 24, 205, 301(a)(3), 301(a)(4), and 301(c) of the Federal Meat Inspection Act [21 U.S.C. 607(c), 624, 645, 661(a)(3), 661(a)(4), and 661(c)] and sections 5(a)(3), 5(a)(4), 5(c), 8(b), and 11(e) of the Poultry Products Inspection Act [21 U.S.C. 454(a)(3), 454(a)(4), 454(c), 457(b), and 460(e)].

The Administrator of FSIS is the chairperson of the Committee. Membership of the Committee is drawn from representatives of consumer groups; producers, processors, and marketers from the meat, poultry and egg product industries; State and local government officials; and academia. The current members of the NACMPI are: Ms. Kibbe M. Conti, Northern Plains Nutrition Consulting, Rapid City, SD; Mr. Brian R. Covington, Keystone Foods LLC, West Conshohocken, PA; Dr. Catherine N. Cutter, Pennsylvania State University, University Park, PA; Dr. James S. Dickson, Iowa State University, Ames, IA; Mr. Kevin M. Elfering, Minnesota Department of Agriculture, St. Paul, MN; Mr. Mike W. Finnegan, Montana Meat & Poultry Inspection Bureau, Helena, MT; Ms. Carol Tucker Foreman, Consumer Federation of America, Chevy Chase, MD; Dr. Andrea L. Grondahl, North Dakota Department of Agriculture, Bismarck, ND; Dr. Joseph J. Harris, Southwest Meat Association, Bryan, TX; Dr. Craig W. Henry, Food Products Association, Washington, DC; Ms. Cheryl D. Jones, Morehouse School of Medicine, Atlanta, GA; Mr. Michael E. Kowalcyk, DunnhumbyUSA LLC, Cincinnati, OH; Dr. Shelton E. Murinda, California State Polytechnic University, Pomona, CA; Dr. Edna Negron-Bravo, University of Puerto Rico, Mayaguez, PR; Dr. Michael L. Rybolt, National Turkey Federation, Washington, DC; Mr. Mark P. Schad, Schad Meats, Inc., Cincinnati, OH; and Dr. Stanley A. Stromberg, Oklahoma Department of Agriculture, Food, and Forestry, Oklahoma City, OK.

The Committee has subcommittees to deliberate on specific issues and make recommendations to the whole Committee. The Committee makes recommendations to the Secretary of Agriculture.

All interested parties are welcome to attend the Meetings and to submit written comments and suggestions concerning issues the Committee will review and discuss. The comments and the official transcript of the meeting, when they become available, will be kept in the FSIS Docket Room, U.S. Department of Agriculture, Food Safety and Inspection Service, 300 12th Street, SW., Room 102, Cotton Annex, Washington, DC 20250, and posted on the Agency's NACMPI Web site, *http://www.fsis.usda.gov/about_fsis/nacmpi/index.asp.*

Members of the public will be required to register before entering the meeting.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that minorities, women, and persons with disabilities are aware of this notice, FSIS will announce it on-line through the FSIS Web page located at *http://www.fsis.usda.gov/regulations/2007 Notices Index/*. FSIS will also make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to constituents and stakeholders. The Update is communicated via Listserv, a free electronic mail subscription service for industry, trade and farm groups, consumer interest groups, allied health professionals, and other individuals who have asked to be included. The Update is available on the FSIS Web page. Through the Listserv and Web page, FSIS is able to provide information to a much broader and more diverse audience. In addition, FSIS offers an e-mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at *http://www.fsis.usda.gov/news and events/email subscription/*. Options range from recalls to export information to regulations, directives and notices. Customers can add or delete subscriptions themselves and have the option to password protect their account.

Done in Washington, DC on July 24, 2007.

Alfred V. Almanza,

Administrator.

BILLING CODE 3410–DM–M

DEPARTMENT OF AGRICULTURE

Forest Service

Colville National Forest; Washington; Republic Ranger Station Excess Residence Sale

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Colville National Forest, USDA Forest Service, will prepare an EIS (environmental impact statement) on a proposal to sell a 0.4-acre parcel of land with a residential building, located on the Republic Ranger District administrative compound, within the City of Republic, Ferry County Washington. The parcel and Building are no longer needed to meet public service of Forest Service mission requirements. The Forest Service Facility Realignment and Enhancement Act of 2005 authorized the Secretary of Agriculture to sell administrative sites that are no longer needed for National Forest System purposes. Project implementation is scheduled for Fiscal Year 2008. This project is not associated with the proposed Secure Rural Schools Land Sale Initiative. The Colville National Forest invites written comments and suggestions on the scope of the analysis. The agency will give notice of the full environmental analysis and decision-making process so interested and affected people may participate and contribute to the final decision.

DATES: Comments concerning the scope of the analysis must be received by August 31, 2007. The draft environmental impact statement is expected in November 2007 and the final environmental impact statement is expected in January 2008.

ADDRESSES: Send written comments to Rick Brazell, Forest Supervisor, Colville National Forest, 765 South Main, Colville, WA 99114 (phone 509–684–7000). Comments may be submitted electronically to *comments-pacificnorthwest-colville@fs.fed.us.* Comments may also be sent by fax to (509) 775–7401. Include your name and mailing address with your comments so documents pertaining to this project may be mailed to you.

FOR FURTHER INFORMATION CONTACT: Ed Shaw, Reality Specialist, Colville

National Forest, 765 South Main, Colville, WA 99114 (phone 509–684–7129), or Jim Parker, EIS Project Leader, Republic Ranger District, 650 East Delaware, Republic WA 99166 (phone 509–775–7462).

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

One of the key findings of the Colville National Forest Facilities Master Plan is that the Colville National Forest maintains more facility space than it needs to perform its mission. The Colville National Forest needs to remove unneeded buildings from the Forest's facility inventory in order to eliminate the cost of maintaining unneeded facilities.

Proposed Action

The proposed action is to sell 0.4 acres of land with a residential building, located on the Republic Ranger District administrative compound, located in Republic, Ferry County, Washington. The property legal description is: A portion of the SW¼NW¼ Section 6, T36N, R33E, WM. The site is located within the city limits of Republic, Washington. The land was acquired by the Forest Service in 1934.

The site has one residential building. The mineral estate would be reserved by the government. Water and sewer are provided by a community system.

This property may be sold directly to an identified purchaser or may be sold under competitive bidding procedures. The method of sale will be determined at a later date. If the property is offered for sale under competitive bidding procedures, an Invitation for Bid will provide specific information, including a minimum bid price, the scheduled starting date for bidding, approximate bid closing date, requirements and instructions for bidding, payment and other closing procedures. An Offer to Sell will be released after all environmental studies and other required analysis ar completed and a final decision to sell the property is made.

Responsible Official

The Responsible Official is Rick Brazell, Forest Supervisor, Colville National Forest, 765 South Main, Colville, WA 99114.

Nature of Decision To Be Made

The Responsible Official will decide whether or not to proceed with sale of Republic Ranger Station residence and property, including any outstanding interests or conditions to be conveyed. The decision and rationale for the decision will be documented in the Record of Decision, which will be subject to Forest Service Appeal Regulations (36 CFR Part 215).

Scoping Process

The scoping process will identify and clarify issues, identify key issues to be analyzed in depth, explore alternatives based on themes derived from key issues recognized during the scoping process, and identify potential environmental effects associated with the proposed action. A No Action alternative will be considered.

Preliminary Issues

Only one key issue was identified in preliminary project assessment: The National Historic Preservation Act of 1966, Revised, requires that Federal agencies evaluate properties for historic significance under Section 106. The residential structure has been found eligible to the NHRP (National Register of Historic Places), with the Washington State Historic Preservation Office concurring on this finding. Conveyance of the property from Federal ownership will be an adverse effect because of NRHP eligibility based on the following criteria: The property may represent a significant contribution to the American history (Criterion A), is associated with the lives of significant persons in our past (Criterion B), displays distinctive characteristics of type or period (Criterion C), or may be likely to yield information important to history (Criterion D). The NRHP eligibility for the structure is based on a national significance of context in association with the Depression-era Civilian Conservation Corps. Eligibility is also based on national and regional significance of context associated with distinctive architectural characteristics. The property also contains a deposit of prehistoric lithic material which would also be eligible for listing on the NRHP; however, the Forest Service intends to conduct a data recovery excavation of the site. Data will be professionally recorded, and artifacts recovered will be curated at an approved curation facility.

Comment Requested

This notice of intent initiates the scoping process which guides the development of the environmental impact statement. The Forest Service is seeking information, comments, and assistance from other agencies, organizations, Indian Tribes, and individuals who may be interested in or affected by the Proposed Action. This input will be used in preparation of the Draft EIS. Your comments are appreciated throughout the analysis process.

Early Notice of Importance of Public Participation in Subsequent Environmental Review: A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register.**

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon* v. *Hodel,* 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the public record on this proposal and will be available for public inspection.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21)

Dated: July 26, 2007.

Rick Brazell,

Forest Supervisor.

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

Glenn/Colusa County Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Glenn/Colusa County Resource Advisory Committee (RAC) will meet in Willows, California. Agenda items covered include: (1) Introductions, (2) Approve Minutes, (3) Public Comment, (4) Project Proposals/Action, (5) General Discussion, (6) Next Agenda.

DATES: The meeting will be held on August 13, 2007, from 1:30 p.m. and end at approximately 4:30 p.m.

ADDRESSES: The meeting will be held at the Mendocino National Forest Supervisor's Office, 825 N. Humboldt Ave., Willows, CA 95988. Individuals who wish to speak or propose agenda items send their names and proposals to Eduardo Olmedo, DFO, 825 N. Humboldt Ave., Willows, CA 95988.

FOR FURTHER INFORMATION CONTACT: Bobbin Gaddini, Committee Coordinator, USDA, Mendocino National Forest, Grindstone Ranger District, P.O. Box 164, Elk Creek, CA 95939. (530) 968–1815; e-mail *ggaddini@fs.fed.us.*

SUPPLEMENTARY INFORMATION: The meeting will be open to the public. Committee discussion is limited to Forest Service staff and Committee members. However, persons who wish to bring matters to the attention of the Committee will file written statements with the Committee staff before or after the meeting. Public input sessions are provided and individuals who made written requests by August 10, 2007 have the opportunity to address the committee at those sessions.

Dated: July 25, 2007.

Eduardo Olmedo,

Designated Federal Official.

Forest Service

Siskiyou Resource Advisory Committee; Notice of Meeting

AGENCY: USDA Forest Service.

ACTION: Notice of Meeting; Siskiyou Resource Advisory Committee (RAC).

SUMMARY: The Siskiyou Resource Advisory Committee will meet on Thursday, August 30, 2007 to recommend Title II projects for fiscal year 2008 under the Secure Rural Schools and Community Self Determination Act of 2000. The meeting will be held at the Chetco Community Public Library, Large Community Meeting Room at 405 Alder Street, Brookings, Oregon. It begins at 10 a.m., ends at 2:30 p.m.; the open public comments begin at 11 a.m. and ends at 11:30 a.m. Written comments may be submitted prior to the meeting and delivered to Designated Federal Official, Scott Conroy at the Rogue River-Siskiyou National Forest, P.O. Box 520, Medford, Oregon 97501.

FOR FURTHER INFORMATION CONTACT: Rogue River-Siskiyou National Forest Public Affairs Officer Patty Burel at telephone: (541) 858-2211, e-mail: *pburel@fs.fed.us*, or USDA Forest Service, P.O. Box 520, 333 West 8th Street, Medford, OR, 97501.

Dated: July 26, 2007.

Cassius M. Cash,

Acting Forest Supervisor, Rogue River-Siskiyou National Forest.

DEPARTMENT OF AGRICULTURE

Forest Service

[FSM 2350]

Continental Divide National Scenic Trail

AGENCY: Forest Service, USDA.

ACTION: Notice of extension of public comment period for Proposed Continental Divide National Scenic Trail (CDNST) Directives.

SUMMARY: The Northern, Rocky Mountain, Southwestern, and Intermountain Regions of the USDA Forest Service are extending the public comment period through October 12, 2007, for the proposed directives for the planning, development, and management of the CDNST. The notice of proposed directives was first published in **Federal Register** Notice Vol. 72, No. 112, on Tuesday, June 12, 2007. After considering comments, the USDA Forest Service proposes to issue a supplemental directive for each Region. The directives would also amend the CDNST Comprehensive Plan of 1985.

Policy direction is needed to clarify the nature and purposes of the CDNST and to align the CDNST planning with USDA Forest Service land management planning processes. The directives would have no effect on the ground until site-specific planning decisions are completed, with additional opportunity for public involvement. Additional information regarding this proposed directive can be found on the Internet at: *http://www.fs.fed.us/cdt.*

DATES: Comments are requested and must be submitted on or before October 12, 2007.

FOR FURTHER INFORMATION CONTACT: Greg Warren, CDNST Administrator, (303) 275–5054.

Written comments concerning this proposal are to be sent to US Forest Service, Attn: CDNST, 740 Simms St, Golden, CO 80401–4720; or via e-mail *cdnst@fs.fed.us.*

All comments, including names and addresses, when provided, will be placed in the record and will be available for public inspection and copying. The public may inspect comments received in the office of the Director of Recreation, Heritage, and Wilderness Resources, USDA Forest Service, Rocky Mountain Regional Office, 740 Simms Street, Golden, CO 80401, on business days between the hours 8:30 a.m. and 4 p.m. Those wishing to inspect comments are encouraged to call ahead at (303) 275–5200 to facilitate entry into the building.

SUPPLEMENTARY INFORMATION:

Background

The USDA Forest Service provides internal direction to field units through its Directives System, consisting of the USDA Forest Service Manuals (FSM) and USDA Forest Service Handbooks (FSH). Directives provide guidance to field units in implementing programs established by statute and regulation. USDA Forest Service directives establish agency policies for delegations of authority, consistent definitions of terms, clear and consistent interpretation of regulatory language, and standard processes.

The USDA Forest Service is requesting comment on policy that promotes the nature and purposes of the CDNST as depicted in the CDNST Study Report and Final Environment Statement. In addition, the directives

recommend land management planning integration and management direction for the CDNST, and amends the CDNST Comprehensive Plan of 1985.

The Continental Divide National Scenic Trail is administered by the Secretary of Agriculture in consultation with the Secretary of the Interior. The Regional Forester of the Rocky Mountain Region is the lead Forest Service official coordinating matters concerning the study, planning, and operation of the CDT.

The issuance of timely direction for the planning and management of the CDNST is important due to the extensive nature of ongoing land management planning and project planning assessments along the trail corridor throughout these four Regions of the USDA Forest Service. These assessments need to provide for the integrated management of the CDNST designated area. Additional information regarding this proposed directive can be found on the Internet at *http://www.fs.fed.us/cdt.*

Because the agency plans to propose additional revisions to USDA Forest Service Manual 2300, chapter 50, proposed directives are issued for comments at this time. The current Forest Service Manual can be found on the Internet at: *http://www.fs.fed.us/im/directives/fsm/2300/2350.doc.*

The proposed directives for the four Regions are as follows:

Digest

2353.42(4)(5)—Adds policy direction for the Continental Divide National Scenic Trail.

2353.43(1–11) Planning and Development of the Continental Divide National Scenic Trail (CDNST)—Adds planning and development direction for the CDNST.

2353.44(1–8) Management of the Continental Divide National Scenic Trail (CDNST)—Adds management direction for the CDNST.

2353.4—Administration of National Scenic and National Historic Trails

2353.42—Policy

4. The nature and purposes of the Continental Divide National Scenic Trail are to provide for high quality, scenic, primitive hiking and horseback-riding, non-motorized recreational experiences and to conserve natural, historic, and cultural resources along the Continental Divide.

5. The policy, development, and management direction in this directive amends and supersedes the purpose depiction, management policy, and direction contained in the ''Continental Divide National Scenic Trail Comprehensive Plan'' of 1985.

2353.43—National Scenic and Historic Trail System Development

Planning and Development of the Continental Divide National Scenic Trail (CDNST)

1. Land Management Planning (FSM 1921) is to provide for the nature and purposes of theCDNST congressionally designated area, and address the Comprehensive Plan programmatic requirements of the National Trails System Act, as amended (Title 16, United States Code, section 1244(f) (16 U.S.C. 1244(f)):

a. Identify CDNST desired conditions,

b. Establish CDNST objectives,

c. Establish CDNST management guidelines,

d. Establish monitoring programs to evaluate the condition of the CDNST in the land management planning area, and

e. Where the CDNST travel route is outside the congressionally established wilderness delineate a special area or management area for the trail corridor.

2. For each land management plan area that encompasses the CDNST, a management plan should be completed to address the site-specific requirements of the National Trails System Act, as amended (16 U.S.C. 1244(f)):

a. Identify and display the located CDNST travel route,

b. Identify the significant natural, historical, and cultural resources to be preserved along the CDNST corridor,

c. Identify the carrying capacity for the trail that reflects the nature and purposes of the CDNST,

d. Provide for CDNST development, signing, and maintenance programs,

e. Establish monitoring programs to evaluate the condition of each CDNST segment as related to the nature and purposes of the CDNST, and

f. Where applicable, protect high potential segments until such time that the CDNST is located and delineated as a special area or management area (FMS 2353.43, Planning and Development of the CDNST (1)(e)).

3. The Scenery Management System (FSM 2382) should be followed when developing land management plans. The foreground zone from the CDNST travel route should be a primary consideration in delineating a CDNST special area or management area.

4. Use the Recreation Opportunity Spectrum (ROS) system to delineate, define and integrate CDNST recreational opportunities in land management planning (FSM 2311.1). The CDNST should be located in Primitive and Semi-Primitive Non-Motorized ROS settings where available in the land management planning area, while recognizing that the CDNST will intermittently traverse through more developed areas, and across designated motor vehicle use routes (Subpart B—Designation of Roads, Trails, and Areas for Motor Vehicle Use, part 212 Travel Management, of Title 36 Code of the Code of Federal Regulations (36 CFR part 212 subpart B)), in order to provide for a continuous travel route between Canada and Mexico along the Continental Divide.

5. A new segment of the CDNST travel route should only be constructed if current National Forest System trails cannot be managed, maintained, and reconstructed to provide for the nature and purposes of the CDNST.

6. A CDNST trail segment (16 U.S.C. 1246(c)) is not to be designated for motor vehicle use (36 CFR part 212 subpart B) by the general public, unless such use is consistent with FSM 2353.44, Management of the CDNST (5).

7. A CDNST segment may only be located on a road (16 U.S.C. 1244(5)) where the following conditions are met:

a. The road is primitive in nature and offers a recreation experiences not materially different in quality than that extended by a bona fide hiking and equestrian trail,

b. An affirmative determination has been made that motor vehicle use would not substantially interfere with the nature and purposes of the CDNST, and

c. Motor vehicle use does not constitute a safety hazard to hikers-pedestrians and equestrians.

8. Locating the CDNST in wilderness on a National Forest System trail, and marking the travel route at trail junctions with the CDNST marker brand, is consistent with the Wilderness Act (Title 16, United States Code, sections 1131(a) and 1133(b)).

9. The CDNST should be located on a permanent easement where the trail crosses private land (FSM 5460.3).

10. The CDNST should be designed following the Pack-and-Saddle Trail Class 2 or 3 design parameters when constructed or reconstructed (FSH 2309.18). However, a CDNST segment may be designed following the Hiker-Pedestrian Trail Class 1, 2, or 3 design parameters where there exists a substantial safety or resource concern, or the overall management direction for the land management plan area only provides for Hiker-Pedestrian use.

2353.44—Management of National Scenic and National Historic Trails

Management of the Continental Divide National Scenic Trail (CDNST)

1. Scenery should be managed following the Scenery Management System (FSM 2380). The CDNST is a concern level 1 travel route, and scenic integrity objective is to be high or very high.

2. Use the Recreation Opportunity Spectrum (ROS) system (FSM 2311.1) in the management of the CDNST corridor. The CDNST is to be managed primarily for Primitive and Semi-Primitive Non-Motorized ROS conditions and experiences.

3. The CDNST should be managed for both Pack-and-Saddle and Hiker-Pedestrian uses (FSH 2309.18). However, where the trail design parameters reflect only Hiker-Pedestrian use, the managed use should be only Hiker-Pedestrian.

4. Motor vehicle use may be allowed on a trail segment of the CDNST (Title 16 United States Code, section 1246(c) (16 U.S.C. 1246(c)):

a. If necessary to meet emergencies,

b. To enable adjacent landowners or land users to have reasonable access to their lands or where there are existing valid rights, and

c. On a designated motor vehicle use route (36 CFR part 212 subpart B) that crosses the CDNST where an affirmative determination has been made that such use would not substantially interfere with the nature and purposes of the CDNST.

d. In addition to one of the above three situations being met, motor vehicle use must also be allowed by the overall management direction for the land management plan area.

e. Motor vehicle use is also allowed on a trail segment if such use is consistent with FSM 2353.44, Management of the CDNST (5).

5. Motor vehicle use shall be allowed on a trail segment of the CDNST where the following conditions are met (16 U.S.C. 1246(c)):

a. An affirmative determination has been made that motor vehicle use would not substantially interfere with the nature and purposes of the CDNST, and

b. Motor vehicle use was allowed by administrative regulations on a National Forest System travel route that was developed prior to November 10, 1978, which is the time of designation of the CDNST by Public Law 95–625.

c. In addition to both of the above two situations being met, motor vehicle use must also be allowed by the overall management direction for the land management plan area.

d. Motor vehicle use may also be allowed on a trail segment if such use is consistent with FSM 2353.44, Management of the CDNST (4).

6. Where motor vehicle use is allowed on a road segment (16 U.S.C. 1244(5)) or trail segment (16 U.S.C. 1246(c)) of the CDNST, consider establishing motor vehicle use prohibitions and restrictions (part 261–Prohibitions, of Title 36 Code of Federal Regulations (36 CFR part 261)) to mitigate the effects of such use on the nature and purposes of the CDNST. Management practices and actions that would promote or result in increased motor vehicle use ont he CDNST should not occur.

7. Bicycle (mountain bike) use may only be allowed on a trail segment of the CDNST where the following conditions are met (16 U.S.C. 1246(c)):

a. An affirmative determination has been made that bicycle use would not substantially interfere with the nature and purposes of the CDNST, and

b. Bicycles must also be allowed by the overall management direction for the land management plan area.

8. Where bicycle (mountain bike) use is allowed on the CDNST, consider establishing bicycle use prohibitions and restrictions (36 CFR part 261) to mitigate the effects of such use on the nature and purposes of the CDNST. Management practices and actions that would promote or result in increased bicycle use on the CDNST should not occur.

Regulatory Certifications

Environmental Impact

The directives would provide policy and procedural guidance to agency officials implementing the National Trails System Act. CDNST management decisions implementing the directives would include appropriate site-specific environmental analysis and public involvement. The directives would have no effect on the ground until site-specific planning decisions are completed, with opportunity for public involvement. Section 31b of USDA Forest Service Handbook 1909.15 (57 FR 43180, September 18, 1992) excludes from documentation in an environmental assessment or environmental impact statement ''rules, regulations, or policies to establish Service-wide administrative procedures, program processes, or instructions.'' The agency's conclusion is that the directives fall within this category of actions and that no extraordinary circumstances exist which would require preparation of an environmental assessment or environmental impact statement.

Regulatory Impact

The directives have been reviewed under USDA procedures and Executive Order (E.O.) 12866 on regulatory planning and review. The directives would not have an annual effect of $100 million or more on the economy, nor would it adversely affect productivity, competition, jobs, the environment, public health and safety, or State and local governments. The directives would not interfere with any action taken or planned by another agency, nor would they raise new legal or policy issues. Finally, the directives would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of beneficiaries of such programs. Accordingly, the directives are not subject to OMB review under E.O. 12866.

Regulatory Flexibility Act Analysis

The directives have been considered in light of the Regulatory Flexibility Act (5 U.S.C. 602 *et seq.*). The directives would not have any effect on small entities as defined by the Regulatory Flexibility Act. The directives would not directly affect small businesses, small organizations, and small governmental jurisdictions. Therefore, the agency has determined that the directives would not have a significant economic impact on a substantial number of small entities pursuant to the Regulatory Flexibility Act because the directives would not impose record-keeping requirements on them; the directives would not affect their competitive position in relation to large entities; and it would not affect their cash flow, liquidity, or ability to remain in the market.

No Takings Implications

The directives have been analyzed in accordance with the principles and criteria contained in E.O. 12630. It has been determined that the directives would not pose the risk of a taking of private property.

Federalism and Consultation and Coordination With Indian Tribal Governments

The agency has considered the directives under the requirements of E.O. 13132 on federalism, and has determined that the directives conform with the federalism principles set out in this E.O.; would not impose any compliance costs on the States; and would not have substantial direct effects on the States, the relationship between the Federal government and the States, or the distribution of power and responsibilities among the various

levels of government. Therefore, the agency has determined that no further assessment of federalism implications is necessary.

Moreover, the directives would not have Tribal implications as defined by E.O. 13175, Consultation and Coordination With Indian Tribal Governments, and therefore advance consultation with Tribes is not required.

Energy Effects

The directives have been reviewed under E.O. 13211 of May 18, 2001, Actions Concerning Regulations That Significantly Affect the Energy Supply. It has been determined that the directives would not constitute a significant energy action as defined in the E.O.

Unfunded Mandates

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), which the President signed into law on March 22, 1995, the agency has assessed the effects of the directives on State, local, and Tribal governments and the private sector. The directives would not compel the expenditure of $100 million or more by an State, local, or Tribal government or anyone in the private sector. Therefore, a statement under section 202 of the act is not required.

Controlling Paperwork Burdens on the Public

These directives do not contain any record-keeping or reporting requirements or other information collection requirements as defined in 5 CFR part 1320 that are not already required by law or not already approved for use. Accordingly, the review provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR part 1320 do not apply.

Dated: July 26, 2007.

Richard Stem,

Deputy Regional Forester.

Information Collection Activity; Comment Request

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended), the Rural Utilities Service, an agency delivering the United States Department of Agriculture's (USDA) Rural Development Utilities Programs, hereinafter referred to as Rural Development and/or Agency, invites comments on this information collection for which the Agency intends to request approval from the Office of Management and Budget (OMB).

DATES: Comments on this notice must be received by October 1, 2007.

FOR FURTHER INFORMATION CONTACT: Michele L. Brooks, Acting Director, Program Development & Regulatory Analysis, Rural Utilities Service, USDA, 1400 Independence Ave., SW., STOP 1522, Room 5159 South Building, Washington, DC 20250–1522. Telephone: (202) 720–0736. FAX: (202) 720–4120.

SUPPLEMENTARY INFORMATION:

Title: 7 CFR Part 1753, Telecommunications System Construction Policies and Procedures.

OMB Control Number: 0572–0059.

Type of Request: Revision of a currently approved collection package.

Abstract: In order to facilitate the programmatic interest of the RE Act, and, in order to assure that loans made or guaranteed by the Agency are adequately secured, the Agency, as a secured lender, has established certain forms for materials, equipment and construction of electric and telecommunications systems. The use of standard forms, construction contracts, and procurement procedures helps assure the Agency that appropriate standards and specifications are maintained, the Agency's loan security is not adversely affected; and the loan and loan guarantee funds are used effectively and for the intended purposes.

Over the past year and a half, the Agency has undertaken a comprehensive review of its Telecommunications Program contracts. The purpose of this undertaking is to improve customer service to the Agency's rural borrowers with a more efficient and effective means to complete a contract transaction as well as improve the internal efficiency of processing contracts.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 2 hours per response.

Respondents: Business or other for-profit and non-profit institutions.

Estimated Number of Respondents: 513.

Estimated Number of Responses per Respondent: 10.

Estimate Total Annual Burden on Respondents: 10,592 hours.

Copies of this information collection can be obtained from MaryPat Daskal, Program Development and Regulatory Analysis, USDA Rural Development at (202) 720–7853. Comments are invited on (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumption used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques on other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

James M. Andrew,

Administrator, Rural Utilities Service.

BILLING CODE 3410–15–P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Illinois Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that a briefing meeting of the Illinois Advisory Committee to the Commission will convene at 10 a.m. and adjourn at 4 p.m. on August 17, 2007, at the Dirksen Federal Building, Courtroom 1719, 219 S. Dearborn St., Chicago, IL 60604. The purpose of the meeting is to gather data regarding the enforcement of prohibitions against religious discrimination in prisons. The agenda will include panels of presenters knowledgeable of the topic, including prisoners' rights advocates; state, county, and federal prison officials; clergy who serve the religious needs of inmates; and legal scholars.

Members of the public are entitled to submit written comments; the comments must be received in the regional office by August 24, 2007. The address is 55 West Monroe Street, Suite 410, Chicago, IL 60603. Persons wishing to email their comments, or to present

their comments verbally at the meeting, or who desire additional information should contact Carolyn Allen, Administrative Assistant, (312) 353–8311, TDD/TTY (312) 353–8362, or by email: *callen@usccr.gov.*

Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least ten (10) working days before the scheduled date of the meeting.

Records generated from this meeting may be inspected and reproduced at the Midwestern Regional Office, as they become available, both before and after the meeting. Persons interested in the work of this advisory committee are advised to go to the Commission's website, *http://www.usccr.gov,* or to contact the Midwestern Regional Office at the above email or street address.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission and FACA.

Dated in Washington, DC, July 30, 2007.

Ivy Davis,

Acting Chief, Regional Programs Coordination Unit.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[T–3–2007]

Foreign-Trade Zone 7—Mayaguez, PR; Temporary/Interim Manufacturing Authority Merck Sharpe & Dohme Quimica De Puerto Rico Inc. (Pharmaceutical Manufacturing); Notice of Approval

On May 10, 2007, the Executive Secretary of the Foreign-Trade Zones (FTZ) Board filed an application submitted by the Puerto Rico Industrial Development Company, grantee of FTZ 7, requesting temporary/interim manufacturing (T/IM) authority on behalf of Merck Sharpe & Dohme Quimica De Puerto Rico, Inc., within FTZ 7, at the MOVA Pharmaceutical Corporation pharmaceutical manufacturing facility located in Caguas, Puerto Rico.

The application was processed in accordance with T/IM procedures, as authorized by FTZ Board Orders 1347 (69 FR 52587, 8/30/04) and 1480 (71 FR 55422, 9/22/06), including notice in the **Federal Register** inviting public comment (72 FR 27801, 5/17/07). The FTZ staff examiner reviewed the application and determined that it meets the criteria for approval under T/IM procedures. Pursuant to the authority delegated to the FTZ Board Executive Secretary in Board Orders 1347 and 1480 the application was approved, effective July 23, 2007, until July 23, 2009, subject to the FTZ Act and the Board's regulations, including Section 400.28.

Dated: July 23, 2007.

Andrew McGilvray,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Advance Notification of Sunset Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of upcoming Sunset Reviews.

Background

Every five years, pursuant to section 751(c) of the Tariff Act of 1930, as amended, the Department of Commerce (''the Department'') and the International Trade Commission automatically initiate and conduct a review to determine whether revocation of a countervailing or antidumping duty order or termination of an investigation suspended under section 704 or 734 would be likely to lead to continuation or recurrence of dumping or a counteravailable subsidy (as the case may be) and of material injury.

Upcoming Sunset Reviews for September 2007

The following Sunset Reviews are scheduled for initiation in September 2007 and will appear in that month's Notice of Initiation of Five-Year Sunset Reviews.

	Department contact
Antidumping Duty Proceeding	
Carbon and Certain Alloy Steel Wire Rod from Brazil (A–351–832)	Brandon Farlander (202) 482–0182.
Carbon and Certain Alloy Steel Wire Rod from Canada (A–122–840)	Brandon Farlander (202) 482–0182.
Carbon and Certain Alloy Steel Wire Rod from Mexico (A–201–830)	Brandon Farlander (202) 482–0182.
Carbon and Certain Alloy Steel Wire Rod from Trinidad and Tobago (A–274–804)	Brandon Farlander (202) 482–0182.
Carbon and Certain Alloy Steel Wire Rod from Ukraine (A–823–812)	Brandon Farlander (202) 482–0182.
Carbon and Certain Alloy Steel Wire Rod from Indonesia (A–560–815)	Brandon Farlander (202) 482–0182.
Carbon and Certain Alloy Steel Wire Rod from Moldova (A–841–805)	Brandon Farlander (202) 482–0182.
Countervailing Duty Proceedings	
Carbon and Certain Alloy Steel Wire Rod from Brazil (C–351–833)	Brandon Farlander (202) 482–0182.

Suspended Investigations

No Sunset Reviews of suspended investigations are scheduled for initiation in September 2007.

The Department's procedures for the conduct of Sunset Reviews are set forth in 19 CFR 351.218. Guidance on methodological or analytical issues relevant to the Department's conduct of Sunset Reviews is set forth in the Department's Policy Bulletin 98.3—Policies Regarding the Conduct of Five-Year (''Sunset'') Reviews of Antidumping and Countervailing Duty Orders; Policy Bulletin, 63 FR 18871 (April 16, 1998). The Notice of Initiation of Five-Year (''Sunset'') Reviews provides further information regarding what is required of all parties to participate in Sunset Reviews.

Pursuant to 19 CFR 351.103(c), the Department will maintain and make available a service list for these proceedings. To facilitate the timely preparation of the service list(s), it is requested that those seeking recognition as interested parties to a proceeding

contact the Department in writing within 15 days of the publication of the Notice of Initiation.

Please note that if the Department receives a Notice of Intent to Participate from a member of the domestic industry within 15 days of the date of initiation, the review will continue. Thereafter, any interested party wishing to participate in the Sunset Review must provide substantive comments in response to the notice of initiation no later than 30 days after the date of initiation.

This notice is not required by statute but is published as a service to the international trading community.

Dated: July 23, 2007.

Stephen J. Claeys,

Deputy Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

FOR FURTHER INFORMATION CONTACT: Sheila E. Forbes, Office of AD/CVD Operations, Customs Unit, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: (202) 482–4697.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party, as defined in section 771(9) of the Tariff Act of 1930, as amended, may request, in accordance with section 351.213 (2002) of the Department of Commerce (the Department) Regulations, that the Department conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity to Request a Review: Not later than the last day of August 2007,[1] interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in August for the following periods:

	Period
Antidumping Duty Proceeding	
Germany:	
Corrosion-Resistant Carbon Steel Flat Products, A–428–815	8/1/06–7/31/07
Seamless Line and Pressure Pipe, A–428–820	8/1/06–7/31/07
Italy:	
Granular Polytetrafluoroethylene Resin, A–475–703	8/1/06–7/31/07
Japan:	
Brass Sheet & Strip, A–588–704	8/1/06–7/31/07
Granular Polytetrafluoroethylene Resin, A–588–707	8/1/06–7/31/07
Tin Mill Products, A–588–854	8/1/06–7/31/07
Malaysia:	
Polyethylene Retail Carrier Bags, A–557–813	8/1/06–7/31/07
Mexico:	
Gray Portland Cement and Cement Clinker, A–201–802	8/1/06–7/31/07
Republic Of Korea:	
Corrosion-Resistant Carbon Steel Flat Products, A–580–816	8/1/06–7/31/07
Romania:	
Carbon and Alloy Seamless Standard, Line, and Pressure Pipe (Under 4½ Inches), A–485–805	8/1/06–7/31/07
Thailand:	
Polyethylene Retail Carrier Bags, A–549–821	8/1/06–7/31/07
The People's Republic of China:	
Floor Standing Metal-Top Ironing Tables and Parts Thereof, A–570–888	8/1/06–7/31/07
Petroleum Wax Candles, A–570–504	8/1/06–7/31/07
Polyethylene Retail Carrier Bags, A–570–886	8/1/06–7/31/07

Dynamic Random Access Memory Semiconductors, C–580–851	1/1/06–12/31/06
Stainless Steel Sheet and Strip in Coils, C–580–835	1/1/06–12/31/06

Suspension Agreements

None.

In accordance with section 351.213(b) of the regulations, an interested party as defined by section 771(9) of the Act may request in writing that the Secretary conduct an administrative review. For both antidumping and countervailing duty reviews, the interested party must specify the individual producers or exporters covered by an antidumping finding or an antidumping or

[1] Or the next business day, if the deadline falls on a weekend, federal holiday or any other day when the Department is closed.

countervailing duty order or suspension agreement for which it is requesting a review, and the requesting party must state why it desires the Secretary to review those particular producers or exporters.[2] If the interested party intends for the Secretary to review sales of merchandise by an exporter (or a producer if that producer also exports merchandise from other suppliers) which were produced in more than one country of origin and each country of origin is subject to a separate order, then the interested party must state specifically, on an order-by-order basis, which exporter(s) the request is intended to cover.

As explained in *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003), the Department has clarified its practice with respect to the collection of final antidumping duties on imports of merchandise where intermediate firms are involved. The public should be aware of this clarification in determining whether to request an administrative review of merchandise subject to antidumping findings and orders. See also the Import Administration Web site at *http://ia.ita.doc.gov.*

Six copies of the request should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, Room 1870, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, DC 20230. The Department also asks parties to serve a copy of their requests to the Office of Antidumping/Countervailing Operations, Attention: Sheila Forbes, in room 3065 of the main Commerce Building. Further, in accordance with section 351.303(f)(l)(i) of the regulations, a copy of each request must be served on every party on the Department's service list.

The Department will publish in the **Federal Register** a notice of ''Initiation of Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation'' for requests received by the last day of August 2007. If the Department does not receive, by the last day of August 2007, a request for review of entries covered by an order, finding, or suspended investigation listed in this notice and for the period identified above, the Department will instruct the U.S. Customs and Border Protection to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute but is published as a service to the international trading community.

Dated: July 23, 2007.

Stephen J. Claeys,

Deputy Assistant Secretary, for Import Administration.

Continuation of Antidumping Duty Orders on Honey From Argentina and the People's Republic of China, and Continuation of Countervailing Duty Order on Honey From Argentina

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the Department of Commerce (the Department) and the International Trade Commission (the Commission) that revocation of the antidumping duty (AD) orders on honey from Argentina and the People's Republic of China (PRC) would likely lead to continuation or recurrence of dumping; that revocation of the countervailing duty (CVD) order on honey from Argentina would likely lead to continuation or recurrence of a countervailable subsidy; and, that revocation of these AD and CVD orders would likely lead to a continuation or recurrence of material injury to an industry in the United States, the Department is publishing this notice of continuation of these AD and CVD orders.

DATES: *Effective Date:* August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Deborah Scott (AD orders), Elfi Blum (CVD order), or Dana Mermelstein, AD/CVD Operations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave., NW., Washington, DC 20230; telephone: (202) 482–2657, (202) 482–0197, or (202) 482–1391, respectively.

SUPPLEMENTARY INFORMATION:

Background

On November 1, 2006, the Department initiated and the Commission instituted sunset reviews of the AD orders on honey from Argentina and the PRC and the CVD order on honey from Argentina, pursuant to sections 751(c) and 752 of the Tariff Act of 1930, as amended (the Act), respectively. *See Initiation of Five-Year (''Sunset'') Reviews,* 71 FR 64242 (November 1, 2006) and *Honey From Argentina and China,* 71 FR 64292 (November 1, 2006). As a result of its reviews, the Department found that revocation of the AD orders would likely lead to a continuation or recurrence of dumping, and that revocation of the CVD order would likely lead to continuation or recurrence of subsidization, and notified the Commission of the dumping margins and the countervailable subsidy rates likely to prevail if the orders were revoked. *See Honey From Argentina and the People's Republic of China; Final Results of the Expedited Five-Year (''Sunset'') Reviews of Antidumping Duty Orders,* 72 FR 10150 (March 7, 2007), and *Honey from Argentina: Final Results of Full Sunset Review of the Countervailing Duty Order,* 72 FR 32078 (June 11, 2007).

On June 14, 2007, the Commission determined that revocation of the AD orders on honey from Argentina and the PRC and the CVD order on honey from Argentina would be likely to lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time. *See Honey from Argentina and China,* 72 FR 39445 (July 18, 2007), and USITC Publication 3929 (June 2007) (Inv. Nos. 701–TA–402 and 731–TA–892 and 893 (Review)).

Scope of the AD Orders

For purposes of these orders, the products covered are natural honey, artificial honey containing more than 50 percent natural honey by weight, preparations of natural honey containing more than 50 percent natural honey by weight, and flavored honey. The subject merchandise includes all grades and colors of honey whether in liquid, creamed, comb, cut comb, or chunk form, and whether packaged for retail or in bulk form.

The merchandise covered by these orders is currently classifiable under subheadings 0409.00.00, 1702.90.90, and 2106.90.99 of the *Harmonized Tariff Schedule of the United States* (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the Department's written description of the

merchandise under this order is dispositive.

Scope of the CVD Order

The merchandise subject to this order is natural honey, artificial honey containing more than 50 percent natural honey by weight, preparations of natural honey containing more than 50 percent natural honey by weight, and flavored honey. The subject merchandise includes all grades and colors of honey whether in liquid, creamed, combs, cut comb, or chunk form, and whether packaged for retail or in bulk form.

The merchandise subject to this order is currently classifiable under subheadings 0409.00.00, 1702.90.90, and 2106.90.99 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the Department's written description of the merchandise covered by this order is dispositive.

Determination

As a result of the determinations by the Department and the Commission that revocation of these AD and CVD orders would be likely to lead to continuation or recurrence of dumping or a countervailable subsidy and continuation or recurrence of material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, the Department hereby orders the continuation of the AD orders on honey from Argentina and the PRC and the CVD order on honey from Argentina.

U.S. Customs and Border Protection will continue to collect cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of continuation of these orders is the date of publication in the **Federal Register** of this notice of continuation. Pursuant to section 751(c)(2) of the Act, the Department intends to initiate the next five-year review of these orders not later than 30 days prior to the fifth anniversary of the effective date of continuation.

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return/destruction or conversion to judicial protective order of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Failure to comply is a violation of the APO which may be subject to sanctions.

These five-year (''Sunset'') reviews and this continuation notice are in accordance with section 751(c) of the Act. This notice is published pursuant to 777(i) of the Act.

Dated: July 24, 2007.

David M. Spooner,

Assistant Secretary, for Import Administration.

Ball Bearings and Parts Thereof from Germany: Notice of Court Decision Not in Harmony

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On June 29, 2007, the United States Court of International Trade affirmed the Department of Commerce's redetermination on remand of the final results of the administrative review of the antidumping duty order on ball bearings and parts thereof from Germany. See *Paul Mueller Industrie GmbH & Co. v. United States*, Court No. 04–00522, slip op. 07–100 (CIT 2007) (*Paul Mueller*). The Department is now issuing this notice of court decision not in harmony with the Department's determination.

EFFECTIVE DATE: August 2, 2007.

FOR FURTHER INFORMATION CONTACT: David Dirstine or Richard Rimlinger, AD/CVD Operations, Office 5, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–4033 or (202) 482–4477, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 15, 2004, the Department of Commerce (the Department) published the final results of the administrative review of the antidumping duty order on ball bearings and parts thereof from Germany for the period May 1, 2002, through April 30, 2003. See *Antifriction Bearings and Parts Thereof From France, Germany, Italy, Japan, Singapore, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Rescission of Administrative Reviews in Part, and Determination To Revoke Order in Part*, 69 FR 55574 (September 15, 2004) (*Final Results*). The *Final Results* were amended in *Ball Bearings and Parts Thereof from Germany; Amended Final Results of Antidumping Duty Administrative Review*, 69 FR 63507 (November 2, 2004) (*Amended Final Results*). Paul Mueller Industrie GmbH (Paul Mueller) and Timken US Corporation (Timken) filed lawsuits challenging the *Final Results* as amended by the *Amended Final Results*. The Department requested a voluntary remand on two issues. On May 26, 2006, the United States Court of International Trade (CIT) granted the Department's request and ordered the Department to address two items: (1) correct a ministerial error involving a billing adjustment reported by Paul Mueller for one home–market transaction and to recalculate its antidumping margin accordingly; (2) explain its treatment of Paul Mueller's inventory carrying costs.

In accordance with the CIT's remand order in *Paul Mueller v. United States*, 435 F. Supp. 2d at 1241, 1246–1247 (CIT 2006), the Department filed its redetermination on remand of the final results (remand results) on September 13, 2006. In its redetermination, the Department corrected the ministerial error and made a change to its treatment of the inventory carrying costs to ensure that home–market and U.S. inventory carrying costs were calculated on a consistent basis. On June 29, 2007, the CIT affirmed the Department's remand results. The CIT's decision was not made publicly available until July 17, 2007, when the Court entered its judgment. See *Paul Mueller*, slip op. 07–100.

Decision Not in Harmony

By affirming the remand results, the CIT recognized that the Department had made a ministerial error in its calculation of a billing adjustment for Paul Mueller and that its initial calculations of inventory carrying costs for Paul Mueller's home–market and U.S. inventory carrying costs were not made on a consistent basis.

The changes to our calculations with respect to Paul Mueller resulted in a change in the weighted–average margin for ball bearings and parts thereof from 0.44 percent to 0.46 percent for the period of review. Accordingly, absent an appeal or, if appealed, upon a final and conclusive court decision in this action, we will amend our final results of this review to reflect the recalculation of the margin for Paul Mueller.

Suspension of Liquidation

The United States Court of Appeals for Federal Circuit (CAFC) held that the Department must publish notice of a decision of the CIT or the CAFC which is not in harmony with the Department's determination. See *The Timken Company v. United States*, 893 F.2d 337, 341 (CAFC 1990). Publication of this notice fulfills that obligation. The CAFC also held that, in such a case, the

Department must suspend liquidation until there is a ''conclusive'' decision in the action. *Id.* Therefore, the Department must suspend liquidation pending the expiration of the period to appeal the CIT's June 29, 2007, decision or, if appealed, pending a final and conclusive court decision.

Because entries of ball bearings and parts thereof from Germany produced and exported to the United States by Paul Mueller are currently being suspended pursuant to the court's injunction order in effect, the Department does not need to order U.S. Customs and Border Protection to suspend liquidation of affected entries. The Department will not order the lifting of the suspension of liquidation on entries of ball bearings and parts thereof made during the review period before a court decision in this lawsuit becomes final and conclusive.

We are issuing and publishing this notice in accordance with section 516A(c)(1) of the Tariff Act of 1930, as amended.

Dated: July 24, 2007.

Brake Rotors From the People's Republic of China: Final Results of Antidumping Duty Administrative and New Shipper Reviews and Partial Rescission of the 2005–2006 Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On February 15, 2007, the Department of Commerce (''Department'') published *Brake Rotors From the People's Republic of China: Preliminary Results of the 2005 2006 Administrative and New Shipper Reviews and Partial Rescission of the 2005 2006 Administrative Review*, 72 FR 7405 (February 15, 2007) (''*Preliminary Results*''). The period of review (''POR'') is April 1, 2005, through March 31, 2006. The administrative review covers three mandatory respondents and 12 separate–rate respondents. The new shipper review covers one new shipper.

We invited interested parties to comment on our *Preliminary Results*. Based on our analysis of the comments received, we made certain changes to our calculations. The final dumping margins for the administrative and new shipper reviews are listed in the ''Final Results of the Reviews'' section, below.

EFFECTIVE DATE: August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Jennifer Moats for Longkou Haimeng Machinery Co., Ltd. and Qingdao Golrich Autoparts Co., Ltd., or Frances Veith for Yantai Winhere Auto–Part Manufacturing Co., Ltd. and Qingdao Meita Automotive, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue, NW, Washington, DC 20230; telephone: 202–482–5047 and 202–482–4295, respectively.

SUPPLEMENTARY INFORMATION:

Background

On February 15, 2007, the Department published the Preliminary Results of the administrative and new shipper reviews of the antidumping duty order on brake rotors from the People's Republic of China (''PRC'').

On March 6, 2007, the Department issued a letter to all interested parties granting a 28-day extension of time to submit publicly available information to value the factors of production for the final results of these reviews and postponed the briefing schedule pending the Department's release of the Shandong Huanri Group General Co., Laizhou Huanri Automobile Parts Co., Ltd, and Shandong Huanri Group Co., Ltd. (collectively, ''Huanri'') verification report.

From March 20 through March 22, 2007, the Department conducted a verification of Huanri and released its verification report of Huanri on May 4, 2007.[1] On May 9, 2007, the Department issued a memorandum stating that it would revise the surrogate value for steel strap to include Indian import data from Ukraine for February and March 2006 for the final results.[2] *See* ''Surrogate Value'' section below. On May 10, 2007, the Department revised the deadline for submission of case and rebuttal briefs to May 21 and May 29, 2007, respectively. On May 15, 2007, in response to a request filed by the Coalition for the Preservation of American Brake Drum and Rotor Aftermarket Manufacturers (''the petitioner''), the Department extended the deadline for submission of rebuttal briefs until June 5, 2007. On May 21, 2007, the Department received case briefs from Laizhou Auto Brake Equipment Company (''LABEC''), Yantai Winhere Auto–Part Manufacturing Co., Ltd. (''Winhere''), Longkou Haimeng Machinery Co., Ltd. (''Haimeng''), Laizhou Luqi Machinery Co., Ltd. (''Luqi''), Laizhou Hongda Auto Replacement Co., Ltd. (''Hongda''), Qindgdao Meita Automotive Industry Co., Ltd. (''Meita'') (collectively, ''the Trade Pacific respondents''), and the petitioner. On May 21, 2007, the Department placed the supporting documentation regarding the Department's calculation of the surrogate wage rate used in respondents' margin calculations on the record of these reviews.[3] On June 5, 2007, we received rebuttal briefs from the petitioner and the Trade Pacific respondents.

On June 11, 2007, the Department published a notice extending the time limit for the completion of the final results of these reviews until July 31, 2007. *See Brake Rotors from the People's Republic of China: Extension of Time Limit for the Final Results of the 2005–2006 Administrative and New Shipper Reviews*, 72 FR 32071 (June 11, 2007).

We conducted these reviews in accordance with sections 751 and 777(i)(1) of the Tariff Act of 1930, as amended (''the Act''), and sections 19 CFR 351.213 and 19 CFR 351.221 of the agency's regulations.

Period of Review

The POR is April 1, 2005, through March 31, 2006.

Scope of the Order

The products covered by this order are brake rotors made of gray cast iron, whether finished, semifinished, or unfinished, ranging in diameter from 8 to 16 inches (20.32 to 40.64 centimeters) and in weight from 8 to 45 pounds (3.63

[1] *See* Memorandum from Eugene Degnan, Senior International Trade Compliance Analyst, AD/CVD Operations, Office 8, and Paul Stolz, International Trade Compliance Analyst, AD/CVD Operations, Office 8, through Robert Bolling, Program Manager, AD/CVD Operations, Office 8 and Wendy J. Frankel, Director, AD/CVD Operations, Office 8, to the File entitled, ''Antidumping Duty Administrative Review of Brake Rotors from the People's Republic of China: Verification of Section A and Quantity and Value Response of Shandong Huanri Group Co., Ltd., Laizhou Huanri Automobile Parts Co., Ltd., and Shandong Huanri Group General Co.,'' dated May 4, 2007 (''*Huanri Verification Report*'').

[2] *See* Memorandum from Ann Fornaro, International Trade Compliance Analyst, to the File entitled, ''2005-2006 Antidumping Duty Administrative and New Shipper Reviews of Brake Rotors from the People's Republic of China - Surrogate Value Change for Final Results,'' dated May 9, 2007 (''*Surrogate Value Change Memo*'').

[3] *See* Memorandum from Ann Fornaro, International Trade Compliance Analyst, to the File entitled, ''2005-2006 Antidumping Duty Administrative Review of Brake Rotors from the People's Republic of China - Expected Wages of Selected Non-Market Economy Countries,'' dated May 21, 2007.

to 20.41 kilograms). The size parameters (weight and dimension) of the brake rotors limit their use to the following types of motor vehicles: automobiles, all–terrain vehicles, vans and recreational vehicles under ''one ton and a half,'' and light trucks designated as ''one ton and a half.''

Finished brake rotors are those that are ready for sale and installation without any further operations. Semi–finished rotors are those on which the surface is not entirely smooth, and have undergone some drilling. Unfinished rotors are those which have undergone some grinding or turning.

These brake rotors are for motor vehicles, and do not contain in the casting a logo of an original equipment manufacturer (''OEM'') which produces vehicles sold in the United States. (*e.g.*, General Motors, Ford, Chrysler, Honda, Toyota, Volvo). Brake rotors covered in this order are not certified by OEM producers of vehicles sold in the United States. The scope also includes composite brake rotors that are made of gray cast iron, which contain a steel plate, but otherwise meet the above criteria. Excluded from the scope of this order are brake rotors made of gray cast iron, whether finished, semifinished, or unfinished, with a diameter less than 8 inches or greater than 16 inches (less than 20.32 centimeters or greater than 40.64 centimeters) and a weight less than 8 pounds or greater than 45 pounds (less than 3.63 kilograms or greater than 20.41 kilograms).[4]

Brake rotors are currently classifiable under subheadings 8708.39.5010, 8708.39.5030, and 8708.30.5030 of the *Harmonized Tariff Schedule of the United States* (''HTSUS'').[5] Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this order is dispositive.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs filed by parties in these reviews are addressed in the Memorandum from Stephen J. Claeys, Deputy Assistant Secretary for Import Administration, to David M. Spooner, Assistant Secretary for Import Administration, ''Issues and Decision Memorandum for the 2005–2006 Administrative and New Shipper Reviews of Brake Rotors From the People's Republic of China,'' dated July 27, 2007 (''*Issues and Decision Memo*''), which is hereby adopted by this notice. A list of the issues that parties raised and to which we responded in the *Issues and Decision Memo* follows as an appendix to this notice. The *Issues and Decision Memo* is a public document which is on file in the Central Records Unit (''CRU'') in room B–099 of the main Department building, and is also accessible on the Web at <http://ia.ita.doc.gov/frn/>. The paper copy and electronic version of the *Issues and Decision Memo* are identical in content.

Verification

In the *Preliminary Results*, we stated that we intended to verify the information reported to the Department by Huanri in its separate–rate application.[6] From March 20 through March 22, 2007, the Department conducted a verification of Huanri at Huanri's headquarters in Panjia Village, Laizhou, China. We used standard verification procedures, including on–site inspection of the company's facilities and examination of relevant sales and financial records to verify Section A, and quantity and value information submitted by Huanri on the record of the administrative review. The Department issued the results of the verification on May 4, 2007. For further details on the verification, *see* the *Huanri Verification Report*.

Partial Rescission of Administrative Review

In the *Preliminary Results*, the Department issued a notice of intent to rescind the administrative review with respect to Hongfa Machinery (Dalian) Co., Ltd. (''Hongfa''), Laizhou Wally Automobile Co., Ltd. (''Wally''), Xianghe Xumingyuan Auto Parts Co. (''Xumingyuan''), China National Automotive Industry Import & Export Corporation (''CAIEC''), Shandong Laizhou CAPCO Industry (''CAPCO''), Laizhou Luyuan Automobile Fittings Co. (''Luyuan''), and Shenyang Honbase Machinery Co., Ltd. (''Honbase''), in accordance with 19 CFR 351.213(d)(3), because we found no evidence that any of these companies made shipments of subject merchandise to the United States during the POR. *See Preliminary Results*, 72 FR at 7409. The Department received no comments on this issue, and we did not receive any further information since the issuance of the *Preliminary Results* that provides a basis for reconsideration of this determination. Therefore, the Department is rescinding this administrative review with respect to Hongfa, Wally, Xumingyuan, CAIEC, CAPCO, Luyuan, and Honbase.

Separate Rates

In our *Preliminary Results*, we determined that Qingdao Rotec Auto Parts Co., Ltd. (''Rotec'') and Xiangfen Hengtai Brake System Co., Ltd. (''Hengtai'') did not qualify for a separate rate and, therefore, are deemed to be included in the PRC–wide entity, and subject to the PRC–wide rate. *See Preliminary Results*, 72 FR at 7410. The Department received no comments on this issue, and we did not receive any further information since the issuance of the *Preliminary Results* that provides a basis for reconsideration of these determinations for the final results. We also determined that the three mandatory (*i.e.*, Haimeng, Meita, and Winhere) and 12 separate–rate respondents (*i.e.*, non–selected respondents)[7] met the criteria for the assignment of a separate rate. Based on the results of Huanri's verification and the Department's careful consideration of comments placed on the record by parties, we have determined that Huanri is eligible for a separate rate in the final results of the administrative review. *See Issues and Decision Memo* at Comment 11.

The PRC–Wide Rate and Use of Facts Otherwise Available

In the *Preliminary Results*, we determined that the PRC–wide entity (including Hengtai and Rotec) received copies of the Department's questionnaire but did not respond and, therefore, failed to cooperate to the best of their ability in the administrative

[4] On January 17, 2007, the Department determined the brake rotors produced by Federal-Mogul and certified by the Ford Motor Company to be excluded from the scope of the order. *See* Memorandum from Blanche Ziv, Program Manager, AD/CVD Operations, Office 8, through Wendy J. Frankel, Office Director, AD/CVD Operations, Office 8, to Stephen J. Claeys, Deputy Assistant Secretary for Import Administration, entitled, ''Scope Ruling of the Antidumping Duty Order on Brake Rotors from the People's Republic of China; Federal-Mogul Corporation,'' dated January 17, 2007.

[5] As of January 1, 2005, the HTS classification for brake rotors (discs) changed from 8708.39.5010 to 8708.39.5030. As of January 1, 2007, the HTS classification for brake rotors (discs) changed from 8708.39.5030 to 8708.30.5030. *See Harmonized Tariff Schedule of the United States (2005)*, available at <www.usitc.gov>. *See also* Memorandum from Ann Fornaro, International Trade Compliance Analyst, through Blanche Ziv, Program Manager, to the File entitled, ''Brake Rotors from the People's Republic of China: Change in HTS Code for Subject Merchandise,'' dated February 6, 2007.

[6] *See Preliminary Results*, 72 FR at 7408.

[7] The non-selected respondents are as follows: China National Industrial Machinery Import & Export Corporation (''CNIM''), LABEC, Qingdao Gren Co. (''Gren''), Zibo Luzhou Automobile Parts Co., Ltd. (''ZLAP''), Hongda, Longkou TLC Machinery Co., Ltd. (''Longkou TLC''), Zibo Golden Harvest Machinery Limited Company (''ZGOLD''), Luqi, Shenyang Yinghao Machinery Co., Longkou Jinzheng Machinery Co. (''Jinzheng''), Shanxi Zhongding Auto Parts Co., Ltd. (''SZAP''), and Huanri.

review. *See Preliminary Results*, 72 FR at 7410–12. Accordingly, we determined that the use of facts otherwise available in reaching our determination is appropriate pursuant to sections 776(a)(2)(A) and (B) of the Act, and that the use of an adverse inference in selecting from the facts available is appropriate pursuant to section 776(b) of the Act. *See Preliminary Results*, 72 FR at 7410. In accordance with section 776(b)(1) of the Act, as adverse facts available, we assigned to the PRC–entity (including Hengtai and Rotec) the PRC–wide rate of 43.32 percent. For detailed information on the Department's corroboration of this rate, *see Preliminary Results*, 72 FR at 7411, and Memorandum from Ann Fornaro, International Trade Analyst, through Blanche Ziv, Program Manager, AD/CVD Enforcement Office 8, and Wendy J. Frankel, Office Director, AD/CVD Enforcement Office 8, to the File, entitled, ''Corroboration of the PRC–Wide Adverse Facts–Available Rate,'' dated February 9, 2007.

Changes Since the Preliminary Results

Based on our analysis of comments received from interested parties and information on the record of these reviews, we made changes to the margin calculations as noted below.

For the final results, we have corrected the calculation of freight values for Golrich's carton and steel buckle inputs by multiplying the distance from the domestic supplier to the factory by the surrogate value for truck freight, instead of adding those two values. For further details, *see* the *Issues and Decision Memo* at Comment 13, and Memorandum from Ann Fornaro, International Trade Analyst, through Blanche Ziv, Program Manager, AD/CVD Operations Office 8, to the File, entitled, ''Analysis for the Final Results of the 2005–2006 New Shipper Review of the Antidumping Duty Order on Brake Rotors from the People's Republic of China: Qingdao Golrich Autoparts Co., Ltd.,'' dated July 27, 2007 (''*Golrich Analysis Memo*'').

For further details on company–specific calculations, *see* the company–specific analysis memoranda.[8]

We have made certain changes to the financial ratio calculations for the final results. For further details, *see* the *Issues and Decision Memo* at Comment 3.

We determined that we inadvertently excluded Ukraine import data for February and March 2006 in the calculation of the surrogate value for steel strap in the *Preliminary Results*. Therefore, we recalculated the surrogate value for steel strap to include the Ukraine data for those two months for the final results.[9] For further information on the calculation of this value, *see* Memorandum from Ann Fornaro, Trade Compliance Analyst, through Blanche Ziv, Program Manager, AD/CVD Operations Office 8, to the File entitled, ''2005–2006 Administration and New Shipper Reviews of the Antidumping Duty Order of Brake Rotors from the People's Republic of China Surrogate Values for the Final Results,'' dated July 27, 2007 (''*Final Surrogate Value Memo*'').

We have also made changes to the surrogate values for cartons. For further details, see the *Issues and Decision Memo* at Comment 9 and *Final Surrogate Value Memo*.

Final Results of the Reviews

We determine that the following final dumping margins exist for the period April 1, 2005, through March 31, 2006:

Individually Reviewed Exporters 2005–2006 Administrative Review	Weighted–Average Percent Margin
Longkou Haimeng Machinery Co., Ltd.	4.22
Yantai Winhere Auto–Part Manufacturing Co., Ltd.	0.03 (*de minimis*)
Qingdao Meita Automotive Industry Co., Ltd.	0.00

Separate–Rate Applicant Exporters 2005–2006 Administrative Review	Weighted–Average Percent Margin
China National Industrial Machinery I & E Co.[10]	4.22
Laizhou Auto Brake Equipment Co., Ltd.	4.22
Qingdao Gren (Group) Co.[11]	4.22
Zibo Luzhou Automobile Parts Co., Ltd.	4.22
Laizhou Hongda Auto Replacement Parts Co., Ltd.	4.22
Longkou TLC Machinery Co., Ltd.	4.22
Zibo Golden Harvest Machinery Limited Company	4.22
Laizhou City Luqi Machinery Co., Ltd.	4.22
Shenyang Yinghao Machinery Co.	4.22
Longkou Jinzheng Machinery Co., Ltd.	4.22
Shanxi Zhongding Auto Parts Co., Ltd.	4.22
Shandong Huanri Group Co., Ltd.	4.22

[10] This company is also known as China National Industrial Machinery Import & Export Corporation.
[11] This company is also known as Qingdao Gren Co. and Gren Group (Qingdao) Co.

2005–2006 New Shipper Review	Weighted–Average Percent Margin
Qingdao Golrich Autoparts Co., Ltd.	0.00

[8] Memorandum from Jennifer Moats, Senior International Trade Analyst, through Blanche Ziv, Program Manager, AD/CVD Operations Office 8, to the File, entitled, ''Analysis for the Final Results of the 2005-2006 Administrative Review of the Antidumping Duty Order on Brake Rotors from the People's Republic of China: Longkou Haimeng Machinery Co., Ltd.,'' dated July 27, 2007; Memorandum from Frances Veith, International Trade Compliance Analyst, through Blanche Ziv, Program Manager, AD/CVD Operations Office 8, to the File, entitled, ''Analysis for the Final Results of the 2005-2006 Antidumping Duty Administrative Review of Brake Rotors from the People's Republic of China: Qingdao Meita Automotive Industry Co., Ltd.,'' dated July 27, 2007; Memorandum from Frances Veith, International Trade Compliance Analyst, through Blanche Ziv, Program Manager, AD/CVD Operations Office 8, to the File, entitled, ''Analysis for the Final Results of the 2005-2006 Antidumping Duty Administrative Review of Brake Rotors from the People's Republic of China: Yantai Winhere Auto-Part Manufacturing Co., Ltd.,'' dated July 27, 2007; and the *Golrich Analysis Memo*.

[9] *See Surrogate Value Change Memo*.

PRC–Wide Rate	Margin (Percent)
PRC–Wide Rate*	43.32

*This includes Rotec and Hengtai.

The Department will disclose calculations performed for the final results to the parties within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Assessment Rates

The Department has determined, and U.S. Customs and Border Protection (''CBP'') shall assess, antidumping duties on all appropriate entries covered by these reviews. The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of the reviews. In accordance with 19 CFR 351.212(b)(1), for Winhere, Meita, Haimeng, and Golrich, we calculated an exporter/importer (or customer)-specific assessment rate for the merchandise subject to these reviews. Where the respondent has reported reliable entered values, we calculated importer (or customer)-specific *ad valorem* rates by aggregating the dumping margins calculated for all U.S. sales to each importer (or customer) and dividing this amount by the total entered value of the sales to each importer (or customer). *See* 19 CFR 351.212(b)(1). Where an importer (or customer)-specific *ad valorem* rate is greater than *de minimis*, we will apply the assessment rate to the entered value of the importer's/customer's entries during the review period. *See* 19 CFR 351.212(b)(1). Where we do not have entered values for all U.S. sales, we calculated a per–unit assessment rate by aggregating the antidumping duties due for all U.S. sales to each importer (or customer) and dividing this amount by the total quantity sold to that importer (or customer). *See* 19 CFR 351.212(b)(1). To determine whether the duty assessment rates are *de minimis*, in accordance with the requirement set forth in 19 CFR 351.106(c)(2), we calculated importer (or customer)-specific *ad valorem* ratios based on the estimated entered value. Where an importer (or customer)-specific *ad valorem* rate is zero or *de minimis*, we will instruct CBP to liquidate appropriate entries without regard to antidumping duties. *See* 19 CFR 351.106(c)(2).

For the companies receiving a separate rate that were not selected for individual review (*i.e.*, CNIM, LABEC, Gren, ZLAP, Hongda, Longkou TLC, ZGOLD, Luqi, Shenyang Yinghao Machinery Co., Jinzheng, SZAP, and Huanri), we will calculate an assessment rate based on the weighted average of the cash deposit rates calculated for the companies selected for individual review excluding any that are zero, *de minimis*, or based entirely on AFA pursuant to section 735(c)(5)(B) of the Act.

Cash–Deposit Requirements

The following cash deposit rates will be effective upon publication of this notice of final results for all shipments of subject merchandise from Golrich entered or withdrawn from warehouse, for consumption on or after publication date: (1) zero cash deposit will be required for subject merchandise manufactured and exported by Golrich;[12] and (2) for subject merchandise exported by Golrich but not manufactured by Golrich, the cash deposit rate will be the PRC–wide rate of 43.32 percent.

The following cash deposit requirements will be effective upon publication of this notice of final results for all shipments of brake rotors from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Act: (1) the cash deposit rates for CNIM, LABEC, GREN, Winhere, Haimeng, ZLAP, Hongda, Meita, TLC, ZGOLD, Luqi Yinghao, Longkou Jinzheng, Zhongding and Huanri will be the company–specific rate indicated above (except that if a rate is *de minimis*, *i.e.*, less than 0.50 percent, zero cash deposit will be required); (2) the cash deposit rate for previously investigated or reviewed PRC and non–PRC exporters who received a separate rate in a prior segment of the proceeding (which were not reviewed in this segment of the proceeding) will continue to be the rate assigned in that segment of the proceeding; (3) the cash deposit rate for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate (including Rotec and Hengtai) will be the PRC–wide rate of 43.32 percent; and (4) the cash deposit rate for all non–PRC exporters of subject merchandise which have not received their own rate will be the rate applicable to the PRC exporter that supplied that non–PRC exporter. These requirements shall remain in effect until further notice.

Notification to Interested Parties

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Pursuant to 19 CFR 351.402(f)(3), failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective order (''APO'') of their responsibility concerning the disposition of proprietary information disclosed under APO, in accordance with 19 CFR 351.305 and as explained in the APO itself. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This notice of final results of the administrative and new shipper reviews is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 27, 2007.

David M. Spooner,

Assistant Secretary for Import Administration.

International Trade Administration

[A–570–831]

Fresh Garlic From the People's Republic of China: Extension of Time Limit for the Preliminary Results of the 12th Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce

DATES: *Effective Date:* August 2, 2007,

FOR FURTHER INFORMATION CONTACT: Julia Hancock or Matthew Renkey, AD/CVD Operations, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–1394 and (202) 482–2312, respectively.

Background

On December 27, 2006, the Department of Commerce (''Department'') published a notice of initiation of an administrative review of fresh garlic from the People's Republic of China (''PRC''), covering the period November 1, 2005, through October 31, 2006. *See Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part,* 71 FR 77720 (December 27, 2006). On April 11, 2007, after receiving quantity and value and separate rate responses, the Department selected the mandatory respondents for this review. Between May 14, 2007, and June 11, 2007, the Department received the initial section A, C and D questionnaire responses from the mandatory respondents. The preliminary results of this administrative review are currently due on August 2, 2007.

Extension of Time Limit for the Preliminary Results

The Department determines that completion of the preliminary results of this review within the statutory time period is not practicable, given the extraordinarily complicated nature of the proceeding. The 12th administrative review covers 19 companies (three mandatory respondents and 16 separate rate respondents), requiring the Department to gather and analyze a significant amount of information pertaining to each company's corporate structure and ownership, sales practices, and manufacturing methods. The Department requires more time within which to complete its analysis. Furthermore, this review involves the extraordinarily complicated intermediate input methodology issue. Lastly, the Department requires additional time to analyze the questionnaire responses and to issue supplemental questionnaires.

Therefore, given the number and complexity of issues in this case, and in accordance with section 751(a)(3)(A) of the Tariff Act of 1930, as amended (''the Act''), we are extending the time period for issuing the preliminary results of review by 120 days until November 30, 2007. The final results continue to be due 120 days after the publication of the preliminary results.

This notice is published pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

Dated: July 23, 2007.

Stephen J. Claeys,

Deputy Assistant Secretary for Import Administration.

Furfuryl Alcohol from Thailand: Preliminary Results of the 2005–2006 Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commence is conducting an administrative review of the antidumping duty order on furfuryl alcohol from Thailand. The period of review is July 1, 2005, through May 3, 2006. This review covers imports of furfuryl alcohol from one producer/exporter.

We preliminarily determine that sales of subject merchandise have not been made at less than normal value. If these preliminary results are adopted in our final results, we will instruct U.S. Customs and Border Protection to liquidate entries of furfuryl alcohol from Indorama Chemicals (Thailand) Ltd. without regard to antidumping duties. We invite interested parties to comment on these preliminary results. We will issue the final results not later than 120 days from the date of publication of this notice.

DATES: *Effective Date:* August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Damian Felton or Brandon Farlander, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–0133 and (202) 482–0182, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 25, 1995, the Department published an antidumping duty order on furfuryl alcohol from Thailand. *See Furfuryl Alcohol from Thailand: Notice of Amended Final Antidumping Duty Determinant and Order,* 60 FR 38035 (July 25, 1995). On July 3, 2006, the Department published its *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review,* 71 FR 37890 (July 3, 2006). On July 28, 2006, Penn Specialty Chemicals, Inc. (''petitioner'') requested that the Department conduct an administrative review of Indorama Chemicals (Thailand), Ltd. (''IRCT''), a producer and exporter of furfuryl alcohol from Thailand. In accordance with 19 CFR 351.221(b)(1), we published a notice of initiation of this antidumping duty administrative review on August 30, 2006. *See Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 71 FR 51573 (August 30, 2006) (''*Furfuryl Alcohol Initiation*'').

An antidumping duty questionnaire was sent to IRCT on September 6, 2006. We received timely responses to the questionnaire from IRCT on September 27, 2006, and October 27, 2006. On April 3, 2007, in accordance with section 751(a)(3)(A) of the Tariff Act of 1930, as amended (''the Act''), we published a notice extending the time limit for the completion of the preliminary results in this case by 120 days (*i.e.,* until no later than July 31, 2007). *See Furfuryl Alcohol from*

Thailand: Notice of Extension for Time Limit for Preliminary Results of the 2005–2006 Antidumping Administrative Review, 72 FR 15863 (April 3, 2007).

We issued a supplemental questionnaire regarding IRCT's responses to sections A, B, and C of the Department's original questionnaire on May 3, 2007, and received a timely response from IRCT on May 25, 2007. We issued an additional supplemental questionnaire on June 18, 2007, and received a timely response to the second supplemental questionnaire on June 22, 2007.

Period of Review

The period of review (''POR'') covers July 1, 2005, through May 3, 2006.[1]

Scope of the Order

The merchandise covered by this order is furfuryl alcohol ($C_4H_3OCH_2OH$). Furfuryl alcohol is a primary alcohol, and is colorless or pale yellow in appearance. It is used in the manufacture of resins and as a wetting agent and solvent for coating resins, nitrocellulose, cellulose acetate, and other soluble dyes.

The product subject to this order is classifiable under subheading 2932.13.00 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Fair Value Comparisons

To determine whether sales of furfuryl alcohol by IRCT to the United States were made at less than normal value (''NV''), we compared the export price (''EP'') to NV, as described in the ''Export Price'' and ''Normal Value'' sections of this notice, below.

Pursuant to section 777A(d)(2) of the Act, we compared the EPs of individual U.S. transactions to the weighted-average sales prices of the foreign like product, where there were sales made in the ordinary course of trade, as discussed in the ''Normal Value'' section of this notice.

Product Comparisons

In accordance with section 771(16) of the Act, we considered all products produced by IRCT covered by the description in the ''Scope of the Order'' section, above, to be foreign like products for purposes of determining appropriate product comparisons to U.S. sales. In making product comparisons, consistent with the *Notice of Final Determination of Sales at Less Than Fair Value: Furfuryl Alcohol from Thailand: Final Determination of Sales at Less Than Fair Value,* 60 FR 22557 (May 8, 1995) and *Furfuryl Alcohol from Thailand: Notice of Amended Final Antidumping Duty Determination and Order,* 60 FR 38035 (July 25, 1995) (collectively ''LTFV Final''), we matched foreign like products based on the physical characteristics reported by IRCT.

Export Price

We calculated EP in accordance with section 772(a) of the Act because the merchandise was sold to the first unaffiliated purchaser in the United States prior to importation by the exporter or producer and constructed export price methodology was not otherwise warranted. We based EP on the packed delivered, freight-on-board, cash-in-freight, or the delivery-duty paid price to unaffiliated purchasers in the United States. We made deductions from the starting price for movement expenses in accordance with section 772(c)(2)(A) of the Act. These deductions included foreign inland freight, country of manufacture inland insurance, brokerage and handling, international freight, and marine insurance. We also made adjustments to the starting price for duty drawback in accordance with section 772(c)(1)(B) of the Act.

It is normally the Department's practice to confirm that the duty drawback adjustment claimed by the respondent meets the Department's two-pronged criteria for determining whether the duty drawback adjustment is appropriate. *See Rajinder Pipes, Ltd.* v. *United States*, 70 F. Supp. 2d 1350, 1358 (CIT 1999); *see also Notice of Final Determination of Sales at Less Than Fair Value: Light-Walled Rectangular Pipe and Tube from Turkey*, 69 FR 53675 (September 2, 2004) and accompanying Issues and Decision Memorandum at Comment 1; and *Notice of Final Determination of Sales at Less Than Fair Value and Final Determination of Critical Circumstances: Diamond Sawblades and Parts Thereof from the Republic of Korea*, 71 FR 29310 (May 22, 2006) and accompanying Issues and Decision Memorandum at Comment 49. We have determined that only one of the reported inputs used in the projection of furfuryl alcohol meets the two-pronged criteria. Therefore, we made an adjustment to the starting price for duty drawback to account for import duties paid on the importation of a single input used in the production of the subject merchandise. for an in-depth explanation of these changes, *see* Memorandum from Case Analyst to File, ''Preliminary Results Calculation Memorandum for Indorama Chemicals (Thailand) Ltd.,'' (''*Prelim Calc Memo*'') dated July 25, 2007, available in the Department's CRU.

Normal Value

A. Home Market Viability

In order to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis for calculating NV, we compared the volume of IRCT's home market sales of the foreign like product to the volume of its U.S. sales of the subject merchandise, in accordance with section 773(a)(1)(C)(ii) of the Act. Because IRCT's aggregate volume of home market sales of the foreign like product was greater than five percent of its aggregate volume of U.S. sales for the subject merchandise, we determined that the home market was viable.

Level of Trade

Section 773(a)(1)(B)(i) of the Act states that, to the extent practicable, the Department will calculate NV based on sales at the same level of trade (''LOT'') as the EP. Sales are made at different LOTs if they are made at different marketing stages (or their equivalent). *See* 19 CFR 351.412(c)(2). Substantial differences in selling activities are a necessary, but not sufficient, condition for determining that there is a difference in the stages of marketing. *Id.*; *see also Notice of Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate From South Africa.* 62 FR 61731, 61732 (November 19, 1997). In order to determine whether the comparison sales were at different stages in the marketing process than the U.S. sales, we reviewed the distribution system in each market (*i.e.*, the ''chain of distribution''),[2] including selling functions,[3] class of customer (''customer

[1] On August 30, 2006, the Department published a notice of initiation for this administrative review covering the period July 1, 2005 through June 30, 2006. *See Furfuryl Alcohol Initiation.* However, since the initiation, the Department has revoked this order effective May 4, 2006. *See Furfuryl Alcohol from Thailand; Final Results of the Second Sunset Review of the Antidumping Duty Order and Revocation of the Order*, 72 FR 9729 (March 5, 2006). Therefore, the revised POR is now July 1, 2005 through May 3, 2006.

[2] The marketing process in the United States and comparison market begins with the producer and extends to the sale to the final user or consumer. The chain of distribution between the two may have many or few links, and the respondent's sales occur somewhere along this chain.

[3] Selling functions associated with a particular chain of distribution helps us to evaluate the level(s) of trade in a particular market. For purposes of these preliminary results, we have organized the common selling functions into four major categories: sales process and marketing support,

Continued

category''), and the level of selling expenses for each sale.

Pursuant to section 773(a)(1)(B)(i) of the Act, in identifying levels of trade for EP and comparison market sales, we consider the starting prices before any adjustments. *See Micron Technology, Inc.* v. *United States, et. al.*, 243 F. 3d 1301, 1314–1315 (Fed. Cir. 2001) (affirming this methodology).

When the Department is unable to match U.S. EP sales to sales of the foreign like product in the comparison market at the same LOT as the EP, the Department may compare the U.S. sale to sales at a different LOT in the comparison market. In comparing EP sales to a different LOT in the comparison market, where available data make it practical, we make a LOT adjustment under section 773(a)(7)(A) of the Act.

IRCT reported one LOT in the home market and one LOT in the U.S. market. IRCT reported making sales only to end-users in the home market. In the United States, IRCT reported that it made sales only to a trading company. We examined the information IRCT reported regarding its marketing process for making the reported comparison market and U.S. sales, including the type and level of selling activities performed and customer categories. Specifically, we considered the extent to which the sales process, freight services, warehouse/inventory maintenance, and warranty services varied with respect to the different customer categories (*i.e.*, distributors and end-users). Based on our analysis, we found that the single LOT in the United States is identical to the single LOT in the comparison market. Thus, we preliminarily find that a LOT adjustment for IRCT is not warranted.

C. Calculation of Normal Value Based on Comparison Market Prices

We calculated NV based on the delivered prices to unaffiliated customers. In accordance with section 773(a)(6)(b)(ii) of the Act, we made deductions for inland freight and inland insurance. Furthermore, where appropriate, we made adjustments for differences in circumstances of sale (''COS'') in accordance with section 773(a)(6)(c)(iii) of the Act and 19 CFR 351.410 by deducting direct selling expenses incurred on comparison market sales (credit expenses), and adding U.S. direct selling expenses (credit expenses). We deducted inventory carrying costs incurred on comparison market sales, and added U.S. inventory carrying cost. We deducted home market packing costs and added U.S. packing costs in accordance with section 773(a)(6)(A) and (B) of the Act.

Preliminary Results of the Review

We preliminarily find that the following dumping margin exists for the period July 1, 2005, through May 3, 2006.

Manufacturer/Exporter	Weighted-Average Margin (Percentage)
Indorama Chemicals (Thailand) Ltd.	*0.39

*This is a *de minimis* rate.

Assessment Rates

Upon completion of this administrative review, the Department will determine, and U.S. Customs and Border Protection (''CBP'') shall assess, antidumping duties on all appropriate entries. Pursuant to 19 CFR 351.212(b), the Department calculates an assessment rate for each importer (or customer) of the subject merchandise. Upon issuance of the final results of this administrative review, if any importer (or customer)-specific assessment rates calculated in the final results are above *de minimis* (*i.e.*, at or above 0.5 percent), the Department will issue appraisement instructions directly to CBP to assess antidumping duties on appropriate entries. Pursuant to 19 CFR 351.106(c)(2), we will instruct CBP to liquidate without regard to antidumping duties any entries for which the assessment rate is *de minimis* (*i.e.*, less than 0.50 percent).

The Department intends to issue appropriate assessment instructions directly to CBP 15 days after the date of publication of the final results of this administrative review.

Cash Deposit Rates

On March 5, 2006, pursuant to section 751(d)(2) of the Act and 19 CFR 351.222(i)(1)(ii), the Department revoked the antidumping duty order on furfuryl alcohol from Thailand (*see Furfuryl Alcohol from Thailand; Final Results of the Second Sunset Review of the Antidumping Duty Order and Revocation of the Order,* 72 FR 9729 (March 5, 2006)). The effective date of the revocation is May 4, 2007. As a result of this action, we do not intend to issue cash deposit instructions.

Public Comment

Any interested party may request a hearing within 30 days of publication of this notice. *See* 19 CFR 351.310(c). A hearing, if requested, will be 44 days after the publication of this notice, or the first business day thereafter. Issues raised in the hearing will be limited to those raised in the case and rebuttal briefs. Interested parties may submit case briefs and/or written comments no later than 30 days after the date of publication of these preliminary results. *See* 19 CFR 351.309(c)(ii). Rebuttal briefs and rebuttals to written comments, limited to issues raised in such briefs or comments, may be filed no later than five days after submission of case briefs. *See* 19 CFR 351.309(d). Parties who submit arguments are requested to submit with the argument (1) A statement of the issue, (2) a brief summary of the argument, and (3) a table of authorities.

The Department will issue the final results of this administrative review, including the results of its analysis of issues raised in any such written briefs or hearing, no later than 120 days after publication of these preliminary results.

Notification to Interested Parties

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: July 25, 2007.

David M. Spooner,

Assistant Secretary for Import Administration.

International Trade Administration

[A–570–891]

Hand Trucks and Certain Parts Thereof From the People's Republic of China: Initiation of New Shipper Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce

DATES: *Effective Date:* August 2, 2007.

SUMMARY: The Department of Commerce (the ''Department'') has determined that the request for a new shipper review of

the antidumping duty order on hand trucks and certain parts thereof (''Hand Trucks'') from the People's Republic of China (''PRC''), received July 2, 2007, meets the statutory and regulatory requirements for initiation. The period of review (''POR'') of this new shipper review is December 1, 2006, through May 31, 2007.

FOR FURTHER INFORMATION CONTACT: Matthew Quigley or Robert Bolling, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–4551 or (202) 482–3434, respectively.

SUPPLEMENTARY INFORMATION:

Background

The notice announcing the antidumping duty order on hand trucks from the PRC was published on December 2, 2004. *See Antidumping Duty Order: Hand Trucks and Certain Parts Thereof From the People's Republic of China,* 69 FR 70122 (December 2, 2004). On July 2, 2007, we received a new shipper review request from New-Tec Integration (Xiamen) Co., Ltd. (''New-Tec''). New-Tec certified that it is both the producer and exporter of the subject merchandise upon which the respective request for a new shipper review is based.

Pursuant to section 751(a)(2)(B)(i)(I) of the Tariff Act of 1930, as amended (the ''Act''), and 19 CFR 351.214(b)(2)(i), New-Tec certified that it did not export hand trucks to the United States during the period of investigation (''POI''). In addition, pursuant to section 751(a)(2)(B)(i)(II) of the Act and 19 CFR 351.214(b)(2)(iii)(A), New-Tec certified that, since the initiation of the investigation, it has never been affiliated with any exporter or producer who exported hand trucks to the United States during the POI, including those not individually examined during the investigation. As required by 19 CFR 351.214(b)(2)(iii)(B), New-Tec also certified that its export activities were not controlled by the central government of the PRC.

In addition to the certifications described above, New-Tec submitted documentation establishing the following: (1) The date on which it first shipped hand trucks for export to the United States; (2) the volume of its first shipment; and (3) the date of its first sale to an unaffiliated customer in the United States.

Initiation of New Shipper Review

Pursuant to section 751(a)(2)(B) of the Act and 19 CFR 351.214(d)(1), we find that the request submitted by New-Tec meets the threshold requirements for initiation of a new shipper review for shipments of hand trucks from the PRC produced and exported by New-Tec.

The POR is December 1, 2006, through May 31, 2007. *See* 19 CFR 351.214(g)(1)(i)(B). We intend to issue preliminary results of this review no later than 180 days from the date of initiation, and final results no later than 90 days from the date the preliminary results are issued. *See* section 751(a)(2)(B)(iv) of the Act.

It is the Department's usual practice, in cases involving non-market economies, to require that a company seeking to establish eligibility for an antidumping duty rate separate from the country-wide rate provide evidence of *de jure* and *de facto* absence of government control over the company's export activities. Accordingly, we will issue a questionnaire to New-Tec, including a separate-rate section. The review will proceed if the response provides sufficient indication that New-Tec is not subject to either *de jure* or *de facto* government control with respect to its exports of hand trucks. However, if New-Tec does not demonstrate its eligibility for a separate rate, it will be deemed not separate from other companies that exported during the POI, and its new shipper review will be rescinded.

On August 17, 2006, the Pension Protection Act of 2006 (H.R. 4) was signed into law. Section 1632 of H.R. 4 temporarily suspends the authority of the Department to instruct U.S. Customs and Border Protection to collect a bond or other security in lieu of a cash deposit in a new shipper review. Therefore, the posting of a bond or other security under section 751(a)(2)(B)(iii) of the Act in lieu of a cash deposit is not available in this case. Importers of hand trucks produced by and exported by New-Tec must continue to post cash deposits of estimated antidumping duties on each entry of subject merchandise (*i.e.*, hand trucks) at the PRC-wide entity rate of 383.6 percent.

Interested parties that need access to proprietary information in this new shipper review should submit applications for disclosure under administrative protective order in accordance with 19 CFR 351.305 and 351.306.

This initiation and notice are in accordance with section 751(a)(2)(B) of the Act and 19 CFR 351.214 and 351.221(c)(1)(i).

Dated: July 26, 2007.

Stephen J. Claeys,

Deputy Assistant Secretary for Import Administration.

Silicomanganese from India, Kazakhstan, and Venezuela: Final Results of Expedited Five-year (''Sunset'') Reviews of the Antidumping Duty Orders

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On April 2, 2007, the Department of Commerce (''the Department'') published in the **Federal Register** the notice of initiation of the first five-year sunset reviews of the antidumping duty orders on silicomanganese from India, Kazakhstan, and Venezuela, pursuant to section 751(c) of the Tariff Act of 1930, as amended (''the Act''). *See Initiation of Five-year (''Sunset'') Reviews*, 72 FR 15652 (April 2, 2007) (''*Notice of Initiation*''). On the basis of notices of intent to participate and adequate substantive responses filed on behalf of domestic interested parties, and inadequate responses from respondent interested parties, the Department has conducted expedited sunset reviews of these orders pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C). As a result of these sunset reviews, the Department finds that revocation of the antidumping duty orders is likely to lead to continuation or recurrence of dumping at the levels indicated in the ''Final Results of Review'' section of this notice.

EFFECTIVE DATE: August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Martha Douthit or Dara Iserson, AD/CVD Operations, Office 6, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave., NW., Washington, DC. 20230; telephone: (202) 482–5050, or (202) 482–4052, respectively.

SUPPLEMENTARY INFORMATION:

Background

The antidumping duty orders on silicomanganese from India, Kazakhstan, and Venezuela were published in the **Federal Register** on May 23, 2002. *See Notice of Amended*

Final Determination of Sales at Less than Fair Value and Antidumping Duty Orders: Silicomanganese from India, Kazakhstan, and Venezuela, 67 FR 36149 (May 23, 2002). On April 2, 2007, the Department initiated the first sunset reviews of the antidumping duty orders on silicomanganese from India, Kazakhstan, and Venezuela, pursuant to section 751(c) of the Act. *See Notice of Initiation*. The Department received notices of intent to participate from Felman Production Inc. (''Felman''), Eramet Marietta Inc. (''Eramet'') (collectively ''domestic interested parties''), within the deadline specified in 19 CFR 351.218(d)(1)(i). Domestic interested parties claimed interested party status under section 771(9)(C) of the Act as producers of the subject merchandise.

On May 1 and May 2, 2007, the Department received substantive responses from domestic interested parties Felman and Eramet, respectively, within the deadline specified in 19 CFR 351.218(d)(3)(i). On May 8, 2007, the Department received a timely substantive response from Nava Bharat Ventures Limited (''Nava Bharat''), a respondent interested party from India.[1] Nava Bharat claimed interested party status under section 771(9)(A) of the Act as a producer/exporter of subject merchandise. On May 22, 2007, the Department determined that Nava Bharat did not provide an adequate response to the *Notice of Initiation* in accordance with 19 CFR 351.218(e)(1)(ii)(A) because its shipments accounted for less than 50 percent of exports of subject merchandise to the United States over the five calendar years preceding the initiation of this review. Pursuant to 19 CFR 351.218(e)(1)(ii)(C)(1), on the same day, the Department notified the International Trade Commission (''ITC'') of its adequacy determination. *See Memorandum to Barbara E. Tillman from the Sunset Team, Sunset Review of the Antidumping Duty Order on Silicomanganese from India: Adequacy Determination*, dated May 22, 2007. The Department, therefore, has conducted expedited sunset reviews of the antidumping duty orders pursuant to section 751(c)(3)(B) of the Act.

Scope of the Orders

For purposes of these orders, the products covered are all forms, sizes and compositions of silicomanganese, except low–carbon silicomanganese, including silicomanganese briquettes, fines and slag. Silicomanganese is a ferroalloy composed principally of manganese, silicon and iron, and normally contains much smaller proportions of minor elements, such as carbon, phosphorous and sulfur. Silicomanganese is sometimes referred to as ferrosilicon manganese. Silicomanganese is used primarily in steel production as a source of both silicon and manganese. Silicomanganese generally contains by weight not less than 4 percent iron, more than 30 percent manganese, more than 8 percent silicon and not more than 3 percent phosphorous. Silicomanganese is properly classifiable under subheading 7202.30.0000 of the Harmonized Tariff Schedule of the United States (HTSUS). Some silicomanganese may also be classified under HTSUS subheading 7202.99.5040.

The low–carbon silicomanganese excluded from this scope is a ferro alloy with the following chemical specifications: minimum 55 percent manganese, minimum 27 percent silicon, minimum 4 percent iron, maximum 0.10 percent phosphorus, maximum 0.10 percent carbon and maximum 0.05 percent sulfur. Low–carbon silicomanganese is used in the manufacture of stainless steel and special carbon steel grades, such as motor lamination grade steel, requiring a very low carbon content. It is sometimes referred to as ferromanganese–silicon. Low–carbon silicomanganese is classifiable under HTSUS subheading 7202.99.5040. This scope covers all silicomanganese, regardless of its tariff classification. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope remains dispositive.

Analysis of Comments Received

All issues raised in the substantive responses by parties to these sunset reviews are addressed in the *Issues and Decision Memorandum for the Expedited Sunset Reviews of the Antidumping Duty Orders of Silicomanganese from India, Kazakhstan, and Venezuela; Final Results from Stephen J. Claeys, Deputy Assistant Secretary for Import Administration, to David M. Spooner, Assistant Secretary for Import Administration*, dated concurrently with this notice (''*Decision Memo*''), which is hereby adopted in this notice. The issues discussed in the *Decision Memo* include the likelihood of continuation or recurrence of dumping and the rate likely to prevail if the orders were revoked. Parties can find a complete discussion of all issues raised in these sunset reviews and the corresponding recommendation in this public memorandum which is on file in B–099, the Central Records Unit, of the main Commerce building. In addition, a complete version of the Decision Memo can be accessed directly on the Department's Web page at *http://ia.ita.doc.gov/frn*. The paper copy and electronic version of the *Decision Memo* are identical in content.

Final Results of Reviews

The Department determines that revocation of the antidumping duty orders on silicomanganese from India, Kazakhstan, and Venezuela would be likely to lead to continuation or recurrence of dumping at the following duty rates:

Manufacturers/Exporters/Producers	Weighted–Average Margin (percent)
India.	
Nava Bharat	15.32
Universal Ferro and Allied Chemicals, Ltd.	20.53
All Others Rate	17.74
Kazakhstan.	
Alloy 2000, S.A.	247.88
Kazakhstan–Wide Rate	247.88
Venezuela.	
Hornos Eléctricos de Venezuela, S.A.	
All Others Rate	24.62

International Trade Commission (ITC) Notification

In accordance with section 752(c)(3) of the Act, we will notify the ITC of the final results of this expedited sunset review.

Notification Regarding Administrative Protective Order

This notice also serves as the only reminder to parties subject to administrative protective orders (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective orders is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing this determination and notice in accordance with sections 751(c), 752, and 777(i) of the Act.

[1] Nava Bharat received an extension to May 8, 2007, to submit its substantive response.

Dated: July 25, 2007.

David M. Spooner,

Assistant Secretary for Import Administration.

Stainless Steel Bar from Spain: Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On March 28, 2007, the Department of Commerce published the preliminary results of the 2005/2006 administrative review of the antidumping duty order on stainless steel bar from Spain. We gave interested parties an opportunity to comment on the preliminary results. Based on our analysis of the comments received we did not make changes for the final results. The final weighted–average dumping margin for a single respondent is listed below in the ''Final Results of the Review'' section of this notice.

EFFECTIVE DATE: August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Dmitry Vladamirov or Minoo Hatten, AD/CVD Operations, Office 5, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–0665 and (202) 482–1690, respectively.

SUPPLEMENTARY INFORMATION:

Background

On March 28, 2007, the Department of Commerce (the Department) published *Stainless Steel Bar from Spain: Preliminary Results of Antidumping Duty Administrative Review*, 72 FR 14522 (March 28, 2007) (*Preliminary Results*) in the **Federal Register**. The period of review is March 1, 2005, through February 28, 2006.

We invited parties to comment on the Preliminary Results. On April 27, 2007, we received a case brief from the respondent, Sidenor Industrial SL (Sidenor). On May 7, 2007, Carpenter Technology Corporation, Valbruna Slater Stainless, Inc., and Electralloy Corporation, a Division of G.O. Carlson, Inc. (collectively, the domestic interested parties), filed a rebuttal brief. At the request of Sidenor, we held a hearing on May 16, 2007.

We have conducted this review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of Order

The product covered by this order is stainless steel bar (SSB). SSB means articles of stainless steel in straight lengths that have been either hot–rolled, forged, turned, cold–drawn, cold–rolled or otherwise cold–finished, or ground, having a uniform solid cross section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles, hexagons, octagons or other convex polygons. SSB includes cold–finished SSBs that are turned or ground in straight lengths, whether produced from hot–rolled bar or from straightened and cut rod or wire, and reinforcing bars that have indentations, ribs, grooves, or other deformations produced during the rolling process.

Except as specified above, the term does not include stainless steel semi–finished products, cut length flat–rolled products (*i.e.*, cut length rolled products which if less than 4.75 mm in thickness have a width measuring at least 10 times the thickness, or if 4.75 mm or more in thickness having a width which exceeds 150 mm and measures at least twice the thickness), wire (i.e., cold–formed products in coils, of any uniform solid cross section along their whole length, which do not conform to the definition of flat–rolled products), and angles, shapes and sections.

The SSB subject to this order is currently classifiable under subheadings 7222.10.0005, 7222.10.0050, 7222.20.0005, 7222.20.0045, 7222.20.0075, and 7222.30.0000 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this order is dispositive.

Analysis of Comments Received

All comments raised in the case and rebuttal briefs by parties in this review of the antidumping duty order on stainless steel bar from Spain are addressed in the ''Issues and Decision Memorandum'' from Stephen J. Claeys, Deputy Assistant Secretary, to David M. Spooner, Assistant Secretary, dated July 26, 2007 (Decision Memorandum), which is hereby adopted by this notice. The Decision Memorandum, which is a public document, is on file in the Central Records Unit, main Commerce building, Room B–099, and is accessible on the Web at http://ia.ita.doc.gov/frn/index.html. The paper copy and electronic version of the Decision Memorandum are identical in content.

Changes Since The Preliminary Results

With respect to Sidenor, in the *Preliminary Results*, we determined that the use of adverse facts available is appropriate as the basis for the weighted–average dumping margin. For these final results of review, we have continued to rely on the use of adverse facts available in establishing the weighted–average dumping margin for Sidenor for the period of review. Therefore, there were no changes since the *Preliminary Results*.

Use of Adverse Facts Available

In accordance with section 776(b) of the Act, we determine that the use of adverse facts available as the basis for the weighted–average dumping margin is appropriate for Sidenor. As explained in the *Preliminary Results* and in the Memorandum from Mark Todd to Neal Halper, entitled ''Use of Adverse Facts Available for the Preliminary Determination,'' dated March 22, 2007 (AFA Memo), we determined that the cost–of-production (COP) questionnaire responses submitted by Sidenor are incomplete and cannot be used to calculate an accurate dumping margin for Sidenor. Specifically, as a result of the serious deficiencies that we identified and that Sidenor failed repeatedly to address with respect to its reporting of the COP information, we are unable to determine adequately whether the reported COP information reflects, reasonably and accurately, the costs incurred by Sidenor to produce the merchandise under consideration. Without this information, we cannot calculate an accurate dumping margin for this company.

Therefore, as a consequence of the requested necessary information being absent from the record, we find that our reliance on facts otherwise available is warranted pursuant to section 776(a)(1) of the Act. Furthermore, we find that Sidenor has withheld requested information, failed to provide such information in the form and manner required, impeded the conduct of this review, and reported information that could not be verified. As such, pursuant to sections 776(a)(2)(A), (B), (C), and (D) of the Act, we find that the use of facts available for the final results is warranted. For a detailed discussion, please refer to the AFA Memo. See also the Decision Memorandum for a complete discussion of this issue.In addition, we find that Sidenor did not act to the best of its ability in reporting the COP information. Despite our repeated requests for information and

our generous provisions of extensions of due dates to respond, in some instances Sidenor continued to refrain from providing certain requested information regarding its reported costs; in other instances it provided confusing and sometimes contradictory information; yet in other instances it de–emphasized the significance or downplayed the necessity of our repeated requests for certain critical information by claiming that we had been ''misinterpreting'' or ''misunderstanding'' its COP response. See, *e.g.*, Sidenor's January 24, 2007, third supplemental Section D questionnaire response at pages 1, 5, and 6. Therefore, we find that Sidenor has failed to cooperate to the best of its ability because Sidenor failed consistently to address certain critical elements for which we sought clarification or explanation in order to alleviate our concerns regarding the accuracy and reliability of Sidenor's reporting of its COP information. Accordingly, for these final results we find that, in selecting from among the facts otherwise available, an adverse inference is warranted. See the AFA Memo and the Decision Memorandum for a complete discussion of this issue.

As total adverse facts available, we have applied the highest rate determined in the less–than-fair–value investigation, which is 62.85 percent. See *Notice of Final Determination of Sales at Less Than Fair Value: Stainless Steel Bar From Spain*, 59 FR 66931 (December 28, 1994). Furthermore, as required by section 776(c) of the Act, we corroborated this margin with respect to Sidenor, to the extent practicable. For a detailed explanation of how we corroborated this margin, see the *Preliminary Results*. See also the Decision Memorandum for a complete discussion of this issue.

Final Results of the Review

As a result of our review, we determine a dumping margin of 62.85 percent for Sidenor for the period March 1, 2005, through February 28, 2006.

Assessment Rates

The Department will determine and U.S. Customs and Border Protection (CBP) shall assess antidumping duties on all appropriate entries, in accordance with 19 CFR 351.212(b). Because we are relying on total adverse facts available to establish Sidenor's dumping margin, we will instruct CBP to apply a dumping margin of 62.85 percent to all entries of subject merchandise during the period of review produced and/or exported by Sidenor. The Department intends to issue instructions to CBP 15 days after the date of publication of these final results of review.

Cash–Deposit Requirements

The following deposit requirements will be effective upon publication of this notice of final results of administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication, consistent with section 751(a)(1) of the Act: (1) the cash–deposit rate for Sidenor will be 62.85 percent; (2) for previously investigated companies not listed above, the cash–deposit rate will continue to be the company–specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a previous review, or the original less–than-fair–value (LTFV) investigation but the manufacturer is, the cash–deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; (4) the cash–deposit rate for all other manufacturers or exporters will continue to be 25.77 percent, which is the ''all others'' rate established in the LTFV investigation. See *Amended Final Determination and Antidumping Duty Order: Stainless Steel Bar From Spain*, 60 FR 11656 (March 2, 1995). These deposit requirements shall remain in effect until further notice.

Notification

This notice serves as a reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: July 26, 2007.

David M. Spooner,

Assistant Secretary for Import Administration.

Wooden Bedroom Furniture From The People's Republic of China: Notice of Partial Rescission of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On March 7, 2007, the Department of Commerce (''the Department'') initiated the second administrative review of the antidumping duty order on wooden bedroom furniture from the People's Republic of China (''PRC'') covering the period January 1, 2006, through December 31, 2006. *See Notice of Initiation of Administrative Review of the Antidumping Duty Order on Wooden Bedroom Furniture from the People's Republic of China,* 72 FR 10159 (March 7, 2007) (''*Initiation Notice*'').[1] Between March 7 and June 6, 2007, several parties withdrew their requests for review. Therefore, the Department is rescinding the administrative review of sales of wooden bedroom furniture with respect to the entities for whom all review requests have been withdrawn.

DATES: *Effective Date:* August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Robert Bolling, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–3434

SUPPLEMENTARY INFORMATION:

Background

On January 4, 2005, the Department published in the **Federal Register** the antidumping duty order on wooden bedroom furniture from the PRC. *See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Wooden Bedroom Furniture from the People's*

[1] On May 30, 2007, the Department published a subsequent notice clarifying that Country Roots Furniture Inc. was omitted from the Initiation Notice. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part,* 72 FR 29968, 29969 n. 5 (May 30, 2007).

Republic of China, 70 FR 329 (January 4, 2005). On January 3, 2007, the Department published a notice of opportunity to request an administrative review of the antidumping duty order on wooden bedroom furniture from the PRC for the period January 1, 2006, through December 31, 2006. *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation: Opportunity to Request Administrative Review,* 72 FR 99 (January 3, 2007).

The Department received multiple timely requests for review and on March 7, 2007, in accordance with section 751(a) of Tariff Act of 1930, as amended (''the Act''), published in the **Federal Register** a notice of the initiation of the antidumping duty administrative review of wooden bedroom furniture from the PRC for the 2006 period of review. *See Initiation Notice.*

Partial Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), the Department will rescind an administrative review, in whole or in part, if a party that requested a review withdraws the request within 90 days of the date of publication of the notice of initiation. In response to a timely filed extension request from Petitioners to extend the withdrawal deadline, the Department extended the deadline for withdrawing review requests. Because all requesting parties withdrew their respective requests for review of the following entities, the Department is rescinding this review with respect to these entities, in accordance with 19 CFR 351.213(d)(1):

Assessment

The Department will instruct U.S. Customs and Border Protection (''CBP'') to assess antidumping duties on all appropriate entries for the above-named entities. For those companies for which this review has been rescinded, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). The Department will issue appropriate assessment instructions directly to CBP 15 days after the publication of this notice in the **Federal Register**.

In addition, the Department is rescinding this review with respect to the following entities which did not receive a separate rate in any completed prior segment of this proceeding. For purposes of initiation of this administrative review, the Department accepted requests for review of these entities based upon the premise that such entities would seek to demonstrate in this review that they were, in law and in fact, separate from the PRC-wide entity, and therefore, entitled to a rate separate from the rate established for the PRC-wide entity. However, as the requests for review of these entities have been withdrawn, these entities may be subject to this review as part of the single PRC-wide entity.[3] Therefore, the Department will provide assessment instructions to CBP for the PRC-wide entity, which includes the following companies, after the final results of this administrative review.

Engmost Investments Limited
Golden Well International (HK), Ltd.
Hainan Rulai Furniture Co., Ltd.
Huizhou Jadom Furniture Co., Ltd., Jadom Furniture Co., Ltd.
Kong Fong Furniture, Kong Fong Mao Iek Hong
Kunshan Junsen Furniture Co., Ltd.
Nathan China Group
Putian Ou Dian Furniture Co., Ltd.
Time Crown (U.K.) International Ltd., China United International Co.
Tradewinds Furniture Ltd.
Tradewinds International Enterprise Ltd.
Trendex Industries Limited (BVI)

The review will continue with respect to all other entities identified in the *Initiation Notice.*

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's assumption that reimbursement of antidumping duties occurred and subsequent assessment of double antidumping duties.

Notification Regarding Administrative Protective Orders (''APOs'')

This notice also serves as a reminder to parties subject to APOs of their responsibility concerning the return or destruction of proprietary information disclosed under an APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is in accordance with section 777(i)(1) of the Act, and 19 CFR 351.213(d)(4) of the Department's regulations.

Dated: July 25, 2007 .

Stephen J. Claeys,

Deputy Assistant Secretary for Import Administration.

Circular Welded Carbon Quality Steel Pipe from the People's Republic of China: Notice of Postponement of Preliminary Determination in the Countervailing Duty Investigation

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Damian Felton or Nancy Decker, AD/CVD Operations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–0133 and (202) 482–0196, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 27, 2007, the Department of Commerce (''the Department'') initiated the countervailing duty investigation of circular welded carbon quality steel pipe from the People's Republic of China. *See Notice of Initiation of Countervailing Duty Investigation: Circular Welded Carbon Quality Steel Pipe from the People's Republic of China*, 72 FR 36668 (July 5, 2007). Currently, the preliminary determination is due no later than August 31, 2007.

Postponement of Due Date for Preliminary Determinations

Section 703(b)(1) of the Tariff Act of 1930, as amended (''the Act''), requires the Department to issue the preliminary determination in a countervailing duty investigation within 65 days after the date on which the Department initiated the investigation. However, if the Department concludes that the parties concerned in the investigation are cooperating and determines that the investigation is extraordinarily complicated, section 703(c)(1)(B)(i) of the Act allows the Department to postpone making the preliminary determination until no later than the 130 days after the date on which the administering authority initiated the investigation.

The Department concludes that, thus far, the parties concerned are cooperating. Furthermore, due to the complexity of the alleged countervailable subsidy practices being investigated, which include provision of goods or services for less than adequate remuneration and government restraints on exports, it is not practicable to complete the preliminary determination of this investigation within the original time limit (i.e., August 31, 2007). Therefore, in accordance with section 703(c)(1)(B)(i) of the Act, we are fully extending the due date for the preliminary determination to no later than 130 days after the day on which the investigation was initiated. As this deadline falls on a weekend, however, the fully extended deadline is the next business day, November 5, 2007.

This notice is issued and published pursuant to section 703(c)(2) of the Act.

Dated: July 26, 2007.

Stephen J. Claeys,

Deputy Assistant Secretary for Import Administration.

[C–533–821]

Hot–Rolled Carbon Steel Products from India: Extension of Time Limit for Preliminary Results of Countervailing Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: August 2, 2007.

FOR FURTHER INFORMATION CONTACT: Gayle Longest or Robert Copyak, AD/CVD Operations, Office 3, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3338 or (202) 482–2209, respectively.

SUPPLEMENTARY INFORMATION:

Background

On February 2, 2007, the U.S. Department of Commerce (''the Department'') published a notice of initiation of the administrative review of the countervailing duty order on certain hot–rolled carbon steel flat products from the India covering the period of review January 1, 2006, through December 31, 2006. *See Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 72 FR 5005 (February 2, 2007). The preliminary results are currently due no later than September 4, 2007.

Extension of Time Limit for Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (''the Act''), requires the Department to make a preliminary determination within 245 days after the last day of the anniversary month of an order or finding for which a review is requested. Section 751(a)(3)(A) of the Act further states that if it is not practicable to complete the review within the time period specified, the administering authority may extend the 245-day period to issue its preliminary results by up to 120 days.

Due to new subsidy allegations and the large number of companies and programs in this administrative review, we have determined that it is not

practicable to complete the preliminary results of this review within the 245-day period. Therefore, in accordance with section 751(a)(3)(A) of the Act, we are extending the time period for issuing the preliminary results of the review to 365 days. The preliminary results are now due no later than December 31, 2007. The final results continue to be due 120 days after publication of the preliminary results.

This notice is issued and published in accordance with section 751(a)(3)(A) of the Act.

Dated: July 27, 2007.

Solicitation of Applications for Allocation of Tariff Rate Quotas on the Imports of Certain Cotton Shirting Fabric to Persons Who Cut and Sew Men's and Boys' Cotton Shirts in the United States

AGENCY: Department of Commerce, International trade Administration.

ACTION: Notice.

SUMMARY: The Department hereby solicits applications from persons (including firms, corporations, or other legal entities) who cut and sew men's and boys' cotton shirts in the United States for an allocation of the 2007 tariff rate quotas on certain cotton woven fabric. Interested persons must submit ITA Form 4156P to the address listed below. After the Department has made its allocations of the 2007 tariff rate quotas, the Department will publish in the **Federal Register** a notice informing the public of this action.

DATES: To be considered, applications must be received or postmarked by 5 p.m. EDT on September 4, 2007.

ADDRESSES: Applications must be submitted to the Office of Textiles and Apparel, Room 3001, United States Department of Commerce, Washington, D.C. 20230 (telephone: (202) 482–4058). Application forms may be obtained from that office (via facsimile or mail) or from the following Internet address: http://web.ita.doc.gov/tacgi/cottontrq.nsf/TRQApp.

FOR FURTHER INFORMATION CONTACT: Sergio Botero, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4058.

SUPPLEMENTARY INFORMATION:

Background

On December 9, 2006, President Bush signed into law the Tax Relief and Health Care Act of 2006 (HR 6406/HR 6111) (''the Act''). Section 406(b)(1) of the Act requires the Secretary of Commerce to fairly allocate tariff rate quotas on the import of certain cotton woven fabrics through December 31, 2009. Section 406 (b)(1) authorizes the Secretary of Commerce to issue licenses to eligible manufacturers under headings 9902.52.08 through 9902.52.19 of the Harmonized Tariff Schedule of the United States, specifying the restrictions under each such license on the quantity of cotton woven fabrics that may be entered each year on behalf of the manufacturer. The Act created an annual tariff rate quota providing for temporary reductions through December 31, 2009 in the import duties of cotton woven fabrics suitable for making cotton shirts (new Harmonized Tariff Schedule of the United States (HTS) headings 9902.52.08, 9902.52.09, 9902.52.10, 9902.52.11, 9902.52.12, 9902.52.13, 9902.52.14, 9902.52.15, 9902.52.16, 9902.52.17, 9902.52.18, and 9902.52.19). The reduction in duty is limited to 85 percent of the total square meter equivalents of all imported woven fabrics of cotton containing 85 percent or more by weight cotton used by manufacturers in cutting and sewing men's and boy's cotton shirts in the United States and purchased by such manufacturer during calendar year 2000.

The Act requires that the tariff rate quotas be allocated to persons (including firms, corporations, or other legal entities) who, during calendar year 2000, were manufacturers cutting and sewing men's and boy's cotton shirts in the United States from imported woven fabrics of cotton containing 85 percent or more by weight cotton of the kind described in HTS 9902.52.08 through 9902.5219 purchased by such manufacturer during calendar year 2000. On July 24, 2007, the Department published regulations establishing procedures for allocating the TRQ. 72 FR 40235, 15 CFR 336. In order to receive an allocation, an applicant must submit ITA Form 4156P provided at http://web.ita.doc.gov/tacgi/cotton.nsf/TRQApp to the address listed above by 5 p.m. on September 4, 2007 in compliance with the requirements of 15 CFR 336. Any business confidential information that is marked business confidential will be kept confidential and protected from disclosure to the full extent permitted by law.

Dated: July 27, 2007.

R. Matthew Priest,

Deputy Assistant Secretary for Textiles and Apparel.

RIN 0648–XB71

2007 Monkfish Research Set-aside Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; reallocation of set-aside days-at-sea.

SUMMARY: NMFS notifies the public of the reallocation of monkfish research days-at-sea (DAS) as exempted DAS. These are DAS that were set aside under the 2007 Monkfish Research Set-Aside (RSA) Program, but were not distributed through the NOAA grant process. These exempted DAS may be used for the conduct of monkfish related research activities during fishing year (FY) 2007 (May 1, 2007, through April 30, 2008). Requests for a monkfish DAS exemption must be submitted with a complete application for an exempted fishing permit (EFP).

DATES: Projects involving the use of exempted DAS, under this program, must be completed prior to the end of FY 2007, on April 30, 2008.

ADDRESSES: Applications for an EFP must be sent to the Regional Administrator (RA), NMFS, Northeast Regional Office, One Blackburn Drive, Gloucester, MA 01930.

FOR FURTHER INFORMATION CONTACT: Allison McHale, Fishery Policy Analyst, by phone 978–281–9103, by fax 978–281–9135, or by e-mail at *Allison.McHale@noaa.gov*.

SUPPLEMENTARY INFORMATION:

Background

Amendment 2 to the Monkfish Fishery Management Plan (FMP) (70 FR 21927, April 28, 2005) established the Monkfish RSA Program, which annually sets aside 500 monkfish DAS from the total number of monkfish DAS allocated to limited access monkfish vessels to be used for cooperative monkfish research

programs. Amendment 2 also established a Monkfish Exemption Program, which requires the Regional Administrator (RA) to reallocate as exempted DAS any monkfish research DAS not allocated through the Monkfish RSA Program. These exempted DAS may be then used by vessels for the conduct of monkfish research activities during the current fishing year (e.g., FY 2007).

On June 12, 2006, NMFS published a notice in the **Federal Register** announcing the 2007 Monkfish RSA Program (71 FR 33898), and solicited proposals for monkfish research activities to be conducted under this RSA program. Four proposals were received as part of this solicitation, and three were granted awards totaling 367 monkfish research DAS. As a result, there are 133 DAS available to be reallocated as exempted DAS during FY 2007. Therefore, the RA, pursuant to the regulations governing the monkfish fishery at 50 CFR 648.92(c)(1)(v), reallocates these unused research DAS from the FY 2007 Monkfish RSA Program, as exempted DAS, that may be used for the conduct of monkfish research projects during FY 2007.

All requests for monkfish DAS exemptions under the Monkfish DAS Exemption Program must be submitted to the RA along with a complete application for an EFP. The requirements for submitting a complete EFP application are provided in the regulations implementing the Magnuson-Stevens Fishery Conservation and Management Act at § 600.745(b).

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

This document contains collection-of-information requirements subject to the Paperwork Reduction Act (PRA). The information requested in an EFP application has been approved under Office of Management and Budget (OMB) Control Number 0648–0309. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA unless that collection of information displays a currently valid OMB control number.

Authority: 16 U.S.C. 1801 *et seq.*

Dated:July 26, 2007.

Endangered Species; File No. 1526–01

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit modification.

SUMMARY: Notice is hereby given that Andre Landry, Sea Turtle and Fisheries Ecology Research Lab, Texas A&M University at Galveston, 5007 Avenue U, Galveston, TX 77553 has been issued a modification to scientific research Permit No. 1526.

ADDRESSES: The modification and related documents are available for review upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713–2289; fax (301)427–2521; and

Southeast Region, NMFS, 263 13th Ave South, St. Petersburg, FL 33701; phone (727)824–5312; fax (727)824–5309.

FOR FURTHER INFORMATION CONTACT: Patrick Opay or Kate Swails, (301)713–2289.

SUPPLEMENTARY INFORMATION: On May 24, 2007, notice was published in the **Federal Register** (72 FR 29132) that a modification of Permit No. 1526, issued August 1, 2005 (70 FR 44091), had been requested by the above-named individual. The requested modification has been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

The modification allows Dr. Landry to expand his sample size. It extends the annual take of sea turtles through 2010; authorizes the attachment of additional satellite transmitters to animals; and allows the collection of biopsy samples of skin and carapace scute tissue from green sea turtles for stable isotope analysis to document life history changes, foraging and habitat selection, migration, and diet in green sea turtles.

Issuance of this modification, as required by the ESA was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: July 26, 2007.

BILLING CODE 3510–22–S

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Renewal of a Currently Approved Information Collection

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (hereinafter the ''Corporation''), is conducting a pre-clearance consultation for renewal of the AmeriCorps Performance Measurement Survey information collection request (ICR) in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104–13), (44 U.S.C. Chapter 35). Copies of the individual ICR may be obtained by calling the Corporation for National and Community Service, Brooke Nicholas, (202) 606–6627. Individuals who use a telecommunications device for the deaf (TTY–TDD) may call (202) 606–3472 between 8:30 a.m. and 5 p.m. Eastern time, Monday through Friday.

ADDRESSES: Comments may be submitted, identified by the title of the information collection activity, to the Corporation for National and Community Service, Attn: Ms. Brooke Nicholas, by any of the following two methods within 60 days from the date of this publication in the **Federal Register**:

(1) *By fax to:* (202) 3606–3464, *Attention:* Ms. Brooke Nicholas; and

(2) *Electronically by e-mail to: bnicholas@cns.gov.*

SUPPLEMENTARY INFORMATION:

Description: The Corporation is strongly committed to making its performance measurement and management systems more results oriented in order to strengthen the accountability and performance of its

programs. As part of its effort to do so, there is a need to collect outcome information regarding the Corporation's AmeriCorps programs consisting of AmeriCorps*State and National, AmeriCorps*VISTA, and AmeriCorps*National Civilian Community Corps (NCCC). Information on program performance will be informed by a series of surveys of a sample of AmeriCorps members and sub-grantee organizations that deliver services.

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Propose ways to enhance the quality, utility, and clarity of the information to be collected; and
- Propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Type of Review: Renewal.

Agency: Corporation for National and Community Service.

Title: Performance Measurement in AmeriCorps: Surveys of Members, Organizations and End Beneficiaries.

OMB Number: 3045–0094.

Frequency: Annual.

Affected Public: Individuals and households, community and faith-based organizations, non-profits, state and local government and education institutions.

Number of Respondents: 10,000.

Estimated Time Per Respondent: Ten minutes

Total Burden Hours: 1,667 hours.

Total Burden Cost (capital/startup): None.

Total Annual Cost (operating/maintaining systems or purchasing services): None.

Dated: July 27, 2007.

Kevin Cramer,

Acting Director, Department of Research and Policy Development.

BILLING CODE 5001–06–M

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

SUMMARY: The Acting Leader, Regulatory Information Management Services, Office of Management invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before September 4, 2007.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Education Desk Officer, Office of Management and Budget, 725 17th Street NW., Room 10222, Washington, DC 20503. Commenters are encouraged to submit responses electronically by e-mail to *oira_submission@omb.eop.gov* or via fax to (202) 395–6974. Commenters should include the following subject line in their response ''Comment: [insert OMB number], [insert abbreviated collection name, e.g., ''Upward Bound Evaluation'']. Persons submitting comments electronically should not submit paper copies.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Leader, Regulatory Information Management Services, Office of Management, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing, or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

Dated: July 30, 2007.

James Hyler,

Acting Leader, Information Management Case Services Team, Regulatory Information Management Services Office of Management.

Institute of Education Sciences

Type of Review: New.

Title: A Study of the Effectiveness of a School Improvement Intervention.

Frequency: Semi-annually, annually.

Affected Public: Not-for-profit institutions.

Reporting and Recordkeeping Hour Burden:

Responses: 3,979.

Burden Hours: 6,452.

Abstract: This randomized control trial study will examine the

effectiveness of Success in Sight (SiS) in 52 elementary schools with low to moderate student achievement. This study will specifically examine the impact of SiS on student achievement and on school practices associated with school improvement. The primary data collection will include a teacher survey assessing school improvement practices (data-based decision-making, practices associated with improved student achievement, shared leadership, and purposeful community) and student achievement data. Data collection will occur over a two-year period. Hierarchical Linear Modeling (HLM) will be used to determine the effects of SiS on school-level student achievement and school-level reform practices.

Requests for copies of the information collection submission for OMB review may be accessed from *http://edicsweb.ed.gov*, by selecting the ''Browse Pending Collections'' link and by clicking on link number 3361. When you access the information collection, click on ''Download Attachments '' to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue SW., Potomac Center, 9th Floor, Washington, DC 20202–4700. Requests may also be electronically mailed to *ICDocketMgr@ed.gov* or faxed to 202–245–6623. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to *ICDocketMgr@ed.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Reading First Advisory Committee; Notice of Open Meeting

AGENCY: Department of Education, Office of Elementary and Secondary Education.

ACTION: Notice of open meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the first open meeting of the Reading First Advisory Committee. The notice also describes the functions of the Committee. Notice of the meeting is required by section 10(a)(2) of the Federal Advisory Committee Act and is intended to notify the public of their opportunity to attend.

DATE AND TIME: August 20 from 10 a.m. to 3 p.m.; August 22 from 9 a.m. to 3 p.m.

ADDRESSES: The Beacon Hotel, 1615 Rhode Island Avenue, NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Deborah Spitz, Reading First Team Leader, Reading First Advisory Committee; 400 Maryland Avenue, SW., Washington, DC 20202; telephone: (202) 260–3793; fax: (202) 260–8969; e-mail: *Deborah.Spitz@ed.gov.*

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FRS) at 1–800–877–8339, Monday through Friday between the hours of 8 a.m. and 8 p.m., Eastern Standard Time.

SUPPLEMENTARY INFORMATION: The Reading First Advisory Committee is authorized by Sections 1203(c)(2)(a) and 1202(e)(2) of the Elementary and Secondary Education Act (ESEA) of 1965, as amended. The Committee is being established by the Department of Education to evaluate Reading First applications submitted by States, to review the progress reports that States submit after the third year of the grant period, to advise on the awarding of Targeted Assistance Grants, and to advise the Secretary on other issues that the Secretary deems appropriate.

At this meeting, members of the Committee will be sworn in and will discuss the purpose and responsibilities of the Committee. Committee members will select a Committee Chair, develop procedures for completing the tasks described in its charter, and plan future meetings. To the extent practicable, Committee members will begin the work described in the charter, including but not limited to reviewing applications for the Targeted Assistance Grants (TAG).

Individuals who will need accommodations for a disability in order to attend the meeting (e.g., interpreting services, assistance listening devices, or materials in alternative format) should notify Deborah Spitz at (202) 260–3793, no later than ten (10) days before the scheduled date of the meeting. We will attempt to meet requests for accommodations after this date but cannot guarantee their availability. The meeting site is accessible to individuals with disabilities.

Request for Written Comments: Written comments should be submitted via e-mail at least ten (10) days prior to the scheduled date of the meeting to Deborah Spitz at *Deborah.Spitz@ed.gov.* These comments will be shared with the members of the Committee.

Records are kept of all Committee proceedings and are available for public inspection at 400 Maryland Ave., SW., Washington, DC 20202, from the hours of 9 a.m. to 5 p.m., Eastern Standard Time, Monday through Friday.

Electronic Access to This Document: You may view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *http://www.ed.gov/news/fedregister/index.html.*

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free at 1–888–293–6498; or in the Washington, DC area at (202) 512–1530.

BILLING CODE 4001–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER07–1106–000]

ArcLight Energy Marketing, LLC.; Notice of Issuance of Order

July 26, 2007.

ArcLight Energy Marketing, LLC. (AEM) filed an application for market-based rate authority, with an accompanying tariff. The proposed market-based rate tariff provides for the sale of energy, capacity and ancillary services at market-based rates. AEM also requested waivers of various Commission regulations. In particular, AEM requested that the Commission grant blanket approval under 18 CFR part 34 of all future issuances of securities and assumptions of liability by AEM.

On July 25, 2007, pursuant to delegated authority, the Director, Division of Tariffs and Market Development—West, granted the requests for blanket approval under part 34 (Director's Order). The Director's Order also stated that the Commission would publish a separate notice in the **Federal Register** establishing a period of

time for the filing of protests. Accordingly, any person desiring to be heard concerning the blanket approvals of issuances of securities or assumptions of liability by AEM should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. 18 CFR 385.211, 385.214 (2004).

Notice is hereby given that the deadline for filing protests is August 24, 2007.

Absent a request to be heard in opposition to such blanket approvals by the deadline above, AEM is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of AEM, compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approvals of AEM's issuance of securities or assumptions of liability.

Copies of the full text of the Director's Order are available from the Commission's Public Reference Room, 888 First Street, NE., Washington, DC 20426. The Order may also be viewed on the Commission's Web site at *http://www.ferc.gov,* using the eLibrary link. Enter the docket number excluding the last three digits in the docket number filed to access the document. Comments, protests, and interventions may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the ''e-Filing'' link. The Commission strongly encourages electronic filings.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER07–981–000]

Barclays Capital Energy, Inc.; Notice of Issuance of Order

July 26, 2007.

Barclays Capital Energy, Inc. (Barclays Capital) filed an application for market-based rate authority, with an accompanying rate schedule. The proposed market-based rate schedule provides for the sale of energy, capacity and ancillary services at market-based rates. Barclays Capital also requested waivers of various Commission regulations. In particular, Barclays Capital requested that the Commission grant blanket approval under 18 CFR part 34 of all future issuances of securities and assumptions of liability by Barclays Capital.

On July 25, 2007, pursuant to delegated authority, the Director, Division of Tariffs and Market Development—West, granted the requests for blanket approval under part 34 (Director's Order). The Director's Order also stated that the Commission would publish a separate notice in the **Federal Register** establishing a period of time for the filing of protests. Accordingly, any person desiring to be heard concerning the blanket approvals of issuances of securities or assumptions of liability by Barclays Capital should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. 18 CFR 385.211, 385.214 (2004).

Notice is hereby given that the deadline for filing protests is August 24, 2007.

Absent a request to be heard in opposition to such blanket approvals by the deadline above, Barclays Capital is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of Barclays Capital compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approvals of Barclays Capital's issuance of securities or assumptions of liability.

Copies of the full text of the Director's Order are available from the Commission's Public Reference Room, 888 First Street, NE., Washington, DC 20426. July 26, 2007.

Take notice that on July 24, 2007, Leaf River Energy Center, LLC. (Leaf River), 61 Wilton Road, Westport, CT, 06880, filed in Docket No. CP07–422–000, a petition for Exemption of Temporary Acts and Operations from Certificate Requirements, pursuant to Rule 207(a)(5) of the Commission's Rules of Practice and Procedure, and section 7(c)(1)(B) of the Natural Gas Act, seeking approval of an exemption from certificate requirements to perform temporary activities related to drilling three test wells and performing other activities to assess the feasibility of developing an underground natural gas storage facility in the New Home Salt Dome in Smith County, Mississippi, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing may also be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, call (202) 502–8659 or TTY, (202) 208–3676.

Any questions regarding this application should be directed to James F. Bowe, Jr., Dewey Ballantine, LLP., 975 F Street, NW., Washington, DC 20004, at (202) 862–1000, or by fax at (202) 862–1093, or e-mail *jbowe@deweyballantine.com.*

Pursuant to Section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NW., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov,* or call

(866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5 pm Eastern Time on August 3, 2007.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER07–964–000]

UNS Electric, Inc.; Notice of Issuance of Order

July 26, 2007.

UNS Electric, Inc. (UNS Electric) filed an application for market-based rate authority, with an accompanying rate schedule. The proposed market-based rate schedule provides for the sale of energy, capacity and ancillary services at market-based rates. UNS Electric also requested waivers of various Commission regulations. In particular, UNS Electric requested that the Commission grant blanket approval under 18 CFR part 34 of all future issuances of securities and assumptions of liability by UNS Electric.

On July 25, 2007, pursuant to delegated authority, the Director, Division of Tariffs and Market Development—West, granted the requests for blanket approval under part 34 (Director's Order). The Director's Order also stated that the Commission would publish a separate notice in the **Federal Register** establishing a period of time for the filing of protests. Accordingly, any person desiring to be heard concerning the blanket approvals of issuances of securities or assumptions of liability by UNS Electric should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. 18 CFR 385.211, 385.214 (2004).

Notice is hereby given that the deadline for filing protests is August 24, 2007.

Absent a request to be heard in opposition to such blanket approvals by the deadline above, UNS Electric is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of UNS Electric, compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approvals of UNS Electric's issuance of securities or assumptions of liability.

Copies of the full text of the Director's Order are available from the Commission's Public Reference Room, 888 First Street, NE., Washington, DC 20426. The Order may also be viewed on the Commission's Web site at *http://www.ferc.gov*, using the eLibrary link. Enter the docket number excluding the last three digits in the docket number filed to access the document. Comments, protests, and interventions may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the ''e-Filing'' link. The Commission strongly encourages electronic filings.

Kimberly D. Bose,

Secretary.

[Docket No. CP06–19–002]

Windy Hill Gas Storage, LLC; Notice of Compliance Filing

July 26, 2007.

Take notice that on June 29, 2007, Windy Hill Gas Storage, LLC (Windy Hill) tendered for filing a compliance filing pursuant to the Commission's order issued on June 21, 2007 in Docket No. CP06–19–001.

Windy Hill states that copies of the filing were served on parties on the official service list in the above-captioned proceeding.

Any person desiring to protest this filing must file in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). Protests to this filing will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Such protests must be filed on or before the date as indicated below. Anyone filing a protest must serve a copy of that document on all the parties to the proceeding.

The Commission encourages electronic submission of protests in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings # 1

July 25, 2007.

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC07–117–000.

Applicants: Sunbury Generation LP; Corona Power, LLC.

Description: Joint Application of Sunbury Generation LP and Corona Power LLC for authorization under section 203 of the Federal Power Act.

Filed Date: July 18, 2007.

Accession Number: 20070720–0050.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 8, 2007.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG07–57–000.

Applicants: EL Segundo Power II LLC.

Description: Notice of Self-Certification of EL Segundo Power II LLC of exempt wholesale generator status.

Filed Date: July 6, 2007.

Accession Number: 20070606–5040.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 1, 2007.

Docket Numbers: EG07–57–000.

Applicants: EL Segundo Power II LLC.

Description: Clarification of June 6, 2007 filing of EL Segundo Power II LLC.

Filed Date: June 26, 2007.
Accession Number: 20070626–5027.
Comment Date: 5 p.m. Eastern Time on Wednesday, August 1, 2007.

Docket Numbers: EG07–61–000.
Applicants: Warm Springs Biomass Project, LLC.
Description: Amendment to Notice of Self-Certification of Exempt Wholesale Generator Status.
Filed Date: July 12, 2007.
Accession Number: 20070711–5233.
Comment Date: 5 p.m. Eastern Time on Thursday, August 2, 2007.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER01–666–009.
Applicants: EWO Marketing, LP.
Description: EWO Marketing LP submits the refund report related to refunds.
Filed Date: July 20, 2007.
Accession Number: 20070724–0180.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER04–831–003.
Applicants: Calpine Newark, LLC.
Description: Calpine Newark, LLC submits an updated market analysis in accordance with FERC's letter order dated July 21, 2004.
Filed Date: July 23, 2007.
Accession Number: 20070724–0200.
Comment Date: 5 p.m. Eastern Time on Monday, August 13, 2007.

Docket Numbers: ER04–925–017.
Applicants: Merrill Lynch Commodities, Inc.
Description: Triennial Updated Market Power Analysis for Merrill Lynch Commodities, Inc.
Filed Date: July 19, 2007.
Accession Number: 20070724–0175.
Comment Date: 5 p.m. Eastern Time on Thursday, August 9, 2007.

Docket Numbers: ER06–739–006; ER06–738–006; ER03–983–005; ER07–501–002; ER07–758–001; ER02–537–009.
Applicants: Cogen Technologies Linden Venture, L.P.
Description: Cogen Technologies Linden Venture, LP et al notifies FERC of a change in status resulting from the acquisition of a 100 percent indirect interest in Shady Hills by General Electric Capital Corp.
Filed Date: July 20, 2007.
Accession Number: 20070724–0178.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–570–003.
Applicants: New York Independent System Operator, Inc.
Description: New York Independent System Operator, Inc submits revised Market Administration and Control Area Services Tariff and Open Access Transmission Tariff Sheets in compliance w/FERC's July 21, 2007 order.
Filed Date: July 20, 2007.
Accession Number: 20070724–0179.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–946–002; ER07–947–002; ER07–948–002.
Applicants: Westar Energy, Inc.
Description: Westar Energy, Inc submits First Revised Sheet 8 to 1st Revised FERC Electric Rate Schedule 226.
Filed Date: July 19, 2007.
Accession Number: 20070724–0176.
Comment Date: 5 p.m. Eastern Time on Thursday, August 9, 2007.

Docket Numbers: ER07–954–001.
Applicants: American Transmission Company LLC.
Description: American Transmission Company LLC submits a response to an informal request for information by FERC Staff regarding the amended Distribution-Transmission Interconnection Agreement filed on May 25, 2007.
Filed Date: July 20, 2007.
Accession Number: 20070724–0177.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–1171–001.
Applicants: Arizona Public Service Company.
Description: Arizona Public Service Co submits an errata to the corrected version of the tariff sheets filed in section 205 Filing.
Filed Date: July 20, 2007.
Accession Number: 20070724–0135.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–1175–000.
Applicants: Illinois Power Company d/b/a AmerenIP.
Description: Illinois Power Co dba AmerenIP's et al requests approval of the Joint Ownership Agreement with Ameren Transco.
Filed Date: July 19, 2007.
Accession Number: 20070724–0130.
Comment Date: 5 p.m. Eastern Time on Thursday, August 9, 2007.

Docket Numbers: ER07–1176–000.
Applicants: Niagara Mohawk Power Corporation.
Description: Niagra Mohawk Power Co submits a notice of Cancellation of Rate Schedule 172 with Lockport Energy Associates, LP.
Filed Date: July 19, 2007.
Accession Number: 20070724–0131.
Comment Date: 5 p.m. Eastern Time on Thursday, August 9, 2007.

Docket Numbers: ER07–1177–000.
Applicants: Midwest Independent Transmission System Operator, Inc.
Description: Midwest Independent Transmission System Operator, Inc. submits an executed Small Generator Interconnection Agreement with Odin Wind Farm, LLC.
Filed Date: July 19, 2007.
Accession Number: 20070724–0132.
Comment Date: 5 p.m. Eastern Time on Thursday, August 9, 2007.

Docket Numbers: ER07–1178–000.
Applicants: Xcel Energy Operating Companies.
Description: Xcel Energy Services Inc submits the Revised and Restated Interconnection and Interchange Agreement dated July 23, 2007 b/w Northern States Power Company (Minnesota), Northern States Power Co (Wisconsin) etc.
Filed Date: July 19, 2007.
Accession Number: 20070724–0186.
Comment Date: 5 p.m. Eastern Time on Thursday, August 9, 2007.

Docket Numbers: ER07–1179–000.
Applicants: Pacific Gas and Electric Company.
Description: Pacific Gas and Electric Company submits its quarterly filing of Facilities Agreements pursuant to the Procedures for Implementation of section 3.3 of the 1987 Agreement.
Filed Date: July 20, 2007.
Accession Number: 20070724–0182.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–1180–000.
Applicants: California Independent System Operator Corporation
Description: Petition of the California Independent System Operator Corp to waive sanctions for violation of section 31.1.4.1 of its tariff through October 18, 2006.
Filed Date: July 20, 2007.
Accession Number: 20070724–0137.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–1181–000.
Applicants: New York Independent System Operator, Inc.
Description: New York Independent System Operator, Inc submits a single limited revision to its Open Access Transmission Tariff.
Filed Date: July 20, 2007.
Accession Number: 20070724–0136.
Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–1182–000.
Applicants: Midwest Independent Transmission System Operator, Inc.
Description: Midwest Independent Transmission System Operator, Inc submits its request for an extension of the Broad Constrained Area mitigation measures provided in their Open Access Transmission & energy Markets Tariff.

Filed Date: July 20, 2007.

Accession Number: 20070724–0134.

Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Docket Numbers: ER07–1183–000.

Applicants: Susquehanna Energy Products, LLC.

Description: SIG Energy, LLLP submits a supplement to its June 8, 2007 Notice of Succession.

Filed Date: July 20, 2007.

Accession Number: 20070724–0133.

Comment Date: 5 p.m. Eastern Time on Friday, August 10, 2007.

Take notice that the Commission received the following electric securities filings:

Docket Numbers: ES07–41–000.

Applicants: Duquesne Light Company.

Description: Duquesne Light Co's Filing of Pro Forma Financial Statements.

Filed Date: July 19, 2007.

Accession Number: 20070719–5054.

Comment Date: 5 p.m. Eastern Time on Thursday, August 9, 2007.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed dockets(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Records Governing Off-the Record Communications; Public Notice

July 26, 2007.

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the eLibrary link. ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2007–0563; FRL–8449–1]

Agency Information Collection Activities: Proposed Collection; Comment Request; National Volatile Organic Compound Emission Standards for Consumer Products; EPA ICR No. 1764.01; OMB Control No. 2060–0348

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501, *et seq.*), this document announces that EPA is planning to submit a request to renew an existing approved Information Collection Request (ICR) to the Office of Management and Budget (OMB). This ICR is scheduled to expire on October 31, 2007. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before October 1, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2007–0563 by one of the following methods:

- *www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *E-mail: a-and-r-Docket@epa.gov.*
- *Fax:* (202) 566–9744.
- *Mail:* National VOC Standards for Consumer Products—Information Collection Request Renewal, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460.
- *Hand Delivery:* Air and Radiation Docket and Information Center, Public Reading Room, EPA West Building, Room 3334, 1301 Constitution Ave., NW., Washington, DC 20004. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–OAR–2007–0563. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov

or e-mail. The *www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *www.regulations.gov,* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

FOR FURTHER INFORMATION CONTACT: Mr. Bruce Moore, U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Sector Policies and Programs Division, Natural Resources and Commerce Group (E143–03), Research Triangle Park, NC 27711; telephone number: (919) 541–5460; fax number: (919) 541–3470; e-mail address: *moore.bruce@epa.gov.*

SUPPLEMENTARY INFORMATION:

How Can I Access the Docket and/or Submit Comments?

EPA has established a public docket for this ICR under Docket ID number EPA–HQ–OAR–2007–0563, which is available for online viewing at *www.regulations.gov,* or in person viewing at the Air and Radiation Docket and Information Center in the EPA Docket Center, EPA West Building, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566–1744, and the telephone number for the Air and Radiation Docket and Information Center is (202) 566–1742.

Use *www.regulations.gov* to obtain a copy of the draft collection of information, submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''search,'' then key in the docket ID number identified in this document.

What Information is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the Paperwork Reduction Act, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider when I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does this Apply to?

Docket ID No. EPA–HQ–OAR–2007–0563.

Affected entities: Entities potentially affected by this action are those which manufacture, distribute, or import consumer products for sale or distribution in the United States, including the District of Columbia and all United States territories.

Title: National Volatile Organic Compound Emission Standards for Consumer Products.

ICR numbers: EPA ICR No. 1764.01, OMB Control No. 2060–0348.

ICR status: This ICR is currently scheduled to expire on October 31, 2007. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The information collection includes initial reports and periodic recordkeeping necessary for EPA to ensure compliance with Federal standards for volatile organic compounds in consumer products. Respondents are manufacturers, distributors, and importers of consumer products. Responses to the collection are mandatory under 40 CFR part 59, Subpart C—National Volatile Organic Compound Emission Standards for Consumer Products. All information submitted to the EPA for which a claim of confidentiality is made will be safeguarded according to the Agency policies set forth in 40 CFR part 2, Subpart B—Confidentiality of Business Information.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 40 hours per respondent. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel

to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 732.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 29,613 hours.

Estimated total annual costs: $1,187,537. This includes an estimated burden cost of $1,187,537 and an estimated zero cost for capital investment or maintenance and operational costs.

Are There Changes in the Estimates from the Last Approval?

There is no change in hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. However, the estimated total annual costs are increased by $83,480 due to increased costs of employment compensation since the previous approval.

What is the Next Step in the Process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: July 25, 2007.

Jan Cortelyou Lee,

Acting Director, Office of Air Quality Planning and Standards.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than August 15, 2007.

A. Federal Reserve Bank of St. Louis (Glenda Wilson, Community Affairs Officer) 411 Locust Street, St. Louis, Missouri 63166-2034:

1. Harry Roberts, individually, and as part of The Roberts Group, that consists of Willa Roberts, Harry L. Roberts and Sherry Roberts all of Owensboro, Kentucky; to acquire First Security, Inc., Owensboro, Kentucky and thereby indirectly acquire voting shares of First Security Bank of Owensboro, Inc., Owensboro, Kentucky.

Board of Governors of the Federal Reserve System, July 27, 2007.

Robert deV. Frierson,

Deputy Secretary of the Board.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at *www.ffiec.gov/nic/*.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 27, 2007.

A. Federal Reserve Bank of Kansas City (Donna J. Ward, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198-0001:

1. Community State Bankshares, Inc.; to become a bank holding company by acquiring 100 percent of the voting shares of Community State Bank (in organization) both of Lamar, Colorado.

Board of Governors of the Federal Reserve System, July 27, 2007

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

[Document Identifier: OS–0990–0000; 30-day notice]

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: New collection

Title of Information Collection: Homelessness Data for Health and Human Services Mainstream Programs

Form/OMB No.: 0990–0000

Use: The Office of the Assistant Secretary for Planning and Evaluation will study data collection practices by Temporary Assistant for Needy Families (TANF) and Medicaid state programs regarding homelessness and housing status. Telephone interviews will be conducted with state officials from all 50 states and the District of Columbia who administer the TANF and Medicaid programs to collect information about the type and quality of data related to homelessness and housing status that are collected from and recorded about TANF and Medicaid applicants. This information will be used to determine whether these two HHS mainstream programs are collecting information from program applicants and/or participants regarding their housing status.

Frequency: One time

Affected Public: State, Local and Tribal Government

Annual Number of Respondents: 102

Total Annual Responses: 102

Average Burden per Response: 60 minutes

Total Annual Hours: 102

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, e-mail your request, including your address, phone number, OMB number, and OS document identifier, to *Sherette.funncoleman@hhs.gov,* or call the Reports Clearance Office on (202) 690–6162. Written comments and recommendations for the proposed information collections must be received within 30 days of this notice directly to the Desk Officer at the address below: OMB Desk Officer: John Kraemer, OMB Human Resources and Housing Branch, Attention: (OMB #0990–0000), New Executive Office Building, Room 10235, Washington DC 20503.

Date: July 25, 2007.

Seleda Perryman,

Office of the Secretary, Paperwork Reduction Act Reports Clearance Officer.

[FR Doc. E7–14978 Filed 8–1–07; 8:45 am]

BILLING CODE 4150–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the National Coordinator for Health Information Technology; American Health Information Community; Announcement of Public Comment Period About the Design and Implementation of the American Health Information Community Successor

SUMMARY: This notice announces a public comment period, from August 6, 2007 to August 31, 2007, to collect input about ideas for the design and implementation of a successor entity for the American Health Information Community (AHIC) as described in the *American Health Information Community Successor White paper, July 2007* (available on the Web at *http://www.hhs.gov/healthit/community/background/AHICsuccessor. html* on or after July 31, 2007).

The ANIC is a federally-chartered advisory committee that provides input and recommendations to the Department of Health and Human Services (HHS) on how to make health records digital and interoperable, and how to assure that the privacy and security of those records are protected. The charter of the AHIC requires that its responsibilities be transferred to a successor entity. Therefore, HHS and the AHIC are embarking upon a project that will take the AHIC to the next level. The successor entity will be an independent, sustainable public-private partnership that brings together the best of the public and private sectors. This

new public-private partnership will develop a unified approach to realize an effective, interoperable nationwide health information system that supports the health and well-being of the people of this country. The input from this public comment period will be used to inform the plans for transitioning the locus of activity from a Federal advisory committee to a independent public-private partnership.

HHS and the AHIC are eager to hear the thoughts of your organization with respect to the AHIC successor entity. To facilitate your participation in this process, you are encouraged to provide your comments organized by the following concepts:

- Purpose and scope of the successor entity
- Membership, including classes and sectors
- Governing body and decision-making process
- Protections, incorporation, management, and staffing
- Value of participation in the successor entity for stakeholders

All comments in any format will be accepted.

DATES: Comments should be received by the Office of the National Coordinator for Health Information Technology, Department of Health and Human Services, on or before 5 p.m. EST on August 31, 2007.

ADDRESSES: electronic responses are preferred and may be recorded via the Web site at *http://www.hhs.gov/healthit/commhnity/background/AHICsuccessor.html* or may be sent via e-mail addressed to *AHICsuccessor@hhs.gov* in the Office of the National Coordinator for Health Information Technology, Department of Health and Human Services. Please include ''AHIC Successor White Paper Comments'' in the subject line.

Paper-based responses will also be accepted. Please send to: Office of the National Coordinator for Health Information Technology, Department of Health and Human Services, Attention: AHIC Successor White Paper Comments, Mary C. Switzer Building, 330 C Street, SW., Room 4080, Washington, DC 20201, or fax to (202) 690–6079, Attention: AHIC Successor White Paper Comments.

FOR FURTHER INFORMATION: Visit *http://www.hhs.gov/healthit/community/background/AHICsuccessor.html.*

Dated: July 27, 2007.

Michelle Murray,

Office of Programs and Coordination, Office of the National Coordinator for Health Information Technology.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404–639–5960 and send comments to Maryam I. Daneshvar, CDC Acting Reports Clearance Officer, 1600 Clifton Road, MS–D74, Atlanta, GA 30333 or send an e-mail to *omb@cdc.gov.*

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Pilot Project to Estimate the Incidence of Hepatitis C Virus (HCV) Infection Among Young Injection Drug Users (IDUs) Using Serial Cross-Sectional Seroprevalence Surveys—New—National Center for HIV, Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Hepatitis C is the most prevalent bloodborne infection in the United States; approximately 3.2 million persons are chronically infected with HCV. National recommendations for prevention and control of HCV infection emphasize primary prevention activities to reduce the risk of HCV transmission. Identifying and reaching persons at risk for HCV infection to provide risk-reduction counseling is thus critical to prevent infection. Currently the Centers for Disease Control and Prevention (CDC) monitors the national incidence of acute hepatitis C through passive surveillance of acute, symptomatic cases of laboratory confirmed hepatitis C. However, only a minority of people with acute infection have symptoms at all (<25%) and passive surveillance only captures a small fraction of acutely infected people, i.e., those who have symptoms and receive medical attention and appropriate laboratory testing during the acute phase of the disease. Injection drug users (IDUs), who are the primary risk group for acute hepatitis C (70% of identified acute cases), have additional barriers to health care access and/or utilization resulting in the potential for a further underestimation of overall incidence. Thus, it is necessary to consider strategies other than passive surveillance for incidence monitoring. One such strategy is to conduct Serial Cross-Sectional Seroprevalence Surveys (SCSS) among populations at increased risk of infection such as IDUs.

For the proposed pilot project, funding will be awarded to selected U.S. sites that will develop and test different methods to recruit a sample of young IDUs that is most representative of the population of young IDUs at risk for HCV infection. These sampling methods will be compared and contrasted to identify a methodology to be used in ongoing SCSSs among young IDUs. Better methods of identification of persons at risk will enhance current surveillance efforts to monitor the incidence of HCV infection which in turn are the best means to direct and assess primary prevention strategies, determine new transmission patterns, and identify and control outbreaks. Moreover, methods developed in this study can be used in other areas to gather representative data on incidence of acute disease and the burden of disease caused by HCV infection.

In addition, instruments for collecting behavioral/risk factor data from IDUs will be developed and pilot tested. It is estimated that data will be collected over 15 months from a total of 2000

respondents. The total annual burden for this project is expected to be 1600 hours. The information to be collected includes demographic data, risk factors for HCV infection, missed opportunities for prevention (including hepatitis A and B vaccination), access to medical care, and knowledge, attitudes, and beliefs about HCV infection. The utility of using HCV nucleic acid testing (NAT), antigen-antibody testing and other testing modalities to identify sero-incident (window period) infections will also be assessed. Knowledge of factors associated with acquiring hepatitis C virus infection is essential to guide the development of prevention and control strategies.

Participation in the data collection is voluntary and there is no cost to respondents to participate in the survey other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Respondents	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Young injection drug users	1600	1	1	1600

Dated: July 27, 2007.

Written comments should be received within 60 days of this notice.

Proposed Project

Coal Workers' X-ray Surveillance Program (CWXSP) OMB # 0920–0020—Extension—The National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The CWXSP is a federally mandated program under the Federal Mine Safety and Health Act of 1977, Public Law 95–164. The Act provides the regulatory authority for the administration of the CWXSP, a surveillance program to protect the health and safety of underground coal miners. This Program requires the gathering of demographic and logistical information from coal mine operators, participating miners, participating x-ray facilities, and participating physicians. The Appalachian Laboratory for Occupational Safety and Health (ALOSH), located in Morgantown, WV, is charged with administration of this Program. Over the past two years, participation in the CWXSP has increased, which is reflected in this submission for renewal. Based on an average of 5,000 x-rays coming into the Program per year (each x-ray receives two readings), and using the average hourly wage rates taken from the Bureau of Labor Statistics, National Occupational Employment and Wage Estimates, the total annualized burden hours is 2,329. Physicians (B Readers) will fill out forms regarding their interpretations of the x-rays. Based on prior practice it takes the physician approximately 3 minutes per form. Physicians taking the B Reader Examination are asked to complete a registration form which takes approximately 10 minutes to complete. There are approximately 300 physicians each year taking the certification exam.

Miners participating in the CWXSP must fill out the Miner Identification Document which requires approximately 20 minutes. There are about 5,000 miners participating in the CWXSP Program. Mine operators are required to file a Mine x-ray Plan with NIOSH approximately every 3 years. It takes the mine operator approximately 30 minutes to complete this form. Approximately 200 mine operators have x-ray plans that are due for renewal each year. An x-ray facility that applies to be a NIOSH-approved facility for providing miners x-rays must complete an approval packet. The forms associated with this approval process require approximately 30 minutes for completion. There are approximately 25 x-ray facilities each year seeking approval into the CWXSP Program. Overall, there will be no costs to study participants.

ESTIMATES OF ANNUALIZED BURDEN HOURS

Respondents	Number of respondents	Number of responses/ respondent	Average burden/response (in hrs.)	Total burden (in hrs.)
Physicians/interpretations	10,000	1	3/60	500

ESTIMATES OF ANNUALIZED BURDEN HOURS—Continued

Respondents	Number of respondents	Number of responses/ respondent	Average burden/response (in hrs.)	Total burden (in hrs.)
Physicians/certification	300	1	10/60	50
Miners	5000	1	20/60	1,666
Mine operators	200	1	30/60	100
X-ray facilities	25	1	30/60	13
Total				2,329

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Animal Drug User Fee Rates and Payment Procedures for Fiscal Year 2008

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the rates and payment procedures for fiscal year (FY) 2008 animal drug user fees. The Federal Food, Drug, and Cosmetic Act (the act), as amended by the Animal Drug User Fee Act of 2003 (ADUFA), authorizes FDA to collect user fees for certain animal drug applications, on certain animal drug products, on certain establishments where such products are made, and on certain sponsors of such animal drug applications and/or investigational animal drug submissions. This notice establishes the fee rates for FY 2008.

For FY 2008, the animal drug user fee rates are: $172,500 for an animal drug application; $86,250 for a supplemental animal drug application for which safety or effectiveness data is required; $4,125 for an annual product fee; $52,700 for an annual establishment fee; and $43,900 for an annual sponsor fee. FDA will issue invoices for FY 2008 product, establishment and sponsor fees by December 30, 2007, and these invoices will be due and payable by January 31, 2008.

The application fee rates are effective for applications submitted on or after October 1, 2007, and will remain in effect through September 30, 2008. Applications will not be accepted to review until FDA has received full payment of application fees and any other animal drug user fees owed.

FOR FURTHER INFORMATION CONTACT: Visit the FDA Web site at *http://www.fda.gov/oc/adufa* or contact Roxanne Schweitzer, Center for Veterinary Medicine (HFV–10), Food and Drug Administration, 7529 Standish Pl., Rockville, MD 20855, 240–276–9705. For general questions, you may also e-mail the Center for Veterinary Medicine (CVM) at *cvmadufa@fda.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

Section 740 of the act (21 U.S.C. 379j–12) establishes four different kinds of user fees: (1) Fees for certain types of animal drug applications and supplements, (2) annual fees for certain animal drug products, (3) annual fees for certain establishments where such products are made, and (4) annual fees for certain sponsors of animal drug applications and/or investigational animal drug submissions (21 U.S.C. 379j–12(a)). When certain conditions are met, FDA will waive or reduce fees (21 U.S.C. 379j–12(d)).

For FY 2004 through FY 2008, the act establishes aggregate yearly base revenue amounts for each of these fee categories. Base revenue amounts established for years after FY 2004 are subject to adjustment for inflation and workload. Fees for applications, establishments, products, and sponsors are to be established each year by FDA so that the revenue for each fee category will approximate the level established in the statute, after the level has been adjusted for inflation and workload.

II. Revenue Amount for FY 2008 and Adjustments for Inflation and Workload

A. Statutory Fee Revenue Amounts

ADUFA (Public Law 108–130) specifies that the aggregate revenue amount for FY 2008 for each of the four animal drug user fee categories is $2,500,000, before any adjustments for inflation or workload are made (21 U.S.C. 379j–12(b)(1)–(4)).

B. Inflation Adjustment to Fee Revenue Amount

ADUFA provides that fee revenue amounts for each FY after 2004 shall be adjusted for inflation (see 21 U.S.C. 379j–12(c)(1)). The adjustment must reflect the greater of the following: (1) The total percentage change that occurred in the Consumer Price Index (CPI) for all urban consumers (all items; U.S. city average) during the 12-month period ending June 30 preceding the FY for which fees are being set, or (2) the total percentage pay change for the previous FY for Federal employees stationed in Washington, DC. ADUFA provides for this annual adjustment to be cumulative and compounded annually after FY 2004 (21 U.S.C. 379j–12(c)(1)).

The inflation adjustment for FY 2005 was 4.42 percent. This was the greater of the CPI increase during the 12-month period ending June 30, 2004, (3.27 percent) or the increase in pay for FY 2004 for Federal employees stationed in Washington, DC (4.42 percent).

The inflation adjustment for FY 2006 was 3.71 percent. This was the greater of the CPI increase during the 12-month period ending June 30, 2005, (2.53 percent) or the increase in pay for FY 2005 for Federal employees stationed in Washington, DC (3.71 percent).

The inflation adjustment for FY 2007 was 4.32 percent. This was the greater of the CPI increase for the 12-month period ending June 30, 2006, (4.32 percent) or the increase in pay for FY 2006 for Federal employees stationed in Washington, DC (3.44 percent).

The inflation adjustment for FY 2008 is 2.69 percent. This is the greater of the CPI increase for the 12-month period ending June 30, 2007, (2.69 percent) or the increase in pay for FY 2007 for Federal employees stationed in Washington, DC (2.64 percent).

Compounding these amounts (1.0442 times 1.0371 times 1.0432 times 1.0269) yields a total compounded inflation adjustment of 16.01 percent for FY 2008.

The inflation-adjusted revenue amount for each category of fees for FY 2008 is the statutory fee amount ($2,500,000) increased by 16.01 percent, the inflation adjuster for FY 2008. The inflation-adjusted revenue amount is $2,900,000 for each category of fee, rounded to the nearest thousand dollars, for a total inflation-adjusted fee revenue amount of $11,600,000 for all four categories of fees in FY 2008.

C. Workload Adjustment to Inflation Adjusted Fee Revenue Amount

For each FY beginning in FY 2005, ADUFA provides that fee revenue amounts, after they have been adjusted for inflation, shall be further adjusted to reflect changes in review workload (21 U.S.C. 379j–12(c)(2)).

FDA calculated the average number of each of the five types of applications and submissions specified in the workload adjustment provision (animal drug applications, supplemental animal drug applications for which data with respect to safety or efficacy are required, manufacturing supplemental animal drug applications, investigational animal drug study submissions, and investigational animal drug protocol submissions) received over the 3-year period that ended on September 30, 2002 (the base years), and the average number of each of these types of applications and submissions over the most recent 3-year period that ended May 31, 2007.

The results of these calculations are presented in the first two columns of table 1 of this document. Column 3 reflects the percent change in workload over the two 3-year periods. Column 4 shows the weighting factor for each type of application, reflecting how much of the total FDA animal drug review workload was accounted for by each type of application or submission in the table during the most recent 3 years. Column 5 of table 1 is the weighted percent change in each category of workload, and was derived by multiplying the weighting factor in each line in column 4 by the percent change from the base years in column 3. At the bottom right of the table the sum of the values in column 5 is added, reflecting a total change in workload of negative 16.7 percent for FY 2008. This is the workload adjuster for FY 2008.

TABLE 1.—WORKLOAD ADJUSTER CALCULATION (NUMBERS MAY NOT ADD DUE TO ROUNDING)

Application Type	Column 1 3-Year Avg. (Base Years)	Column 2 Latest 3-Year Avg.	Column 3 Percent Change	Column 4 Weighting Factor	Column 5 Weighted Percent Change
New Animal Drug Applications (NADAs)	22	13	-39%	4%	-1.5%
Supplemental NADA's with Safety or Efficacy Data	31	12	-62%	2%	-1.4%
Manufacturing Supplements	368	409	+11%	16%	+1.8%
Investigational Study Submissions	272	217	-20%	60%	-12.1%
Investigational Protocol Submissions	283	229	-19%	18%	-3.4%
FY 2008 Workload Adjuster					-16.7%

ADUFA specifies that the workload adjuster may not result in fees that are less than the inflation-adjusted revenue amount (21 U.S.C. 379j–12(c)(2)(B)). For this reason, the workload adjustment will not be applied in FY 2008, and the inflation-adjusted revenue amount for each category of fees for FY 2008 ($2,900,000) becomes the revenue target for fees in FY 2008, for a total inflation-adjusted fee revenue target in FY 2008 of $11,600,000 for fees from all four categories.

III. Adjustment for Excess Collections in Previous Years

Under the provisions of ADUFA, if the agency collects more fees than were provided for in appropriations in any year, FDA is required to reduce its anticipated fee collections in a subsequent year by that amount (21 U.S.C. 379j–12(g)(4)).

In FY 2004, Congress appropriated a total of $5,000,000 to FDA in ADUFA fee revenue. As of July 1, 2007, collections for FY 2004 totaled $5,154,700—or $154,700 in excess of the appropriation limit. Also, in FY 2005 Congress appropriated a total of $8,354,000 to FDA in ADUFA fee revenue, and FDA collected a total of $8,519,101 as of July 1, 2007. This is $165,101 in excess of appropriations. The total in excess collections for the 2 years is $319,801. These are the only fiscal years since ADUFA began in which FDA has collected more in ADUFA fees than Congress appropriated.

The total of $319,801 will be offset against FY 2008 revenue collections, lowering the net amount that would otherwise be collected. One-fourth of this amount, or $80,000, rounded to the nearest thousand dollars, will be subtracted from the FY 2008 adjusted revenue amount for each fee category in the previous section. Thus, after adjustment for prior-year excess collections, the adjusted FY 2008 revenue target for each fee category is:

- Application Fee Revenue Amount: $2,820,000 ($2,900,000 minus $80,000)
- Establishment Fee Revenue Amount: $2,820,000 ($2,900,000 minus $80,000)
- Product Fee Revenue Amount: $2,820,000 ($2,900,000 minus $80,000)
- Sponsor Fee Revenue Amount: $2,820,000 ($2,900,000 minus $80,000)

Thus the adjusted revenue amount from all 4 categories after this adjustment totals $11,280,000.

IV. Final Year Adjustment

Under the provisions of ADUFA, the Secretary of Health and Human Services may, in addition to the inflation and workload adjustments, further increase the fees and fee revenues if such an adjustment is necessary to provide for not more than 3 months of operating reserves of carryover user fees for the process for the review of animal drug applications for the first 3 months of FY

2009. The rational for the amount of this increase shall be contained in the annual notice establishing fee revenues and fees for FY 2008 (21 U.S.C. 379j–12(c)(3)).

As of June 30, 2007, FDA has unallocated cash carryover balances of $4,453,000. In addition, the agency is estimating that application fees over the final 3 months of FY 2007 will add another $675,000 to this balance, for an estimated cash carryover of $5,128,000 on September 30, 2007.

In FY 2008, FDA expects to collect a total of $11,280,000 after adjustments, as noted at the end of section III of this document. To sustain current operations in FY 2008, FDA expects to obligate a total of $13,084,000 (compared with anticipated obligations in FY 2007 of about $12,355,000). The anticipated obligations of $13,084,000 will be about $1,768,000 more than anticipated collections. This will reduce the estimated carryover balance over the course of FY 2008 from $5,128,000 to an estimated $3,360,000 ($5,128,000 minus $1,768,000).

To sustain operations supported from user fees for the first 3 months of FY 2009, FDA estimates that it will need one-fourth of the $13,084,000 it expects to spend in FY 2008, or $3,271,000 (rounded to the nearest thousand). However this amount will need to be increased for inflation by an estimated 5.9 percent (the average amount by which FDA's costs per full-time employee have increased over the past 5 years). The amount needed to sustain operations for the first 3 months of FY 2009 is thus estimated at $3,464,000 (rounded to the nearest thousand), while the estimated carryover balance at the beginning of FY 2009 is estimated at only $3,360,000. Thus FDA will need an additional $104,000 as the final year adjustment to assure sufficient operating reserves for the first 3 months of FY 2009. One-fourth of this amount or $26,000 will be added to the FY 2008 adjusted revenue amount for each of the four fee categories in the previous section. Thus, after the final-year adjustment, the adjusted FY 2008 revenue target for each fee category is:

- Application Fee Revenue Amount: $2,846,000 ($2,820,000 plus $26,000)
- Establishment Fee Revenue Amount: $2,846,000 ($2,820,000 plus $26,000)
- Product Fee Revenue Amount: $2,846,000 ($2,820,000 plus $26,000)
- Sponsor Fee Revenue Amount: $2,846,000 ($2,820,000 plus $26,000)

Thus, after the final year adjustment, the adjusted FY 2008 revenue target from all fee types combined totals $11,384,000.

V. Application Fee Calculations for FY 2008

The terms ''animal drug applications'' and ''supplemental animal drug applications'' are defined in 21 U.S.C. 379j–11(1).

A. Application Fee Revenues and Numbers of Fee-Paying Applications

The application fee must be paid for any animal drug application or supplemental animal drug application that is subject to fees under ADUFA and that is submitted on or after September 1, 2003. The application fees are to be set so that they will generate $2,846,000 in fee revenue for FY 2008. This is the amount set out in the statute after it has been adjusted for inflation and workload, as set out in section II of this document, for excess collections in previous years as set out in section III of this document, and for the final year adjustment as set out in section IV of this document. The fee for a supplemental animal drug application for which safety or effectiveness data are required is to be set at 50 percent of the animal drug application fee (21 U.S.C. 379j–12(a)(1)(A)(ii)).

To set animal drug application fees and supplemental animal drug application fees to realize $2,846,000, FDA must first make some assumptions about the number of fee-paying applications and supplements it will receive in FY 2008.

The agency knows the number of applications that have been submitted in previous years. That number fluctuates significantly from year to year. In estimating the fee revenue to be generated by animal drug application fees in FY 2008, FDA is assuming that the number of applications that will pay fees in FY 2008 will equal the average number of submissions over the 4 most recent years (including an estimate for the current year). This may not fully account for possible year to year fluctuations in numbers of fee-paying applications, but FDA believes that this is a reasonable approach after nearly 4 years of experience with this program.

Over the past 4 years, the average number of animal drug applications that would have been subject to the full fee was 10.25, including the number for the most recent year, estimated at 15. Over this same period, the average number of supplemental applications that would have been subject to half of the full fee was 12.5, including the number for the most recent year, estimated at 13.

Thus, for FY 2008, FDA estimates receipt of 10.25 fee paying original applications and 12.5 fee-paying supplemental animal drug applications.

B. Fee Rates for FY 2008

FDA must set the fee rates for FY 2008 so that the estimated 10.25 applications that pay the full fee and the estimated 12.5 supplements that pay half of the full fee will generate a total of $2,846,000. To generate this amount, the fee for an animal drug application, rounded to the nearest hundred dollars, will have to be $172,500, and the fee for a supplemental animal drug application for which safety or effectiveness data are required will have to be $86,250.

VI. Product Fee Calculations for FY 2008

A. Product Fee Revenues and Numbers of Fee-Paying Products

The animal drug product fee (also referred to as the product fee) must be paid annually by the person named as the applicant in an animal drug application or supplemental animal drug application for an animal drug product submitted for listing under section 510 of the act (21 U.S.C. 360), and who had an animal drug application or supplemental animal drug application pending at FDA after September 1, 2003, (21 U.S.C. 379j–12(a)(2)). The term ''animal drug product'' is defined in 21 U.S.C. 379j–11(3). The product fees are to be set so that they will generate $2,846,000 in fee revenue for FY 2008. This is the amount set out in the statute after it has been adjusted for inflation and workload, as set out in section II of this document, for excess collections in previous years as set out in section III of this document, and for the final year adjustment as set out in section IV of this document.

To set animal drug product fees to realize $2,846,000, FDA must make some assumptions about the number of products for which these fees will be paid in FY 2008. FDA developed data on all animal drug products that have been submitted for listing under section 510 of the act, and matched this to the list of all persons who had an animal drug application or supplement pending after September 1, 2003. As of July 1, 2007, FDA found a total of 767 products submitted for listing by persons who had an animal drug application or supplemental animal drug application pending after September 1, 2003. Based on this, FDA believes that a total of 767 products will be subject to this fee in FY 2008.

In estimating the fee revenue to be generated by animal drug product fees in FY 2008, FDA is assuming that 10 percent of the products invoiced, or 77, will not pay fees in FY 2008 due to fee waivers and reductions. Based on experience with other user fee programs

and the first 4 years of ADUFA, FDA believes that this is a reasonable basis for estimating the number of fee-paying products in FY 2008.

Accordingly, the agency estimates that a total of 690 (767 minus 77) products will be subject to product fees in FY 2008.

B. Product Fee Rates for FY 2008

FDA must set the fee rates for FY 2008 so that the estimated 690 products that pay fees will generate a total of $2,846,000. To generate this amount will require the fee for an animal drug product, rounded to the nearest five dollars, to be $4,125.

VII. Establishment Fee Calculations for FY 2008

A. Establishment Fee Revenues and Numbers of Fee-Paying Establishments

The animal drug establishment fee (also referred to as the establishment fee) must be paid annually by the person who: (1) Owns or operates, directly or through an affiliate, an animal drug establishment; (2) is named as the applicant in an animal drug application or supplemental animal drug application for an animal drug product submitted for listing under section 510 of the act; (3) had an animal drug application or supplemental animal drug application pending at FDA after September 1, 2003; and (4) whose establishment engaged in the manufacture of the animal drug product during the FY (21 U.S.C. 379j–12(a)(3)). An establishment subject to animal drug establishment fees is assessed only one such fee per FY (21 U.S.C. 379j–12(a)(3)). The term ''animal drug establishment'' is defined in 21 U.S.C. 379j–11(4). The establishment fees are to be set so that they will generate $2,846,000 in fee revenue for FY 2008. This is the amount set out in the statute after it has been adjusted for inflation and workload, as set out in section II of this document, for excess collections in previous years as set out in section III of this document, and for the final year adjustment as set out in section IV of this document.

To set animal drug establishment fees to realize $2,846,000, FDA must make some assumptions about the number of establishments for which these fees will be paid in FY 2008. FDA developed data on all animal drug establishments and matched this to the list of all persons who had an animal drug application or supplement pending after September 1, 2003. As of July 1, 2007, FDA found a total of 60 establishments owned or operated by persons who had an animal drug application or supplemental animal drug application pending after September 1, 2003. Based on this, FDA believes that 60 establishments will be subject to this fee in FY 2008.

In estimating the fee revenue to be generated by animal drug establishment fees in FY 2008, FDA is assuming that 10 percent of the establishments invoiced, or six, will not pay fees in FY 2008 due to fee waivers and reductions. Based on experience with the first 4 years of ADUFA, FDA believes that this is a reasonable basis for estimating the number of fee-paying establishments in FY 2008.

Accordingly, the agency estimates that a total of 54 establishments (60 minus 6) will be subject to establishment fees in FY 2008.

B. Establishment Fee Rates for FY 2008

FDA must set the fee rates for FY 2008 so that the estimated 54 establishments that pay fees will generate a total of $2,846,000. To generate this amount will require the fee for an animal drug establishment, rounded to the nearest 50 dollars, to be $52,700.

VIII. Sponsor Fee Calculations for FY 2008

A. Sponsor Fee Revenues and Numbers of Fee-Paying Sponsors

The animal drug sponsor fee (also referred to as the sponsor fee) must be paid annually by each person who: (1) Is named as the applicant in an animal drug application, except for an approved application for which all subject products have been removed from listing under section 510 of the act or has submitted an investigational animal drug submission that has not been terminated or otherwise rendered inactive; and (2) had an animal drug application, supplemental animal drug application, or investigational animal drug submission pending at FDA after September 1, 2003, (21 U.S.C. 379j–11(6) and 379j–12(a)(4)). An animal drug sponsor is subject to only one such fee each FY (21 U.S.C. 379j–12(a)(4)). The sponsor fees are to be set so that they will generate $2,846,000 in fee revenue for FY 2008. This is the amount set out in the statute after it has been adjusted for inflation and workload, as set out in section II of this document, for excess collections in previous years as set out in section III of this document, and for the final year adjustment as set out in section IV of this document.

To set animal drug sponsor fees to realize $2,846,000, FDA must make some assumptions about the number of sponsors who will pay these fees in FY 2008. Based on the number of firms that would have met this definition in each of the past 4 years, FDA estimates that a total of 138 sponsors will meet this definition in FY 2008.

Careful review indicates that about one third or 33 percent of all of these sponsors will qualify for minor use/minor species exemption. Based on the agency's experience to date with sponsor fees, FDA's current best estimate is that an additional 20 percent will qualify for other waivers or reductions, for a total of 53 percent of the sponsors invoiced, or 73, who will not pay fees in FY 2008 due to fee waivers and reductions. FDA believes that this is a reasonable basis for estimating the number of fee-paying sponsors in FY 2008.

Accordingly, the agency estimates that a total of 65 sponsors (138 minus 73) will be subject to sponsor fees in FY 2008.

B. Sponsor Fee Rates for FY 2008

FDA must set the fee rates for FY 2008 so that the estimated 65 sponsors that pay fees will generate a total of $$2,846,000. To generate this amount will require the fee for an animal drug sponsor, rounded to the nearest 50 dollars, to be $43,900.

IX. Fee Schedule for FY 2008

The fee rates for FY 2008 are summarized in table 2 of this document.

TABLE 2.—FY 2008 FEE RATES

Animal Drug User Fee Category	Fee Rate for FY 2008
Animal Drug Application Fee	
Animal Drug Application	$172,500
Supplemental Animal Drug Application for which Safety or Effectiveness Data are Required	$86,250
Animal Drug Product Fee	$4,125

TABLE 2.—FY 2008 FEE RATES—Continued

Animal Drug User Fee Category	Fee Rate for FY 2008
Animal Drug Establishment Fee[1]	$52,700
Animal Drug Sponsor Fee[2]	$43,900

[1]An animal drug establishment is subject to only one such fee each FY.
[2]An animal drug sponsor is subject to only one such fee each FY.

X. Procedures for Paying the FY 2008 Fees

A. Application Fees and Payment Instructions

The appropriate application fee established in the new fee schedule must be paid for an animal drug application or supplement subject to fees under ADUFA that is submitted after September 30, 2007. Payment must be made in U.S. currency by check, bank draft, or U.S. postal money order payable to the order of the Food and Drug Administration. On your check, bank draft, or U.S. postal money order, please write your application's unique Payment Identification Number, beginning with the letters AD, from the upper right-hand corner of your completed Animal Drug User Fee Cover Sheet. Also write the FDA post office box number (PO Box 953877) on the enclosed check, bank draft, or money order. Your payment and a copy of the completed Animal Drug User Fee Cover Sheet can be mailed to: Food and Drug Administration, P.O. Box 953877, St. Louis, MO, 63195–3877.

If you prefer to send a check by a courier such as FEDEX or UPS, the courier may deliver the check and printed copy of the cover sheet to: US Bank, Attn: Government Lockbox 953877, 1005 Convention Plaza, St. Louis, MO 63101. (Note: This address is for courier delivery only. If you have any questions concerning courier delivery contact the US Bank at 314–418–4821. This phone number is only for questions about courier delivery.)

The tax identification number of the Food and Drug Administration is 530196965. (Note: In no case should the check for the fee be submitted to FDA with the application.)

It is helpful if the fee arrives at the bank at least a day or two before the application arrives at FDA's Center for Veterinary Medicine. FDA records the official application receipt date as the later of the following: The date the application was received by FDA's Center for Veterinary Medicine, or the date US Bank notifies FDA that your check in the full amount of the payment due has been received. US Bank is required to notify FDA within 1 working day, using the Payment Identification Number described previously.

B. Application Cover Sheet Procedures

Step One—Create a user account and password. Log onto the ADUFA Web site at *http://www.fda.gov/oc/adufa* and, under the ''Forms'' heading, click on the link ''User Fee Cover Sheet.'' For security reasons, each firm submitting an application will be assigned an organization identification number, and each user will also be required to set up a user account and password the first time you use this site. Online instructions will walk you through this process.

Step Two—Create an Animal Drug User Cover Sheet, transmit it to FDA, and print a copy. After logging into your account with your user name and password, complete the steps required to create an Animal Drug User Fee Cover Sheet. One cover sheet is needed for each animal drug application or supplement. Once you are satisfied that the data on the cover sheet is accurate and you have finalized the cover sheet, you will be able to transmit it electronically to FDA and you will be able to print a copy of your cover sheet showing your unique Payment Identification Number.

Step Three—Send the Payment for your application as described in section X.A of this document.

Step Four—Please submit your application and a copy of the completed Animal Drug User Fee Cover Sheet to the following address: Food and Drug Administration, Center for Veterinary Medicine, Document Control Unit (HFV–199), 7500 Standish Pl., Rockville, MD 20855.

C. Product, Establishment and Sponsor Fees

By December 30, 2007, FDA will issue invoices and payment instructions for product, establishment, and sponsor fees for FY 2008 using this Fee Schedule. Payment will be due and payable by January 31, 2008. FDA will issue invoices in October 2008 for any products, establishments, and sponsors subject to fees for FY 2008 that qualify for fees after the December 2007 billing.

Dated: July 27, 2007.

Randall W. Lutter,

Deputy Commissioner for Policy.

[FR Doc. 07–3782 Filed 7–30–07; 4:29 pm]

BILLING CODE 4160–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission For OMB Review; Comment Request

Periodically, the Health Resources and Services Administration (HRSA) publishes abstracts of information collection requests under review by the Office of Management and Budget (OMB), in compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). To request a copy of the clearance requests submitted to OMB for review, call the HRSA Reports Clearance Office on (301) 443–1129.

The following request has been submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1995:

Proposed Project: The Smallpox Vaccine Injury Compensation Program (OMB No. 0915–0282)—Extension

The Smallpox Emergency Personnel Protection Act (SEPPA) authorized the Secretary of Health and Human Services to establish The Smallpox Vaccine Injury Compensation Program, which provides benefits and/or compensation to certain persons harmed as a direct result of receiving smallpox covered countermeasures, including the smallpox vaccine, or as a direct result of contracting vaccinia through certain accidental exposures.

The benefits available under the Program include compensation for unreimbursed medical care expenses, lost employment income, and survivor death benefits. To be considered for Program benefits, requesters (i.e., smallpox vaccine recipients, vaccinia contacts, survivors, or the representatives of the estates of deceased smallpox vaccine recipients or vaccinia contacts), or persons filing on

their behalf as their representatives, must file a Request Form and the documentation required under SEPPA and its implementing regulations (42 CFR Part 102) to show that they are eligible.

Requesters must submit appropriate documentation to allow the Secretary to determine if the requesters are eligible for Program benefits. This documentation will vary somewhat depending on whether the requester is filing as a smallpox vaccine recipient, a vaccinia contact, a survivor, or a representative of an estate.

All requesters must submit medical records sufficient to demonstrate that a covered injury was sustained by a smallpox vaccine recipient or a vaccinia contact.

The Estimated Annual Burden is as follows:

Form	Number of respondents	Responses per respondent	Total responses	Hours per response	Total burden hours
Request Form	25	1	25	5	125
Certification	25	1	25	1	25
Total	25	.....	25	.....	150

Written comments and recommendations concerning the proposed information collection should be sent within 30 days of this notice to the desk officer for HRSA, either by e-mail to *OIRA_submission@omb.eop.gov* or by fax to 202–395–6974. Please direct all correspondence to the ''attention of the desk officer for HRSA.''

Dated: July 25, 2007.

Alexandra Huttinger,

Acting Director, Division of Policy Review and Coordination.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

National Advisory Committee on Rural Health and Human Services; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that the following committee will convene its fifty-seventh meeting.

Name: National Advisory Committee on Rural Health and Human Services.

Dates and Times: September 12, 2007, 8 a.m.–5:30 p.m.; September 13, 2007, 8 a.m.–5 p.m.; September 14, 2007, 8 a.m.–11 a.m.

Place: Best Western Inn on the Park, 22 South Carroll Street, Madison, WI 53703, Phone: 608–257–8811.

Status: The meeting will be open to the public.

Purpose: The National Advisory Committee on Rural Health and Human Services provides advice and recommendations to the Secretary with respect to the delivery, research, development and administration of health and human services in rural areas.

Agenda: Wednesday morning, at 8 a.m., the meeting will be called to order by the Chairperson of the Committee, the Honorable David Beasley. The first session will be a snapshot of Wisconsin, focusing on the challenges related to jobs, income, and educational level and a look at health and human services assets and liabilities. The next presentation will examine collaborative approaches to increase the supply of physicians for rural Wisconsin. Following this presentation will be discussions on State Medicaid waivers to improve access to healthcare and welfare reform. The next presentation will be a panel discussion by Toyota on health and human services integration in Tupelo, Mississippi, and the implications on the community of the new Toyota factory. The Committee will break into Subcommittee format for the remainder of the day's meeting. The Wednesday meeting will close at 5:30 p.m.

Thursday morning, September 13, at 8 a.m., the Committee will meet briefly to discuss the site visit. At 8:30 a.m., the Committee will depart for Sauk City, Wisconsin. The Committee will hear presentations on health and human services issues facing the community. Transportation to the site visit will not be provided. The Committee will return to the Best Western Inn on the Park to resume the meeting in Subcommittee format at 2 p.m. The Thursday meeting will close at 5 p.m.

The final session will be convened Friday morning, September 14, at 8 a.m. The Committee will have a discussion on the site visit. Following this discussion will be a report by the Subcommittees on the progress with the report chapters; discussion on the letter to the Secretary; and discussion on the upcoming February meeting. The meeting will be adjourned at 11 a.m.

FOR FURTHER INFORMATION CONTACT: Anyone requiring information regarding the Committee should contact Tom Morris, M.P.A., Executive Secretary, National Advisory Committee on Rural Health and Human Services, Health Resources and Services Administration, Parklawn Building, Room 9A–55, 5600 Fishers Lane, Rockville, MD 20857, telephone (301) 443–0835, Fax (301) 443–2803.

Persons interested in attending any portion of the meeting should contact Michele Pray-Gibson, Office of Rural Health Policy (ORHP), telephone (301) 443–0835. The Committee meeting agenda will be posted on ORHP's Web site *http://www.ruralhealth.hrsa.gov*.

Dated: July 24, 2007.

Alexandra Huttinger,

Acting Director, Division of Policy Review and Coordination.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Proposed Project: Confidentiality of Alcohol and Drug Abuse Patient Records—(OMB No. 0930–0092)—Revision

Statute (42 U.S.C. 290dd–2) and regulations (42 CFR Part 2) require federally conducted, regualted, or directly or indirectly assisted alcohol and drug abuse programs to keep alcohol and drug abuse patient records confidential. Information requirements are (1) written disclosure to patients about Federal laws and regulations that protect the confidentiality of each patient, and (2) documenting ''medical personnel'' status of recipients of a disclosure to meet a medical emergency. Annual burden estimates for these requirements are summarized in the table below:

ANNUALIZED BURDEN ESTIMATES

	Annual number of respondents [1]	Responses per respondent	Total responses	Hours per response	Total hour burden
Disclosure:					
42 CFR 2.22	10,629	174	[2] 1,849,548	.20	369,910
Recordkeeping:					
42 CFR 2.51	10,629	2	21,258	.167	3,550
Total	10,629		1,870,806		373,460

[1] The number of publicly funded alcohol and drug facilities from SAMHSA's 2005 National Survey of Substance Abuse Treatment Services (N–SSATS).
[2] The number of treatment admissions from SAMHSA's 2005 Treatment Episode Data Set (TEDS).

Written comments and recommendations concerning the proposed information collection should be sent by September 4, 2007 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: 202–395–6974.

Dated: July 30, 2007.

Elaine Parry,

Acting Director, Office of Program Services.

BILLING CODE 4162–20–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Proposed Project: Opioid Treatment Data Systems for Disaster Planning Project (Pilot)—NEW

The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT), has identified a critical need for Opioid Treatment Programs (OTPs, also commonly known as Methadone Clinics) to be able to access limited but specific patient dosage data for patients displaced due to service disruptions affecting the OTP from which they regularly receive treatment (the patient's 'Home OTP'). Service disruptions in home OTPs have ranged in cause from events such as the September 11th terrorist attacks or more recently, Hurricanes Katrina and Rita, to more common events such as snow storms or electrical black-outs.

The proposed system will ensure that, in such circumstances, patients displaced from their home OTPs will still be able to obtain safe and effective treatment at an alternative OTP (referred to in this project as a 'Guest OTP'). In reviewing past events involving OTP service disruptions and their impact on patients, SAMHSA, in tandem with numerous stakeholders, established four basic principles that would guide creation of a deliberately simple, centralized Web-based system to house patient data. Such a system would facilitate Guest OTPs in providing safe and effective continuity of treatment for patients temporarily unable to obtain treatment from their Home OTPs due to any form of service disruption. The proposed centralized data system is known as the Opioid Treatment Data Systems for Disaster. Subsequently, in a small sample study of five (5) OTPs, SAMHSA tested a protocol and data collection instrument for use in determining functional requirements for the proposed system. In the fall 2005, SAMHSA provided funding for the current project, to support creation of the necessary infrastructure for a pilot system, to be followed by testing on a regional basis. This pilot project will focus on creating the means by which vital dosage data for OTP patients can be made accessible to Guest OTPs called upon to treat patients of other programs in the event of service disruptions, most specifically, in disaster scenarios, so that patients are not forced during such circumstances to forgo or discontinue treatment. Ultimately, the pilot system will be reviewed to determine its effectiveness and ability to support a national implementation, should funding for such a system become available.

This notice is being provided for a survey to be distributed to OTPs in the region(s) selected by SAMHSA to gather information regarding their present data collection and reporting capabilities and practices. Technical information from the surveys will be used exclusively for development of the overall system and to help inform selection of sites best suited for participation as pilot sites for testing of the Opioid Treatment Data Systems for Disaster Planning. OTP respondents will have the option of completing an on-line or paper version of the survey. The survey consists of approximately 25 questions predominantly formatted as yes/no responses with one to two words fill in the blank responses. The estimated maximum annual response burden to collect this information is as follows:

Number of facilities (OTPs)	Responses per facility	Burden/response (hours)	Annual burden (hours)
200	1	1.0	200

Written comments and recommendations concerning the proposed information collection should be sent by September 4, 2007 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: 202–395–6974.

Dated: July 30, 2007.

Elaine Parry,

Acting Director, Office of Program Services.

BILLING CODE 4162–20–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5121–N–26]

Notice of Proposed Information Collection; Comment Request; Lender Qualifications for Multifamily Accelerated Processing (MAP)

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: *Comments Due Date:* October 1, 2007.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Lillian Deitzer, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., L'Enfant Plaza Building, Room 8001, Washington, DC 20410 or *Wayne_Eddins@hud.gov*.

FOR FURTHER INFORMATION CONTACT: Joseph E. Malloy, Acting Director, Office of Multifamily Development, Department of Housing and Urban Development, 451 7th Street, SW., Washington, DC 20410, telephone (202) 708–1142 (this is not a toll free number) for copies of the proposed forms and other available information.

SUPPLEMENTARY INFORMATION: The Department is submitting the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

This Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Lender Qualifications for Multifamily Accelerated Processing (MAP).

OMB Control Number, if applicable: 2502–0541.

Description of the Need for the Information and Proposed Use: Multifamily Accelerated Processing (MAP) is a procedure that permits approved lenders to prepare, process, and submit loan applications for Federal Housing Administration (FHA) multifamily mortgage insurance. An FHA-approved multifamily Lender wishing to participate in MAP must submit a MAP application package so that HUD may determine whether or not it meets the additional qualifications required of a MAP Lender. A Quality Control Plan is a required exhibit in the Lender application package.

Agency Form Numbers, if Applicable: None.

Estimation of the Total numbers of Hours Needed To Prepare the Information Collection Including Number of Respondents, Frequency of Response, and Hours of Response: The annual number of respondents is 25 preparing 25 responses annually. The hours per response are 20 hours for the MAP Lender application, and the frequency of response is on occasion. The total estimated annual burden hours is 500.

Status of the Proposed Information Collection: Extension of a currently approved collection.

Authority: The Paperwork Reduction Act of 1995, 44 U.S.C., Chapter 35, as amended.

Dated: July 19, 2007.

Frank L. Davis,

General Deputy Assistant Secretary for Housing, Deputy Federal Housing Commissioner.

[Docket No. FR–5117–N–61]

Notice of Submission of Proposed Information Collection to OMB; Survey of Participating Jurisdictions in ADDI/HOME Programs

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

The U.S. Senate Committee Report of the FY 2006 Transportation, Treasury and HUD Appropriations Act directed HUD to report on the default and delinquency rate of households who receive downpayment assistance through the American Dream Downpayment Initiative (ADDI) and HOME Investment Partnerships Program (HOME). A sample of Participating Jurisdiction (PJs) who met the eligibility requirements for the ADDI/HOME Program will provide the information for this study.

DATES: *Comments Due Date:* September 4, 2007.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval Number (2528–Pending) and should be sent to: HUD Desk Officer,

Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–6974.

FOR FURTHER INFORMATION CONTACT: Lillian Deitzer, Departmental Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410; e-mail *Lillian_L._Deitzer@HUD.gov* or telephone (202) 708–2374. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Deitzer or from HUD's Web site at *http://www5.hud.gov:63001/po/i/icbts/collectionsearch.cfm.*

SUPPLEMENTARY INFORMATION: This notice informs the public that the Department of Housing and Urban Development has submitted to OMB a request for approval of the information collection described below. This notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This notice also lists the following information:

Title of Proposal: Survey of Participating Jurisdictions in ADDI/HOME programs.

OMB Approval Number: 2528–Pending.

Form Numbers: None

Description of the Need for the Information and Its Proposed Use: The U.S. Senate Committee Report of the FY 2006 Transportation, Treasury and HUD Appropriations Act directed HUD to report on the default and delinquency rate of households who receive downpayment assistance through the American Dream Downpayment Initiative (ADDI) and HOME Investment Partnerships Program (HOME). A sample of Participating Jurisdiction (PJs) who met the eligibility requirements for the ADD/HOME Program will provide the information for this study.

Frequency of Submission: Other—one time.

	Number of respondents	×	Annual responses	×	Hours per response	=	Burden hours
Reporting Burden	116		1		12		1,392

Total Estimated Burden Hours: 1,392.

Status: New collection.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: July 26, 2007.

Privacy Act; Proposed New Systems of Records; Grants Interface Management System (GIMS/P017)

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Establish a new Privacy Act system of records.

SUMMARY: HUD proposes to establish a new record system to add to its inventory of systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended. The proposed new system of records is the Grants Interface Management System (GIMS/P017), HUD/ADM–08. HUD's Departmental Grants Management and Oversight Office will utilize the GIM system to manage the transmission of electronic grant applications received from the *http://www.Grants.gov* portal, which is the central storehouse for information on federal government grant programs. HUD will also utilize this new system as the repository for the electronic applications received.

DATES: *Effective Date:* This action shall be effective without further notice on September 4, 2007 unless comments are received during or before this period that would result in a contrary determination.

Comments Due Date: September 4, 2007.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street, SW., Room 10276, Washington, DC 20410–0500. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address.

FOR FURTHER INFORMATION CONTACT: The Departmental Privacy Act Officer, 451 Seventh Street, SW., Room 4178, Washington, DC 20410, telephone number (202) 708–2374 or the System Manager, Loyd Lamois, Supervisory Program Analyst, 451 Seventh Street, SW., Room 3156, Washington, DC 20410, telephone number (202) 708–0667. (These are not a toll-free numbers.) Telecommunication device for hearing and speech-impaired individuals (TTY) is available at (800) 877–8339 (Federal Information Relay Service).

SUPPLEMENTARY INFORMATION: Title 5 U.S.C. 552a(e)(4) and (11) provide that the public be afforded a 30-day period in which to comment on the new system of records, and require published notice of the existence and character of the system of records.

The new system report was submitted to the Office of Management and Budget (OMB), the Senate Committee on Homeland Security and Governmental Affairs, and the House Committee on Oversight and Government Reform pursuant to paragraph 4c of Appendix 1 to OMB Circular No. A–130, ''Federal Responsibilities for Maintaining Records About Individuals,'' July 25, 1994 (59 FR 37914).

Authority: 5 U.S.C. 552a.

Dated: July 27, 2007.

Lisa Schlosser,

Chief Information Officer.

HUD/ADM–08

SYSTEM NAME:

Grants Interface Management System (GIMS).

SYSTEM LOCATION:

HUD Headquarters, Charleston, West Virginia.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Electronic applicants to HUD competitive (discretionary) grant programs.

CATEGORIES OF RECORDS IN THE SYSTEM:

Electronic grant applications which typically include statements of qualifications, which may include resumes, program budgets and work plans, evaluation plans, and supporting documents such as proof of local support. Resumes may include name, home address, home telephone number, personal email address.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Records are authorized by regulations governing administration of grants and cooperative agreements (24 CFR, Part 84 or 85), and the HUD Reform Act of 1989 Public Law 101–235 (24 CFR Part 4) and scheduled per the NARA requirements for records disposition at 36 CFR Part 1228.

PURPOSES:

The purpose of this system is to receive grant applications from the Grants.gov portal. Records are maintained in compliance with the requirements of the HUD Reform Act of 1989, Public Law 101–235 (24 CFR Part 4) and scheduled per the NARA requirements for records disposition at 36 CFR Part 1228.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, other routine uses are as follows: Routine uses include review of applications. Persons with access at various points in the process include reviewers and program managers.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

Under this section the following subsections must be listed:

STORAGE:

Paper applications are maintained in locked file cabinets and access is granted to personnel who service the records. Electronic data is maintained in the GIMS database.

RETRIEVABILITY:

Applications are indexed by application tracking number, award tracking number, applicant organization name.

SAFEGUARDS:

Paper Records are typically stored in locked cabinets and limited to those personnel who service the records. System access is granted by program administrators and by user ID and password.

RETENTION AND DISPOSAL:

Records are retained per the requirements of the HUD Reform Act of 1989 Pub. Law 101–235 (24 CFR Part 4), and scheduled under the NARA requirements for records disposition at 36 CFR Part 1228.

SYSTEM MANAGER(S) AND ADDRESS:

Loyd Lamois, Supervisory Program Analyst, Office of Departmental Grants Managements and Oversight, Department of Housing and Urban Development, 451 Seventh Street SW., Room 3156, Washington, DC 20410.

NOTIFICATION PROCEDURES:

''For information, assistance, or inquiry about the existence of records, contact the Privacy Act Officer at the Department of Housing and Urban Development, 451 Seventh Street SW., Room 4178, Washington, DC 20410. Written requests must include the full name, document with photo (driver's license, etc.), date of birth, current address, and telephone number of the individual making the request.

CONTESTING RECORD PROCEDURES:

Procedures for the amendment or correction of records, and procedures for applicants who want to appeal initial agency determinations appear in 24 CFR part 16.

If additional information is needed, contact:

(i) In relation to contesting contents of records, the Privacy Act Officer at HUD, 451 Seventh Street, SW., Room 4178, Washington, DC 20410; and,

(ii) In relation to appeals of initial denials, HUD, Departmental Privacy Appeals Officer, Office of General Counsel, 451 Seventh Street, SW., Washington, DC 20410.

RECORD SOURCE CATEGORIES:

Information is submitted by Authorized Organizational Representatives registered at Grants.gov and authorized by applicant organizations.

EXEMPTIONS FROM CERTAIN PROVISIONS OF THE ACT:

''None.''

[FR Doc. E7–14942 Filed 8–1–07; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Species Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of permit applications; request for comments.

SUMMARY: The following applicant has applied for a permit to conduct certain activities with endangered species.

DATES: We must receive any written comments on or before September 4, 2007.

ADDRESSES: Regional Director, Attn: Peter Fasbender, U.S. Fish and Wildlife Service, Ecological Services, 1 Federal Drive, Fort Snelling, MN 55111–4056; electronic mail, *permitsR3ES@fws.gov.*

FOR FURTHER INFORMATION CONTACT: Mr. Peter Fasbender, (612) 713–5343.

SUPPLEMENTARY INFORMATION:

Endangered Species

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), with some exceptions, prohibits activities affecting endangered species unless authorized by a permit from the Service. Before issuing a permit, we invite public comment on it. Accordingly, we invite public comment on the following applicant's permit application for certain activities with endangered species authorized by section 10(a)(1)(A) of the Act and the regulations governing the taking of endangered species (50 CFR 17). Submit your written data, comments, or requests for copies of the complete applications to the address shown in **ADDRESSES**.

Permit Number TE023664–15

Applicant: Environmental Solutions and Innovations, Inc., Cincinnati, OH.

The applicant requests a permit amendment to take listed mussels throughout Indiana, Illinois, Kentucky, Michigan, New York, Ohio, Pennsylvania, and West Virginia. The scientific research is aimed at enhancement of survival of the species in the wild.

Permit Number TE126861–0

Applicant: Bat Conservation and Management, Inc., Carlisle, PA.

The applicant requests a permit amendment to take the Indiana bat (*Myotis sodalis*) throughout Michigan and Missouri. The scientific research is aimed at enhancement of survival of the species in the wild.

Permit Number TE128263–1

Applicant: Ecological Specialties, LLC., Symsonia, KY.

The applicant requests a permit amendment to take Indiana bat throughout Iowa, Okalahoma, Georgia, North Carolina, South Carolina, Wisconsin, Vermont, Florida, Michigan, Mississippi, Maryland, New Jersey, Connecticut, and Massachusetts. The scientific research is aimed at enhancement of survival of the species in the wild.

Permit Number TE160180

Applicant: Amy Halsall, Woodridge, IL.

The applicant requests a permit to take the Indiana bat (*Myotis sodalis*) throughout Illinois and Indiana. The scientific research is aimed at enhancement of survival of the species in the wild.

Permit Number TE160235

Applicant: The Ohio Department of Transportation, Columbus, OH.

The applicant requests a permit to take the Indiana bat (*Myotis sodalis*) throughout Ohio. The scientific research is aimed at enhancement of survival of the species in the wild.

Public Comments

We solicit public review and comment on this permit application. Please refer to the respective permit number when you submit comments. Comments and materials we receive are available for public inspection, by appointment, during normal business hours at the address shown in the **ADDRESSES** section. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

National Environmental Policy Act (NEPA)

In compliance with NEPA (42 U.S.C. 4321 *et seq.*), we have made an initial determination that the activities proposed by this permit are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Dated: July 12, 2007.

TJ Miller,

Chief, Endangered Species, Ecological Services, Region 3, Fort Snelling, Minnesota.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Wildlife and Plants; 5-Year Review of Nine Southeastern Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Fish and Wildlife Service is initiating 5-year reviews of the Louisiana black bear (*Ursus americanus luteolus*), Alabama red-bellied turtle (*Pseudemys alabamensis*), goldline darter (*Percina aurolineata*), blue shiner (*Cyprinella caerulea*), fat pocketbook (*Potamilus capax*), slender campeloma (*Campeloma decampi*), armored snail (*Pyrgulopsis* (=Marstonia) *pachyta*), cave crayfish (*Cambarus zophonastes*), and lyrate bladderpod (*Lesquerella lyrata*), under section 4(c)(2) of the Endangered Species Act (Act) of 1973 (16 U.S.C. 1531 *et seq.*), as amended. The purpose of reviews conducted under this section of the Act is to ensure that the classification of species as threatened or endangered on the List of Endangered and Threatened Wildlife and Plants (50 CFR 17.11 and 17.12) is accurate. A 5-year review is an assessment of the best scientific and commercial data available at the time of the review.

DATES: To allow us adequate time to conduct this review, information submitted for our consideration must be received on or before October 1, 2007. However, we will continue to accept new information about any listed species at any time.

ADDRESSES: Information submitted on the Louisiana black bear should be sent to Field Supervisor, Lafayette Field Office, Fish and Wildlife Service, 646 Cajundome Blvd., Suite 400, Lafayette, Louisiana 70506, fax 337/291–3139. Information on the Alabama red-bellied turtle, goldline darter, blue shiner, fat pocketbook, and lyrate bladderpod should be sent to Field Supervisor, Jackson Field Office, Fish and Wildlife Service, 6578 Dogwood View Parkway, Jackson, Mississippi 39216, fax 601–965–4340. Information on the slender campeloma and armored snail should be sent to Field Supervisor, Daphne Field Office, Fish and Wildlife Service, 1208–B Main St., Daphne, Alabama 36526, fax 251/441–6222. Information submitted on the cave crayfish should be sent to Field Supervisor, Conway Field Office, Fish and Wildlife Service, 110 S. Amity Rd., Suite 300, Conway, Arkansas, fax 501/513–4480. Information received in response to this notice of review will be available for public inspection by appointment, during normal business hours, at the same addresses.

FOR FURTHER INFORMATION CONTACT: Debbie Fuller at the Lafayette, Louisiana office, address above, (telephone, 337/291–3124, e-mail *deborah_fuller@fws.gov*); Cary Norquist at the Jackson, Mississippi office, address above, (telephone, 601/321–1128, e-mail *cary_norquist@fws.gov*); Jeff Powell at the Daphne, Alabama office, address above, (telephone, 251/441–5181, *e-mail jeff_powell@fws.gov*); and David Kampwerth at the Conway, Arkansas office, address above, (telephone, 501/513–4477, e-mail *david_kampwerth@fws.gov*).

SUPPLEMENTARY INFORMATION: Under the Act, the Service maintains a list of endangered and threatened wildlife and plant species at 50 CFR 17.11 (for wildlife) and 17.12 (for plants) (collectively referred to as the List). Section 4(c)(2)(A) of the Act requires that we conduct a review of listed species at least once every 5 years. Then, on the basis of such reviews, under section 4(c)(2)(B), we determine whether or not any species should be removed from the List (delisted), or reclassified from endangered to threatened or from threatened to endangered. Delisting a species must be supported by the best scientific and commercial data available and only considered if such data substantiate that the species is neither endangered nor threatened for one or more of the following reasons: (1) The species is considered extinct; (2) the species is considered to be recovered; and/or (3) the original data available when the species was listed, or the interpretation of such data, were in error. Any change in Federal classification would require a separate rulemaking process. Amendments to the List through final rules are published in the **Federal Register**.

The regulations at 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species currently under active review. This notice announces our active review of the following species that are currently listed as endangered: Alabama red-bellied turtle, slender campeloma, armored snail, cave crayfish, and lyrate bladderpod. This notice also announces

our active review of the following species that are currently listed as threatened: Louisiana black bear, goldline darter, and blue shiner.

The List is also available on our internet site at *http://endangered.fws.gov/wildlife.html#Species.*

What Information Is Considered in the Review?

A 5-year review will consider the best scientific and commercial data that have become available since the current listing determination or most recent status review of each species, such as:

A. Species biology, including but not limited to population trends, distribution, abundance, demographics, and genetics;

B. Habitat conditions, including but not limited to amount, distribution, and suitability;

C. Conservation measures that have been implemented to benefit the species;

D. Threat status and trends (see five factors under heading ''How do we determine whether a species is endangered or threatened?''); and

E. Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Definitions Related to This Notice?

The following definitions are provided to assist those persons who contemplate submitting information regarding the species being reviewed:

A. *Species* includes any species or subspecies of fish, wildlife, or plant, and any distinct population segment of any species of vertebrate which interbreeds when mature.

B. *Endangered* means any species that is in danger of extinction throughout all or a significant portion of its range.

C. *Threatened* means any species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.

How Do We Determine Whether a Species Is Endangered or Threatened?

Section 4(a)(1) of the Act establishes that we determine whether a species is endangered or threatened based on one or more of the following five factors:

A. The present or threatened destruction, modification, or curtailment of its habitat or range;

B. Overutilization for commercial, recreational, scientific, or educational purposes;

C. Disease or predation;

D. The inadequacy of existing regulatory mechanisms; or

E. Other natural or manmade factors affecting its continued existence.

What Could Happen as a Result of This Review?

If we find that there is new information concerning any of these nine species indicating that a change in classification may be warranted, we may propose a new rule that could do one of the following: (a) Reclassify the species from endangered to threatened (downlist); (b) reclassify the species from threatened to endangered (uplist); or (c) delist the species. If we determine that a change in classification is not warranted, then the species will remain on the List under its current status.

Public Solicitation of New Information

We request any new information concerning the status of any of these nine species. See ''What information is considered in the review?'' heading for specific criteria. Information submitted should be supported by documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources. Our practice is to make comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their names and home addresses, etc., but if you wish us to withhold this information, you must state this prominently at the beginning of your comments. In addition, you must present rationale for withholding this information. This rationale must demonstrate that disclosure would constitute a clearly unwarranted invasion of privacy. Unsupported assertions will not meet this burden. In absence of exceptional, undocumented circumstances, this information will be released. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Authority

This document is published under the authority of the Endangered Species Act (16 U.S.C. 1531 *et seq.*).

Dated: June 23, 2007.

Cynthia K. Dohner,

Acting Regional Director, Southeast Region

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability of the Recovery Plan for the Endangered Vermilion Darter

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: We, the Fish and Wildlife Service, announce the availability of the final recovery plan for the endangered vermilion darter (*Etheostoma chermocki*). The vermilion darter is a medium-sized darter found only in the Turkey Creek drainage, Jefferson County, Alabama. The recovery plan includes specific recovery objectives and criteria to be met to delist the vermilion darter under the Endangered Species Act of 1973, 16 U.S.C. 1531 *et seq.*, as amended (Act).

ADDRESSES: You may obtain a copy of the recovery plan by visiting our recovery plan website on the Internet at *http://endangered.fws.gov/recovery/index.html#plans* or by contacting the Jackson Field Office, Fish and Wildlife Service, 6578 Dogwood View Parkway, Suite A, Jackson, Mississippi 39213 (Telephone 601/321–1127).

FOR FURTHER INFORMATION CONTACT: Daniel Drennen at the above address and telephone number.

SUPPLEMENTARY INFORMATION:

Background

The vermilion darter (*Etheostoma chermocki* (Teleostei: Percidae)) was officially described in 1992 from Turkey Creek, a tributary of the Locust Fork, which is within the Black Warrior River drainage of Jefferson County, Alabama. The vermilion darter belongs to the subgenus *Ulocentra* (snubnose darters) which includes fish that are slightly laterally compressed, have complete lateral lines, broadly connected gill membranes, a short head, and a small pronounced mouth. The vermilion darter is a medium-sized darter, reaching about 7.1 centimeters (2.8 inches) total length (length from tip of snout to longest portion of tail fin). The vermilion darter was listed as endangered under the Act on November 28, 2001 (66 FR 59367).

The current range of the vermilion darter is 14.1 kilometers (km) (8.7 miles (mi)) of the main stem of Turkey Creek, the lowermost reaches (0.8 km (0.5 mi)) of Dry and Beaver creeks and within a spring run of an unnamed spring that drains into Beaver Creek along Alabama Highway 79. Restricted and localized in range, the vermilion darter is vulnerable

to sedimentation (excess sediments suspended or deposited in a stream), nutrificiation (excessive nutrients present, such as nitrogen and phosphorus), and barriers or restrictions to stream flow.

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Act and of our endangered species program. To help guide the recovery effort, we prepare recovery plans for most listed species. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for downlisting or delisting them, and estimate time and cost for implementing recovery measures.

The Act requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act requires us to provide public notice and an opportunity for public review and comment during recovery plan development. A notice of availability of the technical agency draft for the vermilion darter was published in the **Federal Register** on July 21, 2005 (70 FR 42087). A 60-day comment period was opened with the notice, closing on September 19, 2005. We received comments from four parties, including comments from one peer reviewer of the recovery plan. Comments and information submitted were considered in the preparation of this final plan and, where appropriate, incorporated.

The objective of this recovery plan is to provide a framework for the recovery of the vermilion darter until that protection under the Act is no longer necessary. As recovery criteria are met, the status of the species will be reviewed, and it will be considered for removal from the Federal List of Endangered and Threatened Wildlife and Plants (50 CFR part 17). Actions needed to recover the vermilion darter include: (1) Protect vermilion darter populations and habitat; (2) ensure and support implementation of effective protective actions; (3) determine habitat requirements and population information of the vermilion darter; (4) determine the necessary husbandry techniques of the species, to produce them in captivity and establish an additional population in the known range; (5) identify, acquire, and restore properties in the Turkey Creek watershed; and (6) promote partnerships and voluntary stewardship within the watershed.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: June 19, 2007.

Cynthia K. Dohner,

Acting Regional Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F–19155–3; AK–964–1410–KC–P]

Alaska Native Claims Selection

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of decision approving lands for conveyance.

SUMMARY: As required by 43 CFR 2650.7(d), notice is hereby given that an appealable decision approving the surface and subsurface estates in certain lands for conveyance pursuant to the Alaska Native Claims Settlement Act will be issued to Doyon, Limited. The lands are in the vicinity of Stevens Village, Alaska, and are located in:

Fairbanks Meridian, Alaska

T. 15 N., R. 5 W.,
Secs. 5 to 8, inclusive.
Containing 2,486.40 acres.
T. 15 N., R. 7 W.,
Secs. 13 to 36, inclusive.
Containing 13,748.13 acres.
Aggregating 16,234.53 acres.

Notice of the decision will also be published four times in the Anchorage Daily News.

DATES: The time limits for filing an appeal are:

1. Any party claiming a property interest which is adversely affected by the decision shall have until September 4, 2007 to file an appeal.

2. Parties receiving service of the decision by certified mail shall have 30 days from the date of receipt to file an appeal.

Parties who do not file an appeal in accordance with the requirements of 43 CFR part 4, Subpart E, shall be deemed to have waived their rights.

ADDRESSES: A copy of the decision may be obtained from: Bureau of Land Management, Alaska State Office, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7504.

FOR FURTHER INFORMATION, CONTACT: The Bureau of Land Management by phone at 907–271–5960, or by e-mail at *ak.blm.conveyance@ak.blm.gov*. Persons who use a telecommunication device (TTD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8330, 24 hours a day, seven days a week, to contact the Bureau of Land Management.

Michael Bilancione,

Land Law Examiner, Branch of Adjudication II.

Bureau of Land Management

[CA–310–0777–XG

Notice of Public Meeting: Northwest California Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 (FLPMA), and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of the Interior, Bureau of Land Management (BLM) Northwest California Resource Advisory Council will meet as indicated below.

DATES: The meeting will be held Thursday and Friday, Sept. 20–21, 2007, in Redding, California. On Sept. 20, the council members convene at 10 a.m. at the BLM Redding Field Office, 355 Hemsted Dr., and depart immediately for a field tour of BLM-managed public lands near Redding. Members of the public are welcome on the tour, but they must provide their own transportation and lunch. On Sept. 21, the council convenes at 8 a.m. in the Conference Room of the Redding Field Office. Time for public comment has been set aside for 11 a.m.

FOR FURTHER INFORMATION CONTACT: Rich Burns, BLM Ukiah Field Office manager, (707) 468–4000; or BLM Public Affairs Officer Joseph J. Fontana, (530) 252–5332.

SUPPLEMENTARY INFORMATION: The 12-member council advises the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with public land management in Northwest California. At this meeting, agenda topics include an update on management proposals for the Sacramento River Bend, field office reports on minerals management, a report on the BLM Managing for Excellence initiative, and status reports on management plan development for Cow Mountain and Lacks Creek.

Members will also hear status reports on activities in the Arcata, Redding and Ukiah field offices and the California Coastal National Monument. All meetings are open to the public. Members of the public may present written comments to the council. Each formal council meeting will have time allocated for public comments. Depending on the number of persons wishing to speak, and the time available, the time for individual comments may be limited. Members of the public are welcome on field tours, but they must provide their own transportation and lunch. Individuals who plan to attend and need special assistance, such as sign language interpretation and other reasonable accommodations, should contact the BLM as provided above.

Dated: July 26, 2007.

Joseph J. Fontana,

Public Affairs Officer.

BILLING CODE 4310–40–M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

San Joaquin River Restoration Program

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of Intent to prepare a Program Environmental Impact Statement/Environmental Impact Report (PEIS/EIR) and Notice of Scoping Meetings.

SUMMARY: Pursuant to the National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA), the Bureau of Reclamation (Reclamation) and the California Department of Water Resources (DWR) propose to prepare a PEIS/EIR for the San Joaquin River Restoration Program (Program). The proposed Program is expected to be implemented by Reclamation, Fish and Wildlife Service (USFWS), the National Marine Fisheries Service (NMFS), the California Department of Fish and Game (DFG), and the DWR.

DATES: Four scoping meetings will be held to solicit public input on alternatives, concerns, and issues to be addressed in the PEIS/EIR. The meeting dates are:

- Tuesday, August 28, 2007, 6 p.m. to 8:30 p.m., Tulare, CA
- Wednesday, August 29, 2007, 6 p.m. to 8:30 p.m., Fresno, CA
- Thursday, August 30, 2007, 6 p.m. to 8:30 p.m., Los Banos, CA
- Monday, September 10, 2007, 1:30 p.m. to 4 p.m., Sacramento, CA

Written comments on the scope of the PEIS/EIR should be sent by September 21, 2007 to Ms. Margaret Gidding, Bureau of Reclamation, 2800 Cottage Way MP–140, Sacramento, CA 95825 or via e-mail at *mgidding@mp.usbr.gov*.

ADDRESSES: The scoping meeting locations are:

- International Agri-Center, Banquet Hall, 4450 S. Laspina St., Tulare, CA 93274
- Piccadilly Inn, University, Ballroom, 4961 North Cedar Ave., Fresno, CA 93726
- Merced County Fairgrounds, Germino Room, 403 F St., Los Banos, CA 93635
- Library Galleria, 828 I St., Sacramento, CA 95814

FOR FURTHER INFORMATION CONTACT: Ms. Margaret Gidding at the above address, by telephone at 916–978–5104, TDD 916–978–5608 or via fax at 916–978–5114. Additional information is available online at *http://www.restoresjr.com*. If special assistance is required at one of the scoping meetings, please contact Ms. Margaret Gidding via the phone number or e-mail listed above no less than five working days prior to the meetings.

SUPPLEMENTARY INFORMATION: Development of the PEIS/EIR for the Program is being carried out under Congressional authorization granted to the Secretary of the Interior under section 3406(c)(1) of the Central Valley Project Improvement Act (CVPIA) and will serve as the initial planning and environmental review activities necessary to implement the Settlement described below.

In 1992, Congress passed the CVPIA (Pub. L. 102–575, Title XXXIV) in order to protect, restore, and enhance fish, wildlife, and associated habitats in California's Central Valley. Specifically, CVPIA Section 3406(c)(1) requires the Secretary of the Interior to ''[d]evelop a comprehensive plan, which is reasonable, prudent, and feasible, to address fish, wildlife, and habitat concerns on the San Joaquin River, including but not limited to the streamflow, channel, riparian habitat, and water quality improvements that would be needed to reestablish where necessary and to sustain naturally reproducing anadromous fisheries from Friant Dam to its confluence with the San Francisco Bay/Sacramento-San Joaquin Delta Estuary.''

In 1988, a coalition of environmental groups, led by the Natural Resources Defense Council (NRDC), filed a lawsuit challenging the renewal of the long-term water service contracts between the United States and the Central Valley Project, Friant Division contractors. After more than 18 years of litigation of this lawsuit, known as the *Natural Resources Defense Council et al.*, v. *Rodgers, et al.*, a Settlement was reached. On September 13, 2006, the Settling Parties reached agreement on the terms and conditions of the Settlement which was subsequently approved by the Court on October 23, 2006. The ''Settling Parties'' include the NRDC, Friant Water Users Authority, and the Departments of the Interior and Commerce.

The Settlement is based on two parallel goals:

- To restore and maintain fish populations in ''good condition'' in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish (Restoration Goal); and
- To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement (Water Management Goal).

The Settlement states that the Secretary of the Interior will implement the terms and conditions of the Settlement. Additionally, the Settling Parties agreed that implementation of the Settlement will also require participation of the State of California (State). Therefore, concurrent with the execution of the Settlement, the Settling Parties entered into a Memorandum of Understanding (MOU) with the State (by and through the California Resources Agency, DWR, DFG, and the California Environmental Protection Agency) regarding the State's role in the implementation of the Settlement. The ''implementing agencies'', which include Reclamation, USFWS, NMFS, DWR, and DFG, are responsible for the management of the Program to implement the Settlement.

Public Disclosure

Before including your name, address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: July 27, 2007.

John F. Davis,

Deputy Regional Director, Mid-Pacific Region.

BILLING CODE 4310–MN–P

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

[OMB Number 1110–0042]

Agency Information Collection Activities; Proposed New Collection; Comments Requested

ACTION: 60-Day Notice of Information Collection Under Review: CJIS Customer Satisfaction Surveys

The Department of Justice (DOJ), Federal Bureau of Investigation (FBI), Criminal Justice Information Services (CJIS) Division will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with review procedures of the Paperwork Reduction Act of 1995. Comments are encouraged and will be accepted for ''sixty days'' until [––]. This process is conducted in accordance with 5 CFR 1320.10.

If you have comments, especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Ashley K. Grove, IT Specialist, Federal Bureau of Investigation, CJIS Division, Module D3, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306–0151, or facsimile at (304) 625–3457.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency/component, including whether the information will have practical utility;

—Evaluate the accuracy of the agencies/components estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of this Information Collection:

(1) *Type of Information Collection:* Revision of a previously approved collection.

(2) *Title of the Form/Collection:* CJIS Customer Satisfaction Surveys.

(3) *Agency Form Number, if any, and the applicable component of the department sponsoring the collection*:

Form Number: 1–760, 1–761, 1–762, 1–763, 1–764, 1–765, 1–766, 1–770.

Criminal Justice Information Services Division, Federal Bureau of Investigation, Department of Justice.

(4) *Affected Public who will be asked or required to respond, as well as a brief abstract*:

Primary: State, local or tribal governments. Other: Federal Government and business or other for-profit.

Brief Abstract: The FBI established the CJIS Division to serve as the focal point and central repository for criminal justice information services within the FBI. The CJIS Division is responsible for the following programs administered by the FBI for the benefit of local, state, federal, and foreign criminal justice agencies: Integrated Automated Fingerprint Identification System; Law Enforcement Online; National Crime Information Center; National Instant Criminal Background Check System—Federal Firearm Licensees; National Instant Criminal Background Check System—Point of Contact and Partial Point of Contact States; Uniform Crime Reporting; Interstate Identification Index; and the CJIS Division Intelligence Group.

CJIS will be conducting a customer service survey for each of the eight aforementioned programs. These surveys will be used to establish approval rating baselines of CJIS Division services in addition to identifying areas where our services can be improved or new services established to assist the criminal justice community with the performance of their official duties.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond*:

Integrated Automated Fingerprint Identification System – Respondents = 400, Average Completion Time = 4 minutes; Law Enforcement Online – Respondents = 400, Average Completion Time = 2 minutes; National Crime Information Center – Respondents = 400, Average Completion Time = 3 minutes; National Instant Criminal Background Check System – Federal Firearm Licensees – Respondents = 400, Average Completion Time = 2 minutes; National Instant Criminal Background Check System – Point of Contact and Partial Point of Contact – Respondents = 21, Average Completion Time = 11 minutes; Uniform Crime Reporting – Respondents = 400, Average Completion Time = 3 minutes; Interstate Identification Index – Respondents = 400, Average Completion Time = 3 minutes; and the CJIS Division Intelligence Group – Respondents = 400, Average Completion Time = 3 minutes.

(6) *An estimate of the total public burden (in hours) associated with the collection*:

There are an estimated 137 total public burden hours associated with this collection. If additional information is required contact: Ms. Lynn Bryant, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Patrick Henry Building, Suite 1600, 601 D Street, NW., Washington, DC 20530.

Dated: July 27,2007.

Lynn Bryant,

Department Clearance Officer, PRA, United States Department of Justice.

[FR Doc. E7–14951 Filed 8–1–07; 8:45 am]

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

Office of Justice Programs

[OMB Number 1121–NEW]

Agency Information Collection Activities; Proposed Collection; Comments Requested

ACTION: 60–Day Notice of Information Collection Under Review: 2007 Census of Law Enforcement Aviation Units.

The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Statistics (BJS), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for ''sixty days'' until October 1, 2007. This

process is conducted in accordance with 5 CFR 1320.10.

If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Steven Smith, Bureau of Justice Statistics, 810 Seventh St., NW., Washington, DC 20531.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agencies' estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Enhance the quality, utility, and clarity of the information to be collected; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Proposed Collection.

(2) *Title of the Form/Collection:* 2007 Census of Law Enforcement Aviation Units.

(3) *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Not applicable.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Federal, State, and Local Government. This information collection is a census of State and local law enforcement agency aviation units. The census will provide detailed statistics on the operations, personnel, expenditures, equipment, and other information about these important units.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 250 respondents will complete a one-hour questionnaire.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 250 total annual burden hours associated with this collection.

If additional information is required contact: Lynn Bryant, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Patrick Henry Building, Suite 1600, 601 D Street, NW., Washington, DC 20530.

Dated: July 27, 2007.

Lynn Bryant,

Department Clearance Officer, Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 (''the Act'') and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Division of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than August 13, 2007.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Division of Trade Adjustment Assistance, at the address shown below, not later than August 13, 2007.

The petitions filed in this case are available for inspection at the Office of the Director, Division of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room C–5311, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC, this 24th day of July 2007.

Richard Church,

Certifying Officer, Division of Trade Adjustment Assistance.

[TA–W–58,984]

Independent Steel Castings Company, New Buffalo, MI; Notice of Revised Determination of Alternative Trade Adjustment Assistance on Remand

On July 10, 2007, the U.S. Court of International Trade (USCIT) remanded to the U.S. Department of Labor (Department) *Former Employees of Independent Steel Castings Company, Inc.* v. *United States Department of Labor,* Court No. 06–00338. In its order, the USCIT directed the Department to acquire additional information on criterion two of the Alternative Trade Adjustment Assistance (ATAA) program (whether the adversely affected workers in the petitioning workers' firm possess job skills that are not easily transferable to other employment).

The Department's determination regarding the subject workers' eligibility to apply for Trade Adjustment Assistance (TAA) and ineligibility to apply for Alternative Trade Adjustment Assistance (ATAA) was issued on June 16, 2006. The Department's Notice of determination was published in the **Federal Register** on July 14, 2006 (71 FR 40157). The determination stated that of the three criteria used to assess eligibility for ATAA —(1) Significant number of adversely affected workers age 50 or over; (2) whether workers possess skills that are easily transferable; and (3) whether competitive conditions within the workers' industry are adverse—workers at the subject firm had not satisfied the second criterion because they possessed skills that were easily transferable. The subject workers had been engaged in the production of investment castings (i.e. steel, aluminum and bronze castings). The subject firm closed May 2005.

The petitioner, the International Union, United Automobile, Aerospace and Agricultural Implement Workers of America (UAW), requested administrative reconsideration of the negative ATAA determination. The request alleged that the county in which the subject firm is located ''has not seen any significant employment growth in the last four years'' and has a high unemployment rate.

By a letter dated July 31, 2006, the Department denied the request for reconsideration, stating that the UAW had not presented evidence that the Department had erred in its interpretation of facts or of the law. The letter also outlined the Department's ATAA investigation methodology—Training and Employment Guidance Letter No. 2–03 (TEGL 2–03)—and stated that the UAW's allegations were insufficient to satisfy ATAA criterion two (whether workers possess skills that are easily transferable).

In the complaint, the Plaintiffs alleged that the separated workers did not possess skills that are easily transferable; that the Department ''relied on conclusory assertions'' provided by the subject firm ''while ignoring evidence presented by the Union;'' and that the Department ''relied on unverified information'' provided by the subject firm official.

While the USCIT upheld the Department's position that it was reasonable for the Department to rely on information provided by a knowledgeable subject firm official, the USCIT found that the Department's conclusion on ATAA criterion two was not supported by substantial evidence. Accordingly, the USCIT remanded the matter to the Department for further investigation and a redetermination of the subject workers' ATAA eligibility.

During the remand investigation, the Department contacted the Plaintiffs' counsel to obtain the position descriptions and lists of skill sets of each of the separated workers. The Department also attempted to contact the subject firm official who provided the Department information during the initial investigation to obtain more information regarding the workers' skills and the skills required to gain new employment in the New Buffalo, Michigan local commuting area. In addition, the Department surveyed companies in the New Buffalo, Michigan local commuting area to determine whether their jobs required the same skills as those which the subject workers possessed.

As a result of the remand investigation, the Department finds that workers at the subject firm do not possess skills that are easily transferable. Accordingly, the workers have satisfied criterion two. Further, the Department finds that at least five percent of the workforce at the subject firm is at least fifty years of age and that competitive conditions within the industry are adverse. Therefore, the Department has concluded that all three ATAA criteria have been met.

Conclusion

After careful review of the additional facts obtained on remand, I conclude that the requirements of section 246 of the Trade Act of 1974, as amended, have been met for workers at the subject firm. In accordance with the provisions of the Act, I make the following certification:

''All workers of Independent Steel Castings Company, New Buffalo, Michigan, who became totally or partially separated from employment on or after March 2, 2005

through June 16, 2008 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under section 246 of the Trade Act of 1974.''

Signed in Washington, DC, this 19th day of July, 2007.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–59,168]

Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance; Joan Fabrics Corporation Including Workers Who's Wages Were Paid By Accuforce Staffing Service; Siler City, North Carolina

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and Section 246 of the Trade Act of 1074 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on April 25, 2006, applicable to workers of Joan Fabrics Corporation, Siler City, North Carolina. The notice was published in the **Federal Register** on May 11, 2006 (71 FR 27519).

At the request of a company official, the Department reviewed the certification for workers of the subject firm. The workers were engaged in the production of upholstery, wall panel and tie lining fabrics.

New information shows that following a change in ownership, some workers of the Siler City, North Carolina location of the subject firm will become employees of AccuForce Staffing Service.

Workers separated from employment at the Siler City, North Carolina location of the subject firm had their wages reported under a separate unemployment insurance (UI) tax account for AccuForce Staffing Service.

Accordingly, the Department is amending the certification to properly reflect this matter.

The intent of the Department's certification is to include all workers of Joan Fabrics Corporation, including workers who's wages were paid by AccuForce Staffing Service, Siler City, North Carolina who were adversely affected by a shift in production to Mexico.

The amended notice applicable to TA–W–59,168 is hereby issued as follows:

''All workers of Joan Fabrics Corporation, including workers who's wages were paid by AccuForce Staffing Service, Siler City, North Carolina, who became totally or partially separated from employment on or after April 5, 2005, through April 25, 2008, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.''

Signed at Washington, DC, this 26th day of July 2007.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance; Joan Fabrics Corporation Mastercraft Fabrics, LLC.; Oakland Plant Including Workers Who's Wages Were Paid By Accuforce Staffing Service; Spindale, NC

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and Section 246 of the Trade Act of 1074 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on September 27, 2005, applicable to workers of Joan Fabrics Corporation, Mastercraft Fabrics, LLC., Oakland Plant, Spindale, North Carolina. The notice was published in the **Federal Register** on October 31, 2005 (70 FR 72347). The certification was previously amended on November 23, 2005 to correct the impact date. The notice was published in the **Federal Register** on December 8, 2005 (70 FR 73033)

At the request of a company official, the Department reviewed the certification for workers of the subject firm. The workers were engaged in the production of jacquard furniture fabric.

New information shows that following a change in ownership, some workers of the Oakland Plant, Spindale, North Carolina location of the subject firm will become employees of AccuForce Staffing Service. Workers separated from employment at the Oakland Plant, Spindale, North Carolina location of the subject firm had their wages reported under a separate unemployment insurance (UI) tax account for AccuForce Staffing Service.

Accordingly, the Department is amending the certification to properly reflect this matter.

The intent of the Department's certification is to include all workers of Joan Fabrics Corporation, Mastercraft Fabrics, LLC., Oakland Plant, including workers who's wages were paid by AccuForce Staffing Service, Spindale, North Carolina who were adversely affected by a shift in production to Mexico.

The amended notice applicable to TA–W–57,746B is hereby issued as follows:

''All workers of Joan Fabrics Corporation, Mastercraft Fabrics, LLC., Oakland Plant, including workers who's wages were paid by AccuForce Staffing Service, Spindale, North Carolina, who became totally or partially separated from employment on or after November 11, 2005, through September 27, 2007, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.''

Signed at Washington, DC, this 25th day of July. 2007.

Circa 1801 Doblin, a Subsidiary of Joan Fabrics Corporation, EBM Textiles, LLC Division, Now Known as Valdese Weavers, Connelly Springs, NC; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and section 246 of the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification Regarding Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade

Adjustment Assistance on May 23, 2007, applicable to workers of Circa 1801 Doblin, a subsidiary of Joan Fabrics Corporation, EBM Textiles, LLC Division, Connelly Springs, North Carolina. The notice was published in the **Federal Register** on June 7, 2007 (72 FR 31615).

At the request of a company official, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of woven fabric, used primarily for upholstery.

New information shows that following a change in ownership, Circa 1801 Doblin, a subsidiary of Joan Fabrics Corporation, EBM Textiles, LLC Division, is now known as Valdese Weavers.

Workers separated from employment at the subject firm had their wages reported under a separate unemployment insurance (UI) tax account for Valdese Weavers.

Accordingly, the Department is amending this certification to properly reflect this matter.

The intent of the Department's certification is to include all workers of Circa 1801 Doblin, a subsidiary of Joan Fabrics Corporation, EBM Textiles, LLC Division, now known as Valdese Weavers, who were adversely affected by increased customer imports.

The amended notice applicable to TA–W–61,313 is hereby issued as follows:

''All workers of Circa 1801 Doblin, a subsidiary of Joan Fabrics Corporation, EBM Textiles, LLC Division, now known as Valdese Weavers, Connelly Springs, North Carolina, who became totally or partially separated from employment on or after April 13, 2006, through May 23, 2009, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under section 246 of the Trade Act of 1974.''

Maytag Corporation, A Wholly Owned Subsidiary of Whirlpool Corporation, Newton Division; Including On-Site Leased Workers of Henkel Corp., Randstad Corp., Ryerson Steel, Chem-Tool, Barnes Electric, Mid Iowa Tools, Kimco Janitorial, Johnson Controls, and Baker Electric Newton, IA; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and section 246 of the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on December 26, 2006, applicable to workers of Maytag Corporation, a wholly owned subsidiary of Whirlpool Corporation, Newton Division, Newton, Iowa. The notice was published in the **Federal Register** on January 16, 2007 (72 FR 1770).

At the request of a company official, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of laundry products (clothes washers and dryers) and are not separately identifiable by specific product.

New information shows that leased workers of the above listed firms were contracted to work on-site at the Newton, Iowa location of Maytag Corporation, a wholly owned subsidiary of Whirlpool Corporation, Newton Division. These workers provided a variety of functions in support of the production of laundry equipment (clothes washers and dryers) manufactured at the subject firm. The Department has determined that the above listed on-site worker groups are sufficiently under the control of Maytag Corporation to be considered leased workers.

The intent of the Department's certification is to include all workers employed at Maytag Corporation, a wholly owned subsidiary of Whirlpool Corporation, Newton Division, Newton, Iowa who were adversely affected by increased company imports.

The amended notice applicable to TA–W–60,515 is hereby issued as follows:

''All workers of Maytag Corporation, a wholly owned subsidiary of Whirlpool Corporation, Newton Division, including on-site leased workers of Henkel Corp., Randstad Corp., Ryerson Steel, Chem-Tool, Barnes Electric, Mid Iowa Tools, Kimco Janitorial, Johnston Controls, and Baker Electric, Newton, Iowa, who became totally or partially separated from employment on or after December 24, 2006, through December 26, 2008, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under section 246 of the Trade Act of 1974.''

McCormick and Co., Inc., CPD—Salinas Plant, Including On-Site Leased Workers of Spherion Staffing Group, Salinas, CA; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and section 246 of the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on August 31, 2006, applicable to workers of McCormick and Co., Inc., CPD—Salinas Plant, Salinas, California. The notice was published in the **Federal Register** on September 21, 2006 (71 FR 55216).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. The workers were engaged in the production of spices.

New information shows that leased workers of Spherion Staffing Group were employed on-site at the Salinas, California location of McCormick and Co., Inc., CPD—Salinas Plant. The Department has determined that the Spherion Staffing Group workers were sufficiently under the control of McCormick and Co., Inc. to be considered leased workers.

Based on these findings, the Department is amending this certification to include leased workers of Spherion Staffing Group working on-site at the Salinas, California location of the subject firm.

The intent of the Department's certification is to include all workers employed at McCormick and Co., Inc., CPD—Salinas Plant, including on-site leased workers of Spherion Staffing Group, Salinas, California who were adversely affected by a shift in production to Canada.

The amended notice applicable to TA–W–59,909 is hereby issued as follows:

''All workers of McCormick and Co., Inc., CPD—Salinas Plant, including on-site leased workers of Spherion Staffing Group, Salinas, California, who became totally or partially separated from employment on or after August 14, 2005 through August 31, 2008, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974.''

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) number and alternative trade adjustment assistance (ATAA) by (TA–W) number issued during the period of July 16 through July 20, 2007.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(a) of the Act must be met.

I. Section (a)(2)(A) All of the Following Must Be Satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. The sales or production, or both, of such firm or subdivision have decreased absolutely; and

C. Increased imports of articles like or directly competitive with articles produced by such firm or subdivision have contributed importantly to such workers' separation or threat of separation and to the decline in sales or production of such firm or subdivision; or

II. Section (a)(2)(B) Both of the Following Must Be Satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. there has been a shift in production by such workers' firm or subdivision to a foreign country of articles like or directly competitive with articles which are produced by such firm or subdivision; and

C. One of the Following Must Be Satisfied:

1. The country to which the workers' firm has shifted production of the articles is a party to a free trade agreement with the United States;

2. The country to which the workers' firm has shifted production of the articles to a beneficiary country under the Andean Trade Preference Act, African Growth and Opportunity Act, or the Caribbean Basin Economic Recovery Act; or

3. There has been or is likely to be an increase in imports of articles that are like or directly competitive with articles which are or were produced by such firm or subdivision.

Also, in order for an affirmative determination to be made for secondarily affected workers of a firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(b) of the Act must be met.

(1) Significant number or proportion of the workers in the workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The workers' firm (or subdivision) is a supplier or downstream producer to a firm (or subdivision) that employed a group of workers who received a certification of eligibility to apply for trade adjustment assistance benefits and such supply or production is related to the article that was the basis for such certification; and

(3) Either—

(A) The workers' firm is a supplier and the component parts it supplied for the firm (or subdivision) described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) A loss or business by the workers' firm with the firm (or subdivision) described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for the Division of Trade Adjustment Assistance to issue a certification of eligibility to apply for Alternative Trade Adjustment Assistance (ATAA) for older workers, the group eligibility requirements of Section 246(a)(3)(A)(ii) of the Trade Act must be met.

1. Whether a significant number of workers in the workers' firm are 50 years of age or older.

2. Whether the workers in the workers' firm possess skills that are not easily transferable.

3. The competitive conditions within the workers' industry (i.e., conditions within the industry are adverse).

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of section 222(a)(2)(A) (increased imports) of the Trade Act have been met.

TA–W–61,625; Performance Machine, La Palma, CA: June 6, 2006.

TA–W–61,803; Rima Manufacturing Company, Piston Division, Hudson, MI: June 14, 2006.

TA–W–61,608; Personnel Management, Inc., Diverisco, Working at Toyota Motor, Princeton, IN: May 29, 2006.

The following certifications have been issued. The requirements of section 222(a)(2)(B) (shift in production) of the Trade Act have been met.

NONE.

The following certifications have been issued. The requirements of section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) of the Trade Act have been met.

NONE.

The following certifications have been issued. The requirements of section 222(b) (downstream producer for a firm whose workers are certified eligible to apply for TAA based on increased imports from or a shift in production to Mexico or Canada) of the Trade Act have been met.

NONE.

Affirmative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of section 222(a)(2)(A) (increased imports) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA–W–61,753; WestPoint Home Inc., Bath Products Divisions, Wagram, NC: August 11, 2007.

TA–W–61,806; Laufen International, Inc., Canton Distribution Center, Canton, OH: July 9, 2006.

TA–W–61,554; SemiTool Incorporated, LC Staffing, Express Personnel, Workplace, Inc., Kalispell, MT: May 18, 2006.

TA–W–61,554A; SemiTool Incorporated—Birch Grove Site, Birch Grove Site, LC Staff, Express Personnel, Kalispell, MT: May 18, 2006.

TA–W–61,554B; SemiTool Incorporated—Libby Plant, Libby Plant, Kalispell, MT: May 18, 2006.

TA–W–61,638; Belcher Corporation LLC, South Easton, MA: May 25, 2006.
TA–W–61,575; Herzman and Company, Inc., Lebanon, PA: May 17, 2006.

The following certifications have been issued. The requirements of section 222(a)(2)(B) (shift in production) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA–W–61,779; Siemens Power Transmission and Distribution, Distribution Products Division, Wendell, NC: June 29, 2006.
TA–W–61,780; Harman Becker Automotive Systems, Inc., Martinsville, IN: June 28, 2006.
TA–W–61,791; Mahe Engine Components, Division of Mahle Industries, Inc., Franklin, KY: July 3, 2006.
TA–W–61,796; Greatbatch Hittman, Inc., Medical Solutions Div., Superior, Swift, Kelly, Anchor, Columbia, MD: June 29, 2006.
TA–W–61,576; Paper Magic Group, Inc., Scranton, PA: May 17, 2006.
TA–W–61,576A; Paper Magic Group, Inc., Scranton, PA: May 17, 2006.
TA–W–61,576B; Paper Magic Group, Inc., Troy, PA: May 17, 2006.
TA–W–61,775; Tandy Brands Accessories, Yoakum, TX: June 28, 2006.
TA–W–61,816; L. Hardy Company, Worcester, MA: July 5, 2006.

The following certifications have been issued. The requirements of section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA–W–61,746; Carolina Warp Print, Inc., Gastonia, NC: June 26, 2006.

The following certifications have been issued. The requirements of section 222(b) (downstream producer for a firm whose workers are certified eligible to apply for TAA based on increased imports from or a shift in production to Mexico or Canada) and section 246(a)(3)(A)(ii) of the Trade Act have been met.

NONE.

Negative Determinations for Alternative Trade Adjustment Assistance

In the following cases, it has been determined that the requirements of 246(a)(3)(A)(ii) have not been met for the reasons specified.

The Department has determined that criterion (1) of section 246 has not been met. The firm does not have a significant number of workers 50 years of age or older.

TA–W–61,625; Performance Machine, La Palma, CA.
TA–W–61,803; Rima Manufacturing Company, Piston Division, Hudson, MI.
TA–W–61,608; Personnel Management, Inc., Diverisco, Working at Toyota Motor, Princeton, IN.

The Department has determined that criterion (2) of section 246 has not been met. Workers at the firm possess skills that are easily transferable.

NONE.

The Department has determined that criterion (3) of section 246 has not been met. Competition conditions within the workers' industry are not adverse.

NONE.

Negative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In the following cases, the investigation revealed that the eligibility criteria for worker adjustment assistance have not been met for the reasons specified.

Because the workers of the firm are not eligible to apply for TAA, the workers cannot be certified eligible for ATAA.

The investigation revealed that criteria (a)(2)(A)(I.A.) and (a)(2)(B)(II.A.) (employment decline) have not been met.

TA–W–61,666; Furnlite Inc., Fallston, NC.
TA–W–61,703; Image Screens Inc., Paterson, NJ.
TA–W–61,754; IBM Corporation, Manpower, Inc. and CTG, Rochester, MN.

The investigation revealed that criteria (a)(2)(A)(I.B.) (Sales or production, or both, did not decline) and (a)(2)(B)(II.B.) (shift in production to a foreign country) have not been met.

TA–W–61,797; Arrow Interventional, Subsidiary of Arrow International, Everett, MA.

The investigation revealed that criteria (a)(2)(A)(I.C.) (increased imports) and (a)(2)(B)(II.B.) (shift in production to a foreign country) have not been met.

TA–W–61,635; Sunset Manufacturing Company, Tualatin, OR.
TA–W–61,677; Needle Nacks Ltd., Madison, NC.
TA–W–61,689; Johnson Controls, Inc., Oberlin, OH.
TA–W–61,647; Smurfit-Stone Container Corporation, Teterboro, NJ.
TA–W–61,696; Medtronic, Inc., Cardiovascular Division, Santa Rosa, CA.

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA–W–61,787; National City Mortgage Corp., Final Documents Control Post Closing Dept., Miamisburg, OH.

The investigation revealed that criteria of section 222(b)(2) has not been met. The workers' firm (or subdivision) is not a supplier to or a downstream producer for a firm whose workers were certified eligible to apply for TAA.

NONE.

I hereby certify that the aforementioned determinations were issued during the period of July 16 through July 20, 2007. Copies of these determinations are available for inspection in Room C–5311, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: July 20, 2007.

Richard Church,

Certify Officer, Division of Trade Adjustment Assistance.

[FR Doc. E7–15007 Filed 8–1–07; 8:45 am]

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–61,157; TA–W–61,157A]

Visteon Systems, LLC, Climate Control Division Evaporators, Connersville, IN; Visteon Systems, LLC, Climate Control Division, Radiator/Heat Exchange, Connersville, IN; Including On-Site Leased Workers From CDI–IT Services and Synova, Employed Through IBM Corporation, Securitas Security Services USA, Inc., Premier MFG. Services, Kleenaway Services, Waste Management Upstream, PMI, Inc., Coolant Controls, Pitney Bowes and CNC Logistics; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273), and section 246 of the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance on April 23, 2007, applicable to workers of Visteon Systems, LLC, Climate Control Division, Evaporators, Connersville, Indiana and Visteon Systems, LLC Climate Control Division Radiator/Heat Exchange, Connersville,

Indiana. The notice was published in the **Federal Register** on May 9, 2007 (72 FR 26424).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of evaporators and radiators/heat exchanges for the automotive industry.

The investigation revealed that the leased workers of the above listed firms were contracted to work on-site at the Connersville, Indiana location of Visteon Systems, LLC Climate Control Division. These workers provided a variety of functions supporting the production of evaporators and radiator/heat exchange units manufactured at the subject firm. The Department has determined that the above listed on-site worker groups are in support of the production of evaporators and radiator/heat exchange units at the subject firm and are sufficiently under the control of the subject firm.

Since the workers of Visteon Systems, LLC, Climate Control Division, Evaporators and Radiator/Heat Exchange, Connersville, Indiana are certified eligible to apply for ATAA, the Department is extending that eligibility to the employees of the above listed firms working on-site at the subject firm.

The intent of the Department's certification is to include all workers employed at Visteon Systems, LLC, Climate Control Division, Evaporators and Radiator/Heat Exchange, Connersville, Indiana who were adversely affected by a shift in production to Mexico.

The amended notice applicable to TA–W–61,157 is hereby issued as follows:

''Workers of Visteon Systems, LLC, Climate Control Division, Evaporators, Connersville, Indiana (TA–W–61,157) and Visteon Systems, LLC Climate Control Division, Radiator/Heat Exchange, Connersville, Indiana (TA–W–61,157A), including on-site leased workers from CDI–IT Services and Synova, employed through IBM Corporation, Securitas Security Services USA, Inc., Premier Mfg. Services, KleenAway Services, Waste Management Upstream, PMI, Inc., Pitney Bowes and CNC Logistics, who became totally or partially separated from employment on or after March 19, 2006 through April 23, 2009, are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974, and are also eligible to apply for alternative trade adjustment assistance under section 246 of the Trade Act of 1974.''

Signed at Washington, DC, this 26th day of July, 2007.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

Labor Certification for the Permanent Employment of Aliens in the United States; Establishment of E-Mail Address for Receipt of Reports of Potential Non-Compliance

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (DOL or Department) is publishing an e-mail address for the receipt and processing of reports of potential violations of its recently published Final Rule seeking to protect the integrity of the permanent labor certification program and reduce incentives for fraud and abuse.

FOR FURTHER INFORMATION CONTACT: William L. Carlson, Administrator, Office of Foreign Labor Certification, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–3010 (this is not a toll-free number). Individuals with hearing or speech impairments may access the telephone number above via TTY by calling the toll-free Federal Information Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION: On May 17, 2007, the Department published a Final Rule to protect the integrity of the permanent labor certification program, to reduce the incentives and opportunities for fraud, and to further fulfill the Department's statutory obligation to protect the wages and working conditions of U.S. workers. 72 FR 27904 (May 17, 2007). As part of that Rule, the Department informed the public it was considering the establishment of a toll-free telephone number, or development of other means, to receive reports on potential non-compliance with the Final Rule's provisions.

The Department continues its consideration of a toll-free number, and has determined that as an initial matter, employers, foreign workers, U.S. workers, and others who wish to submit information on potential violations may do so through an e-mail box: *laborcert.fraud@dol.gov.*

This box will be monitored for reports of alleged non-compliance with the regulations governing the permanent labor certification program. The Employment and Training Administration will determine an appropriate course of action for each report, and may refer individual inquiries to DOL's Employment Standards Administration, the DOL Office of Inspector General, the Department of Homeland Security, and/or other authorities. If appropriate, DOL may determine that no response is required.

Signed at Washington, DC, this 30 day of July, 2007.

Emily Stover Derocco,

Assistant Secretary, Employment and Training Administration.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–390]

Tennessee Valley Authority; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of the Tennessee Valley Authority (the licensee) to withdraw its May 8, 2006, application for proposed amendment to Facility

Operating License No. NPF–90 for the Watts Bar Nuclear Plant, Unit No. 1, located in Rhea County, Tennessee.

The proposed amendment would have revised the Technical Specifications to increase the temperature limit of the ultimate heat sink.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on May 23, 2006 (71 FR 29681). However, by letter dated July 20, 2007, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated May 8, 2006, and the licensee's letter dated July 20, 2007, which withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agency-wide Documents Access and Management Systems (ADAMS) Public Electronic Reading Room on the internet at the NRC Web site, *http://www.nrc.gov/reading-rm.html*. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS should contact the NRC PDR Reference staff by telephone at 1–800–397–4209, or 301–415–4737 or by e-mail to *pdr@nrc.gov*.

Dated at Rockville, Maryland, this 26th day of July 2007.

For the Nuclear Regulatory Commission.

Brendan T. Moroney,

Project Manager, Plant Licensing Branch II–2, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. E7–15047 Filed 8–1–07; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[EA–06–266, 06–278]

In the Matter of University of Pittsburgh; Confirmatory Order (Effective Immediately)

I

University of Pittsburgh (UPitt or licensee) is the holder of Byproduct Material License 37–00245–09 issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR Part 30. License No. 37–00245–09 was originally issued on February 5, 1987, and is due to expire on May 31, 2015.

II

On March 10, 2005, and March 23, 2006, the NRC Office of Investigations (OI) initiated investigations (OI Case Nos. 1–2005–008 and 1–2006–023) to determine whether UPitt willfully violated the physical presence requirements on March 4, 2005, and whether a neurosurgeon had willfully entered the authorized user's (AU) initials on written directives without the AU's knowledge or consent. The investigations were completed on June 15, 2006 and October 10, 2006. Based on a March 5, 2005, visit to the UPitt Medical Center Gamma Knife facility and the investigations, the NRC informed UPitt, in a letter dated February 27, 2007, that three apparent violations were being considered for escalated enforcement action in accordance with the NRC Enforcement Policy. To address the three apparent violations, the February 27, 2007, letter offered UPitt a choice to (1) Attend a Predecisional Enforcement Conference (PEC), or (2) request Alternative Dispute Resolution (ADR) with the NRC in an attempt to resolve any disagreement on whether a violation occurred, the appropriate enforcement action, and the appropriate corrective actions.

III

Subsequent to the NRC's identification of the apparent violations, UPitt took several actions to assure that these events would not recur. These actions included: (1) Ensuring that an Authorized Medical Physicist (AMP) and an AU are present during each GSR treatment; (2) issuance of a procedure for physical presence requirements and posting it at each GSR unit; and, (3) hiring another AMP.

Also, in response to the NRC's February 27, 2007 letter, UPitt requested the use of ADR to resolve the apparent violations and pending enforcement action. ADR is a process in which a neutral mediator, with no decision-making authority, assists the NRC and UPitt to resolve any disagreements on whether a violation occurred, the appropriate enforcement action, and the appropriate corrective actions. At UPitt's request, an ADR session was held in the Region I Office in King of Prussia, PA on May 17, 2007, between UPitt and the NRC. This ADR session was mediated by a professional mediator, arranged through Cornell University's Institute of Conflict Management. Based on the discussion during the ADR session, a settlement agreement was reached regarding this matter. The elements of the settlement agreement are as follows:

1. As noted in an NRC letter dated February 27, 2007, based on an NRC inspection and NRC investigations, the NRC identified three apparent violations of NRC requirements at the University of Pittsburgh Medical Center Gamma Knife facility. The first apparent violation, which involved a failure to meet physical presence requirements described in 10 CFR 35.615(f)(3), included three examples, two of which involved willfulness. The examples included: (1) A March 4, 2005, failure to meet physical presence requirements in that a GSR treatment was conducted without the continuous physical presence of an AMP; (2) multiple incidents between May 13, 2004 and March 10, 2005, when two neurosurgeons, in careless disregard of NRC regulations, initiated GSR treatments in separate suites with only one AMP available to meet physical presence requirements; and, (3) a February 22, 2005, incident when one neurosurgeon willfully initiated a treatment without a written directive signed by an AU and without the physical presence of an AU. The second apparent violation involved licensee management's failure to ensure that GSR activities met NRC requirements, as required by 10 CFR 35.24(b). The third apparent violation involved multiple occasions when a neurosurgeon recorded the Radiation Therapist's initials on the GSR written directive, causing the licensee to violate 10 CFR 35.32. In the NRC February 27, 2007 letter, the NRC noted that it had not determined that violations had occurred or that enforcement should be taken, and the NRC offered the licensee an opportunity to attend a PEC prior to making an enforcement decision. In the alternative, the NRC offered the licensee the opportunity to attend an ADR mediation session to resolve these matters.

2. As a result of an ADR mediation session conducted on May 17, 2007, the licensee and the NRC agreed to final disposition of this matter by way of a single violation of the regulatory requirements in 10 CFR 35.24(b). Specifically, the licensee through the Radiation Safety Officer: (a) Failed to ensure from May 13, 2004 through March 10, 2005, the physical presence requirements of 10 CFR 35.615(f)(3) were consistently met; and (b) failed to ensure between 1998 and 2000 that written directives were consistently signed by all three members of the Gamma Knife team prior to administration of GSR treatments in accordance with 10 CFR 35.32. The NRC

concluded that certain aspects of the 10 CFR 35.24(b) violation were willful. The licensee disputed this conclusion. The NRC and the licensee have agreed to disagree regarding any willful aspects of this violation.

3. Prior to the ADR mediation session, the licensee described the actions that it had taken to address the apparent violations identified by the NRC. Those actions included: (1) Ensuring that an AMP and an AU are present during each GSR treatment; (2) issuance of a procedure for physical presence requirements and posting it at each GSR unit; and, (3) hiring another AMP. Some of these actions were verified by the NRC during the following: (1) An on-site inspection on March 15–17, 2005; (2) the NRC's review of the UPitt response to a Confirmatory Action Letter (CAL), dated April 28, 2005; (3) an on-site inspection on May 12, 2005 to follow-up on the CAL; and, (4) a routine inspection performed September 25–29, 2006.

4. During the ADR mediation session, the licensee also described additional corrective actions that it had taken or planned, which includes: (1) Having the RSO initiate a requirement for a physical presence log to be maintained at each gamma knife treatment console, to include patient name, AU physically present, AMP physically present, date, and start/stop time of treatment; (2) having the RSO staff provide annual radiation safety training to the gamma knife staff, including a review of all applicable requirements in 10 CFR Parts 19, 20, and 35, with emphasis on the physical presence and written directive requirements; (3) having an outside independent consultant (medical RSO) conduct an audit of the Radiation Safety Program with special emphasis on the gamma knife program and management oversight; (4) increasing surveillance of GSR treatments by RSO staff; and, (5) developing a program to heighten awareness of the need to report concerns, and including this program in initial and refresher training for all radiation workers, to foster an environment for raising safety concerns.

5. To provide further opportunity for other licensees in the industry to learn from this incident, UPitt also agreed to: (1) Enhance its 40 hour GSR training course provided to users at other facilities throughout the United States, including expanding the lecture on NRC regulatory requirements to include the physical presence requirements, including a description of this experience as part of the training; and, (2) submit a lessons-learned article for the Operational Radiation Safety publication and the Elekta Newsletter, *eWavelength*, describing these occurrences. The licensee will provide a copy of the training syllabus before conducting the training, and a copy of the article to the NRC at least 30 days prior to the submittal of the article to the organization.

6. In light of the actions that the licensee has taken, or committed to take, as described in Items 3–5 above, as well as the fact that the violation did not result in any known safety consequences to patients, workers, or the public, the NRC agrees to issue a Notice of Violation without a civil penalty for the violation as characterized in Item 2 and to classify the violation at Severity Level III. This action will be publically available in ADAMS and on the NRC ''Significant Enforcement Actions'' Web site.

7. The licensee also agreed to issuance of a Confirmatory Order confirming this agreement.

IV

In light of the actions UPitt has taken and agreed to take to correct the violations and prevent recurrence, as set forth in Section III above, the NRC has concluded that its concerns can be resolved through implementation of UPitt's commitments as outlined in this Confirmatory Order. The NRC has also determined that these commitments shall be confirmed by this Confirmatory Order. Based on the above and UPitt's consent, this Confirmatory Order is immediately effective upon issuance.

V

Accordingly, pursuant to Sections 81, 161b, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Part 2.202 and 10 CFR Part 30 and 35, it is hereby ordered, that within one year of the date of this order:

1. UPitt will enhance its 40 hour GSR training course provided to users at other facilities throughout the United States, including expanding the lecture on NRC regulatory requirements to include the physical presence requirements, including a description of this experience as part of the training;

2. UPitt will provide the NRC a copy of the training syllabus before conducting the training;

3. UPitt will submit a lessons-learned article for the Operational Radiation Safety publication and the Elekta Newsletter, *eWavelength*, describing these occurrences;

4. UPitt will provide a copy of the article to the NRC at least 30 days prior to the submission of the article to the organization; and

5. UPitt will send a letter to the NRC informing the NRC that the actions in Sections V.1–4 are complete, and UPitt will send the letter within 30 days of completion of all of these actions.

The NRC Region I Regional Administrator may relax or rescind, in writing, any of the above conditions upon a showing by UPitt of good cause.

VI

Any person adversely affected by this Confirmatory Order, other than UPitt, may request a hearing within 20 days of its issuance. Where good cause is shown, consideration will be given to extending the time to request a hearing. A request for extension of time must be made in writing to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and must include a statement of good cause for the extension. Any request for a hearing shall be submitted to the Secretary, U.S. Nuclear Regulatory Commission, ATTN: Chief, Rulemaking and Adjudications Staff, Washington, DC 20555. Copies of the hearing request shall also be sent to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington DC 20555, to the Assistant General Counsel for Materials Litigation and Enforcement, to the Director of the Division of Regulatory Improvement Programs at the same address, to the NRC Region I office at 475 Allendale Rd., King of Prussia, PA 19406, and to UPitt. Because of potential disruptions in delivery of mail to United States Government offices, it is requested that answers and requests for hearing be transmitted to the Secretary of the Commission either by means of facsimile transmission to 301–415–1101 or by e-mail to *hearingdocket@nrc.gov* and also to the Office of the General Counsel by means of facsimile transmission to 301–415–3725 or e-mail to *OGCMailCenter@nrc.gov*. If such a person requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order, and shall address the criteria set forth in 10 CFR Part 2.309(d) and (f).

If a hearing is requested by a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearing. If a hearing is held, the issue to be considered at such hearing shall be whether this Confirmatory Order shall be sustained. An answer or a request for a hearing shall not stay the immediate effectiveness of this order.

Dated this 23th day of July 2007.

For the Nuclear Regulatory Commission.

Marc L. Dapas,

Deputy Regional Administrator.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–293]

Entergy Nuclear Operations, Inc.; Pilgrim Nuclear Power Station; Notice of Availability of the Final Supplement 29 to the Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Regarding the License Renewal of Pilgrim Nuclear Power Station

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC, Commission) has published a final plant-specific supplement to the ''Generic Environmental Impact Statement for License Renewal of Nuclear Plants (GEIS),'' NUREG–1437, regarding the renewal of operating license DPR–35 for an additional 20 years of operation for the Pilgrim Nuclear Power Station (Pilgrim). Pilgrim is located on the western shore of Cape Cod in the Town of Plymouth, Plymouth County, Massachusetts. It is 38 miles southeast of Boston, Massachusetts, and 44 miles east of Providence, Rhode Island. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

As discussed in Section 9.3 of the final Supplement 29, the recommendation of the staff is that the Commission determine that the adverse environmental impacts of license renewal for Pilgrim are not so great that preserving the option of license renewal for energy-planning decision makers would be unreasonable. The recommendation is based on: (1) The analysis and findings in the GEIS; (2) the Environmental Report submitted by Entergy; (3) consultation with Federal, State, and local agencies; (4) the staff's own independent review; and (5) the staff's consideration of public comments.

The final Supplement 29 to the GEIS is publicly available at the NRC Public Document Room (PDR), located at One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852, or from the NRC's Agencywide Documents Access and Management System (ADAMS). The ADAMS Public Electronic Reading Room is accessible at *http://adamswebsearch.nrc.gov/dologin.htm*. The Accession Numbers for the final Supplement 29 to the GEIS are ML071990020 Volume 1 and ML071990027 Volume 2. Persons who do not have access to ADAMS, or who encounter problems in accessing the documents located in ADAMS, should contact the NRC's PDR reference staff by telephone at 1–800–397–4209, or 301–415–4737, or by e-mail at *pdr@nrc.gov*. In addition, the final supplement will be available at the following libraries for public inspection: the Plymouth Public Library, 132 South Street, the Duxbury Free Library, 77 Alden Street, and the Kingston Public Library, 6 Green Street.

FOR FURTHER INFORMATION, CONTACT: Ms. Alicia Williamson, Environmental Branch B, Division of License Renewal, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Mail Stop O–11F1, Washington, DC 20555–0001. Ms. Williamson may be contacted by telephone at 1–800–368–5642, extension 1878 or via e-mail at *arw1@nrc.gov*.

Dated at Rockville, Maryland, this 26th day of July, 2007.

For the Nuclear Regulatory Commission.

Rani L. Franovich,

Branch Chief, Environmental Branch B, Division of License Renewal, Office of Nuclear Reactor Regulation.

[Docket No. 030–07188]

Notice of Environmental Assessment Related to the Issuance of a License Amendment to By-product Material License No. 21–05199–02, for Unrestricted Release of Former Facilities for the State of Michigan, Department of Environmental Quality, Lansing, MI

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Environmental Assessment and Finding of No Significant Impact for License Amendment.

FOR FURTHER INFORMATION CONTACT: William Snell, Senior Health Physicist, Decommissioning Branch, Division of Nuclear Materials Safety, Region III, U.S. Nuclear Regulatory Commission, 2443 Warrenville Road, Lisle, Illinois 60532; telephone: (630) 829–9871; fax number: (630) 515–1259; or by email at *wgs@nrc.gov*.

SUPPLEMENTARY INFORMATION: The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of an amendment to NRC By-product Materials License No. 21–05199–02, which is held by the State of Michigan, Department of Environmental Quality (licensee). The amendment would authorize the decommissioning and unrestricted release of the licensee's former facilities located at 3423 and 3500 N. Martin Luther King Jr. Blvd., Lansing, Michigan (the facilities). The NRC has prepared an Environmental Assessment in support of this action in accordance with the requirements of 10 CFR Part 51. Based on the Environmental Assessment, the NRC has determined that a Finding of No Significant Impact is appropriate. The amendment to the State of Michigan's Department of Environmental Quality license will be issued following the publication of this Environmental Assessment and Finding of No Significant Impact.

I. Environmental Assessment

Identification of Proposed Action

The proposed action would approve the State of Michigan's Department of Environmental Quality request to amend its license and release the facilities for unrestricted use in accordance with 10 CFR Part 20, Subpart E. The proposed action does not pertain to the licensee's radiological laboratory at 815 Terminal Road, in Lansing, Michigan, where licensed activities will continue. The proposed action is in accordance with the licensee's request to the U.S. Nuclear Regulatory Commission (NRC) to amend its license by letter dated February 28, 2007 (ADAMS Accession No. ML070590426). The State of Michigan's Department of Environmental Quality was first licensed to use by-product materials at its facilities at 3500 N. Martin Luther King Jr. Blvd. (formerly 3500 N. Logan) on June 30, 1964, and at 3423 N. Martin Luther King Jr. Blvd. on February 21, 1997. The licensee is authorized to use by-product materials for activities involving instrument calibration and for analysis of environmental samples. The licensee was authorized to use sealed sources at the facilities containing cesium-137, cobalt-60, americium-241, nickel-63, and strontium-90. Isotopes that were authorized for use at the facilities in an unsealed form included any by-product material up to a maximum of 100 millicuries at any one time.

At the 3500 N. Martin Luther King Jr. Blvd. address, the licensee used by-product materials in two buildings. The licensee analyzed environmental and special samples in its Nuclear Counting Facility in Building 44, and stored radiological materials in its Radioactive

Material Storage Bunker in Building 20. The licensee ceased using the Nuclear Counting Laboratory and moved all calibration standards, environmental samples and special samples to its new radiological laboratory at 815 Terminal Road, Lansing, Michigan, prior to conducting final status surveys in November 2000 to verify that the 3500 N. Martin Luther King Jr. Blvd. facility could be released for unrestricted use.

In October 2000, the Michigan Department of Public Health requested the NRC terminate its SUB–1385 license, which also authorized the use of radioactive material in the Radioactive Material Storage Bunker in Building 20. The Michigan Department of Public Health provided a Final Status Survey Report that documented that the Radioactive Material Storage Bunker in Building 20 had been surveyed for residual contamination in 1998 and was acceptable for unrestricted use. In January 2001, the NRC terminated the SUB–1385 license and released the Radioactive Material Storage Bunker in Building 20 for unrestricted use. The licensee stated in a July 11, 2007, telephone conference, that it had not used the Radioactive Material Storage Bunker in Building 20 since it had been released for unrestricted use by the NRC in 2001.

At the 3423 N. Martin Luther King Jr. Blvd. address, the licensee maintained a facility for the calibration of portable radiation survey instruments and the storage of radioactive material. The licensee ceased using the calibration/storage facility and moved all radiation sources and environmental samples to its new calibration facility at 815 Terminal Road, Lansing, Michigan, prior to conducting final status surveys in November 2000 to verify that the 3423 N. Martin Luther King Jr. Blvd. facility could be released for unrestricted use.

The licensee conducted surveys of the facilities as part of its decommissioning activities and provided this information to the NRC to demonstrate that the radiological condition there is consistent with radiological criteria for unrestricted use in 10 CFR Part 20, Subpart E. The licensee was not required to submit a decommissioning plan to the NRC since any decommissioning activities and procedures implemented were consistent with those approved for routine operations. No radiological remediation activities are required to complete the proposed action.

Need for the Proposed Action

The licensee is requesting this license amendment because it has moved out of the facilities, and is conducting licensed activities at another location. The NRC is fulfilling its responsibilities under the Atomic Energy Act to make a decision on the proposed action for decommissioning that ensures that residual radioactivity is reduced to a level that is protective of the public health and safety and the environment, and allows the facilities to be released for unrestricted use.

Environmental Impacts of the Proposed Action

The NRC staff reviewed the information provided and surveys performed by the licensee to demonstrate that the release of the facilities is consistent with the radiological criteria for unrestricted use specified in 10 CFR 20.1402. Based on its review, the staff determined that there were no radiological impacts associated with the proposed action because no radiological remediation activities were required to complete the proposed action, and that the radiological criteria for unrestricted use in § 20.1402 have been met.

Based on its review, the staff determined that the radiological environmental impacts from the proposed action for the facilities are bounded by the ''Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities'' (NUREG–1496). Additionally, no non-radiological or cumulative impacts were identified. Therefore, the NRC has determined that the proposed action will not have a significant effect on the quality of the human environment.

Alternatives to the Proposed Action

The only alternative to the proposed action is to take no action. Under the no-action alternative, the facilities would remain under an NRC license and would not be released for unrestricted use. Denial of the license amendment request would result in no change to current conditions. The no-action alternative is not acceptable because it is inconsistent with 10 CFR 30.36, which requires that decommissioning of by-product material facilities be completed and approved by the NRC after licensed activities cease. This alternative would impose an unnecessary regulatory burden in controlling access to the former facility, and limit potential benefits from the future use of the facility.

Conclusion

The NRC staff concluded that the proposed action is consistent with the NRC's unrestricted release criteria specified in 10 CFR 20.1402. Because the proposed action will not significantly impact the quality of the human environment, the NRC staff concludes that the proposed action is the preferred alternative.

Agencies and Persons Consulted

The NRC staff has determined that the proposed action will not affect listed species or critical habitats. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. Likewise, the NRC staff has determined that the proposed action is not a type of activity that has potential to cause effect on historic properties. Therefore, consultation under section 106 of the National Historic Preservation Act is not required.

The NRC consulted with the Michigan Department of Community Health (DCH). The Michigan DCH, Bureau of Health Systems, Division of Health Facilities and Services, was provided the draft EA for comment on July 13, 2007. Mr. Bruce Matkovich, Manager, Radiation Safety Section, with the Michigan DCH, responded to the NRC by e-mail on July 16, 2007, indicating that the State had no comments regarding the NRC Environmental Assessment for the release of the Michigan Department of Environmental Quality facilities.

II. Finding of No Significant Impact

On the basis of the EA in support of the proposed license amendment, the NRC has determined that the proposed action will not have a significant effect on the quality of the human environment. Thus, the NRC has not prepared an environmental impact statement for the proposed action.

III. Further Information

Documents related to this action, including the application for amendment and supporting documentation, are available electronically at the NRC's Electronic Reading Room at *http://www.nrc.gov/reading-rm/adams.html.* From this site, you can access the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of NRC's public documents. If you do not have access to ADAMS, or if there are problems in accessing the documents located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to *pdr@nrc.gov.* The documents and ADAMS accession numbers related to this notice are:

1. Robert D. Skowronek, Michigan Department of Environmental Quality, letter to Patricia Pelke, U.S. Nuclear Regulatory Commission, February 22, 2007 (ADAMS Accession No. ML070590426).

2. Telephone Conversation Record, Initiated by William Snell, U.S. Nuclear Regulatory Commission, to Robert Skowronek, Michigan Department of Environmental Quality, on July 11, 2007 (ADAMS Accession No. ML071930403).

3. U.S. Nuclear Regulatory Commission, ''Environmental Review Guidance for Licensing Actions Associated with NMSS Programs,'' NUREG–1748, August 2003.

4. U.S. Nuclear Regulatory Commission, ''Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities,'' NUREG–1496, August 1994.

5. NRC, NUREG–1757, ''Consolidated NMSS Decommissioning Guidance,'' Volumes 1–3, September 2003.

Documents may also be viewed electronically on the public computers located at the NRC's PDR, O 1 F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. The PDR reproduction contractor will copy documents for a fee.

Dated at Lisle, Illinois, this 20th day of July 2007.

For the Nuclear Regulatory Commission.

Patrick L. Louden,

Chief, Decommissioning Branch, Division of Nuclear Materials Safety, Region III.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Clarification to Regulatory Guide 1.200, Revision 1

AGENCY: Nuclear Regulatory Commission.

ACTION: Clarification to Regulatory Guide.

FOR FURTHER INFORMATION CONTACT: Mary Drouin, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. Telephone: 301–415–6675; e-mail: *MXD@nrc.gov*.

Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a clarification to an existing guide in the agency's regulatory guide (RG) series. The NRC has developed this series to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

At this time, the NRC is issuing a clarification to Revision 1 of RG 1.200, ''An Approach for Determining the Technical Adequacy of Probabilistic Risk Assessment Results for Risk-Informed Activities,'' issued January 2007. The purpose of this clarification is to provide additional explanation to the staff's regulatory position with regard to defining the technical acceptability of a probabilistic risk assessment (PRA), specifically with respect to the treatment of the sources of model uncertainty and the related assumptions in the base PRA.

The clarification to RG 1.200, Revision 1 can be found in Agencywide Documents Access and Management System (ADAMS) Accession Number ML071940235.

The clarification to Regulatory Guide 1.200, Revision 1, is intended for licensees of nuclear power plants. Revision 1 of this RG remains in effect for licensees of nuclear power plants.

The NRC staff encourages and welcomes comments and suggestions in connection with improvements to published RGs, as well as items for inclusion in RGs that are currently under development. You may submit comments by any of the following methods.

1. *Mail comments to:* Rulemaking, Directives and Editing Branch, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

2. *Hand-deliver comments to:* Rulemaking, Directives and Editing Branch, Office of Administration, U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, Maryland 20852, between 7:30 a.m. and 4:15 p.m. on Federal workdays.

3. *Fax comments to:* Rulemaking, Directives and Editing Branch, Office of Administration, U.S. Nuclear Regulatory Commission at (301) 415–5144.

4. Direct requests for technical information about this clarification to Revision 1 of RG 1.200 to Ms. Mary Drouin at (301) 415–6675 or *MXD@nrc.gov*.

RGs are available for inspection or downloading through the NRC's public Web site at *http://www.nrc.gov/reading-rm/doc-collections/reg-guides/*. In addition, this clarification to Revision 1 of RG 1.200 is available for inspection or downloading through the Agencywide Documents Access and Management System (ADAMS) at *http://www.nrc.gov/reading-rm/adams.html* under ADAMS Accession No. ML071940235.

The clarification to Revision 1 of RG 1.200 and other related publicly available documents can also be viewed electronically on computers in the NRC's Public Document Room (PDR), which is located at 11555 Rockville Pike, Rockville, Maryland. The reproduction contractor at the PDR will make copies of documents for a fee. The mailing address for the PDR is USNRC, PDR, Washington, DC 20555–0001. The PDR can also be reached by telephone at (301) 415–4737 or (800) 397–4205, by fax at (301) 415–3548, and by e-mail to *PDR@nrc.gov*.

RGs are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 27th day of July, 2007.

For the U.S. Nuclear Regulatory Commission.

Farouk Eltawila,

Director, Division of Risk Assessment and Special Projects, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

NUREG–1556, Volume 9, Revision 2, ''Consolidated Guidance About Materials Licenses Program-Specific Guidance About Medical Use Licenses; Draft Guidance Document for Comment

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) has amended its regulations to include jurisdiction over certain radium sources, accelerator-produced radioactive materials, and certain naturally occurring radioactive material, as required by the Energy Policy Act of 2005 (EPAct), which was signed into law on August 8, 2005. The EPAct expanded the Atomic Energy Act of 1954 definition of byproduct material to include these radioactive materials. Subsequently, these radioactive materials were placed under NRC's regulatory authority. NRC is revising its regulations to provide a regulatory framework that includes these newly added radioactive materials. See SECY–07–0062, ''Final Rule: Requirements for

Expanded Definition of Byproduct Material,'' dated April 3, 2007, for information on that rulemaking.

Two licensing guidance documents in the NUREG–1556 series are being revised along with these new regulations to provide guidance related to the new requirements: (1) NUREG–1556, Volume 13, Revision 1, ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Commercial Radiopharmacy Licenses,'' and (2) NUREG–1556, Volume 9, Revision 2, ''Consolidated Guidance About Materials Licenses—Program Specific Guidance About Medical Use Licenses.'' A new volume in the NUREG–1556 series has also been developed to address the production of radioactive material using an accelerator. This NUREG is entitled NUREG–1556, Volume 21, ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Possession Licenses for Production of Radioactive Material Using an Accelerator.''

This notice is announcing the availability of one of these three licensing guidance documents for public comment: NUREG–1556, Volume 9, Revision 2. The other two NUREGs were previously noticed for public comment: (1) NUREG–1556, Volume 13, Revision 1, on July 3, 2007 (72 FR 36526), and (2) NUREG–1556, Volume 21, on May 29, 2007 (72 FR 29555).

DATES: Please submit comments on NUREG–1556, Volume 9, Revision 2, by September 4, 2007. Comments received after this date will be considered if practical to do so, but the NRC staff is able to ensure consideration only for those comments received on or before this date.

ADDRESSES: NUREG–1556, Volume 9, Revision 2, ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Medical Use Licenses,'' Draft Report for Comment, is available for inspection and copying for a fee at the NRC's Public Document Room (PDR), Public File Area O–1F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland. Publicly available documents created or received at the NRC after November 1, 1999, are available electronically at the NRC's Electronic Reading Room at *http://www.nrc.gov/NRC/ADAMS/index.html*. From this site, the public can gain entry into the NRC's Agencywide Document Access and Management System (ADAMS), which provides text and image files of the NRC's public documents. The ADAMS Accession Number for NUREG–1556, Volume 9, Revision 2, is ML071860070. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC PDR Reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to *pdr@nrc.gov*.

The document will also be posted on NRC's public Web site at: (1) *http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/* on the ''Consolidated Guidance About Materials Licenses (NUREG–1556)'' Web site page, and (2) *http://www.nrc.gov/reading-rm/doc-collections/nuregs/docs4comment.html* on the ''Draft NUREG Series Publications for Comment.'' It will also be posted on the Office of Federal and State Materials and Environmental Management Programs' NARM (Naturally-Occurring and Accelerator-Produced Radioactive Material) Toolbox Web site page at: *http://nrc-stp.ornl.gov/narmtoolbox.html* under the heading of ''Licensing Guidance.''

A free single copy, to the extent of supply, may be requested by writing to the Office of the Chief Information Officer, Reproduction and Distribution Services, U.S. Nuclear Regulatory Commission, Printing and Graphics Branch, Washington, DC 20555–0001; facsimile: 301–415–2289; e-mail: *Distribution@nrc.gov*.

Please submit comments to Chief, Rulemaking, Directives and Editing Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC, 20555–0001. You may also deliver comments to 11545 Rockville Pike, Rockville, MD, between 7:30 a.m. and 4:30 p.m. Federal workdays, or by e-mail to: *nrcrep@nrc.gov*.

FOR FURTHER INFORMATION CONTACT: Torre Taylor, Division of Intergovernmental Liaison and Rulemaking, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone (301) 415–7900, e-mail: *tmt@nrc.gov*.

SUPPLEMENTARY INFORMATION:

Background

On August 8, 2005, the President signed into law the EPAct. Among other provisions, section 651(e) of the EPAct expanded the definition of byproduct material as defined in section 11e. of the Atomic Energy Act of 1954 (AEA), placing additional byproduct material under the NRC's jurisdiction, and required the Commission to provide a regulatory framework for licensing and regulating this additional byproduct material.

Specifically, section 651(e) of the EPAct expanded the definition of byproduct material by: (1) Adding any discrete source of radium-226 that is produced, extracted, or converted after extraction, before, on, or after the date of enactment of the EPAct for use for a commercial, medical, or research activity; or any material that has been made radioactive by use of a particle accelerator and is produced, extracted, or converted after extraction, before, on, or after the date of enactment of the EPAct for use for a commercial, medical, or research activity (Section 11e.(3) of the AEA); and (2) adding any discrete source of naturally occurring radioactive material, other than source material, that the Commission, in consultation with the Administrator of the Environmental Protection Agency, the Secretary of the Department of Energy, the Secretary of the Department of Homeland Security, and the head of any other appropriate Federal agency, determines would pose a threat similar to the threat posed by a discrete source of radium-226 to the public health and safety or the common defense and security; and is extracted or converted after extraction before, on, or after the date of enactment of the EPAct for use in a commercial, medical, or research activity (Section 11e.(4) of the AEA).

NRC is revising its regulations to provide a regulatory framework that includes these newly added radioactive materials. *See* SECY–07–0062, ''Final Rule: Requirements for Expanded Definition of Byproduct Material,'' dated April 3, 2007, for information on that rulemaking.

Discussion

As part of the rulemaking effort to address the mandate of the EPAct, the NRC also evaluated the need to revise certain licensing guidance documents to provide necessary guidance to applicants in preparing license applications to include the use of the newly added radioactive material as byproduct material. Two NUREG–1556 documents are being revised to provide additional guidance to licensees: (1) NUREG–1556, Volume 13, Revision 1, ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Commercial Radiopharmacy Licenses,'' and (2) NUREG–1556, Volume 9, Revision 2, ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Medical Use Licenses.'' Additionally, a new NUREG–1556 volume has been developed as Volume 21 to address production of radioactive

material using an accelerator. This NUREG–1556, Volume 21, is entitled: ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Possession Licenses for Production of Radioactive Material Using an Accelerator.''

At this time, NRC is announcing the availability for public comment NUREG–1556, Volume 9, Revision 2, ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Medical Use Licenses,'' Draft Report for Comment. The other two NUREGs were previously noticed for public comment: (1) NUREG–1556, Volume 13, Revision 1, on July 3, 2007 (72 FR 36526) and (2) NUREG–1556, Volume 21, on May 29, 2007 (72 FR 29555).

NUREG–1556, Volume 9, Revision 2, ''Consolidated Guidance About Materials Licenses—Program-Specific Guidance About Medical Use Licenses,'' provides guidance for applicants in preparing their license applications for the medical use of byproduct material. Volume 9 is being revised primarily to provide additional guidance related to the NARM rule, as discussed above.

In the draft final rule for the NARM rulemaking, the concept of consortiums and noncommercial distribution was addressed. In summary, because of the short-lived radionuclides associated with Positron Emission Tomography (PET), the source of these radioactive materials needs to be produced in the facility of use or within close proximity. The NRC developed a new regulatory process based on existing practices for consortiums and noncommercial distribution. For this purpose, educational institutions, medical use facilities or Federal facilities may form consortiums with adjacent or nearby hospitals to jointly own or share in the operation and maintenance costs of the PET radionuclide production facility. This is discussed in more detail in SECY–07–0062, ''Final Rule: Requirements for Expanded Definition of Byproduct Material,'' dated April 3, 2007, and within the draft **Federal Register** notice that is provided as an attachment to SECY–07–0062.

NUREG–1556, Volume 9, Revision 2, provides guidance for applicants in licensees about consortiums and noncommercial distribution in Sections 1 and 8, and in Appendix AA. NRC is requesting specific comments on this guidance to ensure that it is clear and easily understood by affected stakeholders.

It is also being revised to clarify training and experience requirements, replaces NRC Form 313A with six new NRC Form 313A forms specific to types of authorizations. References and information related to Subpart J of 10 CFR Part 35 have been removed since these regulatory requirements expired on October 25, 2005.

Additionally, other minor changes are being made that are administrative in nature, such as updating the Agreement State section and updating references. Also, information related to identifying and protecting sensitive information is being updated.

NRC is only requesting comments on the specific changes in this document related to those revisions discussed above. NRC will make corrections if any errors or editorial corrections are noted; however, any comments not related to these specific changes will be evaluated during the next routine review of NUREG–1556, Volume 9.

Dated at Rockville, Maryland, this 26th day of July, 2007.

For the Nuclear Regulatory Commission.

Dennis K. Rathbun,

Director, Division of Intergovernmental, Liaison and Rulemaking, Office of Federal and State Materials, and Environmental Management Programs.

BILLING CODE 7590–01–P

OFFICE OF MANAGEMENT AND BUDGET

Amending Federal Financial Assistance-Related Forms to Include Universal Identifier

AGENCY: Office of Federal Financial Management and Office of Information and Regulatory Affairs, Office of Management and Budget.

ACTION: Notice; request for comments.

SUMMARY: The Office of Management and Budget (OMB) proposes to authorize each Federal agency that receives applications for Federal financial assistance to add a field for the applicant's Dun and Bradstreet Data Universal Numbering System (DUNS) number to application forms previously approved by OMB. This proposed update would broaden the directive's effect to all forms of Federal financial assistance covered by the Federal Funding Accountability and Transparency Act (the ''Act'') including grants, subgrants, loans, awards, cooperative agreements, and other forms of financial assistance.

DATES: Comments are due by September 4, 2007.

ADDRESSES: Comments should be addressed to Marguerite Pridgen, Office of Federal Financial Management, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503; telephone 202–395–7844; fax 202–395–3952; e-mail *mpridgen@omb.eop.gov.* Due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, we encourage respondents to submit comments electronically to ensure timely receipt. We cannot guarantee that comments mailed will be received before the comment closing date. Please include ''Amending Forms for DUNS'' in the subject line of the email message; please also include the full body of your comments in the text of the message and as an attachment. Include your name, title, organization, postal address, telephone number, and e-mail address in your message.

FOR FURTHER INFORMATION CONTACT: Marguerite Pridgen at the addresses noted above.

Authority: Sec. 2, Pub. L. 109–282, 102 Stat. 1186.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget (OMB) proposes to authorize each Federal agency that receives applications for Federal financial assistance to add a field for the applicant's Dun and Bradstreet Data Universal Numbering System (DUNS) number to application forms previously approved by OMB. The intent of authorizing agencies to add the field without additional OMB approval is to enable the agencies to require applicants other than individual persons to provide DUNS numbers for all applications submitted on or after October 1, 2007. This proposal thereby would update the policy in the OMB directive issued on June 27, 2003 [68 FR 38403], ''Use of a Universal Identifier by Grant Applicants.'' That directive authorized agencies to add the DUNS number as a required field for applications leading to the award of two specific forms of Federal financial assistance: Grants and cooperative agreements. This proposed update would broaden the directive's effect to all forms of Federal financial assistance covered by the Federal Funding Accountability and Transparency Act (the ''Act'') including grants, subgrants, loans, awards, cooperative agreements, and other forms of financial assistance. The reason for the proposed update is that the DUNS number will be used as the unique identifier for recipient entities that is required by the Federal Funding Accountability and Transparency Act of 2006 (Pub. L. 109–282). Under that Act, OMB must ensure the establishment and maintenance of a location on the World Wide Web

through which the public may access and search data on agencies' awards. The unique identifier of the recipient entity is one of the data elements that the Act requires for each award. Note that the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) are addressing the Federal Funding Accountability and Transparency Act requirements for contracts, subcontracts, purchase orders, task orders and delivery orders under separate **Federal Register** notices.

Danny Werfel,

Deputy Controller.

[FR Doc. E7–15044 Filed 8–1–07; 8:45 am]

BILLING CODE 3110–01–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Effective Date for Goods of Mexico for Certain Modifications of the NAFTA Rules of Origin

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of effective date.

SUMMARY: In Proclamation 8111 of February 28, 2007, the President modified the rules of origin for certain goods of Mexico under the North American Free Trade Agreement (the ''NAFTA'') incorporated in the Harmonized Tariff Schedule of the United States (the ''HTS''). The proclamation stated that the modifications would be effective on the date to be announced in the **Federal Register** by the United States Trade Representative (the ''USTR'') and would apply to goods of Mexico that are entered, or withdrawn from warehouse for consumption, on or after the date indicated in the proclamation. The purpose of this notice is to announce that the effective date for the modifications is July 30, 2007. The changes were printed in the **Federal Register** of March 6, 2007 (72 FR 10028).

FOR FURTHER INFORMATION CONTACT: For further information, please contact Caroyl Miller, Deputy Special Textile Negotiator, Office of the United States Trade Representative, 600 17th Street, NW., Washington, DC 20508, fax number, (202) 395–5639.

SUPPLEMENTARY INFORMATION: Presidential Proclamation 6641 of December 15, 1993 implemented the North American Free Trade Agreement (the ''NAFTA'') with respect to the United States and, pursuant to the North American Free Trade Agreement Implementation Act (Pub. L. 103–182) (the ''NAFTA Implementation Act''), incorporated in the Harmonized Tariff Schedule of the United States (the ''HTS'') the tariff modifications and rules of origin necessary or appropriate to carry out the NAFTA. Section 202 of the NAFTA Implementation Act (19 U.S.C. 3332) provides rules for determining whether goods imported into the United States originate in the territory of a NAFTA party and thus are eligible for the tariff and other treatment contemplated under the NAFTA. Section 202(q) of the NAFTA Implementation Act (19 U.S.C. 3332(q)) authorizes the President to proclaim, as a part of the HTS, the rules of origin set out in the NAFTA and to proclaim modifications to such previously proclaimed rules of origin, subject to the consultation and layover requirements of section 103(a) of the NAFTA Implementation Act (19 U.S.C. 3313(a)).

The President determined that the modifications to the HTS contained in Proclamation 8811 pursuant to sections 201 and 202 of the NAFTA Implementation Act were appropriate and proclaimed such changes with respect to goods of Mexico entered, or withdrawn from warehouse for consumption, on or after the date indicated in the Annex to that Proclamation. The President decided that the effective date of the modifications shall be announced by the United States Trade Representative (USTR).

On March 15, 2007, the government of Mexico obtained the necessary authorization to implement the rule of origin changes with respect to goods of the United States. Subsequently, officials from the government of Mexico and the government of the United States agreed to implement these changes with respect to each other's eligible goods, effective July 30, 2007.

Scott D. Quesenberry,

Special Textile Negotiator.

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–27912]

Notice of Applications for Deregistration Under Section 8(f) of the Investment Company Act of 1940

July 27, 2007.

The following is a notice of applications for deregistration under section 8(f) of the Investment Company

Act of 1940 for the month of July, 2007. A copy of each application may be obtained for a fee at the SEC's Public Reference Branch (tel. 202–551–5850). An order granting each application will be issued unless the SEC orders a hearing. Interested persons may request a hearing on any application by writing to the SEC's Secretary at the address below and serving the relevant applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on August 22, 2007, and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Secretary, U.S. Securities and Exchange Commission, 100 F. Street, NE., Washington, DC 20549–1090.

FOR FURTHER INFORMATION CONTACT: Diane L. Titus at (202) 551–6810, SEC, Division of Investment Management, Office of Investment Company Regulation, 100 F. Street, NE., Washington, DC 20549–4041.

Portico Funds, Inc.

[File No. 811–10511]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. Applicant has never made a public offering of its securities and does not propose to make a public offering or engage in business of any kind.

Filing Dates: The application was filed on October 25, 2002, and amended on July 18, 2007.

Applicant's Address: c/o U.S. Bancorp Asset Management, Inc., U.S. Bancorp Center, 800 Nicollet Mall, Minneapolis, MN 55402.

Conseco Fund Group

[File No. 811–7839]

On January 27, 2006 and April 28, 2006, applicant transferred its assets to First Investors Equity Funds, First Investors Income Funds, and First Investors Tax Exempt Funds, based on net asset value. Expenses of $422,564 incurred in

connection with the reorganization were paid by applicant.

Filing Date: The application was filed on July 2, 2007.

Applicant's Address: 95 Wall St., New York, NY 10005.

Value Line Hedged Opportunity Fund, Inc.

[File No. 811–8607].

Value Line Smaller Companies Fund, Inc.

[File No. 811–21608].

Value Line Value Fund, Inc.

[File No. 811–21639].

Summary: Each applicant seeks an order declaring that it has ceased to be an investment company. Applicants have never made a public offering of their securities and do not propose to make a public offering or engage in business of any kind.

Filing Dates: The applications were filed on May 30, 2007, and amended on July 11, 2007.

Applicants' Address: 220 East 42nd St., New York, NY 10017.

Vestaur Securities Fund

[File No. 811–2320]

Summary: Applicant, a closed-end investment company, seeks an order declaring that it has ceased to be an investment company. On May 23, 2005, applicant transferred its assets to Evergreen Fixed Income Trust, based on net asset value. Expenses of $147,380 incurred in connection with the reorganization were paid by applicant and Evergreen Investment Management Company, LLC, investment adviser to both applicant and the acquiring fund.

Filing Dates: The application was filed on October 12, 2006, and amended on July 13, 2007.

Applicant's Address: 200 Berkeley St., Boston, MA 02116.

4086 Series Trust

[File No. 811–3641]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On March 29, 2007, three series of 40|86 Series Trust, Fixed Income Portfolio, Government Securities Portfolio and Money Market Portfolio, were liquidated and cash was distributed to each series' respective shareholders pro rata based on share ownership. On May 2, 2007, the shares of the two remaining series of 40|86 Series Trust, Equity Portfolio and Balanced Portfolio, were redeemed in kind by the sole shareholder of each series, which is unaffiliated with the investment adviser of 40|86 Series Trust. Expenses of approximately $ 177,500 incurred in connection with the liquidation were paid by 40|86 Advisors, Inc., applicant's investment adviser.

Filing Dates: The application was filed on June 13, 2007, and amended on July 18, 2007 and July 20, 2007.

Applicant's Address: 11825 N. Pennsylvania Street, Carmel, IN 46032.

Huntington VA Funds

[File No. 811–9481]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On June 23, 2006, Applicant made a distribution of its assets to its shareholders, based on net asset value, in connection with the merger of Applicant (a Massachusetts business trust) into the Huntington Funds (a Delaware statutory trust). Expenses of $138,306.12 were incurred in connection with the merger. These expenses were shared pro-rata among all portfolios of Applicant and the Huntington Funds.

Filing Dates: The application was filed on March 6, 2007, and amended on June 28, 2007.

Applicant's Address: Huntington VA Funds, 5800 Corporate Drive, Pittsburgh, Pennsylvania 15237–7010.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Florence E. Harmon,

Deputy Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–27916; 812–13358]

HealthShares, Inc., et al.; Notice of Application

July 27, 2007.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of application to amend a prior order under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from sections 2(a)(32), 5(a)(1), 22(d), and 24(d) of the Act and rule 22c–1 under the Act, and under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and (a)(2) of the Act.

Summary of Application: Applicants request an order to amend a prior order that permits: (a) Open-end management investment companies, whose series are based on certain equity securities indices created by an affiliate of the investment adviser, to issue shares redeemable only in large aggregations; (b) secondary market transactions in the shares of the series to occur at negotiated prices; (c) dealers to sell shares to purchasers in the secondary market unaccompanied by a prospectus when prospectus delivery is not required by the Securities Act of 1933 (''Securities Act''); and (d) certain affiliated persons of the series to deposit securities into, and receive securities from, the series in connection with the purchase and redemption of aggregations of the series' shares (''Prior Order'').[1] Applicants seek to amend the Prior Order in order to offer additional series that would hold equity and fixed income securities and to provide that certain representations and undertakings contained in the Prior Order shall not apply to a series where an entity that creates, compiles, sponsors, or maintains an underlying index is not an affiliated person, or an affiliated person of an affiliated person, of the series, its investment adviser, distributor, promoter, or any sub-adviser to the series. In addition, the order would delete a condition related to future relief in the Prior Order.

Applicants: HealthShares, Inc., XShares Advisors LLC (formerly, X–Shares Advisors, LLC) (the ''Advisor''), XShares Group LLC (formerly, Ferghana-Wellspring LLC) and TDAX Funds, Inc.

Filing Dates: The application was filed on January 19, 2007 and amended on June 4, 2007 and on July 20, 2007. Applicants have agreed to file an amendment during the notice period, the substance of which is reflected in this notice.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on August 17, 2007, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F

[1] HealthShares, Inc., et al., Investment Company Act Release Nos. 27553 (November 16, 2006) (notice) and 27594 (December 7, 2006) (order).

Street, NE., Washington, DC 20549–1090. Applicants: Attn. Anthony F. Dudzinski, Esq., 420 Lexington Avenue, Suite 2550, New York, NY 10170; and Michael R. Rosella, Esq., Paul, Hastings, Janofsky & Walker LLP, Park Avenue Tower, 75 East 55th Street, First Floor, New York, NY 10022.

FOR FURTHER INFORMATION CONTACT: Deepak T. Pai, Senior Counsel, at (202) 551–6876 or Mary Kay Frech, Branch Chief, at (202) 551–6821 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the Commission's Public Reference Branch, 100 F. Street, NE., Washington, DC 20549–0102 (tel. 202–551–5850).

Applicants' Representations

1. HealthShares, Inc. is an open-end management investment company organized as a Maryland corporation and is comprised of multiple series (the ''Initial Funds''). TDAX Funds, Inc. (the ''Company'') is an open-end management investment company organized as a Maryland corporation that is comprised of five (5) series of underlying ''lifecycle'' portfolios (each a ''New Fund'' and together, the ''New Funds''). The Advisor, which is registered as an investment adviser under the Investment Advisers Act of 1940 (the ''Advisers Act''), serves as the investment adviser to the Initial Funds and will serve as investment adviser to the New Funds. The Advisor expects to enter into sub-advisory agreements with Amerivest Investment Management, LLC and BNY Investment Advisors (collectively, ''Sub-Advisors'') to serve as sub-advisers to the New Funds. Each Sub-Advisor is registered as an investment adviser under the Advisers Act. Neither Sub-Advisor is an affiliated person, or an affiliated person of an affiliated person, of the Advisor or Zacks Investment Research Inc. (''Zacks''), the creator of the Underlying Indexes (as defined below). ALPS Distributors, Inc. (the ''Distributor''), a broker-dealer registered under the Securities Exchange Act of 1934 (the ''Exchange Act''), will serve as the principal underwriter and distributor for the New Funds.

2. The applicants are currently permitted to offer the Initial Funds based on equity securities indices developed by an affiliated person of the Advisor in reliance on the Prior Order. Applicants seek to amend the Prior Order to permit the offering of the New Funds, as well as series that may be created in the future that are advised by the Advisor or an entity controlled by or under common control with the Advisor and that comply with the terms and conditions of the Prior Order, as modified by the requested relief (the ''Future Funds,'' together with the Initial Funds and the New Funds, the ''Funds''). The New Funds would operate in a manner identical to the Initial Funds that are subject to the Prior Order, except as described in the application.

3. The investment objective of each New Fund is to track the performance, before fees and expenses, of a particular underlying index (''Underlying Index'') by investing in a portfolio of securities generally consisting of the component securities (''Component Securities'') of the Underlying Index.[2] Each Underlying Index is a ''lifestyle'' index that rebalances allocations among asset classes over time in an attempt to maximize capital appreciation at a target date. No entity that creates, compiles, sponsors, or maintains an Underlying Index is or will be an affiliated person, as defined in section 2(a)(3) of the Act, or an affiliated person of an affiliated person, of the Company, the Advisor, the Distributor, promoter, or any sub-adviser to a New Fund.

4. The applicants represent that the Component Securities of each Underlying Index include equity securities of U.S. and international companies (including common stocks and real estate investment trusts), American Depository Receipts based on equity securities of international companies, and fixed-income securities (including bonds, treasury bills and notes, mortgage real estate investment trusts, U.S. government agency mortgage pass-through securities, cash equivalents or short-term money market instruments). The fixed income securities included in the Component Securities will be investment grade fixed income securities and will not include corporate mortgage-backed securities, asset-backed securities, high yield bonds, or Rule 144A securities.[3] Each New Fund will attempt to track its Underlying Index by investing at least 90%, and typically substantially all, of its assets in the securities that make up the Underlying Index, holding each security in approximately the same proportion as its weighting in the Underlying Index.[4] Each New Fund also may invest up to 10% of its assets in futures contracts, options on futures contracts, options, as well as swaps on securities of companies in the Underlying Index. Applicants expect that the returns of each New Fund should be highly correlated with the returns of its Underlying Index, expecting that the correlation coefficient between each New Fund and its Underlying Index will exceed 95% over extended periods.

5. The Prior Order relates to Funds that track indices created by an affiliated person of the Advisor. Because such Funds could introduce potential conflicts of interest, the Prior Order contains certain representations and undertakings relating to the transparency of the methodology for those underlying indices, and the establishment of certain policies and procedures to limit communication between index personnel and employees of the Advisor and any sub-adviser. Applicants assert that these conflicts of interest do not exist where the index creator is not an affiliated person, or an affiliated person of an affiliated person, of an exchange-traded fund or its investment adviser or any sub-adviser, such as in the case of the New Funds. Applicants therefore seek to amend the Prior Order to provide that the relevant representations and undertakings shall not apply to a Fund where an entity that creates, compiles, sponsors, or maintains the underlying index is not an affiliated person, as defined in section 2(a)(3) of the Act, or an affiliated person of an affiliated person, of the Fund, the Advisor, the Distributor, promoter or any sub-adviser to a Fund.

---

[2] The Underlying Indices for the New Funds are the Zacks 2010 Lifecycle Index, Zacks 2020 Lifecycle Index, Zacks 2030 Lifecycle Index, Zacks 2040 Lifecycle Index, and Zacks In-Target Lifecycle Index.

[3] If an underlying index of a Future Fund includes restricted securities eligible for resale pursuant to rule 144A under the Securities Act (''Rule 144A securities''), applicants acknowledge that in accepting deposit securities (''Deposit Securities'') and satisfying redemptions with securities that are Rule 144A securities, the Future Funds will comply with the conditions of rule 144A. The prospectus for a Future Fund would also state that an authorized participant that is not a ''Qualified Institutional Buyer,'' as defined in rule 144A under the Securities Act, will not be able to receive, as part of a redemption, restricted securities eligible for resale under rule 144A.

[4] The New Funds may seek to track the performance of any U.S. government agency mortgage pass-through securities included in an Underlying Index by investing in ''to-be announced'' (''TBA'') transactions on such securities. A TBA transaction is a method of trading mortgage-backed securities where the buyer and seller agree upon general trade parameters such as agency, settlement date, par amount and price. The actual pools delivered are determined two days prior to settlement date. A New Fund may designate the mortgage pass-through TBAs to be included in the Deposit Securities and will accept ''cash in lieu'' of delivery of the designated mortgage pass-through TBAs. The amount of substituted cash in the case of TBA transactions will be equivalent to the value of the TBA transaction listed as a Deposit Security.

6. Applicants state that the New Funds will operate in a manner identical to the operation of the Initial Funds in the Prior Order, except as specifically noted by applicants (and summarized in this notice), and will comply with all of the terms, provisions and conditions of the Prior Order, as amended by the present application. Applicants believe that the requested relief continues to meet the necessary exemptive standards.

7. Applicants also seek to amend the Prior Order to modify the terms under which the applicants, in the future, may offer Future Funds based on other equity or fixed income indices. The Prior Order is currently subject to a condition that does not permit applicants to register the shares of any Future Fund by means of filing a post-effective amendment to a Fund's registration statement or by any other means, unless applicants have requested and received with respect to such Future Fund, either exemptive relief from the Commission or a no-action letter from the Division of Investment Management of the Commission, or if the Future Fund could be listed on a national securities exchange (''Exchange'') without the need for a filing pursuant to rule 19b–4 under the Exchange Act.

8. The order would amend the Prior Order to delete this condition. Any Future Funds will (a) be advised by the Advisor or an entity controlled by or under common control with the Advisor; and (b) comply with the terms and conditions of the Prior Order, as amended by any order issued in connection with the present application.

9. Applicants believe that the modification of the future relief available under the Prior Order would be consistent with sections 6(c) and 17(b) of the Act and that granting the requested relief will facilitate the timely creation of Future Funds and the commencement of secondary market trading of such Future Funds by removing the need to seek additional exemptive relief. Applicants submit that the terms and conditions of the Prior Order, as amended by the requested order, are appropriate for the Funds and would remain appropriate for Future Funds. Applicants also submit that tying exemptive relief under the Act to the ability of a Future Fund to be listed on an Exchange without the need for a rule 19b–4 filing under the Exchange Act is not necessary to meet the standards under sections 6(c) and 17(b) of the Act.

Applicants' Condition

Applicants agree that any amended order granting the requested relief will be subject to the same conditions as those imposed by the Prior Order, except for condition 1 to the Prior Order, which will be deleted.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jill M. Peterson,

Assistant Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–27915; 812–13394]

The BISYS Group, Inc., et al.; Temporary Order

July 27, 2007.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Temporary order under section 9(c) of the Investment Company Act of 1940 (''Act'').

SUMMARY: Applicants have received a temporary order exempting them from section 9(a) of the Act, with respect to an injunction entered against The BISYS Group, Inc. (''BISYS'') on or about July 27, 2007 by the United States District Court for the Southern District of New York (the ''Injunction''), until the Commission takes final action on an application for a permanent order or, if earlier, September 24, 2007.

Applicants: BISYS, BISYS Fund Services Limited Partnership, BNY Hamilton Distributors, Inc., Funds Distributor, Inc., Heartland Investor Services, LLC, Mercantile Investment Services, Inc., Performance Funds Distributor, Inc., ProFunds Distributors, Inc. and Victory Capital Advisers, Inc. (collectively, other than BISYS, the ''Underwriter Applicants'', and, together with BISYS, the ''Applicants'').[1]

Filing Date: The application was filed on June 6, 2007.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090. Applicants, BISYS, 105 Eisenhower Parkway, Roseland, New Jersey 07068, the Underwriter Applicants, 100 Summer Street, 15th Floor, Boston, Massachusetts 02110.

[1] Applicants request that any relief granted pursuant to the application also apply to any other company of which BISYS is an affiliated person or may become an affiliated person in the future (together with the Applicants, the ''Covered Persons'').

FOR FURTHER INFORMATION CONTACT: Shannon Conaty, Senior Counsel, at (202) 551–6827, or Janet M. Grossnickle, Branch Chief, at (202) 551–6821, (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The application may be obtained for a fee at the Commission's Public Reference Desk, 100 F Street, NE., Washington, DC 20549–0102 (tel. 202–551–8090).

Applicants' Representations

1. BISYS, a Delaware corporation, directly and through wholly-owned subsidiaries, provides products and support services to financial institutions, including insurance companies, banks and mutual funds. Each of the Underwriter Applicants is an indirect, wholly-owned subsidiary of BISYS and serves as principal underwriter for one or more registered management investment companies (''Funds''). Each Underwriter Applicant is registered with the Commission as a broker-dealer under section 15 of the Securities Exchange Act of 1934 (''Exchange Act'').

2. On or about July 27, 2007, the United States District Court for the Southern District of New York entered the Injunction against BISYS in a matter brought by the Commission.[2] The Commission alleged in the complaint (''Complaint'') that BISYS violated sections 13(a) and 13(b)(2)(A) and (B) of the Exchange Act and rules 12b–20, 13a–1, 13a–11 and 13a–13 thereunder when it engaged in improper accounting practices that resulted in an overstatement of BISYS's financial results for fiscal years 2001 through 2003 by about $180 million. Without admitting or denying the allegations in the Complaint, except as to jurisdiction, BISYS consented to the entry of the Injunction and the payment of disgorgement and prejudgment interest.

Applicants' Legal Analysis

1. Section 9(a)(2) of the Act, in relevant part, prohibits a person who has been enjoined from engaging in or continuing any conduct or practice in connection with the purchase or sale of a security from acting, among other things, as an investment adviser or depositor of any registered investment company or a principal underwriter for any registered open-end investment company, registered unit investment trust or registered face-amount certificate company. Section 9(a)(3) of

[2] *United States Securities and Exchange Commission* v. *The BISYS Group, Inc.*, 07–CIV–4010 (KMK) (S.D.N.Y. May 23, 2007).

the Act extends the prohibitions of section 9(a)(2) to a company any affiliated person of which has been disqualified under the provisions of section 9(a)(2). Section 2(a)(3) of the Act defines ''affiliated person'' to include any person directly or indirectly controlling, controlled by, or under common control with, the other person. Applicants state that BISYS is an affiliated person of each of the other Applicants. Applicants state that the entry of the Injunction would result in Applicants being subject to the disqualification provisions of section 9(a) of the Act.

2. Section 9(c) of the Act provides that the Commission shall grant an application for exemption from the disqualification provisions of section 9(a) if it is established that these provisions, as applied to the Applicants, are unduly or disproportionately severe or that the Applicants' conduct has been such as not to make it against the public interest or the protection of investors to grant the exemption. Applicants have filed an application pursuant to section 9(c) seeking a temporary and permanent order exempting the Applicants and the other Covered Persons from the disqualification provisions of section 9(a) of the Act.

3. Applicants state that no current officer or employee of any of the Underwriter Applicants who is or was involved in providing underwriting services to the Funds participated in the conduct which resulted in the filing of the Complaint. Applicants also state that none of the Applicants has ever previously applied for an exemption pursuant to section 9(c) of the Act.

4. Applicants assert that, if the Underwriter Applicants were barred from serving as principal underwriter to the Funds, the effect on their businesses and employees would be severe. Applicants further represent that the inability of the Underwriter Applicants to continue to serve as principal underwriter to the Funds would result in potentially severe hardships for the Funds and their shareholders.

5. For these and other reasons discussed in the application, Applicants believe they meet the standard for exemption specified in section 9(c).

Applicants' Condition

Applicants agree that any order granting the requested relief will be subject to the following condition:

Any temporary exemption granted pursuant to the application shall be without prejudice to, and shall not limit the Commission's rights in any manner with respect to, any Commission investigation of, or administrative proceedings involving or against, Applicants, including without limitation, the consideration by the Commission of a permanent exemption from section 9(a) of the Act requested pursuant to the application, or the revocation or removal of any temporary exemptions granted under the Act in connection with the application.

Temporary Order

Rule 30–5(a)(7) of the Commission's Rules of Practice and Investigations provides that the Division of Investment Management may exempt persons, for a temporary period not exceeding 60 days, from section 9(a) of the Act, if, on the basis of the facts then set forth in the application, it appears that: (i)(A) the prohibitions of section 9(a), as applied to the applicant, may be unduly or disproportionately severe, or (B) the applicant's conduct has been such as not to make it against the public interest or the protection of investors to grant the temporary exemption; and (ii) granting the temporary exemption would protect the interests of the investment companies being served by the applicant by allowing time for the orderly consideration of the application for permanent relief or the orderly transition of the applicant's responsibilities to a successor, or both.

The Division has considered the matter and, without necessarily agreeing with all of the facts represented or all of the arguments asserted by the Applicants, finds, in accordance with 17 CFR 200.30–5(a)(7), that it appears that (i) The prohibitions of section 9(a), as applied to the Applicants, may be unduly or disproportionately severe, (ii) the Applicants' conduct has been such as not to make it against the public interest or the protection of investors to grant the temporary exemption, and (iii) granting the temporary exemption would protect the interests of the investment companies served by the Applicants by allowing time for the orderly consideration of the application for permanent relief.

Accordingly, in the matter of The BISYS Group, Inc., *et al.* (File No. 812–13394),

It is hereby ordered, pursuant to section 9(c) of the Act, that the Applicants are granted a temporary exemption from the provisions of section 9(a), effective forthwith, solely with respect to the Injunction, subject to the condition in the application, until the date the Commission takes final action on their application for a permanent order or, if earlier, September 24, 2007.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jill M. Peterson,

Assistant Secretary.

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56149; File No. SR–BSE–2007–38]

Self-Regulatory Organizations; Boston Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Penny Pilot Program

July 26, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 24, 2007, the Boston Stock Exchange, Inc. (''BSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by the BSE. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which rendered the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the Boston Options Exchange (''BOX'') pilot program that permits BOX to quote certain classes in penny increments (''Penny Pilot Program'') through September 27, 2007. The text of the proposed rule change is available at BSE, the Commission's Public Reference Room, and *http://www.bostonstock.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the Penny Pilot Program under the Rules of the BOX for approximately an additional two months, extending the program through September 27, 2007. The Penny Pilot Program permits BOX to quote certain designated classes in penny increments.[5] The proposed extension will amend Section 33, (''Penny Pilot Program'') of Chapter V (''Doing business on BOX'') of the BOX Rules.

Currently, all six options exchanges, including BOX, participate in the Penny Pilot Program which includes the following thirteen options: Ishares Russell 2000 (IWM); NASDAQ–100 Index Tracking Stock (QQQQ); SemiConductor Holders Trust (SMH); General Electric Company (GE); Advanced Micro Devices, Inc. (AMD), Microsoft Corporation (MSFT); Intel Corporation (INTC); Caterpillar, Inc. (CAT); Whole Foods Market, Inc. (WFMI); Texas Instruments, Inc. (TXN); Flextronics International Ltd. (FLEX); Sun Microsystems, Inc. (SUNW); and Agilent Technologies, Inc. (A).

The minimum price variation for all classes included in the Penny Pilot Program, except for the QQQQs, will continue to be $0.01 for all quotations in option series that are quoted at less than $3 per contract and $0.05 for all quotations in option series that are quoted at $3 per contract or greater. The QQQQs will continue to be quoted in $0.01 increments for all options series.

BOX will deliver a report to the Commission during the first month after the expiration of the pilot, which will be composed of data from approximately the last five months of trading, from May 1, 2007 through September 27, 2007. The report will analyze the impact of penny pricing on market quality and options system capacity.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with section 6(b) of the Act[6] in general, and furthers the objectives of section 6(b)(5) of the Act,[7] in particular, in that it is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received by the Exchange.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6) thereunder,[9] because the foregoing proposed rule does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.

A proposed rule change filed under Rule 19b–4(f)(6) normally may not become operative prior to 30-days after the date of filing.[10] However, Rule 19b–4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest.[11] The Exchange has requested that the Commission waive the 5-day pre-filing requirement and the 30-day operative delay. The Commission believes that waiving the 5-day pre-filing requirement and the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver will ensure continuity of the Exchange's rules and will allow the Penny Pilot Program to remain in effect without interruption. For these reasons, the Commission designates the proposal to be operative upon filing with the Commission.[12]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[13]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–BSE–2007–38 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F. Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BSE–2007–38. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56151; File No. SR–ISE–2007–68]

Self-Regulatory Organizations; International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to an Extension of the Penny Pilot Program

July 26, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 26, 2007, the International Securities Exchange, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by the ISE. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which rendered the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the Penny Pilot Program. The text of the proposed rule change is available at ISE, the Commission's Public Reference Room, and *http://www.iseoptions.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ISE included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On January 24, 2007, the Commission approved ISE's rule filing (SR–ISE–2006–62),[5] which permits thirteen option classes to quote in penny increments in connection with the implementation of an industry wide, six month penny pilot program (''Penny Pilot Program''). Under the Penny Pilot Program, the minimum price variation for all thirteen option classes, except for the Nasdaq-100 Index Tracking Stock (''QQQQs''), will continue to be $0.01 for all quotations in option series that are quoted at less than $3 per contract and $0.05 for all quotations in options series that are quoted at $3 per contract or greater. The QQQQs will continue to be quoted in $0.01 increments for all options series. The Penny Pilot Program is scheduled to expire on July 26, 2007. ISE proposes to extend the Penny Pilot Program in the thirteen options classes for an additional two months, until September 27, 2007, while the Commission analyzes whether it would be appropriate for the options exchanges to continue the pilot, extend it, or expand it.

As proposed in the Initial Filing, ISE represents that options trading in penny increments will not be eligible for split pricing, as permitted under ISE Rule 716. In the Initial Filing, the Exchange made references to the quote mitigation strategies that are currently in place and proposed to apply them to all option classes during to the Penny Pilot Program.[6] The Exchange proposes to continue applying those quote mitigation strategies during the extension of the Penny Pilot Program. Specifically, as proposed in ISE Rule 804, ISE will continue to utilize a holdback timer that delays quotation updates for up to, but not longer than, one second. The Exchange's monitoring and delisting policies, as proposed in the Initial Filing, shall continue to apply.

Finally, ISE will deliver a report to the Commission during the first month after the expiration of the pilot, which will be composed of data from approximately the last five months of trading, from May 1, 2007 through September 27, 2007. The report will analyze the impact of penny pricing on market quality and options system capacity.

2. Statutory Basis

The Exchange believes that its proposal is consistent with section 6(b) of the Act[7] in general, and furthers the objectives of section 6(b)(5) of the Act[8] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received by the Exchange.

[14] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[6] The Exchange confirmed that the quote mitigation strategies in place during the Penny Pilot Program applied to all options classes. Telephone conversation between Samir Patel, Assistant General Counsel, ISE and Jennifer Colihan, Special Counsel, Division of Market Regulation, Commission, on July 26, 2006.

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act [9] and Rule 19b–4(f)(6) thereunder,[10] because the foregoing proposed rule does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.

A proposed rule change filed under Rule 19b–4(f)(6) normally may not become operative prior to 30-days after the date of filing.[11] However, Rule 19b–4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest.[12] The Exchange has requested that the Commission waive the 5-day pre-filing requirement and the 30-day operative delay. The Commission believes that waiving the 5-day pre-filing requirement and the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver will ensure continuity of the Exchange's rules and will allow the Penny Pilot Program to remain in effect without interruption. For these reasons, the Commission designates the proposal to be operative upon filing with the Commission.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[14]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–ISE–2007–68 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F. Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISE–2007–68. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F. Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the ISE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ISE–2007–68 and should be submitted on or before August 23, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56143; File No. SR–NYSE–2007–59]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE Rules 342(c) (''Offices—Approval, Supervision and Control'') and 343 (''Offices—Sole Tenancy, Hours, Display of Membership Certificates'')

July 26, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 29, 2007, the New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by NYSE. On July 26, 2007, the Exchange submitted Amendment No. 1 to the proposed rule change. The Exchange filed the proposal as a ''non-controversial'' rule change pursuant to section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder,[4] which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NYSE is filing with the Commission (''SEC'' or ''Commission'') proposed amendments to NYSE Rules 342(c) (''Offices—Approval, Supervision and Control'') to replace the prior consent requirement for branch office approval with a notice requirement and 343 (''Offices—Sole Tenancy, Hours, Display of Membership Certificates'') to eliminate the requirement under Rule 343 that member organizations display an Exchange-provided ''certificate of membership'' at all branch office locations. The text of the proposal is available on the Exchange's Web site (*http://www.nyse.com*), at the principal office of the NYSE, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NYSE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NYSE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend NYSE Rule 342(c) and delete paragraph (d) of Rule 343 as part of its continuing Self Regulatory Organization (''SRO'') Rule Harmonization initiative.[5] The proposed amendment to Rule 342(c) will replace the prior consent requirement for branch office approval with a notice requirement and make the provision consistent with the definition of ''branch office'' set forth in Rule 342.10. The proposed amendment to Rule 343 will delete the Rule 343(d) requirement that member organizations display an Exchange-provided ''certificate of membership'' at all branch offices.

a. Rule 342(c) (''Offices—Approval, Supervision and Control'') Background

NYSE Rule 342.10 defines ''branch office'' as ''any location where one or more associated persons of a member or member organization regularly conduct the business of effecting any transactions in, or inducing or attempting to induce the purchase or sale of any security, or is held out as such * * *'' Rule 342(c) requires that member organizations obtain the Exchange's prior consent or approval (hereinafter referred to as the ''prior consent'' requirement) for each office to be established, other than a main office.

Currently, member organizations are required to submit requests for approval of branch office locations via Form BR (Uniform Branch Office Registration Form),[6] filed with the Central Registration Depository (''CRD''). All filings made with CRD, whether Exchange member organizations or not, are subjected to numerous system completeness checks.[7]

Once filed with CRD, a branch office application is routed to the NYSE via four daily feeds from the NASD, for review through the NYSE's Branch Office System (''BOS'') application. BOS conducts a series of data validation reviews in addition to the CRD completeness checks on the filings received to determine whether to ''auto-approve'' the application when a filing does not have any validation issues, or route the filing to designated NYSE personnel for further review of the application.

Current Rule 342(c) Standard

Under the current prior consent requirement set forth by NYSE Rule 342(c), a vast majority of member organization branch offices are approved. In the limited situations where such consent is not initially given by the Exchange, a member organization may be required to amend its request for branch office approval. Even in these situations, however, such consent is nearly always granted by the Exchange, rendering the prior consent requirement unnecessary.[8]

Current NASD Standard

The NASD requires that any office other than the main office be properly designated and registered, if required, with the NASD[9] (hereinafter referred to as the ''notice'' requirement). The NASD rule and a vast majority of the states'' laws and regulations do not require prior consent to open a branch office. Since there is no corresponding requirement for NASD members, the NYSE's prior consent requirement results in disparate regulatory standards for dual NYSE/NASD member organizations, and the utility of the NASD registration requirement is limited, as dual members have to comply with the more stringent NYSE requirement.

Proposed Rule Change

The Exchange proposes to replace the Rule 342(c) prior consent requirement for branch office approval with a notice requirement consistent with the NASD notice requirement. Specifically, the Exchange proposes to amend Rule 342(c) to state that a ''member organization shall provide, in a manner prescribed by the Exchange, notice to the Exchange of each branch office established by such member organization.'' Under the proposed notice requirement, the Exchange will continue to receive the same information it currently receives under the prior consent requirement, which will still allow the Exchange to monitor branch office applications. Thus the front-end completeness checks in CRD, coupled with the continued receipt of branch office profile information contained on Form BR, will afford the Exchange the opportunity to thoroughly monitor branch office filings submitted and take action where appropriate without unduly delaying the initiation of business activities at such offices.

The Exchange also proposes to conform Rule 342(c) with the definition of ''branch office'' set forth in Rule 342.10. As noted above, Rule 342(c) currently applies to ''each office * * * other than a main office.'' The Exchange proposes to delete the phrase ''other than a main office'' from Rule 342(c) because, based on the definition of branch office in Rule 342.10, a branch office may include a main office location, depending on the functions performed at that location.

In addition, the Exchange proposes to delete the term ''member'' from Rule 342(c) as part of an ongoing process to eliminate, where appropriate, this designation from its rules. The proposed deletion of the term reflects the fact that the Rule has been redefined in the context of the NYSE/ARCA business model [10] and no longer has regulatory relevance in the context of Rule 342(c).

Also, the Exchange proposes deleting the requirement under Rule 343(d) that member organizations display an Exchange-provided ''certificate of membership'' at all branch office locations. The Exchange believes this practice has become outdated.

The Exchange requests that the rule change be effective immediately.

[5] *See* SR–NYSE–2007–22 for additional information.

[6] *See* NYSE Information Memo 05–75 (Approval of Form BR (Uniform Branch Office Registration Form)).

[7] Completeness checks conducted on Form BR filings include, for example, a review for proper registration, pursuant to National Association of Securities Dealers, Inc. (''NASD'') Rules, of supervisory individuals. A Form BR would not be processed by CRD if any completeness checks were not satisfied.

[8] From November 1, 2005 through December 31, 2006, NYSE received 3,831 branch office applications, of which, slightly under half, that is 1,913, were ''auto'' or ''managed'' approved applications, requiring intervention only on a technical support level in some instances. Of the remaining applications received, 1,918, the vast majority were manually reviewed and approved by NYSE personnel. The 3,831 office applications received and reviewed resulted in only 76 rejections, or roughly 2% of the total received. These office applications were rejected for reasons such as individuals designated as supervisors not being properly qualified under NYSE requirements or incorrect designation of office type (*e.g.*, ''Small'' instead of ''Regular'' branch office).

[9] *See* NASD Rule 3010(g)(2)(A) and NASD IM–1000–4.

[10] *See* Securities Exchange Act Release No. 53382 (February 27, 2006), 71 FR 11251 (March 6, 2006) (order approving SR–NYSE–2005–77) and SR–NYSE–2007–22.

2. Statutory Basis

The statutory basis for the proposed rule change is section 6(b)(5) of the Act[11] which requires, among other things, that the rules of the Exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and national market system, and in general, to protect investors and the public interest.

The Exchange believes the proposed amendment to Rule 342(c) will provide greater harmonization between the Exchange and NASD rules by eliminating the prior consent requirement for branch office approval and replacing it with a notice requirement so that dual NYSE/NASD member organizations must only comply with one standard.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (A) Significantly affect the protection of investors or the public interest; (B) impose any significant burden on competition; and (C) by its terms, become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, it has become effective pursuant to Section 19(b)(3)(A) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13]

A proposed rule change filed under 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest.

The Exchange believes that good cause exists to justify immediate effectiveness because under the proposed amendments to Rule 342(c), the Exchange will continue to receive the same information it currently receives under the prior consent requirement and thus, will be able to monitor branch office applications. Also, the front-end completeness checks in CRD, coupled with the continued receipt of branch office profile information contained on Form BR, will afford the Exchange the opportunity to thoroughly monitor branch office filings submitted and take action where appropriate without unduly delaying the initiation of business activities at such offices.

The Commission believes that for these reasons, and because the proposed rule change more closely conforms NYSE and NASD regulatory standards, waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission designates the proposed rule change to be operative upon filing with the Commission.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[15]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2007–59 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F. Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2007–59. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F. Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of NYSE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2007–59 and should be submitted on or before August 23, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[16]

Florence E. Harmon,

Deputy Secretary.

[FR Doc. E7–14914 Filed 8–1–07; 8:45 am]

BILLING CODE 8010–01–P

[11] 15 U.S.C. 78f(b)(5).

[12] 15 U.S.C. 78s(b)(3)(A).

[13] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires that a self-regulatory organization submit to the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission notes that NYSE has satisfied the five-day pre-filing notice requirement.

[14] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[15] For purposes of calculating the 60-day period within which the Commission may summarily abrogate the proposed rule change under Section 19(b)(3)(C) of the Act, the Commission considers the period to commence on July 26, 2007, the date on which NYSE submitted Amendment No. 1. *See* 15 U.S.C. 78s(b)(3)(C).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56162; File No. SR–NYSE–2007–013]

Self-Regulatory Organizations; New York Stock Exchange LLC, Notice of Filing of Proposed Rule and Amendment No. 1 Relating to a Proposed New Rule on Notification of Fees

July 27, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on February 6, 2007, the New York Stock Exchange (''NYSE'') filed with the Securities and Exchange Commission (''Commission'') the proposed new rule as described in Items I, II and III below, which Items have been substantially prepared by NYSE. On July 27, 2007, NYSE filed Amendment No. 1 to the proposed rule. The Commission is publishing this notice to solicit comments on the proposed rule from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule

NYSE is filing with the Commission proposed new Rule 405B (''Notification of Fees'').

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule

1. Purpose

The NYSE is proposing new Rule 405B (''Notification of Fees'') which would require member organizations to provide their customers with written notification of all fees related to their customers' accounts as well as require that fees be reasonable and not unfairly discriminatory between customers.

a. Background

A significant number of operational complaints that were reported to the Exchange pursuant to NYSE Rule 351(d)[3] concerned member organizations' insufficient notification of fees to their customers.[4] Specifically, many of these complaints involved increases in account fees and service charges or other charges which customers felt were imposed on them without notification. In June of 2005, the Exchange published Information Memo 05–41 (''Customer Notification of Service Fees and Service Fee Changes''), which provided guidance to firms regarding notification of fees. New Rule 405B is proposed to codify such guidance so as to emphasize the importance of notification of fees to customers.[5]

b. Proposed Rule

As proposed, Rule 405B would require member organizations to provide their customers with written notification of relevant fees regarding their accounts. Specifically, Rule 405B(1)(a) would require member organizations to provide each of its customers with written notification of all fees that are in effect at the time the account is opened, or that will take effect within 30 days of the account being opened. Additionally, Rule 405B(1)(b) would require member organizations to mail written notification of increased fees, or imposition of any new fees, at least 30 days prior to the increase or imposition related to an account to the last known address of every customer whose account is subject to such fees. Further, member organizations would be required to post a notification of the types of fee changes, and the projected date of such changes, on their internet website (if they maintain a website). This proposed Rule would better allow customers to stay apprised of their account fees as well as any changes to such fees.

Proposed Rule 405B(2) provides for methods of notification. Specifically, the proposed new rule would allow member organizations to either send a separate written notification to inform customers of fees or include the fee notices with account statements or newsletters.

Furthermore, Rule 405B(3) describes the types of fees which are included under the notification requirements of Rule 405B. Specifically, proposed Rule 405B(3) states, in part, that fees ''shall be construed broadly to include, but not be limited to, charges such as commissions, charges for any managed or non-managed accounts, or charges for other account-related services, such as reinvestment of dividends or interest, transfer or custody of securities, appraisals, safe-keeping, or margin.''

Also, proposed Rule 405B(4) would require that fees imposed on customers by member organizations be reasonable and not unfairly discriminatory.[6] The Exchange recognizes that fees charged to certain customers by member organizations may differ in some circumstances depending on various factors including, for example, the type of account, the amount invested, and the length and type of relationship. Thus, the proposed rule would not prohibit or restrict firms' ability to structure their pricing schedules based upon the uniqueness of their various customer relationships.

In addition, proposed Rule 405B(5) would provide customers with an option to receive notification of fees electronically in lieu of by mail, provided the customer affirmatively opts out of receiving such notification in writing.[7] This proposed rule is an effort to provide greater convenience to the investing public by providing customers with an option as to how they would like to receive fee notifications.

2. Statutory Basis

The statutory basis for this proposed rule change is section 6(b)(5) of the Exchange Act.[8] Under that section, rules of the Exchange must be designed to prevent fraudulent and manipulative acts and practices and promote just and equitable principles of trade. Proposed new Rule 405B would require member

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] NYSE Rule 351 (''Reporting Requirements'') specifies certain occurrences, incidents, and periodic information that member organizations must report to the Exchange.

[4] *See* NYSE Information Memo 05–41 (June 13, 2005) (Customer Notification of Service Fees and Service Fee Changes) stating that over 25% of customer operational complaints made to the Exchange in 2004 concerned ''fee/commissions'' problems.

[5] There has continued to be abuses in this area of excessive fees charged to customers and fee notification to customers. *See* NASD action involving McLaughlin, Piven and Vogel Securities (October 26, 2006).

[6] This is substantially similar to NASD Rule 2430 (''Charges for Services Performed''), but proposed NYSE Rule 405B contains notification requirements, whereas NASD Rule 2430 does not.

[7] This approach is similar to a recently approved amendment to NYSE Rule 409 (''Statements of Accounts to Customers'') permitting institutional customers doing business solely on a deliver versus payment/receive versus payment basis (''RVP/DVP'') to opt out of receiving statements as otherwise required by the rule. *See* Release No. 34–54810 (November 22, 2006), 71 FR 69165 (November 29, 2006) (SR–NYSE–2005–90). The SEC also approved similar revisions to NASD Rule 2340 in Release No. 34–54811 (November 22, 2006), 71 FR 69161 (November 29, 2006) (SR–NASD–2006–066). *See also* NYSE Information Memo 06–80 (November 30, 2006).

[8] 15 U.S.C. 78a *et. seq.*

organizations to provide their customers with written notification of fees. This proposed new rule is, therefore, consistent with section 6(b)(5) of the Exchange Act because it would provide for greater transparency to customers with respect to fees charged and will provide guidance to firms with respect to the fees they impose upon their customers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Received from Members, Participants or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule, or

B. institute proceedings to determine whether the proposed rule should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule is consistent with the Act. We invite interested persons to discuss whether a de minimis exception to paragraph (1) would help member organizations comply with the proposed rule and/or increase the effectiveness of the disclosures. If a de minimis exception is warranted, we also invite interested persons to discuss under what circumstances a fee or fee increase should be considered ''de minimis.'' Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2007–013 on the subject line.

Paper Comments

• Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F. Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2007–013. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule that are filed with the Commission, and all written communications relating to the proposed rule between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F. Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of NYSE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2007–013 and should be submitted on or before August 23, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56158; File No. SR–NYSE–2005–48]

Self-Regulatory Organizations; New York Stock Exchange LLC; Order Approving Proposed Rule Change as Modified by Amendment Nos. 1, 2, 3, and 4 Thereto and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 5 to Revise Rule 619 Pertaining to Subpoenas for the Production of Documents and Appearances of Witnesses

July 27, 2007.

I. Introduction

On July 13, 2005, the New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change amending NYSE Rule 619, which pertains to subpoenas for the production of documents and the appearance of witnesses. On September 26, 2005, the Commission published for comment the proposed rule change in the **Federal Register**.[3] The Commission received no comments on the proposal. On April 18, 2006, November 2, 2006, December 22, 2006, and February 8, 2007, the NYSE submitted Amendment Nos. 1, 2, 3, and 4, respectively, to the proposed rule change.[4] On April 13, 2007, the Commission published for comment the proposed rule change, as amended, in the **Federal Register**.[5] The Commission received two comments on the proposal.[6] On July 13, 2007, NYSE

[4] Amendment No. 1 clarified that only the arbitrator(s) may issue subpoenas and delineated the manner in which a party may request the issuance of a subpoena. Amendment No. 2 established a time frame for the parties to make and respond to objections to the requested subpoena and clarified that the arbitrator(s) may not rule on such a request until this time period has elapsed. Amendment No. 3 made technical changes to the rule and clarified that the arbitrator(s) must receive copies of any objections to the issuance of a subpoena. Amendment No. 4 clarified that a party requesting a subpoena may not serve the request or the draft subpoena on a non-party.

[5] *See* Securities Exchange Act Release No. 55594 (April 6, 2007), 72 FR 18710 (April 13, 2007).

[6] *See* letters from Steven B. Caruso, President, Public Investors Arbitration Bar Association (''PIABA''), dated April 17, 2007; and Martin L. Feinberg, dated May 4, 2007 (''Feinberg''). The NYSE responded to these comments in telephone conversations with Commission staff. Telephone conversations among Karen Kupersmith, Director of Arbitration, NYSE; Lourdes Gonzalez, Assistant

Continued

submitted Amendment No. 5 to the proposed rule change.

This notice and order solicits comment from interested persons on Amendment No. 5 and approves the proposal, as amended, on an accelerated basis. The text of the proposed rule change is available at *http://www.nyse.com,* the principal offices of the NYSE, and the Commission's Public Reference Room.

II. Description of the Proposed Rule Change

In its amended filing, the NYSE proposed to revise Rule 619 to provide that only the arbitrator(s) may issue subpoenas for the production of documents and the appearance of witnesses. The rule also provides that the arbitrator(s), and not the courts, will rule on discovery disputes concerning the issuance of subpoenas. Under the rules, the party who requests a subpoena must make a written request asking the arbitrator(s) to issue the subpoena and send a copy of the request and the requested draft subpoena to the Director of Arbitration, each arbitrator, and all parties to the arbitration in a manner reasonably expected to result in delivery to everyone on the same day. The requesting party may not serve the request or the requested draft subpoena on any non-party.

If a party has an objection to the propriety or scope of the subpoena, that party must file objections in writing with the Director of Arbitration and send copies to all other parties, including each arbitrator, within 10 days of service of the request and draft subpoena. The party requesting the subpoena could file a reply to the objection within five days of receipt of the objection. The arbitrator(s) then determine the propriety and scope of the requested subpoena after the time period for filing objections or replies had elapsed. If a subpoena is issued by the arbitrator(s), the party that requested the subpoena must serve the subpoena at the same time and in the same manner on all parties, and, if applicable, on any non-party receiving the subpoena.

In addition, the proposed rule change provides that any party that receives documents in response to a subpoena served upon a non-party must provide notice to all other parties within five days of receipt of the documents. Thereafter, any party may request copies of those documents and, if such a request is made, the documents must be provided within 10 days following receipt of the request. The party requesting the documents is responsible for the reasonable costs associated with the production of the copies, unless the panel determines otherwise.

Amendment No. 5 clarified that calendar days, and not business days, apply to (1) The 10-day period to object to the scope or propriety of subpoenas, (2) the five-day period to respond to an objection, (3) the five-day period to notify all other parties of receipt of documents from a third party, and (4) the 10-day period to request copies of these documents.

III. Summary of Comments Received and NYSE Response

One commenter [7] noted that the proposed rule does not expressly state whether calendar or business days apply to various filing deadlines, and urged the NYSE to clarify in the rule specify that calendar days govern the applicable time periods. In response to this comment, the NYSE filed Amendment No. 5, which clarified that calendar days apply to all deadlines under the proposed rule. Both commenters criticized the proposed rule's requirement that the party receiving documents in response to a subpoena will be responsible for the reasonable costs associated with the production, unless the panel determines otherwise. PIABA stated that this ''cost-shifting'' will increase arbitration expenses associated with the initiation and prosecution of every arbitration proceeding, while Feinberg maintained that the rule should not require payment for subpoenaed documents.

The NYSE responded that although the proposed rule is ambiguous, this provision only applies to the receipt of documents from a third-party, and does not apply more broadly to all subpoenas, as the commenters suggest. The arbitration panel still may allocate fees among the parties pursuant to NYSE Rule 629(c)(2), which permits arbitrators to determine in the award the amount of costs incurred pursuant to Rule 619 (among other rules) and, unless applicable law directs otherwise, other costs and expenses of the parties.[8]

One commenter [9] contended that under the proposed rule, read in light of the subpoena service requirements of the Federal Arbitration Act, would require personal service of subpoenas and copies of subpoenas. In the commenter's view, this would be expensive, burdensome and unnecessary. The NYSE responded that neither the proposed rule nor its other rules require personal service.[10] In particular, NYSE stated that Rule 612 provides that ''[s]ervice and filing are accomplished on the date of mailing either by first-class postage prepaid or by means of overnight mail service or, in the case of other means of service, on the date of delivery.'' [11]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 5, including whether Amendment No. 5 is consistent with the Exchange Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml)*; or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–NYSE–2005–48 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2005–48. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of NYSE. All comments received will be posted

Chief Counsel—Sales Practices, Commission; and Michael Hershaft, Special Counsel, Commission (July 11, 2007 and July 27, 2007) (''NYSE Response'').

without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2005–48 and should be submitted on or before August 23, 2007.

V. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the NYSE, and, in particular, with section 6(b)(5) of the Act.[12] Section 6(b)(5) requires, among other things, that the NYSE's rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.[13] The Commission believes that the proposed rule change is designed to accomplish these ends by permitting only arbitrators to issue subpoenas and by making the arbitration subpoena process more orderly and efficient.

Accelerated Approval of Amendment No. 5

The Commission finds good cause for approving Amendment No. 5 to the proposed rule change prior to the thirtieth day after the amendment is published for comment in the **Federal Register** pursuant to section 19(b)(2) of the Act. Amendment No. 5 clarifies that calendar days, and not business days, apply to various filing deadlines under the proposed rule. The Commission anticipates that these changes will provide for greater clarity with respect to the subpoena process. Accordingly, the Commission finds that accelerated approval of Amendment No. 5 is appropriate.

VI. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act[14] that the proposed rule change, as modified by Amendment Nos. 1, 2, 3, 4, and 5, (SR–NYSE–2005–48), be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Nancy M. Morris,

Secretary.

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Rule 6.86

July 27, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 26, 2007, NYSE Arca, Inc., (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by the NYSE Arca. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which rendered the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NYSE Arca proposes to implement the Exchange's quote mitigation strategy, reflected in NYSE Arca Rule 6.86, on a permanent basis. The text of the proposed rule change is available at NYSE Arca, the Commission's Public Reference Room, and *http://nysearca.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NYSE Arca included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to implement the Exchange's quote mitigation strategy, reflected in NYSE Arca Rule 6.86, on a permanent basis. The Exchange's quote mitigation strategy, which is designed to reduce the number of quotations generated by NYSE Arca for all option issues traded on NYSE Arca, not just issues in the Penny Pilot, was previously approved by the Commission in conjunction with approval of the Penny Pilot.[5] According to that approval order, the Commission approved both the Penny Pilot and the changes to NYSE Arca Rule 6.86 for a six month period, ending July 25, 2007. The quote mitigation strategy reflected in NYSE Arca Rule 6.86 was not intended to be approved on a pilot or short term basis.[6]

2. Statutory Basis

The Exchange believes that its proposal is consistent with section 6(b) of the Act[7] in general, and furthers the objectives of section 6(b)(5) of the Act[8] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received by the Exchange.

[5] *See* Securities Exchange Act Release No. 34–55156 (January 23, 2007), 72 FR 4759 (February 1, 2007) (SR–NYSEArca–2006–73).

[6] The Exchange reported that its quote mitigation strategy has resulted in a daily mitigation savings of, on average, 13% of NYSE Arca's daily quote traffic sent to the Options Price Reporting Authority. *See* Exhibit 3 to SR–NYSEArca–2007–56, ''*Understanding Economic and Capacity Impacts of the Penny Pilot*'' (analyzing data collected during the first three months of the Penny Pilot).

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act [9] and Rule 19b–4(f)(6) thereunder,[10] because the foregoing proposed rule does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.

A proposed rule change filed under Rule 19b–4(f)(6) normally may not become operative prior to 30-days after the date of filing.[11] However, Rule 19b–4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest.[12] The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver will ensure continuity of the Exchange's rules and will allow the Exchange's quote mitigation strategy to remain in effect without interruption. For these reasons, the Commission designates the proposal to be operative upon filing with the Commission.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[14]

[9] 15 U.S.C. 78s(b)(3)(A).

[10] 17 CFR 240.19b–4(f)(6).

[11] 17 CFR 240.19b–4(f)(6)(iii). In addition, Rule 19b–4(f)(6)(iii) requires the self-regulatory organization to give the Commission notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange provided written notice of its intent to file the proposed rule change on July 24, 2007. The Commission deems this to satisfy the pre-filing requirement.

[12] 17 CFR 240.19b–4(f)(6)(iii).

[13] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[14] *See* 15 U.S.C. 78s(b)(3)(C).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSE Arca–2007–71 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F. Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2007–71. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F. Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the NYSE Arca. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2007–71 and should be submitted on or before August 23, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Nancy M. Morris,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56150; File No. SR–NYSEArca–2007–56]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change as Modified by Amendment Nos. 1 and 2 thereto Relating to NYSE Arca Rule 6.72 and the Penny Pilot for Options Trading

July 26, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 18, 2007, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by NYSE Arca. On July 23, 2007, the Exchange filed Amendment No. 1 to the proposed rule change.[3] The Exchange filed Amendment No. 2 to the proposal on July 25, 2007. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to section 19(b)(3)(A) of the Act [4] and Rule 19b–4(f)(6) thereunder,[5] which rendered the proposal effective upon filing with the Commission.[6] The Commission is publishing this notice to solicit comments on the proposed rule change, as amended, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NYSE Arca proposes to amend its option trading rules in order to extend the Penny Pilot in options classes in certain issues (''Pilot Program'') previously approved by the Commission through September 27, 2007. The text of the proposed rule change is available on NYSE Arca's Web site at *http://www.nysearca.com,* at the Exchange's

[15] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Amendment No. 1 superseded and replaced the original filing in its entirety.

[5] 17 CFR 240.19b–4(f)(6).

[6] *See* Amendment No. 1.

Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to extend the time period of the Pilot Program [7] through September 27, 2007. The Exchange believes the benefits to public customers and other market participants who will be able to express their true prices to buy and sell options have been demonstrated to outweigh the increase in quote traffic. The Exchange previously filed with the Commission its economic and capacity analysis of the Pilot Program.[8] The Exchange attached its report as Exhibit 3 to the proposed rule change. The report assessed, among other things, the impact of the Pilot Program upon quote rates, effective spreads, quoted spreads, available liquidity, data mitigation, and volume changes.

According to the Exchange, the results detailed in the report indicate that the pre-pilot capacity fears were unfounded and unrealized and the pre-pilot predictions of spread compression were justified—much to the benefit of investors. The Exchange believes that these results strongly support the extension of the Pilot Program.

The Exchange, pursuant to discussions with Commission staff, intends to file a separate request to further extend and expand the Pilot Program, prior to September 27, 2007.

The Exchange agrees to submit a report to the Commission that includes data and written analysis of information collected from May 1, 2007 through September 27, 2007. This report will include, but is not limited to: (1) Data and written analysis on the number of quotations generated for options selected for the Pilot Program; (2) an assessment of the quotation spreads for the options selected for the Pilot Program; (3) an assessment of the impact of the Pilot Program on the capacity of the NYSE Arca's automated systems; (4) any capacity problems or other problems that arose related to the operation of the Pilot Program and how the Exchange addressed them; and (5) an assessment of trade through complaints that were sent by the Exchange during the operation of the Pilot Program and how they were addressed.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with Section 6(b) of the Act [9] in general, and furthers the objectives of section 6(b)(5) of the Act,[10] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

On July 20, 2007, Citadel submitted a comment letter to the Commission in response to the Exchange's original filing regarding the Penny Pilot (SR–NYSEArca–2007–56).[11] No other written comments were solicited or received by the Exchange.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act [12] and Rule 19b–4(f)(6) thereunder,[13] because the foregoing proposed rule does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.[14]

A proposed rule change filed under Rule 19b–4(f)(6) normally may not become operative prior to 30-days after the date of filing.[15] However, Rule 19b–4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest.[16] The Exchange has requested that the Commission waive the 5-day pre-filing requirement and the 30-day operative delay. The Commission believes that waiving the 5-day pre-filing requirement and the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver will ensure continuity of the Exchange's rules and will allow the Penny Pilot Program to remain in effect without interruption. For these reasons, the Commission designates the proposal to be operative upon filing with the Commission.[17]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[18]

[8] *See* Exhibit 3 to proposed rule change, *''Understanding Economic and Capacity Impacts of the Penny Pilot''* previously submitted to the Commission by NYSE Arca on May 31, 2007.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] The Exchange subsequently filed Amendment No. 1, which superseded and replaced the original filing in its entirety. Amendment No. 1 changed the original scope of the proposed extension and expansion considerably. As a result, the Exchange believes that Citadel's comments are no longer applicable.

[12] 15 U.S.C. 78s(b)(3)(A).

[13] 17 CFR 240.19b–4(f)(6).

[14] The Commission notes that the effective date of the proposed rule change is July 23, 2007, the date on which Amendment No. 1 was filed.

[15] 17 CFR 240.19b–4(f)(6)(iii). In addition, Rule 19b–4(f)(6)(iii) requires the self-regulatory organization to give the Commission notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

[16] 17 CFR 240.19b–4(f)(6)(iii).

[17] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[18] For purposes of calculating the 60-day period within which the Commission may summarily abrogate the proposed rule change under Section

Continued

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change, as amended, is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2007–56 on the subject line.

Paper Comments

• Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2007–56. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the NYSE Arca. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2007–56 and should be submitted on or before August 23, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[19]

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for Public Assistance Only for the State of Oklahoma (FEMA–1707–DR), dated 06/07/2007.

Incident: Severe Storms, Tornadoes, and Flooding.

Incident Period: 05/04/2007 through 05/11/2007.

Effective Date: 07/23/2007.

Physical Loan Application Deadline Date: 08/06/2007.

ADDRESSES: Submit Completed Loan Applications To: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street, SW., Suite 6050, Washington, DC 20416.

SUPPLEMENTARY INFORMATION: The notice of the President's major disaster declaration for Private Non-Profit organizations in the State of Oklahoma, dated 06/07/2007, is hereby amended to include the following areas as adversely affected by the disaster.

Primary Counties:

Canadian: Cotton, Grady, Grant, Hughes, Logan, McClain, McIntosh, Pawnee, Tillman.

All other information in the original declaration remains unchanged.

(Catalog of Federal Domestic Assistance Number 59008)

Herbert L. Mitchell,

Associate Administrator for Disaster Assistance.

SMALL BUSINESS ADMINISTRATION

Disaster Declaration #10919 and #10920; Texas Disaster Number TX–00254

AGENCY: Small Business Administration.

ACTION: Amendment 3.

SUMMARY: This is an amendment of the Presidential declaration of a major disaster for the State of Texas (FEMA—1709—DR) , dated 06/29/2007.

Incident: Severe Storms, Tornadoes, and Flooding.

Incident Period: 06/16/2007 and continuing.

Effective Date: 07/25/2007.

Physical Loan Application Deadline Date: 08/28/2007.

EIDL Loan Application Deadline Date: 03/31/2008.

ADDRESSES: Submit Completed Loan Applications To: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street, SW., Suite 6050, Washington, DC 20416.

SUPPLEMENTARY INFORMATION: The notice of the Presidential disaster declaration for the State of Texas, dated 06/29/2007 is hereby amended to include the following areas as adversely affected by the disaster:

Primary Counties:

Brown, Cherokee, Comanche, Hamilton, Llano, Runnels, Smith, and Travis.

Contiguous Counties:

Texas, Anderson, Angelina, Caldwell, Coke, Coleman, Concho, Gillespie, Gregg, Hays, Henderson, Houston, Mason, Mcculloch, Nacogdoches, Nolan, Rusk , Taylor, Tom Green, Upshur, Van Zandt, and Wood.

All other information in the original declaration remains unchanged.

(Catalog of Federal Domestic Assistance Numbers 59002 and 59008)

Herbert L. Mitchell,

Associate Administrator for Disaster Assistance.

DEPARTMENT OF STATE

[Public Notice 5872]

Culturally Significant Objects Imported for Exhibition Determinations: ''Taddeo and Federico Zuccaro''

SUMMARY: Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.*; 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236 of October 19, 1999, as amended, and Delegation of Authority No. 257 of April 15, 2003 [68 FR 19875], I hereby determine that the objects to be included in the exhibition ''Taddeo and Federico Zuccaro,'' imported from abroad for temporary exhibition within the United States, are of cultural significance. The objects are imported pursuant to loan agreements with the foreign owners or custodians. I also determine that the exhibition or display of the exhibit objects at the J. Paul Getty Museum, from on or about October 2, 2007, until on or about January 6, 2008, and at possible additional venues yet to be determined, is in the national interest. Public Notice of these Determinations is ordered to be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: For further information, including a list of the exhibit objects, contact Richard Lahne, Attorney-Adviser, Office of the Legal Adviser, U.S. Department of State (telephone: 202/453–8058). The address is U.S. Department of State, SA–44, 301 4th Street, SW., Room 700, Washington, DC 20547–0001.

Dated: July 25, 2007.

C. Miller Crouch,

Principal Deputy Assistant Secretary for Educational and Cultural Affairs, Department of State.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Release Certain Properties From All Terms, Conditions, Reservations and Restrictions of a Quitclaim Deed Agreement Between the City of Orlando and the Federal Aviation Administration for the Orlando Executive Airport, Orlando, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Request for public comment.

SUMMARY: The FAA hereby provides notice of intent to release certain airport properties, 5.958 acres at the Orlando Executive Airport, Orlando, FL from the conditions, reservations, and restrictions as contained in a Quitclaim Deed agreement between the FAA and the City of Orlando, dated August 9, 1961. The release of property will allow the City of Orlando to dispose of the property for other than aeronautical purposes. The property is located in a portion of the Southwest ¼ of Section 28, Township 22 South, Range 30 East, Orange County, Florida. The parcel is currently designated as non-aeronautical use. The property will be disposed of for the purpose of constructing the Orlando-Orange County Expressway Authority Operations Center. The fair market value of the property has been determined by appraisal to be $1,557,200. The airport will receive fair market value for the property, which will be subsequently reinvested in another eligible airport improvement project.

Documents reflecting the Sponsor's request are available, by appointment only, for inspection at the Greater Orlando Aviation Authority and the FAA Airports District Office.

SUPPLEMENTARY INFORMATION: Section 125 of The Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR–21) requires the FAA to provide an opportunity for public notice and comment prior to the ''waiver'' or ''modification'' of a sponsor's Federal obligation to use certain airport land for non-aeronautical purposes.

DATES: September 4, 2007.

ADDRESSES: Documents are available for review at the Greater Orlando Aviation Authority, One Airport Boulevard, Orlando, FL 32827 and the FAA Airports District Office, 5950 Hazeltine National Drive, Suite 400, Orlando, FL 32822. Written comments on the Sponsor's request must be delivered or mailed to: Juan C. Brown, Program Manager, Orlando Airports District Office, 5950 Hazeltine National Drive, Suite 400, Orlando, FL 32822–5024.

FOR FURTHER INFORMATION CONTACT: Juan C. Brown, Program Manager, Orlando Airport District Office, 5950 Hazeltine National Drive, Suite 400, Orlando, FL 32822–5024.

W. Dean Stringer,

Manager, Orlando Airports District Office, Southern Region.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 35063]

Michigan Central Railway, LLC—Acquisition and Operation Exemption—Lines of Norfolk Southern Railway Company

AGENCY: Surface Transportation Board.

ACTION: Notice of commencement of proceeding, revocation of exemption, and issuance of procedural schedule.

SUMMARY: By this decision and notice, the Board is commencing a proceeding under 49 U.S.C. 10502(b) and 49 CFR 1121.1 to consider the petition of Michigan Central Railway, LLC (MCR) to exempt its acquisition and operation of certain railroad lines of the Norfolk Southern Railway Company (NSR) in Michigan and Indiana. To allow this proceeding to go forward, we are granting MCR's petition to revoke the application of the class exemption, which would otherwise apply to this transaction. Our revocation of the class exemption as to this transaction will allow us to consider the transaction in greater detail than it could be considered under our regulations for processing notices invoking the class exemption, and it will facilitate the participation of interested persons pursuant to the procedural schedule we are adopting.

DATES: Comments on MCR's petition for exemption may be filed by any interested person by September 4, 2007. Replies by MCR and NSR are due by September 17, 2007. The Board will issue its final decision on October 11, 2007.

ADDRESSES: Any filing submitted in this proceeding must refer to STB Finance Docket No. 35063 and may be submitted either via the Board's e-filing format or in the traditional paper format. Any person using e-filing must attach a document and otherwise comply with the instructions found on the Board's ''*http://www.stb.dot.gov.*'' Web site, at the ''E-FILING'' link. Any person submitting a filing in the traditional paper format must submit an original and 10 paper copies of the filing (and also an electronic version) to: Surface Transportation Board, 395 E. Street, SW., Washington, DC 20423–0001. In addition, one copy of each filing in this proceeding must be sent (and may be sent by e-mail only if service by e-mail is acceptable to the recipient) to: Karl Morell, Of Counsel, Ball Janik, LLP, Suite 225, 1455 F. Street, NW., Washington, DC 20005; and G. Paul Moates, Sidley & Austin LLP 1501 K. Street, NW., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 245–0395. [Federal Information Relay Service (FIRS) for the hearing impaired: 1–800–877–8339.]

SUPPLEMENTARY INFORMATION: By petition filed on July 13, 2007, in STB Finance Docket No. 35063, MCR requests, pursuant to 49 U.S.C. 10502, an exemption under the Board's formal (case-by-case) exemption procedures at 49 CFR 1121.1 to authorize it to acquire some 299 miles of rail line from NSR,[1] to acquire through assignment from NSR some 85.5 miles of existing trackage rights [2] and lease rights,[3] and to acquire yards and stations that are related to this track.[4] A map of the area to be served by MCR appears in Exhibit 1 attached to its petition for exemption.

If MCR becomes a carrier pursuant to the exemption sought here, it will grant limited local trackage rights to NSR, approval for which is being sought in a notice of exemption filed in a related proceeding.[5] If the proposed transaction is consummated, MCR would become a Class II rail carrier and would hire approximately 118 employees to operate these rail lines. Under that trackage rights agreement, NSR will retain the right to serve, under certain specified conditions, the General Motors facilities at Grand Rapids and Lansing, MI, and the RSOC of Michigan LLC automotive steel processing facility at Holt, MI, as well as any subsequent occupant(s) of any of these facilities.

In another related proceeding, Watco Companies, Inc. and its wholly owned subsidiary, Watco Transportation Services, Inc. (collectively, Watco), have filed a notice of exemption to continue in control of MCR upon MCR's becoming a rail carrier through its proposed acquisition and operation of these rail lines.[6] NSR will contribute these rail lines, trackage rights, and related assets to MCR, subject to certain traffic restrictions, in exchange for a noncontrolling 33% membership interest in MCR. Watco will contribute

[1] The NSR rail lines run generally between Elkhart, IN and Grand Rapids, MI; between Kalamazoo, MI, and a point near Ypsilanti, MI; and between Jackson, MI, and Lansing, MI. More specifically, the rail lines to be acquired run between the following mileposts: Milepost KH 1.4 at Elkhart, IN, and milepost KH 27.4 at Three Rivers, MI; milepost FB 27.3 at Three Rivers and milepost FB 102.3 at Grand Rapids, MI; milepost MH 143.03 at CP BO in Kalamazoo, MI, and milepost MH 28 at CP Ypsi; and milepost LZ 0.0 at Jackson, MI, and milepost LZ 36.9 at Lansing, MI.

[2] MCR will acquire through assignment by NSR 80 miles of trackage rights over the line of the National Railroad Passenger Corporation (Amtrak) between milepost MH 143.3 near Kalamazoo, MI, and milepost MH 222.8 at the Michigan/Indiana border (east of Michigan City, IN). Additionally, MCR will exercise NSR's trackage rights over lines of CSX Transportation, Inc. (CSXT) between: mileposts 0.0–1.0 M9 in Grand Rapids, MI; and mileposts LZ 36.8–37.9 and 0.0–2.2 HZ in Lansing, MI. MCR will also exercise NSR's trackage rights over a Canadian National Railway Company (CN) line between mileposts 176.7–175.5 in Battle Creek, MI. MCR will host trackage rights to CSXT for a short stretch of track between mileposts LZ 36.8–37.9 in Lansing, MI. Finally MCR will host trackage rights for CN between mileposts UP 2.2–UP 0.0, KY 0.0–KY 0.4, and FB 54.0–FB 56.3 in Kalamazoo, MI.

[3] Specifically, MCR will become lessor of the rail line leased to CN between Kalamazoo (MP 9.51) and Pavilion (MP 0.4).

[4] MCR plans to acquire and to operate NSR yards at: Kalamazoo, MI (Botsford); Grand Rapids, MI (Hughart); Jackson, MI; Lansing, MI (Saginaw); and Battle Creek (Hinman), MI.

[5] *See* NSR's notice invoking the class exemption at 49 CFR 1180.2(d)(7), currently filed on July 13, 2007, in *Norfolk Southern Railway Company—Trackage Rights Exemption—Michigan Central Railway, LLC,* STB Finance Docket No. 35065 (STB served July 27, 2007).

[6] *See* Watco's notice invoking the class exemption at 49 CFR 1180.2(d), concurrently filed on July 13, 2007, in *Watco Companies, Inc., and Watco Transportation Services, Inc.—Continuance in Control Exemption—Michigan Central Railway, LLC,* STB Finance Docket No. 35064 (STB served July 27, 2007).

$18 million in cash and locomotives over time to MCR in exchange for a controlling 67% membership interest. According to MCR, it will invest more than $20 million in these lines over the first 3 years, provide responsive service to local shippers, and develop a new traffic base. MCR states that there will be no adverse effect on overhead traffic and that no shipper will suffer a reduction in competition as a result of the proposed transaction.

MCR simultaneously filed a petition asking the Board to revoke the class exemption at 49 CFR 1150.31 that otherwise would apply to allow the agency to consider the transaction in greater detail than it could be considered under the regulations for processing notices invoking the class exemption. Under 49 U.S.C. 10502(d), the Board may revoke an exemption when it finds that application of regulation is necessary to carry out the Rail Transportation Policy of 49 U.S.C. 10101. We make such a finding here based on the particular circumstances of this transaction. Thus, the class exemption at 49 CFR 1150.31 will be revoked as to this transaction to permit MCR to proceed with seeking Board approval for the transaction through its petition for exemption.

As part of its revocation petition, MCR also has proposed a procedural schedule providing for comments from interested persons 50 days from the date MCR filed its petition, replies by MCR and NSR 65 days from the date the petition was filed, and a final Board decision by 90 days from the date the petition was filed. The proposed schedule will facilitate the participation of interested persons in this proceeding and will provide a timely process for our issuing a final decision. Accordingly, we will adopt the proposed procedural schedule.

MCR's petition for exemption raises issues that require consideration by the Board. Pursuant to 49 U.S.C. 10502(b), the Board must determine whether to begin a proceeding within 90 days of the filing of a petition for exemption. A decision must then be issued within 9 months of the date when the proceeding is formally instituted. The 90th day in this proceeding is October 11, 2007. In compliance with the statute, this order will be issued, and a proceeding will be formally instituted. The deadlines for the submission of comments are set forth above.

Board decisions, notices, and filings are available on its Web site at *http://www.stb.dot.gov.*

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is Ordered

1. MCR's petition to revoke the class exemption is granted.

2. Under 49 U.S.C. 10502(b) a proceeding is commenced to hear MCR's petition for exemption under the formal (case-by-case) exemption procedures at 49 CFR 1121.1, and comments in this proceeding will be due by the dates set forth above.

3. This decision will be published in the **Federal Register** on August 2, 2007.

4. This decision is effective on August 2, 2007.

Decided: July 30, 2007.

By the Board, Chairman Nottingham, Vice Chairman Buttrey, and Commissioner Mulvey.

Vernon Williams,

Secretary.

Medicare Program; Revised Payment System Policies for Services Furnished in Ambulatory Surgical Centers (ASCs) Beginning in CY 2008

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: This final rule revises the Medicare ambulatory surgical center (ASC) payment system to implement certain related provisions of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA). This final rule establishes the ASC list of covered surgical procedures, identifies covered ancillary services under the revised ASC payment system, and sets forth the amounts and factors that will be used to determine the ASC payment rates for calendar year (CY) 2008. The changes to the ASC payment system and ratesetting methodology in this final rule are applicable to services furnished on or after January 1, 2008.

DATES: *Effective Date:* This final rule is effective on January 1, 2008.

Table of Contents

I. Background

A. Legislative and Regulatory History

Section 1832(a)(2)(F)(i) of the Social Security Act (the Act) provides that benefits under the Medicare Supplementary Medical Insurance program (Part B) include payment for facility services furnished in connection with surgical procedures specified by the Secretary that are performed in an ambulatory surgical center (ASC). To participate in the Medicare program as an ASC, a facility must meet the standards specified in section 1832(a)(2)(F)(i) of the Act, which are implemented in 42 CFR Part 416, Subpart B and Subpart C of our regulations. The regulations at 42 CFR 416, Subpart B set forth general conditions and requirements for ASCs, and the regulations at Subpart C provide specific conditions for coverage for ASCs.

The ASC services benefit was enacted by Congress through the Omnibus Reconciliation Act of 1980 (Pub. L. 96–499). For a detailed discussion of the legislative history related to ASCs, we refer readers to the June 12, 1998 proposed rule (63 FR 32291).

Section 1833(i)(1)(A) of the Act requires the Secretary to specify surgical procedures that, although appropriately performed in an inpatient hospital setting, also can be performed safely on an ambulatory basis in an ASC, critical access hospital (CAH), or a hospital outpatient department (HOPD). The report accompanying the legislation explained that Congress intended procedures currently performed on an ambulatory basis in a physician's office that do not generally require the more elaborate facilities of an ASC not be included in the list of ASC covered procedures (H.R. Rep. No. 96–1167, at 390–91, reprinted in 1980 U.S.C.C.A.N. 5526, 5753–54). In a final rule published on August 5, 1982, in the **Federal Register** (47 FR 34082), we established regulations that included criteria for specifying which surgical procedures were to be included for purposes of implementing the ASC facility benefit. Medicare only allows payment to ASCs for procedures that are specified on the ASC list.

Section 626(b) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, Public Law 108–173, repealed the requirement formerly found in section 1833(i)(2)(A) of the Act that the Secretary conduct a survey of ASC costs for purposes of updating ASC payment rates and, instead, requires the Secretary to implement a revised ASC payment system, to be effective not later than January 1, 2008. Section 5103 of the Deficit Reduction Act of 2005 (DRA), Public Law 109–171, amended section 1833(i)(2) of the Act by adding a new subparagraph (E) to place a limitation on payments for surgical procedures in ASCs. Section 1833(i)(2) of the Act provides that if the standard overhead amount under section 1833(i)(2)(A) of the Act for a facility service for such procedure, without application of any geographic adjustment, exceeds the Medicare payment amount under the hospital outpatient prospective payment system (OPPS) for the service for that year, without application of any geographic adjustment, the Secretary shall substitute the OPPS payment amount for the ASC standard overhead amount. This provision applies to surgical procedures furnished in ASCs on or after January 1, 2007, and before the effective date of the revised ASC payment system implemented in this final rule.

In the November 24, 2006 final rule with comment period for the CY 2007 OPPS and ASC payment systems (71 FR 67960), we addressed the changes in payment to ASCs mandated by section 5103 of Public Law 109–171 and finalized § 416.1(a)(5) of the regulations to implement this provision. (Hereinafter, the November 24, 2006 final rule with comment period is referred to as the CY 2007 OPPS/ASC final rule with comment period.) We also addressed additions to and deletions from the ASC list of covered surgical procedures that were implemented on January 1, 2007. In addition, we made changes in the process to review payment adjustments for insertion of new technology intraocular lenses (NTIOLs) under section 1833(i)(2)(A)(iii) of the Act.

Section 416.65(a) of the regulations specifies general standards for procedures on the ASC list. ASC procedures are those surgical and other medical procedures that are—

- Commonly performed on an inpatient basis but may be safely performed in an ASC;
- Not of a type that are commonly performed or that may be safely performed in physicians' offices;
- Limited to procedures requiring a dedicated operating room or suite and generally requiring a postoperative recovery room or short-term (not overnight) convalescent room; and
- Not otherwise excluded from Medicare coverage.

Specific standards in § 416.65(b) limit covered ASC procedures to those that do not generally exceed 90 minutes operating time and a total of 4 hours recovery or convalescent time. If

anesthesia is required, the anesthesia must be local or regional anesthesia, or general anesthesia of not more than 90 minutes duration.

Section 416.65(b)(3) of the regulations excludes from the ASC list procedures that generally result in extensive blood loss, that require major or prolonged invasion of body cavities, that directly involve major blood vessels, or that are generally emergency or life-threatening in nature.

A detailed history of published changes to the ASC list and ASC payment rates can be found in the June 12, 1998 proposed rule (63 FR 32291). Subsequently, in accordance with § 416.65(c), we published updates of the ASC list in the **Federal Register** on March 28, 2003 (68 FR 15268), May 4, 2005 (70 FR 23690), and in the CY 2007 OPPS/ASC final rule with comment period (71 FR 67960).

During years when we have not updated the ASC list in the **Federal Register**, we have revised the list to be consistent with annual calendar year changes to the Healthcare Common Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes. These annual coding updates have been implemented through program instructions to the carriers that process ASC claims. (We note that Medicare Part B carriers are transitioning to Medicare Administrative Contractors (MACs) through 2011, as described in a final rule with comment period published in the **Federal Register** on November 24, 2006 (71 FR 68229).) We last issued program instructions to update the list only to conform to CPT and HCPCS coding changes on December 20, 2006, via Transmittal 1134, Change Request 5211. This transmittal can be found on the CMS Web site at: *http://www.cms.hhs.gov/Transmittals/*).

B. ASC Payment Method

On August 23, 2006, we proposed in the **Federal Register** (71 FR 49635) a revised payment system for ASCs to be implemented effective January 1, 2008, in accordance with section 626(b) of Public Law 108–173, including revisions to the ratesetting methodology and the applicable ASC regulations to incorporate the requirements and payments for ASC services under the revised ASC payment system. We also proposed a new ''exclusionary'' approach for revising the ASC list of covered surgical procedures beginning CY 2008. We proposed to evaluate surgical procedures to identify those that could pose a significant safety risk or that would be expected to require an overnight stay when performed in ASCs, and that would, therefore, be excluded from Medicare payment under the revised ASC payment system. Using that exclusionary method, we developed a list of surgical procedures that we believed were safe for Medicare beneficiaries in ASCs and that were appropriate for Medicare payment. We proposed to adopt an exclusionary approach for identifying surgical procedures that were appropriate for payment under the revised ASC payment system, and the result of that process was a proposed list of surgical procedures for which separate payment would be made. We refer to that list of payable procedures hereinafter as the ASC ''list of covered surgical procedures.''

There are two primary elements in the total cost of performing a surgical procedure: (a) The cost of the physician's professional services to perform the procedure; and (b) the cost of items and services furnished by the facility where the procedure is performed (for example, surgical supplies, equipment, and nursing services). Payment for the first element is made under the Medicare Physician Fee Schedule (MPFS). The August 2006 OPPS/ASC proposed rule addressed the second element, payment for the cost of items and services furnished by the facility.

Under the current ASC payment system, the ASC payment rate is a standard overhead amount established on the basis of our estimate of a fee that takes into account the costs incurred by ASCs generally in providing facility services in connection with performing a specific procedure. The report of the Conference Committee accompanying section 934 of the Omnibus Reconciliation Act of 1980 states that this overhead amount is expected to be calculated on a prospective basis using sample survey data and similar techniques to establish reasonable estimated overhead allowances, which take into account volume (within reasonable limits), for each of the listed procedures (H.R. Rept. No. 96–1479, at 134–35 (1980)).

As stated earlier, to establish those reasonable estimated allowances for services furnished prior to implementation of the revised ASC payment system, section 626(b)(1) of Public Law 108–73 amended section 1833(i)(2)(A)(i) of the Act that required us to take into account the audited costs incurred by ASCs to perform a procedure in accordance with a survey. Further, beginning January 1, 2007, and prior to implementation of a revised ASC payment system, in accordance with section 5103 of Pub. L. 109–171, no ASC standard overhead amount may be greater than the OPPS payment rate for a given service for that year. Except for screening colonoscopies and flexible sigmoidoscopies, payment for ASC services is subject to the usual Medicare Part B deductible and coinsurance requirements, and the amounts paid by Medicare must be 80 percent of the standard overhead amount. As required by section 1834(d) of the Act and implemented in regulations at 42 CFR 410.152(i), the amount paid by Medicare must be 75 percent of the fee schedule payment amount for screening colonoscopies and flexible sigmoidoscopies.

Section 1833(i)(1) of the Act requires us to specify, in consultation with appropriate medical organizations, surgical procedures that are appropriately performed on an inpatient basis in a hospital but that can be safely performed in an ASC, a CAH, or an HOPD and to review and update the list of ASC procedures at least every 2 years.

Section 141(b) of the Social Security Act Amendments of 1994, Public Law 103–432, requires us to establish a process for reviewing the appropriateness of the payment amount provided under section 1833(i)(2)(A)(iii) of the Act for intraocular lenses (IOLs) that belong to a class of NTIOLs. That process was the subject of a separate final rule entitled ''Adjustment in Payment Amounts for New Technology Intraocular Lenses Furnished by Ambulatory Surgical Centers,'' published on June 16, 1999, in the **Federal Register** (64 FR 32198). We proposed changes to the NTIOL request for review process in the CY 2007 OPPS/ASC proposed rule published in the **Federal Register** on August 23, 2006 (71 FR 49631 through 49635) and finalized changes to that process in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68175 through 68181).

C. Provisions of Public Law 108–173 (MMA)

Section 626(a) of Public Law 108–173 (MMA) amended section 1833(i)(2)(C) of the Act, which requires the Secretary to update ASC payment rates using the Consumer Price Index for All Urban Consumers (CPI–U) (U.S. city average) if the Secretary has not otherwise updated the amounts under the revised ASC payment system. As amended by Pub. L. 108–173, section 1833(i)(2)(C) of the Act requires that, if the Secretary is required to apply the CPI–U increase, the CPI–U percentage increase is to be applied on a fiscal year (FY) basis beginning with FY 1986 through FY 2005 and on a

calendar year (CY) basis beginning with CY 2006.

Section 626(a) of Public Law 108–173 further amended section 1833(i)(2)(C) of the Act to require us in FY 2004, beginning April 1, 2004, to increase the ASC payment rates using the CPI–U as estimated for the 12-month period ending March 31, 2003, minus 3.0 percentage points. Section 626(a) of Public Law 108–173 also requires that the CPI–U adjustment factor equal zero percent in FY 2005, the last quarter of CY 2005, and each calendar year from CY 2006 through CY 2009.

Section 626(b) of Public Law 108–173 repealed the requirement that CMS conduct a survey of ASC costs upon which to base a standard overhead payment amount for surgical services performed in ASCs, and added section 1833(i)(2)(D) of the Act. Section 1833(i)(2)(D)(iii) of the Act requires us to implement by no earlier than January 1, 2006, and not later than January 1, 2008, a revised ASC payment system. The revised payment system under section 1833(i)(2)(D)(i) of the Act is to take into account the recommendations contained in a Report to Congress that the Government Accountability Office (GAO) was required to submit by January 1, 2005. Section 1833(i)(2)(D)(ii) of the Act requires that the revised ASC payment system be designed to result in the same aggregate amount of expenditures for surgical services furnished in ASCs the year the system is implemented as would be made if the new system did not apply as estimated by the Secretary. This requirement is to take into account the limitation in ASC expenditures resulting from implementation of section 5103 of Public Law 109–171 beginning January 1, 2007, as we described in sections XVII.A.1. and XVII.E. of the preamble to the CY 2007 OPPS/ASC final rule with comment period (71 FR 68165 and 68174, respectively).

Section 1833(i)(2)(D)(iv) of the Act exempts the classification system, relative weights, payment amounts, and geographic adjustment factor (if any) under the revised ASC payment system from administrative and judicial review.

Section 626(c) of Public Law 108–173 added a conforming amendment to section 1833(a)(1) of the Act, which provides that the amounts paid under the revised ASC payment system shall equal 80 percent of the lesser of the actual charge for the services or the payment amount that we determine under the revised ASC payment system.

D. Issuance of Proposed Rule

As stated earlier, in the August 23, 2006 **Federal Register** (71 FR 49635), we proposed to implement revisions to the ASC payment system so that the revised system is first effective on January 1, 2008.

In addition, we set forth an analysis of the impact that the proposed revised ASC payment system would have on affected entities and Medicare beneficiaries.

We received over 8,900 pieces of correspondence in response to our August 23, 2006 proposal for the revised ASC payment system, which included some comments recommending various changes to how CMS pays for ASC services and processes ASC claims that we did not propose in the August 23, 2006 **Federal Register**. While we read those comments with interest, we generally do not address them, nor have we made any changes in this final rule based on them. We summarize the numerous comments and recommendations that are pertinent to what we proposed, and we respond to them in the appropriate sections of this final rule.

E. Changes to the ASC List for CY 2007

As part of the CY 2007 OPPS/ASC final rule with comment period, we finalized additions to and deletions from the ASC list of covered surgical procedures, effective January 1, 2007 (71 FR 68166). We did not change the criteria for adding or deleting items from the ASC list effective January 1, 2007. However, in the August 2006 proposed rule (71 FR 49628), we discussed changes to the criteria in the context of developing the proposed revised ASC payment system to be effective January 1, 2008. The changes to the criteria that we proposed resulted in the proposed addition for CY 2008 of many procedures that do not meet the current criteria for addition to the list.

II. Revisions to the ASC Payment System Effective January 1, 2008

A. General

As we discussed earlier, generally, there are two primary elements in the total cost of performing a surgical procedure: (a) The cost of the physician's professional services for performing the procedure; and (b) the cost of services furnished by the facility where the procedure is performed (for example, surgical supplies, equipment, nursing services, and overhead). The former is covered by the MPFS. The latter is covered by a Medicare benefit enacted in 1980 that authorized payment of a fee to ASCs for services furnished in connection with performing certain surgical procedures.

Section 1833(i)(1) of the Act requires us to specify surgical procedures that are appropriately and safely performed on an ambulatory basis in an ASC. Moreover, we are required to review and update the list of these procedures not less often than every 2 years, in consultation with appropriate trade and professional associations. The ASC list of covered surgical procedures was limited in 1982 to approximately 100 procedures. Currently, the list consists of more than 2,500 CPT codes encompassing a cross-section of surgical services, although 150 of these codes account for more than 90 percent of the approximately 4.5 million procedures paid for each year under the ASC Part B benefit. Eye, pain management, and gastrointestinal endoscopic procedures are the highest volume ASC surgeries performed under the present ASC payment system.

In CY 2007, Medicare only allows payment to ASCs for procedures on the ASC list of covered surgical procedures. Except for screening colonoscopy services, payment for ASC facility services is subject to the usual Medicare Part B deductible and coinsurance requirements, and the amounts paid by Medicare must be 80 percent of the standard overhead amount. As discussed earlier, under section 626(b) of Public Law 108–173, Congress mandated implementation of a revised payment system for ASC surgical services by no later than January 1, 2008. Public Law 108–173 set forth several requirements for the revised payment system, but did not amend those provisions of the statute pertaining to the ASC list.

As we proposed in the August 2006 proposed rule (71 FR 49635), in this final rule, we address two components of the ASC payment system that will go into effect January 1, 2008. First, we are establishing the ASC list of covered surgical procedures for which an ASC may receive Medicare payment for facility services under the revised ASC payment system, as well as those covered ancillary services that may be separately paid if they are provided integral to a covered surgical procedure. Second, we are specifying the method we will use to set payment rates for ASC services furnished in association with covered surgical procedures. In this final rule, we also specify the regulatory changes that we are making to 42 CFR Parts 410 and 416 to incorporate the rules governing ASC payments that will be applicable beginning in CY 2008.

B. Factors Considered in the Development of the Revised ASC Payment System

On August 2, 2005, we convened a listening session teleconference on revising the Medicare ASC payment system. Over 450 callers participated, including ASC staff, physicians, and representatives of industry trade associations. The listening session provided an opportunity for participants to identify the issues and concerns that they wanted us to address as we developed the revised ASC payment system.

Callers encouraged us to foster beneficiary access to ASCs by creating incentives for physicians to use ASCs. The issues raised by participants included suggestions to expand or eliminate altogether the ASC list, recommendations to model payment on the OPPS, and concerns about how we would propose to treat the geographic wage index adjustment and the annual ASC payment rate update. Several callers also raised concerns about ensuring adequate payment for supplies, ancillary services, and implantable devices under the revised payment system, as well as developing a process to allow special payment for new technology.

We also met with representatives of the ASC industry over the past several years to discuss options for ratesetting other than conducting a survey, to discuss timely updates to the ASC list, and to listen to industry concerns related to the implementation of a revised payment system. We appreciate the thoughtful suggestions that were presented. We considered the concerns and issues brought to our attention, the proposals for revising the ASC list of covered surgical procedures, and the suggested methods by which we could set ASC payment rates in developing the policies in this final rule.

In the August 23, 2006 **Federal Register** (71 FR 49506), we proposed the policies for the revised ASC payment system to be effective beginning in CY 2008. In response to those proposed policies, we received over 8,900 pieces of correspondence from the public that we are addressing in this final rule.

Subsequent to publication of the August 2006 proposed rule for the revised ASC payment system, the GAO published the statutorily mandated report entitled, ''Medicare: Payment for Ambulatory Surgical Centers Should Be Based on the Hospital Outpatient Payment System'' (GAO–07–86) on November 30, 2006. We considered the report's methodology, findings, and recommendations in the development of this CY 2008 final rule for the revised ASC payment system. The GAO methodology, results, and recommendations are summarized below.

The GAO was directed to conduct a study comparing the relative costs of procedures furnished in ASCs to those furnished in HOPDs paid under the OPPS, including examining the accuracy of the ambulatory payment classifications (APC) with respect to surgical procedures furnished in ASCs. Section 626(d) of Pub. L. 108–173 indicated that the report should include recommendations on the following matters:

1. Appropriateness of using groups of covered services and relative weights established for the OPPS as the basis of payment for ASCs.

2. If the OPPS relative weights are appropriate for this purpose, whether the ASC payments should be based on a uniform percentage of the payment rates or weights under the OPPS, or should vary, or the weights should be revised based on specific procedures or types of services.

3. Whether a geographic adjustment should be used for ASC payment and, if so, the labor and nonlabor shares of such payment.

To compare the relative costs of procedures performed in ASCs and HOPDs, the GAO first compiled information on ASCs' costs and the surgical procedures performed. It conducted a survey of 600 randomly selected ASCs from the universe of all ASCs to obtain their CY 2004 cost and procedure data. The GAO received 397 responses from facilities and, through data reliability testing, determined that data from 290 responding facilities were sufficiently reliable and geographically representative of ASCs. Furthermore, to compare the delivery of surgical procedures and their relative costs between ASC and HOPD settings, the GAO analyzed OPPS claims data from CY 2003. It also interviewed officials at CMS, representatives from ASC industry organizations and physician specialty societies, and representatives from nine ASCs.

In order to allocate ASCs' total costs among the individual procedures they performed, the GAO developed a specific methodology to allocate the portion of an ASC's costs accounted for by each procedure. It constructed a relative weight scale for Medicare's covered ASC procedures that captured the general variation in resources associated with performing different procedures. Primarily, it used data that CMS collects for the purpose of setting the practice expense component of physician payment rates, supplemented by information from specialty societies and physicians who work for CMS for those procedures for which CMS had no data on the resources used.

To calculate per-procedure costs based upon data gathered through its survey of ASCs, the GAO deducted costs that Medicare considers unallowable, that is, advertising and entertainment costs. In addition, it also removed costs for services that Medicare pays for separately, such as physician and nonphysician practitioner services. The remaining facility costs were then divided into direct and indirect costs. The GAO defined direct costs as those associated with the clinical staff, equipment, and supplies utilized during the procedure. Indirect costs included all remaining costs. Next, to allocate each facility's direct costs across the procedures it performed, the GAO applied its relative weight scale. It allocated indirect costs equally across all procedures performed by the facility. For each procedure performed by a responding ASC facility, it summed the allocated direct and indirect costs to determine a total cost for the procedure. To obtain a per-procedure cost across all ASCs, the GAO arrayed the calculated costs for all ASCs performing that procedure and identified the median cost.

To compare per-procedure costs for ASCs and HOPDs, the GAO obtained the list of OPPS APCs and their assigned procedures, along with the OPPS median cost of each procedure and its related APC group. It then calculated a ratio between each procedure's ASC median cost as determined by the survey and the median cost of the procedure's corresponding APC group under the OPPS, referred to as the ASC-to-APC cost ratio. It calculated a corresponding ratio between each ASC procedure's median cost under the OPPS and the median cost of the procedure's APC group using CMS data, referred to as the OPPS-to-APC cost ratio. In order to evaluate the difference in procedure costs between the two settings, the GAO compared the ASC-to-APC cost ratio to the OPPS-to-APC cost ratio. Next, to assess how well the relative costs of procedures in the OPPS, defined by their assignment to APC groups, reflect the relative costs of procedures in the ASC setting, it evaluated the distribution of both the ASC-to-APC cost ratios and the OPPS-to-APC cost ratios.

The GAO also analyzed Medicare claims data for the top 20 procedures with the highest Medicare ASC claims volume in CY 2004 to examine the delivery of additional services with

surgical procedures in ASCs and HOPDs. Last, to calculate the percentage of labor-related costs among the responding ASCs, for each ASC, the GAO divided total labor costs by total costs and then determined the range of the percentage of labor-related costs among all of the ASCs between the 25th and the 75th percentile, as well as the mean and median percentage of labor-related costs.

Based on its extensive analyses, the GAO determined that the APC groups in the OPPS accurately reflect the relative costs of the procedures performed in ASCs. GAO's analysis of the cost ratios showed that the ASC-to-APC cost ratios were more tightly distributed around their median cost ratio than were the OPPS-to-APC cost ratios. These patterns demonstrated that the APC groups reflect the relative costs of procedures performed by ASCs and, therefore, that the APC groups could be used as the basis for an ASC payment system. The GAO determined, in fact, that there was less variation in the ASC setting between individual procedures' costs and the costs of their assigned APC groups than there is in the HOPD setting. It concluded that, as a group, the costs of procedures performed in ASCs have a relatively consistent relationship with the costs of the APC groups to which they would be assigned under the OPPS. The GAO's analysis also found that procedures in the ASC setting had substantially lower costs than those same procedures in the HOPD. While ASC costs for individual procedures varied, in general, the median costs for procedures were lower in ASCs, relative to the median costs of their APC groups, than the median costs for the same procedures in the HOPD setting. The median cost ratio among all ASC procedures was 0.39 (0.84 when weighted by Medicare volume based on CY 2004 claims), whereas the median cost ratio among all OPPS procedures was 1.04.

The GAO found many similarities in the additional items and services provided by ASCs and HOPDs for the top 20 ASC procedures. However, of these additional items and services, few resulted in additional payment in one setting but not the other. HOPDs were paid for some of the related services separately, while in the ASC setting, other Part B suppliers billed Medicare and received payment for many of the related services.

Finally, in its analysis of labor-related costs, the GAO determined that the mean labor-related proportion of costs was 50 percent. The range of the labor-related costs for the middle 50 percent of responding ASCs was 43 percent to 57 percent of total costs.

Based on its findings from the study, the GAO recommended that CMS implement a payment system for procedures performed in ASCs based on the OPPS, taking into account the lower relative costs of procedures performed in ASCs compared to HOPDs in determining ASC payment rates.

Comment: A number of commenters noted that, by the close of the public comment period for the August 2006 proposed rule for the revised ASC payment system, the GAO had not yet provided recommendations regarding ASC payment in a report to Congress that it was required to submit by January 1, 2005. Some commenters recommended that, although CMS was directed to take into account these recommendations in implementing the revised ASC payment system, should the GAO's recommendations be provided before publication of the final rule establishing the policies of the revised ASC payment system, CMS should not take them into consideration, given the public's inability to provide input to CMS during the comment period regarding the GAO's methodology, findings, and recommendations. Other commenters recommended that, if the GAO Report was forthcoming shortly, CMS should provide another opportunity for public comment prior to finalizing the policies of the revised ASC payment system in order to allow the public to provide CMS with their perspectives on those recommendations.

Response: As described earlier, the GAO published its report (GAO–07–86) on November 30, 2006. In accordance with section 1833(i)(2)(D)(i) of the Act, we did take into account the recommendations made in the GAO Report in developing the final policies for the revised ASC payment system. The GAO's findings and recommendations are summarized above, and its specific recommendations are further discussed in the particular sections of this final rule that address the related topics. We appreciate the public's interest in providing us with detailed input regarding the revised ASC payment system from a variety of perspectives. In regard to the commenters' recommendation for a second opportunity for public comment prior to finalizing the policies of the revised ASC payment system after the GAO Report was published, we note that the GAO's recommendations are in complete accord with our August 2006 proposal for the revised ASC payment system. Therefore, we are not providing another opportunity for public comment prior to finalizing the policies of the revised ASC payment system, because the proposed revised system is fully consistent with the recommendations of the GAO Report and we already provided a 90-day comment period regarding our proposal for CY 2008. We believe that the comment period for the August 2006 proposed rule provided the public with ample opportunity to comment on the policies that were recommended by the GAO. The considerable operational changes required to implement the revised ASC payment system necessitate significant lead time that would not be possible if we were to provide another comment period prior to finalizing the policies. We also believe that our consideration of the recent GAO study, as well as other available information regarding HOPD and ASC costs and payments, in addition to our prior discussions with stakeholders and the many public comments on the proposed rule, provide us with the necessary breadth and depth of information and viewpoints to finalize our payment policies for the revised ASC payment system in this final rule.

At its December 2006 meeting, the Practicing Physicians Advisory Council (PPAC) made two recommendations to CMS regarding the final rule for the revised ASC payment system. First, the PPAC recommended that CMS establish a process to consult with national medical specialty societies and the ASC community to develop and adopt a systematic and adaptable means of fairly reimbursing ASCs for all safe and appropriate services, allowing for changes in technology and current day practice. Second, the PPAC recommended that CMS apply any payment policies uniformly to both ASCs and HOPDs, as appropriate.

We have considered the GAO Report, in addition to the recommendations of the PPAC, all public comments received on the proposed rule, and other concerns and issues brought to our attention by interested parties over the past several years, in developing this final rule for the CY 2008 revised ASC payment system. Specific policies are discussed, comments summarized and responses provided, and policies finalized in subsequent sections of this final rule.

C. Rulemaking for the Revised ASC Payment System in CY 2008

In response to comments submitted timely regarding the proposals set forth in the proposed rule for the revised ASC payment system published on August 23, 2006, this final rule establishes the final policies and regulations of the

revised ASC payment system for initial implementation in CY 2008. All tables included in this final rule listing HCPCS codes subject to pertinent final policies of the revised ASC payment system, as well as estimated payment rates, are illustrative only, based on CY 2007 HCPCS codes and final CY 2007 OPPS and MPFS information, with application of the most current update estimates for CY 2008. The information in the Addenda to this final rule is also only illustrative, to provide examples of the results of applying the final policies of the revised ASC payment system, based on the most recent information available for CY 2007. As further discussed in sections V.E. and VI. of this final rule, we will propose the CY 2008 relative payment weights, payment amounts, specific HCPCS codes to which the final policies of the revised ASC payment system would apply, and other pertinent ratesetting information for the CY 2008 revised ASC payment system in the proposed OPPS/ASC rule to update the payment systems for CY 2008 to be issued in mid-summer of CY 2007. We will then publish final relative payment weights, payment amounts, specific CY 2008 HCPCS codes to which the final policies will apply, and other pertinent ratesetting information for the CY 2008 revised ASC payment system in the final OPPS/ASC rule to update the payment systems for CY 2008. The ASC payment system treatment of new CY 2008 HCPCS codes published in the CY 2008 OPPS/ASC final rule will provide interim determinations, open to public comment on that final rule, and we will respond to comments about those determinations in the OPPS/ASC final rule for CY 2009.

III. Covered Surgical Procedures Paid in ASCs On or After January 1, 2008

A. Payable Procedures

In its March 2004 Report to the Congress, the Medicare Payment Advisory Commission (MedPAC) recommended replacing the current ''inclusive'' list of procedures, which are the only surgical procedures for which Medicare allows payment to an ASC, with an ''exclusionary'' list. That is, rather than limiting payment to ASCs to a list of procedures that CMS specifies, Medicare would allow payment to ASCs for any surgical procedure except those that CMS explicitly excludes from payment. MedPAC further recommended that clinical safety standards and the need for an overnight stay be the only criteria for excluding a procedure from eligibility for Medicare ASC payment. MedPAC suggested that some of the criteria, such as site-of-service volume and time limits, which we have used in the past to identify procedures for the ASC list of covered surgical procedures, are probably no longer clinically relevant.

In the August 2006 proposed rule for the revised ASC payment system, we noted that we had given careful consideration to MedPAC's recommendations and participated in considerable discussion and consultation with members of ASC trade associations and physicians, who represent a variety of surgical specialties, regarding the criteria that we would use to identify procedures for payment under the revised ASC payment system. We agreed that adoption of a policy similar to that recommended by MedPAC would serve both to protect beneficiary safety and increase beneficiary access to procedures in appropriate clinical settings, recognizing the ASC industry's interest in obtaining Medicare payment for a much wider spectrum of services than is now allowed. Therefore, in the August 2006 proposed rule (71 FR 49636), we proposed that, under the revised ASC payment system for services furnished on or after January 1, 2008, Medicare would allow payment to ASCs for any surgical procedure performed in an ASC, except those surgical procedures that we determine are not payable under the ASC benefit.

Further, we proposed to establish beneficiary safety and the expected need for an overnight stay as the principal clinical considerations and decisive factors in determining whether ASC payment would be allowed for a particular surgical procedure. As discussed in section XVIII.B.2. of the preamble of the proposed rule, we also proposed to exclude from separate payment under the revised ASC payment system those surgical procedures that are on the OPPS inpatient list, that are not eligible for separate payment under the OPPS, and that are CPT surgical unlisted procedure codes.

We discuss below the criteria that we proposed as the basis for identifying procedures that would pose a significant safety risk to a Medicare beneficiary when performed in an ASC, or procedures following which we would expect a Medicare beneficiary to require overnight care.

1. Definition of Surgical Procedure

In order to delineate the scope of procedures that constitute ''outpatient surgical procedures'' in the August 2006 proposed rule, we first proposed to clarify what we considered to be a ''surgical'' procedure. Under the existing ASC payment system, we define a surgical procedure as any procedure described within the range of Category I CPT codes that the CPT Editorial Panel of the American Medical Association (AMA) defines as ''surgery'' (CPT codes 10000 through 69999). Under the revised payment system, we proposed to continue to define surgery using that standard. The CPT Editorial Panel is responsible for maintaining the CPT nomenclature, with authority to revise, update, or modify the CPT codes. A larger body of CPT advisors, the CPT Advisory Committee, supports the work of the CPT Editorial Panel. Members of the CPT Editorial Panel include individuals nominated by physician and hospital associations and insurers, providing for diverse specialty input.

In addition, in the August 2006 proposed rule for the revised ASC payment system, we proposed to include within the scope of surgical procedures payable in an ASC those procedures that are described by Level II HCPCS codes or by Category III CPT codes that directly crosswalk to or are clinically similar to procedures in the CPT surgical range. We proposed to include all three types of codes in our definition of surgical procedures because they all may be eligible for separate payment under the OPPS and, to the extent it is reasonable to do so, we proposed that the revised ASC payment system parallel the OPPS in its policies.

In the August 2006 proposed rule, we provided an example of a Level II HCPCS code that we believe represents a procedure that could be safely and appropriately performed in an ASC, specifically HCPCS code G0297 (Insertion of single chamber pacing cardioverter-defibrillator pulse generator). We developed this Level II HCPCS code for use in the OPPS because CPT code 33240 (Insertion of single or dual chamber pacing cardioverter-defibrillator pulse generator), which describes the surgical insertion of a cardioverter-defibrillator pulse generator, does not distinguish insertion of a single chamber cardioverter-defibrillator generator from insertion of a dual chamber cardioverter-defibrillator generator. Under the OPPS, we were concerned that different facility resources could be required for the insertion of these two types of cardioverter-defibrillator pulse generators, so we developed Level II HCPCS codes to permit HOPDs to more accurately report the resources required when these surgical procedures are performed. In instances such as this, when a Level II HCPCS code is

established as a substitute for a CPT surgical procedure code which does not adequately describe, from a facility perspective, the nature of a surgical service, we proposed to allow payment for the Level II HCPCS code under the proposed revised ASC payment system. We proposed not to allow ASC payment for Level II HCPCS codes or Category III CPT codes that describe services that fall outside the scope of, that is, that do not correspond to, surgical procedures described by CPT codes 10000 through 69999.

We recognized in the proposed rule that continuing to use this definition of surgery would exclude from ASC payment certain invasive, ''surgery-like'' procedures, such as cardiac catheterization or certain radiation treatment services which are assigned codes outside the CPT surgical range. However, we believed that continuing to rely on the CPT definition of surgery would be administratively straightforward, logically related to the categorization of services by physician experts who both establish the codes and perform the procedures, and consistent with our proposal to allow ASC payment for all outpatient surgical procedures. Given the number of other changes that we expected to implement as part of the revised payment system, along with the significant expansion of ASC covered surgical procedures that we proposed, we explained that we believed it would be prudent at the outset to continue to define surgery as it is defined by the CPT code set, which is used to report services for payment under both the MPFS and the OPPS. During the development of the August 2006 proposed rule, we reviewed thousands of CPT codes in the surgical range (CPT codes 10000 through 69999), and we proposed to not exclude from payment over 750 surgical procedures previously excluded, in addition to providing ASC payment for the more than 2,500 CPT codes on the CY 2007 ASC list of covered surgical procedures.

However, we are cognizant of the dynamic nature of ambulatory surgery, which has resulted in a dramatic shift of services from the inpatient setting to the outpatient setting over the past two decades. Therefore, in the proposed rule, we solicited comments regarding other services that are invasive and ''surgery-like,'' which could safely and appropriately be performed in an ASC, and which require the resources typical of an ASC, even though the procedures are described by codes that fall outside the range of CPT surgical codes. In particular, we were interested in considering commenters' views regarding what constitutes a ''surgical'' procedure.

We received many public comments about our August 2006 proposal to define the surgical procedures for which we would make payment to ASCs as those falling within the surgical code range specified by the CPT Editorial Panel.

Comment: While, in general, hospital associations and device manufacturers supported the proposal to maintain the definition of a surgical procedure used under the existing ASC payment system, many ASC industry representatives provided a broad range of suggestions about how the definition should be expanded. Some of the commenters requested that CMS place no limit on the procedures that would be payable in ASCs because there is no such limit on Medicare payments to HOPDs. Other commenters suggested a more limited expansion of procedures eligible for payment under the revised ASC payment system. These commenters specifically recommended that CMS expand its definition of a surgical procedure to include:

(a) Medical procedures that are invasive and require general anesthesia or that are specifically designated as intraoperative procedures;

(b) X-ray, fluoroscopy, and ultrasound procedures that require insertion of a needle, catheter, tube, or probe via a natural orifice or through the skin;

(c) Radiology procedures integral to performance of nonradiologic procedures, performed either during or immediately following the surgical procedure; and

(d) Level II HCPCS and Category III CPT codes that describe procedures that crosswalk directly or are clinically similar to those listed in suggestions (a) through (c) above.

Response: We have given consideration to the many recommendations of the commenters. In general, we continue to believe it is appropriate to provide payments to ASCs for the resources associated with performing those services that are surgical procedures as defined by the CPT Editorial Panel. From the Panel's broad experience in regularly addressing the complex issues associated with new and emerging health care technologies, as well as the difficulties encountered with obsolete procedures, we believe its members are well-positioned to maintain and refine the existing coding taxonomy, which defines certain procedures as surgery, to appropriately reflect medical practice in an evolving health care delivery system. In addition, we believe that our proposal to pay for surgical procedures in ASCs that are reported by Level II HCPCS and Category III CPT codes that directly crosswalk or are clinically similar to procedures in the surgical range of CPT codes that are payable in ASCs is consistent with our definition of surgery according to the CPT surgical code range, while providing ASC payment for some procedures that have not yet been categorized by the CPT Editorial Panel or for which Medicare recognizes alternative HCPCS codes for payment.

Although we are not changing our definition of surgery as suggested by commenters, we did review procedures that are coded by specific Level II HCPCS or Category III CPT codes that were identified by commenters as surgical procedures that should be payable in ASCs. We assessed those procedures using the same final criteria discussed in section III.A.2. of this final rule that we used to evaluate all surgical procedures for their safety or the expected need for an overnight stay in making decisions about their exclusion from ASC payment. As we proposed, we also evaluated the codes in the context of whether they directly crosswalk or are clinically similar to procedures in the CPT surgical range that we have determined do not pose a significant safety risk or for which an overnight stay is not expected when performed in ASCs. As a result of that review, 14 additional Level II HCPCS codes and 15 Category III CPT codes beyond those we proposed for CY 2008 payment will be payable as covered surgical procedures when performed in ASCs beginning in CY 2008.

Furthermore, as discussed in section IV. of this final rule, although we are not expanding our definition of surgical procedures, we will provide separate ASC payment for a number of covered ancillary services when they are furnished on the same day as a covered surgical procedure and are integral to the performance of that procedure in the ASC setting. Those services include certain radiology procedures, such as some fluoroscopy and ultrasound services, that some commenters recommended we define as surgical procedures for addition to the ASC list of covered surgical procedures.

Comment: Several commenters expressed concern regarding CMS' proposed exclusion from ASC payment of all procedures described within the range of Category I CPT codes defined as ''radiology'' in accordance with the CPT Editorial Panel designation. The commenters asserted that regulations regarding the Federal physician self-referral prohibition (section 1877 of the Act) exclude interventional and

intraoperative radiology services from the definition of ''radiology'' services subject to the law's self-referral prohibition, and that CMS should, therefore, treat those services as surgical services that are eligible for payment as covered surgical procedures under the revised ASC payment system. They believed that interventional radiology and intraoperative radiology services that require insertion of a needle, catheter, tube, probe, or similar device are appropriately considered surgical in nature for purposes of ASC payment.

Response: The commenters' statements with respect to the treatment of interventional radiology procedures under the physician self-referral regulations seem overly broad. The physician self-referral regulations provide that the following services (which may include some, but not all, interventional radiology procedures) are not ''radiology and certain other imaging services'' for purposes of section 1877 of the Act: (i) X-ray, fluoroscopy, or ultrasound procedures that require the insertion of a needle, catheter, tube, or probe through the skin or into a body orifice; and (ii) radiology procedures that are integral to the performance of a nonradiological medical procedure and performed either during the nonradiological medical procedure or immediately following the nonradiological medical procedure when necessary to confirm placement of an item inserted during the nonradiological medical procedure. We do not believe that Medicare's exclusion of specific services from the definition of ''radiology and certain other imaging services'' for purposes of the physician self-referral prohibition should result in such services being considered ''surgical services'' for purposes of the revised ASC payment system.

Further, as we explain above, we believe that the characterization of procedures as surgery for purposes of their performance in ASCs is best left to the expertise of the CPT Editorial Panel. We do not believe that services designated as radiology services by the CPT Editorial Panel are appropriately classified as covered surgical procedures in ASCs, facilities that specialize in the delivery of ambulatory surgical services. However, as discussed further in section IV.C.2. of this final rule, we do believe that it is appropriate to provide separate ASC payment for certain ancillary services that are integral to the covered surgical procedures. Thus, we will provide separate payment to ASCs under the revised payment system for radiology services that are integral to the performance of an ASC covered surgical procedure when that radiology procedure is one of those for which separate payment is made under the OPPS. That is, separate payment will be made for covered ancillary radiology services integral to covered surgical procedures that are provided in the ASC immediately before, during, or immediately following the surgical procedure.

After consideration of the public comments we received, we are finalizing our proposal to define surgery as those procedures described by CPT codes within the surgical range of 10000 through 69999, without modification. In addition, we are including within our definition of a covered surgical procedure payable in the ASC setting those Level II HCPCS codes or Category III CPT codes that directly crosswalk or are clinically similar to procedures in the CPT surgical range that we have determined do not pose a significant safety risk, that we would not expect to require an overnight stay when performed in ASCs, and that are separately paid under the OPPS. An illustrative list of covered surgical procedures under the revised ASC payment system, including Category I and Category III CPT codes and Level II HCPCS codes, can be found in Addendum AA to this final rule. An illustrative list of radiology services and other covered ancillary services that are eligible for separate ASC payment when provided integral to an ASC covered surgical procedure on the same day is located in Addendum BB to this final rule.

2. Procedures Excluded From Payment Under the Revised ASC Payment System

As stated above, in the August 2006 proposed rule for the revised ASC payment system, we proposed to allow payment to ASCs for all procedures described by CPT codes within the surgical range of 10000 through 69999, or by Level II HCPCS codes or Category III CPT codes that directly crosswalk or are clinically similar to procedures in the CPT surgical range, that do not pose a significant safety risk to Medicare beneficiaries and that are not expected to require an overnight stay. Having established what we consider to be a ''surgical procedure,'' we next considered criteria that would enable us to identify procedures that could pose a significant safety risk when performed in an ASC or that we expect would require an overnight stay within the bounds of prevailing medical practice. We discuss in the next section how we proposed to identify procedures that could pose a significant safety risk.

a. Significant Safety Risk

First, we proposed to exclude from ASC payment any procedure that is included on the current OPPS inpatient list, that is, those procedures designated as requiring inpatient care under § 419.22(n). (See Addendum E to the CY 2007 OPPS/ASC final rule with comment period (71 FR 68385 through 68398).) The procedures included on that list are typically performed in the hospital inpatient setting due to the nature of the procedure, the need for at least 24 hours of postoperative recovery time or monitoring before the patient can be safely discharged, or the underlying physical condition of the patient. We believed that any procedure for which we did not allow payment in the hospital outpatient setting due to safety concerns would not be safe to perform in an ASC.

Second, we proposed to exclude from ASC payment procedures that the CY 2005 Part B Extract Summary System (BESS) data indicated were performed 80 percent or more of the time in the hospital inpatient setting, even if those procedures were not included on the OPPS inpatient list. We selected an 80-percent threshold because we believed that an 80-percent level of inpatient performance was a fair indicator that a procedure is most appropriately performed on an inpatient basis and, as such, would pose a significant safety risk for Medicare beneficiaries if performed in an ASC. We believed that procedures with inpatient utilization frequencies above the proposed threshold were complex and were likely to require a longer and more intensive level of care postoperatively than what is provided in a typical ASC. We also believed that performing these procedures in an ASC, where immediate access to the full resources of an acute care hospital is not the norm, would pose a significant safety risk for beneficiaries.

Third, we proposed to retain some of the specific criteria for evaluating safety risks that are listed in § 416.65(b)(3) of our existing regulations. Procedures that involve major blood vessels, major or prolonged invasion of body cavities, extensive blood loss, or are emergent or life-threatening in nature could, by definition, pose a significant safety risk. Therefore, we proposed to exclude from ASC payment surgical procedures that may be expected to involve any of these characteristics, based on evaluation by our medical advisors. We noted that most of the procedures that our medical advisors identified as involving any of the characteristics listed in § 416.65(b)(3) also require overnight or

inpatient stays, reinforcing our belief that they should be excluded from ASC payment.

Finally, we proposed not to continue applying under the proposed revised system the current time-based, prescriptive criteria at §§ 416.65(b)(1) and (b)(2), which exclude from the ASC list procedures that exceed 90 minutes of operating time or 4 hours of recovery time or 90 minutes of anesthesia. We believed these criteria were no longer clinically appropriate for purposes of defining a significant safety risk for surgical procedures.

We indicated that, in light of the proposed changes for evaluating procedures to identify those that pose a significant safety risk for beneficiaries when performed in ASCs, we believed that it would not be appropriate to apply the existing standard at § 416.65(a)(1), which states that covered surgical procedures are those that are commonly performed on an inpatient basis but may be safely performed in an ASC, because this standard is no longer relevant to prevailing medical practice in the realm of ambulatory or outpatient surgery. Similarly, we believed that it would not be appropriate to continue applying the existing standard at § 416.65(a)(2), which states that procedures performed in an ASC are not of a type that are commonly performed, or that may be performed, in a physician's office. This standard did not seem relevant within the context of the proposal only to exclude from ASC payment under the revised payment system those surgical procedures that pose a safety risk or are expected to require an overnight stay. We would expect the types of surgical procedures that are commonly performed or that may be performed in a physician's office to pose no significant safety risk and to require no overnight stay.

We proposed to add new Subpart F to 42 CFR Part 416 to reflect coverage, scope, and payment for ASC services under the revised payment system. Included in the changes would be new § 416.166 to reflect the changes that we proposed to our current policy for evaluating and identifying those procedures that would pose a significant safety risk for beneficiaries and would be excluded from our list of ASC covered surgical procedures beginning January 1, 2008. To set the provisions that are applicable to our existing ASC payment system apart from those that would apply to the revised ASC payment system, as we proposed, in the CY 2007 OPPS/ASC final rule with comment period, we revised the section headings of Subparts D and E of Part 416 to clearly denote the provisions that govern covered surgical procedures furnished before January 1, 2008. We also added §§ 416.76 and 416.121 to clearly denote the effective dates of Subparts D and E (71 FR 68226).

Comment: Commenters provided many recommendations regarding the proposed criteria for evaluating which procedures should be excluded from the ASC list of covered surgical procedures that varied greatly. At one end of the spectrum, some commenters recommended that CMS only exclude from ASC payment those procedures that are included on the ''inpatient list'' used under the OPPS. They believed that all procedures not on the OPPS inpatient list are safe for performance in ASCs and that, by the specification of their payable status under the OPPS, they do not require an overnight stay.

Some commenters suggested that CMS create the ASC exclusionary list by individually reviewing surgical procedures based upon data that demonstrate the risks, complications, and overall safety of a given procedure, rather than attempting to specifically apply the standards of the proposed criteria. They believed that health outcomes databases, including the National Surgical Quality Improvement Project and patient and device registries, could provide further information to refine an initial safety assessment based on the proposed criteria when certain procedures were identified as needing further consideration and evaluation. The commenters recommended this flexible and specific approach to allow for full consideration of the surgical aspects of each procedure, in order to make an appropriate determination regarding its safety for ASC performance. The commenters believed CMS could work with surgical professional associations and external surgical experts to facilitate a smooth and efficient clinical review process.

In contrast, other commenters recommended that CMS implement more stringent review criteria than our criteria under the existing payment system for evaluating which procedures are unsafe for performance in ASCs. They believed that beneficiary safety could be better protected if CMS would adopt review criteria that would exclude more procedures from ASC performance than those criteria currently in place, while maintaining the existing limitations on operating and recovery room times.

Response: We believe that both ends of the spectrum of public comments are inconsistent with our goal of only excluding those procedures from ASC payment that are unsafe for performance in ASCs or are expected to require an overnight stay. We agree with the perspective of most commenters that procedures on the OPPS inpatient list should also be excluded from ASC payment. However, while we strongly disagree with the contention by some commenters that all procedures performed in HOPDs are appropriate for performance in ASCs, we also believe that instituting criteria that are more restrictive than those currently in place would be inappropriate, because we do not have safety concerns regarding procedures that are already included on the ASC list of covered surgical procedures.

Typically, HOPDs are able to provide much higher acuity care than ASCs. ASCs have neither patient safety standards consistent with those in place for hospitals, nor are they required to have the trained staff and equipment needed to provide the breadth and intensity of care that hospitals are required to maintain. According to current CMS standards, hospitals must meet numerous documentation, infection prevention, and patient assessment requirements that are not applied to ASCs. Therefore, there are some procedures that we believe may be appropriately provided in the HOPD setting that are unsafe for performance in ASCs. Thus, we are not adopting a final policy to exclude only those surgical procedures on the OPPS inpatient list from ASC payment under the revised payment system.

Nonetheless, as stated in our August 2006 proposal and consistent with MedPAC recommendations, we are committed to revising the ASC list of covered surgical procedures so that it excludes only those surgical procedures that pose significant safety risks to beneficiaries or that are expected to require an overnight stay. We believe that adoption of a policy similar to that recommended by MedPAC would serve both to protect beneficiary safety and increase beneficiary access to surgical procedures in appropriate clinical settings. We also believe that this approach is most consistent with the PPAC's recommendation that we provide payment under the revised ASC payment system for all safe and appropriate services. Thus, we do not believe that it would be appropriate to implement more restrictive criteria for evaluating procedures for exclusion from ASC payment or even to maintain all of the current criteria that we use under the existing payment system to evaluate the appropriateness of including procedures on the ASC list. We continue to believe the current limitations on operating room and recovery room times for ASC procedures

are no longer clinically relevant to assessing the safety risk of surgical procedures. Our comprehensive review of all surgical procedures has convinced us that there are procedures in addition to those included on the CY 2007 ASC list of covered surgical procedures that may be safely performed in ASCs, and that increasing the number and types of procedures for which Medicare provides ASC payment is appropriate.

Regarding our proposed overall approach to evaluating procedures for exclusion from the ASC list of covered surgical procedures, we believe that our evaluation process is generally consistent with the approach advised by some commenters that we apply the proposed criteria as part of an initial safety assessment, and then conduct procedure-specific analyses of possible risks and complications of individual procedures based on available data. In preparing the proposal for the revised ASC payment system, we reviewed each surgical procedure that is separately payable under the OPPS and not already on the CY 2007 ASC list and with inpatient utilization of less than 80 percent against the proposed safety and overnight stay criteria and identified a subset of procedures for further assessment if we had concerns about their potential safety risk. We then used all of the information available to us to arrive at a preliminary determination regarding each procedure's suitability for payment in the ASC setting. These preliminary determinations constituted our proposed treatment of the procedures under the revised ASC payment system, and the status of the codes was open to public comment in the August 2006 proposed rule. We received detailed information and recommendations from many commenters, including hospitals, ASCs, device manufacturers, and physician specialty organizations, as well as physician experts, regarding the proposed treatment of many surgical procedure codes. Summaries of these comments and our responses follow later in this section of this final rule.

Comment: A number of commenters expressed concerns about the safety implications of a greatly expanded list of surgical procedures to be performed in ASCs. They advocated implementation of specific additional measures for tightening and strengthening the criteria we proposed to use to evaluate the potential for beneficiary risk associated with surgical procedures. Included in the commenters' numerous recommendations were the following comments:

(1) Make no changes to the current criteria until the ASC Conditions for Coverage are revised to ensure that patient protections comparable to those in place in hospitals are in place in ASCs.

(2) Apply the existing and proposed criterion to exclude procedures from the ASC list that involve major blood vessels, by adopting a specific list of blood vessels that CMS defines as major blood vessels, in order to provide more certainty about which procedures would be excluded. Some commenters recommended that CMS adopt the definition of a major blood vessel advanced in a medical textbook, *Essentials of Anatomy & Physiology,* 6th Edition, by Seeley, Stephens and Tate. For procedures that involve blood vessels defined by Seeley, et al., as major, but that are already being performed safely in ASCs (for example, CPT code 36870, Thrombectomy, percutaneous, arteriovenous fistula, autogenous or nonautogenous graft (includes mechanical thrombus extraction and intra-graft thrombolysis)), the commenters suggested that CMS retain them as ASC covered surgical procedures, thereby allowing their continued payment when performed in ASCs.

(3) Apply the existing and proposed criterion to exclude from ASC payment those procedures requiring major or prolonged invasion of body cavities, by defining ''prolonged'' invasion as referring to any procedure in which the patient is under anesthesia for 90 minutes or longer, and expand the definition of body cavity to include major blood vessels.

(4) Exclude from ASC payment procedures that commonly require systemic thrombolytic therapy. Some commenters recommended that CMS exclude procedures that involve blood vessels that, if occluded, would require inpatient lytic therapy, while other commenters recommended more generally that CMS exclude procedures that may result in a patient's need for lytic therapy. Lytic or inpatient thrombolytic therapy as used in this context both refer to systemic thrombolytic therapy.

(5) Disallow procedures that require puncturing of the femoral vessels for access. Some commenters recommended that this exclusion be for procedures accessing either the femoral artery or the femoral vein, while other commenters would have limited the exclusion to only those procedures requiring femoral arterial access.

(6) Implement a quantitative measure (greater than or equal to 15 percent of total blood volume) to define the existing and proposed criterion to exclude from the list procedures that generally result in extensive blood loss.

(7) Use a 50-percent inpatient threshold for excluding procedures from the ASC list instead of the proposed 80-percent threshold. While some commenters recommended lowering the proposed threshold for exclusion of procedures from the ASC list from 80 percent to 50 percent, several other commenters suggested that CMS should not apply a specific numerical threshold of inpatient utilization at all to its evaluation of procedure safety. They noted that this could have the unintended effect of automatically excluding some procedures from ASC payment simply because of limited data indicating their performance slightly more than 80 percent of the time in the inpatient setting, while data for clinically similar codes reflected inpatient performance slightly less than the 80-percent threshold. Instead, these commenters recommended that we evaluate each surgical procedure with respect to the other proposed criteria, based on the clinical characteristics of the procedure itself. The group of commenters recommending establishment of a lower threshold of 50 percent believed that this modified standard would better enable us to identify procedures that are typically clinically complex and have a higher risk of complications and extensive postoperative care. They suggested that setting the threshold at 50 percent would ensure that procedures performed the majority of time in the inpatient setting would be excluded from ASC payment.

(8) Require that patients be assessed for comorbidities and anesthesia risk using the American Society of Anesthesiologists' tool, and those patients who are high risk, such as patients over age 85 or with morbid obesity, should be required to go to hospital settings for surgical procedures.

(9) Identify and implement outcome and process measures to assess aspects of quality across care settings, including ASCs. To develop those measures, some commenters suggested that CMS work closely with the Hospital Quality Alliance (HQA) and the Ambulatory Quality Alliance (AQA) (formerly both organizations were known as the AQA). The HQA has already begun to include the measures of care used in the Surgical Care Improvement Project, and some commenters believed that the goal of preventing complications in the care of surgical patients provides an appropriate starting point for determining the correct measures for assessing important aspects of the safety

and quality of all types of ambulatory surgery.

Response: We appreciate the commenters' concerns regarding beneficiary safety and gave consideration to each of the individual recommendations listed above. We respond to each of these individually as follows:

(1) *Maintain the current procedure review criteria until after the ASC Conditions for Coverage are revised.*

We do not believe that postponing revisions to our review criteria until after the ASC Conditions for Coverage are revised is warranted. We cannot predict when those revisions will be issued, and we are confident that the criteria we will use to evaluate procedures for exclusion from the list of covered surgical procedures under the revised ASC payment system are appropriate and serve to protect beneficiary safety in the current environment.

(2) *Specifically adopt a defined list of ''major blood vessels.''*

As we stated earlier, we believe it is important to maintain flexibility in our review of procedures for safe performance in the ASC setting, consistent with our past practice regarding this criterion. As noted by commenters requesting a specific definition of this criterion, there are some procedures already on the ASC list that are being safely performed in ASCs and that involve vessels that would be defined as major according to the recommendations of some commenters. We do not agree with these commenters that it would be logical or clinically consistent for us to adopt a specific definition of major blood vessels to evaluate procedures for exclusion from ASC payment, yet still continue to provide ASC payment for procedures that would otherwise be excluded, except for their history of safe performance in ASCs. We believe the involvement of major blood vessels is best considered in the context of the clinical characteristics of individual procedures, as recommended by other commenters, and see no need to adopt a defined list of major blood vessels.

(3) *Define prolonged invasion of a body cavity as any procedure in which the patient is under anesthesia for 90 minutes or longer, and expand the definition of body cavity to include major blood vessels.*

We do not believe that considering major blood vessels to be included in the definition of a body cavity is clinically sensible, based on the general medical understanding of the terms. In addition, we already have a separate safety review criterion regarding major blood vessels, and we believe that evaluation of the safety of procedures involving major blood vessels will continue to be appropriately assessed using that criterion. We also do not believe that prolonged invasion should be defined as anesthesia for 90 minutes or longer. There are surgical procedures that require more than 90 minutes that do not invade a major body cavity at all, and maintaining that time-based restriction would be contrary to the recommendations of MedPAC and current clinical practice. We believe the criterion regarding major or prolonged invasion of body cavities is most appropriately evaluated through a flexible review approach, consistent with our past practice, in which we consider the criterion and its relationship to each specific surgical procedure. Therefore, we are not expanding the current criterion regarding invasion of a body cavity to include the length of time the beneficiary will be under anesthesia or to incorporate major blood vessels.

(4) *Exclude from ASC payment procedures that commonly require systemic thrombolytic therapy.*

We agree with the commenters that systemic thrombolytic therapy is unsafe for performance in ASCs. Systemic thrombolytic therapy involves significant clinical risks and is not an appropriate procedure for initiation in ASCs if its use is anticipated. We have historically considered in our clinical evaluation of the safety of procedures for performance in ASCs the likely need for systemic thrombolytic therapy in association with a surgical procedure, but we have never previously made that an explicit safety review criterion. We agree with the commenters that it should be a specific criterion for evaluation of procedure safety. Therefore, we are making it explicit that the final criteria used to evaluate the safety of procedures for performance in ASCs at § 416.166(c)(5) include the criterion that covered surgical procedures may not be of a type where systemic thrombolytic therapy would commonly be required.

(5) *Exclude procedures that require use of the femoral vessels for access.*

We do not agree with some commenters' position that excluding all procedures that involve the femoral vessels is reasonable or necessary to ensure the patient safety of surgical procedures performed in ASCs. Other commenters stated that there are instances in which the performance of procedures may require use of femoral vessels due to the beneficiary's particular physical condition. For example, a beneficiary who has experienced prolonged exposure to vascular sclerosing agents (such as chemotherapy) or has been on hemodialysis for many years may not have upper body peripheral blood vessels that are adequate even to support the basic intravenous access required during any surgical procedure performed under general anesthesia. In such a case, the surgeon may need to use the femoral vein just to provide routine intravenous access during surgery. In other cases, the use of the femoral vessels may be required for certain surgical procedures. For instance, the femoral blood vessels may be accessed to create an arteriovenous fistula for hemodialysis using a graft, as described by CPT code 36825 (Creation of arteriovenous fistula by other than direct arteriovenous anastomosis (separate procedure); autogenous graft) or CPT code 36830 (Creation of arteriovenous fistula by other than direct arteriovenous anastomosis (separate procedure); nonautogenous graft (e.g., biological collagen, thermoplastic graft)). Both of these procedures that may directly involve the femoral vessels have been on the list of covered ASC procedures since before July 2000, and we have no concerns about their safe performance in ASCs. We do not believe that it makes clinical sense to prohibit use of the femoral vessels in ASC procedures, knowing that they may be needed in any number of situations and that femoral access has been safely achieved in ASCs for years. We believe that our process for clinical review of individual procedures, during which our medical advisors consider the specific performance characteristics of a particular surgical procedure, is the most appropriate method for ensuring that procedures that pose a significant safety risk are excluded from ASC payment. As evidenced by the history of safe performance in ASCs of some procedures that utilize femoral access, we agree with the commenters who believe that it is the specific surgical procedure, rather than the method of vascular access, that must be fully evaluated to assess a procedure's safety in ASCs.

(6) *Adopt a quantitative definition of ''extensive blood loss.''*

We do not believe that the recommendation by some commenters that we revise the criteria used to evaluate procedures for exclusion from the ASC list by quantifying extensive blood loss is necessary or advisable. The existing and proposed criterion related to blood loss requires exclusion of procedures that ''generally result in extensive blood loss'' (42 CFR 416.65(b)(3)(i) and 42 CFR 416.166(c)(1),

respectively), and we have historically evaluated this criterion in considering surgical procedures for ASC payment. We do not believe that identifying a specific amount of blood loss that is considered by some to be ''extensive'' would improve our clinical review regarding procedural safety. For most surgical procedures, specific estimates of expected blood loss are not available, and we do not believe that a discussion of whether or not a procedure generally results in a loss of 14 percent versus 16 percent of a beneficiary's blood volume would be clinically meaningful and contribute to our ability to evaluate a surgical procedure's potential for safe performance in ASCs.

(7) *Adopt a 50-percent inpatient utilization threshold for exclusion of procedures from the ASC list.*

We reexamined our proposal to exclude all procedures from ASC payment that are performed in the inpatient setting 80 percent or more of the time. Although the recommendations of some commenters advocated using a lower threshold to exclude more procedures from ASC payment, we confirmed that using any relatively arbitrary threshold resulted in unintended inconsistencies in the treatment of clinically similar procedures. There were several instances in which one procedure in a clinical family would be excluded from ASC payment based on its inpatient utilization of just slightly over 80 percent, whereas our clinical review of other members of the family indicated that those procedures were safe for performance in ASCs, with inpatient utilization of slightly less than 80 percent. For example, we proposed to exclude CPT codes 33207 (Insertion or replacement of permanent pacemaker with transvenous electrode(s); ventricular) and 33208 (Insertion or replacement of permanent pacemaker with transvenous electrode(s); atrial and ventricular) from ASC payment under the revised payment system because the inpatient utilization for those procedures was higher than 80 percent and, therefore, we did not specifically review the procedures to assess their clinical safety or need for an overnight stay before proposing to exclude them. We did not propose to exclude CPT code 33206 (Insertion or replacement of permanent pacemaker with transvenous electrode(s); atrial), the other procedure in the same family of codes as CPT codes 33207 and 33208, because the inpatient utilization for that procedure was somewhat lower than 80 percent, and our clinical review, based on the other safety and overnight stay criteria proposed for the revised ASC payment system, led to our belief that it was appropriate for performance in ASCs. When we performed a clinical review of CPT codes 33207 and 33208 in order to respond to public comments, we determined that CPT codes 33207 and 33208 do not pose a significant risk to beneficiary safety and are not expected to require an overnight stay, so they are appropriate for performance in ASCs, along with CPT code 33206. Therefore, we have removed both CPT codes 33207 and 33208 from the list of excluded procedures for the revised ASC payment system. We are also, as proposed, not excluding CPT code 33206 from eligibility for ASC payment. This more flexible approach, without application of a specific inpatient utilization threshold, allows us to treat the individual members of the same family of procedures consistently as a clinically coherent group, while considering them in the context of our final safety and overnight stay criteria for the revised ASC payment system.

We also identified a number of surgical procedures with high Medicare inpatient utilization because, most of the time, the procedures are performed with other surgical procedures for beneficiaries who are hospital inpatients. Thus, although the data reflect high inpatient utilization, the procedures themselves are not unsafe for ASC performance, nor do they typically require an overnight stay. Specifically, commenters argued that the high inpatient utilization of CPT code 64447 (Injection, anesthetic agent; femoral nerve, single) was due to its frequent use during inpatient surgical procedures, whereas the injection may also be performed safely in ASCs on its own as an ambulatory pain management intervention. They believed that using the inpatient utilization as the basis for the exclusion of this procedure from ASC payment was unfair because we should evaluate the procedure itself specifically based upon its clinical characteristics, rather than based upon utilization data which could be misleading with respect to the procedure's potential for safe performance in the ASC setting. Our clinical review of CPT code 64447, in response to comments, convinced us that it would clearly not pose a significant safety risk or be expected to require an overnight stay when performed in ASCs and should not be excluded from the list of covered surgical procedures under the revised ASC payment system.

Therefore, we concluded that, in the cases of CPT codes 33207, 33208, and 64447, the utilization data alone could not be relied upon to support a decision to exclude these procedures from ASC payment and, as evidenced by our proposed list of excluded procedures, there were many procedures paid under the OPPS that were not performed more than 80 percent of the time on an inpatient basis but that were proposed for exclusion from ASC payment because of their safety risk or expected need for an overnight stay. Therefore, for this final rule, we evaluated each of the procedures that we had proposed for exclusion from ASC payment based on inpatient utilization of 80 percent or more and made separate determinations about the safety and need for an overnight stay for each of those procedures using all available information, as we did for all other procedures in the surgical range of the CPT code set.

Thus, while we proposed an 80-percent inpatient utilization threshold as one criterion for excluding surgical procedures from ASC payment, we now believe that we will reach more appropriate, clinically consistent decisions regarding procedures for exclusion from ASC payment by not adopting any specific numerical threshold for inpatient utilization that would automatically exclude surgical procedures from ASC payment. Rather than institute a definite threshold for inpatient utilization, we will examine all the clinical information regarding a surgical procedure, including its inpatient utilization, to determine whether or not a procedure would pose a significant risk to beneficiary safety or would be expected to require an overnight stay if performed in an ASC. We will not make final our proposal to exclude procedures from the ASC list of covered surgical procedures based solely on their inpatient utilization of 80 percent or more.

(8) *Require beneficiary assessment of individual surgical risk and do not permit high risk patients to receive ASC services.*

We do not believe that it would be appropriate to accept the commenters' recommendation that patients with certain specified demographic characteristics or comorbidities be automatically excluded from being considered for surgery within an ASC. The recommendation would require ASCs to deny services to individual beneficiaries who are found, based on an appraisal through a specific assessment tool, to have a high level of risk. Section 416.2 defines an ASC as providing surgical services to patients not requiring hospitalization. Thus, ASCs must ensure that each patient is assessed for relevant risk factors by the physician prior to performing the

surgical procedure, in order to screen out patients who are likely to require hospitalization in connection with the planned procedure. We require physicians to make these assessments as a part of their decisions regarding where to perform a surgical procedure for specific Medicare beneficiaries, prior to referring them to facilities for those surgical procedures. The ASC Conditions for Coverage specifically state in § 416.42(a) that ''a physician must examine the patient immediately before surgery to evaluate the risk of anesthesia and of the procedure to be performed.'' In addition, we protect Medicare beneficiary safety through our process of excluding procedures from ASC payment that pose a significant safety risk for the typical Medicare patient. In summary, we do not believe that it is necessary or appropriate for CMS to mandate that ASCs use a specific assessment tool in conducting these required beneficiary assessments.

(9) *Identify and implement outcome and process measures in ASCs to assess quality of care.*

We will take into consideration for future action the recommendation by some commenters that we identify and implement outcome and process measures to assess aspects of quality of care across settings, including ASCs, taking into consideration our final policy for the CY 2009 OPPS that will require hospitals to meet quality reporting standards to receive the full OPPS update (71 FR 68189). We agree that this could be an appropriate next step and is consistent with CMS'' policies being implemented in other beneficiary care settings. In fact, section 109(b) of the Medicare Improvements and Extension Act under Division B of the Tax Relief and Health Care Act of 2006, Public Law 109–432, enacted on December 20, 2006, specifies that the Secretary may require that in order to receive the full annual payment update, ASCs must report data on selected measures of quality. The provisions for ASC services are to apply in a manner similar to which they apply to hospital outpatient services, effective January 1, 2009.

After considering the public comments received, we are finalizing our proposal, with modification, to exclude from ASC payment all surgical procedures that could pose a significant safety risk to Medicare beneficiaries or are expected to require an overnight stay. The criteria to be used to identify procedures that could pose a significant safety risk when performed in an ASC include those surgical procedures that: generally result in extensive blood loss; require major or prolonged invasion of body cavities; directly involve major blood vessels; are emergent or life-threatening in nature; commonly require systemic thrombolytic therapy; are designated as requiring inpatient care under § 419.22(n); can only be reported using a CPT unlisted surgical procedure code (see section III.B. of this final rule for further discussion); or are otherwise excluded under § 411.15. We are not adopting the specific 80-percent inpatient utilization threshold that we proposed for exclusion of surgical procedures from ASC payment. The final revised policy regarding covered surgical procedures is set forth in § 416.166 of this final rule, effective January 1, 2008.

b. Overnight Stay

A longstanding criterion for determining which procedures are appropriate for inclusion on the ASC list of covered surgical procedures has been that the procedures on the list do not require an extended recovery time. Section 416.65(a)(3) of the regulations provides that ASC procedures ''[a]re limited to those requiring a dedicated operating room (or suite), and generally requiring a postoperative recovery room or short-term (not overnight) convalescent room.'' Under § 416.65(b)(1)(ii), we have historically considered procedures that require more than 4 hours of recovery or convalescent time to be inappropriately performed in the ASC.

We have heard many differing opinions of what constitutes an ''overnight'' stay, ranging from ''more than 24 hours'' to time spent in recovery after sunset. After deliberation and consideration of several options, in the August 2006 proposed rule for the revised ASC payment system, we proposed to exclude from ASC payment any procedure for which prevailing medical practice dictates that the beneficiary would typically be expected to require active medical monitoring and care at midnight following the procedure (hereinafter ''overnight stay''). During the development of the August 2006 proposed rule, our clinical staff evaluated each surgical procedure using available claims and physician pricing data, as well as their clinical judgment, to determine which procedures would be expected to require monitoring at midnight of the day on which the surgical procedure was performed.

We proposed to use midnight as the defining measure of an overnight stay for several reasons. First, a patient's location at midnight is a generally accepted standard for determining his or her status as a hospital inpatient or skilled nursing facility patient and as such, it seems reasonable to apply the same standard in the ASC setting. Second, overnight care is not within the scope of ASC services for which Medicare makes payment. The expectation is that surgical procedures performed in an ASC are ambulatory in nature; that is, patients undergoing a procedure in an ASC will recover from anesthesia and return home on the same day that they report to the ASC for a scheduled procedure. Finally, the expected need for monitoring at midnight is a straightforward and easily understood defining measure of ''overnight stay.'' We proposed to add the requirement that procedures will typically not be expected to require active medical monitoring and care at midnight following the procedure to proposed new § 416.166(c)(5).

Comment: Some commenters recommended that CMS use ''less than 24 hours'' as the definition of an overnight stay. Several of the commenters stated that the same 24-hour postoperative recovery standard that applies in HOPDs should apply in ASCs. One commenter stated that CMS' definition of overnight stay related to survey and certification for ASCs is a planned stay of over 24 hours and, that conversely, when the ''length of stay is less than 24 hours, it is not considered an overnight stay.'' Further, several commenters noted that a number of States allow ASCs to perform procedures that require stays of up to 23 or 24 hours.

One commenter group argued that the terms ''ambulatory'' and ''outpatient'' surgery describe the same kind of care, and that the same 24-hour postoperative recovery standard should apply in both ASC and HOPD settings. Some commenters suggested that, if CMS allowed all procedures that are performed in HOPDs to be performed in ASCs, no specific definition of overnight stay would be required because any procedure paid under the OPPS would be presumed to require no overnight stay and that the same assumption should be applied to ASCs.

A number of other commenters agreed with our proposal that procedures requiring an overnight stay should not be performed in an ASC and specifically endorsed our definition of overnight stay. They also believed that the proposed definition is consistent with other accepted definitions and standards of the term.

Several commenters believed that our proposal, if adopted, would require ASCs performing and billing covered surgical procedures to transfer patients to other facilities if the recovery of

individual patients extended beyond midnight on the day of the procedure, in order to receive payment under the revised ASC payment system. Other commenters expressed concern that procedures performed later in the day in ASCs would be treated differently for purposes of ASC payment than those procedures that were performed in the morning, in terms of allowing for adequate recovery time.

Response: We want to clarify our proposal to use the expected need for medical monitoring at midnight following the performance of a procedure as a consideration in determining whether a surgical procedure should be excluded from ASC payment. Our proposal does not affect the distinct care ASCs may provide in individual cases at various times of the day, nor does it alter the ASC payment for covered surgical procedures and covered ancillary services. As we explained in the August 2006 proposed rule, we proposed to exclude surgical procedures from ASC payment only based on their expected need for an overnight stay or the risk they pose to beneficiary safety. We identified the need for medical monitoring at midnight as a clinical measure that was meaningful to our clinical staff and advisors in their assessment, on a procedure-by-procedure basis, of the expected postoperative needs of the typical Medicare beneficiary, in order to determine whether a procedure was likely to require an overnight stay.

We agree with some commenters that the criteria currently in place under the existing ASC payment system that limit covered surgical services to those that do not generally exceed a total of 90 minutes operating time and a total of 4 hours of recovery or convalescent time are both outdated and inconsistent with the proposed policy to base exclusion on the need for an overnight stay. We also agree with the commenters who recognized that the proposed revised measure to facilitate identification of those procedures requiring an overnight stay is considerably less restrictive than the current criteria and, at the same time, the use of midnight as a reference point is clinically meaningful and adequate to ensure beneficiary safety.

As stated above, a beneficiary's location at midnight is a generally accepted standard for determining his or her status as a hospital inpatient or skilled nursing facility patient and, as such, it seems reasonable to apply the same standard in the ASC setting. Second, as defined at § 416.2, ASC means ''any distinct entity that operates exclusively for the purpose of providing surgical services to patients not requiring hospitalization.'' Thus, ASCs are not certified by Medicare to provide overnight care, and there is longstanding policy to exclude from coverage in ASCs those surgical procedures that require overnight stays, as evidenced by our existing criterion at § 416.65(b)(1)(ii) that requires CMS to limit covered surgical procedures to those that do not generally exceed a total of 4 hours of recovery time following surgery. The expectation is that a beneficiary undergoing a procedure in an ASC will recover from anesthesia and return home on the same day that he or she reported to the ASC for a scheduled procedure. This expectation is inconsistent with a 24-hour postoperative recovery period as recommended by some commenters.

The commenters' comparisons of ASCs to HOPDs are not persuasive for many reasons. Most importantly among these is the fact that HOPDs, unlike ASCs, have medical and nursing staff on duty 24 hours a day and all of the resources of the hospital to support the care requirements of beneficiaries in that setting.

After consideration of the public comments we received, we continue to believe that it is appropriate to exclude from ASC payment any procedure for which standard medical practice dictates that the beneficiary would typically be expected to require active medical monitoring and care at midnight following the procedure. Therefore, we are finalizing, with editorial modification to include this requirement in the general standards for covered surgical procedures at § 416.166(b), our proposal to exclude these surgical procedures from ASC payment.

B. Treatment of Unlisted Procedure Codes and Procedures That Are Not Paid Separately Under the OPPS

Unlisted procedure CPT codes are used to report services and procedures that are not accurately described by any other, more specific CPT codes. An example of an unlisted CPT code is 33999 (Unlisted procedure, cardiac surgery). Within the surgical range of CPT codes, there are 91 such codes. None of the unlisted CPT codes in the surgical range is on the current ASC list of covered surgical procedures. Under the OPPS, we assign unlisted CPT codes to the lowest weighted APC in the relevant clinical group, regardless of the median cost for the unlisted procedure code, and we do not include the highly variable claims-based cost information for unlisted services in calculating APC median costs for purposes of establishing APC relative payment weights. Payment for procedures reported by unlisted CPT codes is made only at the discretion of the contractor under the MPFS.

Because of concerns about the potential for safety risks when procedures that may only be reported with unlisted procedure CPT codes are performed, in the August 2006 proposed rule for the revised ASC payment system, we proposed to continue excluding CPT unlisted surgical procedure codes from ASC payment. For example, when CPT code 33999 is reported on a claim, we know only that some kind of cardiac surgery was performed. We have no other information about the procedure, and we have no way of knowing whether the procedure involved major blood vessels, major or prolonged invasion of body cavities, or extensive blood loss, or was emergent or life-threatening in nature.

Prior to our evaluation of surgical procedure codes for their safety risk, we decided to propose that we would not make separate payment under the revised ASC payment system for CPT codes in the surgical range whose payments are packaged under the OPPS. Packaged CPT codes under the OPPS are identified by status indicator ''N'' in Addendum B of the CY 2007 OPPS/ASC final rule with comment period (71 FR 68283 through 68384), and their OPPS payment is provided through payment for other separately payable services. We made this proposal for two reasons. First, we would not be able to establish an ASC payment rate for packaged surgical procedures using the same method we proposed for all other ASC procedures because packaged surgical codes have no relative payment weights under the OPPS upon which to base an ASC payment rate. Second, ASCs, just like hospitals, would receive payment for these packaged surgical procedures because their costs would already be included in the APC relative payment weights upon which the ASC payment rates would be based.

Comment: A few commenters recommended that CMS not exclude all unlisted CPT codes from ASC payment as proposed. Some commenters believed that, because Medicare makes facility payments for unlisted CPT codes under the OPPS, CMS should provide the same treatment in ASCs. Other commenters suggested that, for groups of related CPT codes in which all codes but the related unlisted code are provided payment in ASCs, CMS should also include the unlisted code on the ASC list of covered surgical procedures. For example, all of the specific CPT codes in the surgical hysteroscopy

subsection of CPT (CPT codes 58558 through 58578) are currently on the ASC list. One commenter contended that because CMS had already determined that all of those specific hysteroscopy procedures are safe for performance in ASCs, the related unlisted hysteroscopy procedure (CPT code 58579, Unlisted hysteroscopy procedure, uterus) should also be deemed to pose no significant safety risk or require an overnight stay.

Response: We appreciate the commenters' examples of unlisted codes in families where all of the other procedures in the CPT subsection are not excluded from ASC payment, in support of their recommendation that the related unlisted procedure code should be treated comparably. However, the fact remains that we do not know what specific procedure would be represented by an unlisted code. Our charge requires us to evaluate each surgical procedure for potential safety risk and the expected need for overnight monitoring and to exclude such procedures from ASC payment. It is not possible to evaluate procedures that would be reported by unlisted CPT codes according to these criteria.

We continue to believe that because our final policy under the revised ASC payment system excludes from ASC payment those procedures that pose a significant safety risk in ASCs or would be expected to require an overnight stay, it would not be appropriate to provide ASC payment for unlisted CPT codes in the surgical range, even if payment may be provided under the OPPS. As discussed earlier, ASCs do not possess the breadth and intensity of services that hospitals must maintain to care for patients of higher acuity, and we would have no way of knowing what specific procedures reported by unlisted CPT codes were provided to patients, in order to ensure that they are safe for ASC performance. Therefore, we are finalizing in § 416.166(c)(7) our proposal, without modification, to exclude from ASC payment under the revised ASC payment system all procedures reported by unlisted surgical procedure codes.

Comment: A few commenters expressed concern that payments for certain surgical services that are packaged under the OPPS are frequently paid through the OPPS payments for more comprehensive services that we had proposed to define as nonsurgical because they are not classified by CPT within the surgical range of codes. Therefore, these packaged surgical services would not be paid under the revised ASC payment system. They pointed out that when ASCs perform these packaged surgical services as part of providing a more comprehensive nonsurgical service, the ASC would receive no payment for the surgical service. To illustrate the problem, commenters provided examples of the surgical codes that typically receive packaged payment under the OPPS through payment for radiology services. The minor packaged surgical procedures included numerous injection and catheter placement procedures in the surgical range of CPT codes that generally accompany radiology services for purposes of injecting contrast or facilitating another nonsurgical intervention. These commenters recommended that CMS expand the definition of surgical procedures to include invasive radiology services that have a surgical component, including those radiology procedures that are performed in association with a surgical procedure proposed for packaged payment under the revised ASC payment system, to enable ASCs to receive payment for the comprehensive service, including both the radiology service and the minor surgical procedure. Alternatively, several other commenters supported our proposal to package payment under the revised ASC payment system for the minor surgical procedures for which payment is also packaged under the OPPS, rather than paying for them separately.

Response: We continue to believe that packaging payment for those surgical services that are packaged under the OPPS is appropriate under the revised ASC payment system. This policy is aligned with the recommendation of the PPAC to apply payment policies uniformly in the ASC and HOPD settings. It also maintains comparable payment bundles under the OPPS and the revised ASC payment system for these services, consistent with the recommendation of MedPAC to maintain consistent payment bundles under both payment systems.

Packaged surgical services are minor procedures and are usually reported with a more comprehensive procedure that may itself be nonsurgical and, therefore, excluded from payment under the revised ASC payment system. See section III.A.1. of this final rule for a further discussion of the definition of surgical procedure under the revised ASC payment system. We believe that payment for these minor surgical procedures would be appropriately packaged into payment for comprehensive surgical procedures that are separately paid in the ASC setting, when those minor surgical procedures are provided in support of the comprehensive surgical procedures. In the circumstances referred to by the commenters, the minor surgical procedures are performed in support of comprehensive nonsurgical services and payment for the minor surgical procedures is packaged into payment for the nonsurgical services under the OPPS. Although the packaged procedures are surgical according to our definition for the revised ASC payment system, we do not believe it is reasonable or appropriate to assign a different packaging status for these procedures under the revised ASC payment system than is assigned under the OPPS. The minor surgical procedures are not separately paid in the OPPS and, thus, are not eligible for separate payment under the revised ASC payment system. In addition, if the procedures are only performed in conjunction with major services not payable in ASCs, Medicare also will make no packaged payment for these minor surgical procedures. As we discuss further in section III.A. of this final rule, Medicare pays ASCs for the performance of ambulatory surgical procedures, not for providing nonsurgical services. We do not agree that we should define surgical procedures under the revised ASC payment system to include other types of services, such as radiology services, just because they are provided in association with a minor surgical procedure in the CPT surgical range of codes. Instead, we continue to believe that the other types of services, including radiology services, are not appropriate for performance in ASCs unless they are integral to covered surgical procedures. We see no rationale for considering comprehensive radiology services to be integral to the minor surgical procedures.

After considering all public comments received, we are finalizing, without modification, our proposal to provide packaged payment under the revised ASC payment system for all surgical procedures packaged under the OPPS for the same calendar year. Therefore, we will exclude these surgical procedures from separate payment in the ASC setting under the revised payment system, and they will not be included on the ASC list of covered surgical procedures. We believe that this approach will provide appropriate packaged payment for minor surgical procedures provided in association with significant ASC covered surgical procedures. When these minor surgical procedures are performed in support of comprehensive nonsurgical procedures, they are not appropriate for ASC payment because the more comprehensive service is not a surgical

procedure paid under the revised ASC payment system. HCPCS codes for surgical procedures for which payment will be packaged under the revised ASC payment system are identified in Addendum AA to this final rule with payment indicator ''N1'' (Packaged service/item; no separate payment made).

C. Treatment of Office-Based Procedures

According to the general standard in § 416.65(a)(2) of the existing regulations, procedures that ''are commonly performed, or that may be safely performed, in physicians' offices'' are excluded from the ASC list of covered surgical procedures. We did not propose to continue to apply this provision under the revised ASC payment system. Rather, in the August 2006 proposed rule for the revised ASC payment system, we proposed to allow ASC payment for surgical procedures that are commonly and safely performed in the office setting. We reasoned that the types of procedures performed in physicians' offices would neither pose a significant safety risk nor require an overnight stay when performed in an ASC. However, we expressed concerns that allowing payment for office-based procedures under the ASC benefit could create an incentive for physicians inappropriately to convert their offices into ASCs or to move all their office surgery to an ASC.

To address this concern, we proposed to limit payment for office-based procedures to neutralize any such incentive (see section IV.E. of this final rule). We also proposed in new § 416.171(d) to set forth rules governing the payment of office-based procedures in ASCs. We specifically invited comment regarding the effect on the Medicare program, and on practice patterns for ambulatory surgery generally, of our proposal to allow ASC payment for office-based procedures that historically have been excluded from the ASC list of covered surgical procedures.

As we discussed in the August 2006 proposed rule, we proposed to limit payment for office-based procedures in ASCs in an attempt to mitigate potentially inappropriate migration of services from the physician office setting to the ASC. Alternatively, we acknowledged that we could entirely exclude office-based procedures or procedures that require relatively inexpensive resources to perform from the ASC list of covered surgical procedures.

Comment: Many commenters supported our proposal to not exclude from ASC payment those procedures that are performed most of the time in the physician's office setting. Numerous commenters requested that the payment rate for those procedures be set at a percentage of the OPPS amount, applying the same payment methodology under the revised ASC payment system as for all other surgical procedures not excluded from ASC payment. The commenters believed that the proposed treatment of office-based procedures is unfair because, when any of those procedures would be performed in the ASC setting, that facility site would be necessary due to an individual beneficiary's need for the higher acuity care setting. Therefore, the commenters concluded that the same level of payment, in relationship to OPPS payment for those procedures, should be made for office-based procedures as for other covered ASC procedures that are not office-based. Furthermore, commenters contended that there would be very little change in surgical practice patterns under the revised ASC payment system, and that procedures currently performed predominantly in physicians' offices would not move to ASC settings as a result of our proposal to provide payment for those procedures in ASCs.

Response: We appreciate the commenters' support for our proposal to not exclude office-based surgical procedures from ASC payment under the revised ASC payment system. Based on both our final definition of surgical procedures and our final safety and overnight stay criteria to be used in evaluating procedures for exclusion from ASC payment, we see no reason to exclude surgical procedures that are currently commonly performed in physicians' offices from payment under the revised ASC payment system. We believe there are a variety of reasons that may contribute to the choice of a particular care setting for the treatment of an individual beneficiary, including the patient's surgical risk, the geographic location of the beneficiary and physician, individual physician practice patterns and preferences, the availability of specialty ASCs, and others. We do not believe that individuals receiving surgical procedures in ASCs routinely require care that is of such greater acuity than care provided in the office-based setting that the facility resources are significantly and systematically increased when those procedures that are primarily office-based are performed occasionally in ASCs. While it may be true that some more acute cases are treated in ASCs rather than in physicians' offices, we continue to believe that the structure of payments should not provide a financial incentive for treatment in the ASC facility setting. Furthermore, this policy is consistent with the averaging principle that is common to all prospective payment systems; payment is based on the resources that are required to treat the typical case, and payment for the treatment of a specific Medicare beneficiary may, therefore, be higher than the costs of treating less severe cases but lower than the costs of treating more acute cases.

We believe that including these office-based procedures on the ASC list of covered surgical procedures will ensure Medicare beneficiary access to these services in the most appropriate ambulatory or outpatient setting. Our final payment policy for these procedures, along with public comments and our responses, is discussed in section IV.E. of this final rule, and the related payment rules are set forth in § 416.171(d).

After considering the public comments received, we are finalizing our proposal, without modification, to provide payment under the revised ASC payment system for surgical procedures that are currently performed predominantly in physicians' offices and that may be safety performed in ASCs, without requiring an overnight stay.

D. Specific Surgical Procedures Excluded From Payment under the Revised ASC Payment System

In Tables 44 and 45 of the August 2006 proposed rule (71 FR 49640 through 49646), we listed the HCPCS codes and short descriptors for surgical procedures that, in addition to those that comprised the OPPS inpatient list in Addendum E to the August 2006 proposed rule, we proposed to exclude from ASC payment on or after January 1, 2008, because they pose a significant safety risk or are expected to require an overnight stay. Table 44 included those surgical procedures proposed for exclusion from payment because at least 80 percent of Medicare cases are performed on an inpatient basis, while Table 45 listed those surgical procedures proposed for exclusion from payment because they require an overnight stay. In section III.A.2. of this final rule, we discuss our final rationale for excluding surgical procedures from ASC payment. We note that because our final policy, as discussed above, for the revised ASC payment system does not automatically exclude from payment those procedures for which at least 80 percent of Medicare cases are performed on an inpatient basis, all procedures listed in Table 44 of the August 2006

proposed rule were reviewed again for this final rule as described below, in the context of our final exclusionary patient safety and overnight stay criteria.

For many of the procedures listed in Table 45 of the August 2006 proposed rule, several disqualifying criteria could be applicable, such as ''requires inpatient stay'' or ''could potentially cause extensive blood loss'' or ''is emergent in nature.'' Rather than list multiple disqualifying criteria for individual codes in Table 45 of the August 2006 proposed rule, we defaulted to the one characteristic that is common to all of the codes listed. That is, we believed that, at a minimum, prevailing medical practice would dictate the provision of overnight care following each of the procedures listed in Table 45 of the August 2006 proposed rule. We acknowledged that we had to exercise a degree of clinical judgment in identifying those procedures that we proposed to exclude from ASC payment. Therefore, we solicited comments on the appropriateness of excluding the procedures in Table 45 from payment under the revised payment system. We requested that commenters who disagreed with a specific procedure's proposed exclusion from payment submit clinical evidence that demonstrates that the criteria we proposed in proposed new § 416.166 of the regulations are not factors when the procedure is performed in the majority of cases. We asked that commenters also provide data to support any assertion that the preponderance of Medicare beneficiaries upon whom the procedure is performed would not be expected to require overnight care or monitoring following the surgery. We noted in the proposed rule that simply asserting that the procedure could be safely performed in an ASC, without providing corroborative evidence and data, would not furnish us with sufficient information upon which to make an informed decision.

Comment: Several commenters requested that, if CMS decided not to adopt less than 24 hours as its definition of an overnight stay, CMS should revise the list of proposed excluded procedures that were included in Table 45 of the August 2006 proposed rule on the basis of their overnight stay requirement. The commenters disagreed with CMS' determinations that all of those procedures required at least active medical monitoring at midnight following the procedure. Many commenters provided specific recommendations regarding surgical services that they believed should not be excluded from payment under the revised ASC payment system. In addition, several commenters identified a number of procedures not on the OPPS inpatient list that CMS proposed to exclude from ASC payment but that were not displayed in Table 44 or Table 45 of the proposed rule and for which CMS provided no rationale for their exclusion.

Response: In response to these procedure-specific comments and to those comments that reflected the belief that all procedures not on the OPPS inpatient list should be payable under the revised ASC payment system, we reviewed a subset of all of the surgical procedures that we proposed to exclude from payment under the revised ASC payment system, identified as described below. This included reassessing the treatment of those codes that were proposed to be excluded but were inadvertently left out of Table 44 or Table 45 in the August 2006 proposed rule. To conduct this comprehensive review, we identified all codes within the surgical range of CPT codes that met all of the following criteria: (1) Not proposed for the CY 2008 list of ASC covered surgical procedures (Addendum BB to the August 2006 proposed rule); (2) not included on the CY 2007 OPPS inpatient list; (3) not packaged under the OPPS; (4) not CPT unlisted surgical procedure codes; and (5) recognized for separate payment under the OPPS. Elimination of all CPT codes not meeting these criteria yielded about 750 procedures designated for a second review by our medical advisors, in order to finalize their treatment under the CY 2008 revised ASC payment system.

Our clinical staff evaluated each of those procedures using all available claims and physician pricing data, as well as their clinical judgment and the public comments, to determine which procedures would be expected to require monitoring at midnight of the day on which the surgical procedure was performed or that otherwise would pose a significant safety risk to the typical Medicare beneficiary. Table 2 below, which provides an illustrative list of all surgical procedures excluded from ASC payment under the revised ASC payment system, reflects the final outcome of that comprehensive review process. In all, we are not excluding 17 of the procedures that we had initially proposed for exclusion from payment under the revised ASC payment system. The procedures for which we made a different final determination than our proposal regarding the appropriateness of their performance in ASCs include procedures from virtually all specialty areas within the surgical range, from dermatology to gastroenterology to ophthalmology. In addition, we reviewed all Category III CPT codes and Level II HCPCS codes in the context of the public comments and our final policy for the revised ASC payment system and concluded that 29 of these codes, in addition to those HCPCS codes on the CY 2007 ASC list of covered procedures, are appropriate for performance in ASCs under the revised payment system.

Comment: A number of commenters requested that CMS exclude additional procedures from the ASC list of covered surgical procedures. Specifically, several commenters requested that CMS exclude the procedures listed in Table 1 below, because they believed that they pose significant safety risks to beneficiaries when performed in ASCs. They stated that all of the procedures listed in Table 1 would violate at least one of the proposed procedure review criteria by involving major blood vessels or prolonged invasion of body cavities. Further, one commenter suggested that some of the procedures (as listed, CPT codes 35473 through 37650) should be excluded, because they involve femoral access and could require thrombolytic therapy.

TABLE 1.—SPECIFIC PROCEDURES THAT COMMENTERS REQUESTED BE EXCLUDED FROM ASC PAYMENT

HCPCS code	Short descriptor
21215 ...	Lower jaw bone graft.
32002 ...	Treatment of collapsed lung.
33206 ...	Insertion of heart pacemaker.
33214 ...	Upgrade of pacemaker system.
33215 ...	Reposition pacing-defib lead.
33216 ...	Insert lead pace-defib, one.
33217 ...	Insert lead pace-defib, dual.
33218 ...	Repair lead pace-defib, once.
33220 ...	Repair lead pace-defib, dual.
33222 ...	Revise pocket, pacemaker.
33223 ...	Revise pocket, pacing-defib.
33224 ...	Insert pacing lead & connect.
33225 ...	L ventric pacing lead add-on.
33226 ...	Reposition L ventric lead.
33234 ...	Removal of pacemaker system.
35473 ...	Repair arterial blockage.
35474 ...	Repair arterial blockage.
35475 ...	Repair arterial blockage (non-dialysis).
35476 ...	Repair venous blockage (non-dialysis).
35492 ...	Artherectomy, perc.
35761 ...	Exploration of artery/vein.
37205 ...	Transcath IV stent, perc.
37206 ...	Transcath IV stent/perc addl.
37250 ...	IV U.S. first vessel add-on.
37251 ...	IV U.S. each add vessel add-on.
37650 ...	Revision of major vein.
40700 ...	Repair cleft lip/nasal.
40701 ...	Repair cleft lip/nasal.
42200 ...	Reconstruct cleft palate.
42205 ...	Reconstruct cleft palate.
42210 ...	Reconstruct cleft palate.

TABLE 1.—SPECIFIC PROCEDURES THAT COMMENTERS REQUESTED BE EXCLUDED FROM ASC PAYMENT—Continued

HCPCS code	Short descriptor
42215 ...	Reconstruct cleft palate.
42220 ...	Reconstruct cleft palate.
G0297 ..	Insrt 1 chamb dfib pulse generator.

Response: We appreciate the commenters' concerns and conducted a comprehensive review of each of the procedures presented. We agree with the commenters that the procedures reported by CPT codes 35475 (Transluminal balloon angioplasty, percutaneous; brachiocephalic trunk or braches, each vessel); 37205 (Transcatheter placement of an intravascular stent(s), (except coronary, carotid, and vertebral vessel), percutaneous; initial vessel); and 37206 (Transcatheter placement of an intravascular stent(s), (except coronary, carotid, and vertebral vessel), each additional vessel) should be excluded from the ASC list of covered surgical procedures because they could pose a significant safety risk to beneficiaries in ASCs. We did not include CPT code 35475 in our proposed list of covered surgical procedures under the revised ASC payment system because we, like the commenters, believe that it poses a safety risk for beneficiaries if performed in ASCs. Although we did propose to add CPT codes 37205 and 37206 to the ASC list for CY 2007, we did not finalize that proposal for CY 2007 in response to comments and continue to agree with commenters that those procedures would likely require an overnight stay.

With regard to the remaining procedures, three of them, specifically CPT codes 33222 (Revision or relocation of skin pocket for pacemaker); 33223 (Revision of skin pocket for single or dual chamber pacing cardioverter-defibrillator); and 37650 (Ligation of femoral vein), are on the current ASC list of covered surgical procedures and have been safely performed in ASCs for some time. We do not believe that they represent a significant safety risk or are likely to require an overnight stay.

We did not propose to exclude any of the remaining procedures in Table 1 from the list of procedures for which ASCs may receive payment under the revised payment system because, based on our clinical review, we did not find that the procedures would be expected to require an overnight stay or pose a significant risk to beneficiary safety when performed in ASCs. Our review for this final rule, in consideration of the comments, did not alter our final opinion on the appropriate treatment of these other codes.

Therefore, we are finalizing our proposal, with modification, regarding specific surgical procedures that are excluded from ASC payment under the revised ASC payment system. Table 2 provides an illustrative list of CPT codes that are payable under the OPPS but that are excluded from the ASC list of covered surgical procedures. This illustrative list does not include those procedures that are on the OPPS inpatient list, packaged under the OPPS, or only reportable by CPT unlisted surgical procedure codes. All of the procedures listed in Table 2 are excluded from the list of covered surgical procedures for which Medicare will provide ASC payment under the revised ASC payment system because we believe, based on our review of each procedure's clinical characteristics, utilization data reflected in physician claims, and prevailing medical practice as reflected in the valuation of the services by the AMA/Specialty Society Relative Value Scale Update Committee (RUC), and consideration of the judgment of our medical advisors and all public comments to the proposed rule, that these surgical procedures pose a significant risk to beneficiary safety or are expected to require an overnight stay.

In this final rule, we are finalizing the addition of 793 new surgical procedures to the ASC list of covered surgical procedures for CY 2008, while we are excluding those procedures listed in Table 2 from ASC payment for CY 2008. This list will be updated for the CY 2008 revised ASC payment system through the CY 2008 OPPS/ASC annual rulemaking cycle.

TABLE 2.—ILLUSTRATIVE LIST OF SURGICAL PROCEDURES PAYABLE UNDER THE OPPS (NOT ON THE OPPS INPATIENT LIST, NOT PACKAGED UNDER THE OPPS AND NOT DESIGNATED AS CPT UNLISTED CODES) THAT ARE EXCLUDED FROM ASC PAYMENT BECAUSE THEY POSE A SIGNIFICANT SAFETY RISK OR ARE EXPECTED TO REQUIRE AN OVERNIGHT STAY

HCPCS code	Short descriptor
15170 ..	Acell graft trunk/arms/legs.
15171 ..	Acell graft t/arm/leg add-on.
15175 ..	Acellular graft, f/n/hf/g.
15176 ..	Acell graft, f/n/hf/g add-on.
19260 ..	Removal of chest wall lesion.
19307 ..	Mast, mod rad.

69960 ..	Release inner ear canal.

IV. Ratesetting Methodology for the Revised ASC Payment System

A. Overview of Current ASC Payment System

Section 1833(i)(1) of the Act requires us to specify, in consultation with appropriate medical organizations, surgical procedures that are appropriately performed on an inpatient basis in a hospital but that also can be safely performed in an ASC and to review and update the list of procedures paid under the ASC payment system at least every 2 years.

Under the existing ASC payment system, the ASC payment rate is a standard overhead amount established on the basis of our estimate of a fee that takes into account the costs incurred by ASCs generally in providing facility services in connection with performing a specific procedure. We refer readers to section I.B. of this final rule for further history regarding the establishment of standard overhead amounts for ASC payment. The standard overhead amounts under the existing ASC payment system for procedures on the ASC list of covered surgical procedures were last rebased in 1990 using data collected in a 1986 survey of ASC costs. The process and methodology that we used to establish the payment system are explained in the February 8, 1990 **Federal Register** (55 FR 4526).

The existing ASC payment system consists of 9 standard overhead amounts ranging from $333 to $1,339, based on the data collected in the 1986 survey of ASC costs. An ASC payment group currently consists of all the procedures assigned to a particular standard overhead amount. ASC payment groups are heterogeneous in terms of clinical characteristics, cutting across all body systems and types of surgery. Medicare pays a $150 allowance for IOLs that are inserted during or subsequent to cataract surgery and an additional $50 for IOLs that are included in active NTIOL classes. Medicare also makes separate payment for implantable prosthetic devices and implantable durable medical equipment (DME) that are surgically inserted at an ASC under the Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) fee schedule. Payment for all other facility services that are directly related to performing a surgical procedure is packaged into the prospectively determined ASC payment for the covered surgical procedure.

Section 5103 of Public Law 109–171 requires us to substitute the OPPS payment amount for the ASC standard overhead amount for surgical procedures performed in an ASC on or after January 1, 2007, but prior to the revised ASC payment system, when the ASC standard overhead amount exceeds the OPPS payment amount for the procedure in that year. In Addendum AA to the CY 2007 OPPS/ASC final rule with comment period (71 FR 68243 through 68283), we identify the HCPCS codes on the CY 2007 ASC list for which the CY 2007 ASC payments are capped at the OPPS payment amounts in accordance with the provisions of section 5103 of Public Law 109–171, based on a comparison of the final CY 2007 OPPS payment rates and the ASC standard overhead amounts that are effective in CY 2007.

Except for screening flexible sigmoidoscopy and screening colonoscopy services, payment for ASC services is subject to the usual Medicare Part B deductible and coinsurance requirements and the amounts paid by Medicare must be 80 percent of the standard fee. As required by section 1834(d) of the Act, the coinsurance for screening flexible sigmoidoscopies and colonoscopies is 25 percent and the amounts paid by Medicare must be 75 percent of the standard fee.

Medicare currently accounts for geographic wage variations when calculating individual ASC payments by applying the relevant inpatient prospective payment system (IPPS) wage index values and localities that were established under the IPPS prior to implementation of the new Core Based Statistical Areas (CBSAs) issued by the Office of Management and Budget (OMB) in June 2003 to 34.45 percent of the national ASC standard overhead amount. The 1986 ASC survey data are the basis for attributing 34.45 percent of ASC facility costs to labor costs.

Section 1833(i)(2)(C) of the Act requires the Secretary to update ASC payment rates using the CPI–U (U.S. city average) (CPI–U) if the Secretary has not otherwise updated the amounts under the revised ASC payment system. As amended by Public Law 108–173, section 1833(i)(2)(C) of the Act provides that if the Secretary is required to apply the CPI–U increase, the CPI–U percentage increase is to be applied on a fiscal year basis beginning with FY 1986 through FY 2005 and on a calendar year basis beginning with 2006. Public Law 108–173 further amended section 1833(i)(2)(C) of the Act to require us in FY 2004, beginning April 1, 2004, to increase ASC payment rates using the CPI–U as estimated for the 12-month period ending March 31, 2003, minus 3.0 percentage points. Public Law 108–173 also requires that the CPI–U adjustment factor equal zero percent in FY 2005, the last quarter of CY 2005, and each of CYs 2006 through 2009.

Section 141(b) of the Social Security Act Amendments of 1994, Public Law 103–432, requires us to establish a process for considering requests for review of the appropriateness of the payment amount provided under section 1833(i)(2)(A)(iii) of the Act for IOLs to ensure that the ASC payment for the insertion procedure is reasonable and related to the cost of acquiring a lens that belongs to a class of NTIOLs. In the CY 2007 OPPS/ASC proposed rule that was published August 23, 2006 (71 FR 49631 through 49635), we proposed changes to the process for recognizing IOLs as belonging to a new NTIOL class. In the subsequent CY 2007 OPPS/ASC final rule with comment period (71 FR 68175 through 68181), we finalized the proposed changes to that process, beginning with requests for review for establishing new NTIOL classes for CY 2008 payment.

The revised ASC payment system that we are finalizing in this rule will implement requirements set forth in section 626 of Public Law 108–173. The

revised payment system mandated by section 626(d) of Public Law 108–173 requires us to take into account recommendations in a report to Congress prepared by the GAO. As mentioned earlier, that report (GAO–07–86) was published on November 30, 2006. Its methodology, findings, and recommendations are summarized in section II.B. of this final rule. Specific ASC payment system issues considered in the GAO Report are discussed in the individual sections below under the related topic areas.

B. ASC Relative Payment Weights Based on APC Groups and Relative Payment Weights Established Under the OPPS

As we stated in the August 2006 proposed rule for the revised ASC payment system (71 FR 49647), we considered several strategies and methodologies for setting ASC payment rates under a revised payment system. These options included requiring ASCs to submit modified cost reports as a basis for establishing ASC costs, expanding the number and payment range of the current ASC payment groups, basing payments to ASCs on the relative weights for surgical services established under the MPFS, basing payments to ASCs on the relative weights for surgical services established under the Medicare OPPS, as suggested in Public Law 108–173, or basing payments to ASCs on a flat percentage of the payment for the same services established under the OPPS, as advocated by representatives of several ASC associations.

After reviewing the advantages and disadvantages of each of these approaches, in the August 2006 proposed rule we proposed, within the parameters of section 626 of Public Law 108–173, to use the APC groups and the relative payment weights for surgical procedures established under the OPPS as the basis of the payment groups and the relative payment weights for surgical procedures performed in ASCs. These payment weights would be multiplied by an ASC conversion factor in order to calculate the ASC payment rates. Several factors persuaded us to advance this proposal over the other approaches that we considered.

First, in section 626(d) of Public Law 108–173, the Congress explicitly targets the OPPS for consideration by the GAO in its study of ASC payments. We believe it is reasonable to assume that Congress, by so doing, was highlighting the relative payment weights under the OPPS as a theoretical model for ASC relative payment weights under the revised payment system.

Second, the ASC benefit provides payment for services associated with performing surgical procedures. The OPPS has equipped us with nearly a decade of experience in developing and refining a relative payment system for all services furnished in connection with outpatient surgical procedures.

Third, Public Law 108–173 applies, for the first time, a budget neutrality requirement to the ASC benefit. That is, in the year the revised system is implemented, the system is to be designed to result in the same aggregate amount of expenditures that would be made if the revised payment system were not implemented. Because the OPPS is also a prospective payment system for facility services that is subject to budget neutrality requirements, it provides useful parallels for a ratesetting methodology based on relative facility payment weights for surgical services under the revised ASC payment system.

Fourth, in our analysis of the APC groups to which surgical procedures are assigned for payment under the OPPS, we found that, of the 150 highest volume surgical procedures furnished in HOPDs, more than half (80) are also among the 150 highest volume procedures performed in ASCs.

Finally, the ASC industry in numerous meetings with us over the past several years has frequently voiced its preference for a payment system that parallels the OPPS for the sake of promoting transparency across sites of service in the arena of outpatient surgery and to streamline and modernize how CMS sets payments and determines what is payable under the ASC benefit.

We explained in the August 2006 proposed rule that the OPPS payment rates are based on relative payment weights, which are updated annually based on the most recent year of hospital outpatient claims data and hospitals' latest Medicare cost reports. APCs to which surgical procedures are assigned are generally homogeneous both in terms of clinical characteristics and resource requirements. The APCs have been continually refined over the past 6 years through the work of the Advisory Panel on Ambulatory Payment Classification Groups (APC Panel) and as a result of comments received during the OPPS annual rulemaking cycles.

Moreover, we believed that the APC groups had matured with respect to their clinical and resource homogeneity, and the relativity in resource utilization among APCs containing surgical procedures had stabilized. Thus, we concluded in the proposed rule that the APC groups and their relative weights were reasonable and appropriate models for grouping outpatient surgical procedures and determining the relativity of the ASC payment weights under the revised payment system. For example, whether performed in an HOPD or in an ASC, we believed the time and facility resources required to perform a routine laparoscopic hernia repair described by CPT code 49650 (Laparoscopy, surgical; repair initial inguinal hernia), with a CY 2007 OPPS relative payment weight of 43.5488, were approximately 5 times higher than those required to perform a diagnostic colonoscopy described by CPT code 45378 (Colonoscopy, flexible, proximal to splenic flexure; diagnostic, with or without collection of specimen(s) by brushing or washing, with or without colon decompression (separate procedure)), with a CY 2007 OPPS relative payment weight of 8.7686. Thus, we believed that the relative payment weights established under the OPPS for procedures performed in the hospital outpatient setting reasonably reflected the relative facility resources required for such procedures and did so with sufficient coherence to be applicable to other ambulatory sites of service. Taking all these factors into account, we proposed to use the APCs as a ''grouper'' and the APC relative payment weights as the basis for ASC relative payment weights and for calculating ASC payment rates under the revised payment system. Accordingly, we proposed to establish provisions in proposed new Subpart F, §§ 416.167 and 416.171, to reflect these proposed changes for calculating the ASC payment rates beginning January 1, 2008.

As further discussed in section II.B. of this final rule, on November 30, 2006, the GAO published the report mandated by section 626(d) of Public Law 108–173 (GAO–07–86), where it determined that the APC groups of the OPPS accurately reflect the relative costs of procedures performed in ASCs. It concluded that the APC groups in the OPPS reflect the relative costs of surgical procedures performed in ASCs in the same way that they reflect the relative costs of the same procedures when they are performed in HOPDs. Therefore, the GAO recommended that the APC groups could be applied to procedures performed in ASCs, and the OPPS could be used as the basis for an ASC payment system, thereby eliminating the need for ASC surveys and providing for an annual revision of the ASC payment groups. At its December 2006 meeting, the PPAC recommended that CMS apply any payment policies uniformly to both

ASCs and HOPDs as appropriate, confirming its belief that the OPPS and the revised ASC payment system could be closely linked.

We received a number of comments on our proposal to use the OPPS relative payment weights as the basis for establishing relative payment weights under the revised ASC payment system. A summary of the comments and our responses follow.

Comment: Many commenters agreed that using the OPPS APCs as a ''grouper'' and the APC relative payment weights to establish ASC payment rates for surgical procedures paid under the revised ASC payment system is appropriate because a significant number of surgical procedures furnished in the hospital outpatient setting are also performed in ASCs. Some commenters argued that because ASCs provide many similar procedures that are also performed in HOPDs and often utilize the same equipment, supplies, and clinical labor in performing these procedures, the relative costs of performing the procedures should be similar, if not identical, in both settings. Moreover, the commenters generally agreed that creating an ASC payment system that parallels the OPPS would promote transparency across sites of service in the area of outpatient surgery and would also promote greater alignment and coordination between the OPPS and the revised ASC payment system, including providing for the annual updating of payment weights in the ASC payment system.

Some commenters requested that CMS apply different conversion factors to the OPPS relative payment weights for specific types of procedures to calculate their ASC payment rates, because they suggested that the OPPS relativity was not correct for some services provided in single specialty ASCs (for example, gastroenterology and pain management procedures). They believed that the OPPS APC weights, based on all hospital services rather than just surgical services, may be flawed and that additional analyses of relative hospital and ASC costs are needed. They recommended that CMS develop firm data on the differences between hospital outpatient and ASC costs and the magnitude of those differences for numerous services before finalizing significant changes in ASC payments for procedures. One commenter specifically discussed a study commissioned by MedPAC in which RAND found that no single outpatient surgical setting, ASCs or HOPDs, had consistently higher rates of patient characteristics that would be expected to increase facility costs. Analyses by another commenter found that among a subset of gastrointestinal (GI) procedures, the majority of surgical CPT codes describing those procedures received OPPS payments that were less than hospitals' median costs for the individual procedures.

Response: We appreciate the commenters' general support for basing the revised ASC payment system relative weights on the OPPS APC groups and their relative weights. As discussed in detail in section II.B. of this final rule, in its November 2006 report on ASC payment, the GAO found that the APC groups in the OPPS accurately reflect the relative costs of procedures performed in ASCs. The GAO analyses also demonstrated that there is less variation in the ASC setting between individual procedures' costs and the costs of their assigned APC groups than there is in the HOPD setting, and that when compared to the median cost of the same APC group, procedures performed in ASCs had substantially lower costs than those same procedures performed in HOPDs.

The GAO findings were based upon data for all procedures performed in ASCs in CY 2004, as reported by those ASCs responding to the GAO survey. In view of the GAO's confirmation that the APC groups accurately reflect the relative costs of these procedures performed in ASCs in the same way that they reflect the relative costs of the same procedures when they are performed in HOPDs, substantiating a key assumption underlying our proposal for the revised ASC payment system, we do not believe there is a compelling rationale for using different ASC conversion factors to develop payment rates for various procedures under the revised ASC payment system. Applying more than one ASC conversion factor to different procedures would imply that we believe the OPPS APC payment weight relativity is not applicable to the ASC setting, contrary to our proposal and the GAO study results. APCs currently serve as a ''grouper'' for the OPPS and, as such, the payment for any given procedure under the OPPS does not specifically reflect the cost of that procedure in any one facility. Instead, the APC relative payment weights under the OPPS are developed based on the median cost of all single claims for all procedures assigned to each APC. Prospectively established APC payment rates provide an averaging effect on OPPS payments for individual services. With the significant expansion of covered surgical procedures eligible for ASC payment that we are finalizing in this final rule for the revised ASC payment system as discussed in section III. of this final rule, in many cases where one service in an APC is an ASC procedure, most of the other procedures assigned to the same APC will also be paid in the ASC setting. Thus, under the revised payment system, ASCs generally will have the potential to provide a mix of individual services assigned to those APCs that is similar to the mix of OPPS procedures attributable to certain APCs and, in many cases, all of the procedures assigned to certain APCs under the OPPS will also be ASC covered surgical procedures. We believe this uniform approach under the revised ASC payment system is fully consistent with the recommendation of the PPAC that we apply payment policies consistently to both ASCs and HOPDs, as appropriate. It also generally treats procedures performed in ASCs consistently for purposes of developing ASC payment rates under the revised ASC payment system, in accordance with the PPAC recommendation that we adopt a systematic and adaptable means of fairly reimbursing ASCs for their services.

While information provided by the commenters clearly demonstrated that some specific groups of procedures would experience a significant decrease in payment under the revised ASC payment system as compared with the existing payment structure, we are not convinced that the information we received contradicts the premise of our proposal and the GAO findings that the relativity of costs observed in HOPDs could appropriately be used as the basis for the relative payment weights in the revised ASC payment system. We also continue to see no clinical basis that would support the differential relativity of costs for various procedures performed in the ASC or HOPD settings.

While applying a single conversion factor to the OPPS relative weights may result in decreases to ASC payments for some services commonly provided in single specialty ASCs, we also believe that this approach should result in facilities receiving more appropriate payments for ASC services in general, where those payments more accurately reflect the facility resources required for their performance. As discussed further in section IV.J. of this final rule, our final policy of a 4-year transition to phase in the revised ASC payment system should mitigate the potential disruption in care that could be associated with significant increases or decreases in payments for specific surgical procedures under the revised payment system. Individual ASCs will have a longer period of time to evaluate and potentially modify the breadth of

surgical procedures they provide based on the expanded list of covered surgical procedures and the final policies of the revised ASC payment system. Further, our final ASC policies for payment of device=intensive procedures and covered ancillary services that more closely align the ASC and OPPS systems may moderate the magnitude of differences between current ASC payments and those under the revised payment system for individual surgical procedures. We do not believe that it would be appropriate to modulate changes in payment under the revised system by differentially adjusting the payment weights or the conversion factor for various types of services because, consistent with the GAO recommendation, we believe the OPPS relative payment weights upon which the revised ASC payment system is based appropriately reflect the relativity in ASC resource costs associated with different surgical procedures. We believe that the final payment policies for the revised payment system result in appropriate and equitable payments, and thus, we see no rationale for applying adjustments that are counter to the principles of a prospective payment system.

After considering the public comments received, we are finalizing our proposal, without modification, to establish the relative payment weights under the revised ASC payment system for most covered surgical procedures based on their OPPS APC relative payment weights for the same calendar year, with application of a single ASC conversion factor to determine the national unadjusted ASC payment rates, as set forth in §§ 416.167 and 416.171. Several exceptions to this general policy are discussed elsewhere in this final rule, specifically in sections IV.C. and IV.E. of this preamble.

C. Packaging Policy

1. General Policy

Payment for a surgical procedure under both the current OPPS and ASC payment systems represents payment for a package of various items and services, all of which are directly related and required in order to perform the procedure. In both systems, we package into a single facility payment the payment for a bundle of direct and indirect costs incurred by the facility to perform the surgical procedure. These costs include, but are not limited to, use of the facility, including an operating suite or procedure room and recovery room; nursing, technician, and related services; administrative, recordkeeping, and housekeeping items and services; medical and surgical supplies and equipment; surgical dressings; and materials for anesthesia.

CMS currently applies different rules under the ASC payment system and the OPPS for determining whether payment for other items and services directly related to a surgical procedure is packaged into the facility payment for the associated surgical procedure or paid for separately. These other items and services include drugs, biologicals, contrast agents, implantable devices, and diagnostic services such as imaging. Currently, CMS packages payment for the costs for all drugs, biologicals, and diagnostic services, including imaging, into the ASC standard overhead amount for the surgical procedure with which these items and services are associated. Under the OPPS, CMS pays separately for some of these items and services, in addition to paying for the surgical procedure.

ASCs currently receive separate payment for prosthetic implants and implantable DME, as well as additional payment for NTIOLs. Laboratory services, physicians' services, and x-ray or diagnostic procedures may also be paid separately under other Medicare Part B fee schedules. Conversely, under the OPPS, payment for prosthetic implants and implantable DME is packaged into the OPPS payment for the surgical procedure performed to insert the implants. Payments for IOLs, anesthesia materials, and implantable surgical supplies, such as stents, mesh, guidewires, pins, and catheters, are packaged into the associated surgical procedure payment under both the OPPS and the ASC payment system.

In developing the August 2006 proposed rule for the revised ASC payment system, we considered several packaging options. First, we considered making no change to the current policy regarding items and services for which payment is packaged into the ASC payment. That is, we would continue under the revised ASC payment system to package into the ASC payment all services listed at existing § 416.61(a). In addition, we would continue to pay separately, sometimes under other fee schedules, for items and services such as: NTIOLs; prosthetic implants and implantable DME surgically inserted at an ASC (DMEPOS fee schedule); laboratory services (Clinical Diagnostic Laboratory Fee Schedule); physician services (MPFS); and x-ray or diagnostic procedures other than those directly related to performance of the surgical procedure (MPFS).

We also considered proposing to apply the OPPS packaging rules to the ASC payment system and to pay under the revised ASC payment system the same way we pay under the OPPS for items and services directly related to a surgical procedure. If we adopted this option, payment for certain imaging procedures, drugs, biologicals, and contrast agents directly related to performing a covered surgical procedure would not be packaged into the ASC payment for the procedure but would, instead, be paid separately. Conversely, payment for most surgically implanted devices and implantable DME would be packaged.

Each of the preceding two options has characteristics that are inconsistent with a fundamental principle of a prospective payment system, which is to base payment on large bundles of items and services so as to promote the efficient provision of services. To preserve as much as possible the elements of a prospective payment system within the revised ASC payment system, in the August 2006 proposed rule for the revised ASC payment system, we proposed a third option (71 FR 49648). That is, we proposed to continue the current policy of packaging payment for all direct and indirect costs incurred by the facility to perform a covered surgical procedure into the ASC payment for the procedure. This would include payment for all drugs, biologicals, contrast agents, anesthesia materials, and imaging services, as well as the other items and services that were proposed for packaging into the ASC surgical procedure payment as listed in proposed § 416.164(a). Proposed § 416.164(a) addressed the services for which payment was proposed to be included in the ASC payment for the covered surgical procedures, and proposed § 416.164(b) addressed those services that were proposed *not* to be included in the ASC payment for the covered surgical procedures.

In addition, we proposed to cease making separate payment for implantable prosthetic devices and implantable DME inserted surgically in an ASC. Instead, under the revised payment system, we proposed to package payment for implantable prosthetic devices and implantable DME when they are surgically inserted into the ASC payment for the associated covered surgical procedure, as we do under the OPPS.

However, we proposed to continue excluding from ASC payment for covered surgical procedures the other services addressed in § 416.164(b). That is, payment for items and services for which payment is currently made under other Part B fee schedules, with the exception of implantable prosthetic devices and implantable DME, would

not be included in the ASC payment for the surgical procedure. Payment for items and services, such as physicians' professional services; laboratory, x-ray or diagnostic procedures (other than those directly related to performance of the surgical procedure); nonimplantable prosthetic devices; ambulance services; leg, arm, back and neck braces; artificial limbs; and DME for use in the patient's home would not be included in the ASC payment for the covered surgical procedure.

We proposed this third option for a number of reasons. First, in the August 2006 proposed rule, we explained that this approach to packaging is most consistent with the principles of a prospective payment system. Second, we noted that we believe that ASCs generally treat a less complex and severely ill patient case-mix and, as a result, we believe that ASCs are less likely to provide, on a regular basis, many of the separately paid items and services that patients might receive more consistently in a hospital outpatient setting. Thus, in the August 2006 proposed rule, we concluded that we did not believe there is a need to pay for these services separately in ASCs, because that would unbundle some items and services that are currently packaged into the ASC facility services payment under the existing payment system, reduce incentives for cost-efficient delivery of services in ASCs, and increase the complexity of the revised ASC payment system.

Moreover, after analysis of OPPS claims for surgical procedures, we were unable to identify ancillary items and services that are repeatedly and consistently reported separately in association with specific ambulatory surgical procedures. Rather, the OPPS claims for surgical procedures were of two types: one group showed a broad range of items and services that were provided on the same day that a surgical procedure was performed in the HOPD, only some of which were likely to be directly related to the surgical procedure; the second group of claims revealed that many surgical procedures are only infrequently associated with ancillary items and services paid separately under the OPPS.

We sought comments in the August 2006 proposed rule (71 FR 49648) from ASC clinical and administrative staff, and from physicians who perform surgeries in ASCs, regarding nonsurgical ancillary services or items that are directly related to a surgical procedure that would be paid separately under the OPPS but that would be packaged under our proposal for the revised ASC payment system. We specifically requested that commenters provide data to indicate the frequency with which specific items and services are typically furnished in association with given procedures, the reasons why one patient might require the additional items and services whereas another patient would not, and the costs of those items and services relative to the other costs incurred to perform the associated surgery.

At its December 2006 meeting, the PPAC recommended that CMS apply any payment policies uniformly to ASCs under the revised ASC payment system and HOPDs under the OPPS. In the GAO Report (GAO–07–86) published on November 30, 2006, based upon its study of the 20 most frequently performed ASC procedures in CY 2004, the GAO found that many additional services were billed with surgical procedures in both the ASC and HOPD settings, but few resulted in an additional payment in one setting but not the other. In general, HOPDs were paid separately for some of the related additional services they billed with the procedures and, in the ASC setting, other Part B suppliers usually billed Medicare for those services and received payment for them. Multiple surgical procedures performed in one session were typically paid separately in both settings, occurring in similar proportions of cases and subject to the same 50-percent reduction policy for the procedure with the lower payment rate. Laboratory services were paid under the OPPS according to the Clinical Diagnostic Laboratory Fee Schedule (CLFS) rates and were billed by another Medicare Part B supplier when provided in the context of a surgical procedure performed in an ASC. Similarly, some radiology services were paid separately under the OPPS, but when those radiology services were performed with procedures provided in the ASC setting, those services generally were furnished and billed by another Part B supplier. Anesthesia services in both settings were usually billed by another Part B supplier. While individual drugs were billed under the OPPS for most procedures, the GAO found that none of those individual drugs were separately payable in the HOPD setting, just as their payment was packaged in ASCs. Thus, the GAO concluded that there were many similarities in the additional services billed in the ASC or HOPD settings with the top 20 ASC procedures. Furthermore, the GAO found that, in the context of the existing ASC payment system, CMS generally made separate payment for similar additional services in both settings, although sometimes to other Part B suppliers than to the ASCs themselves.

We also note that we proposed, consistent with section 141(b) of the Social Security Act Amendments of 1994, Public Law 103–432, to continue to provide adjustment to payment amounts for NTIOLs under the revised ASC payment system as set forth in Subpart G that we finalized in the CY 2007 OPPS/ASC final rule with comment period.

We received numerous comments on our proposed packaging policies for the revised ASC payment system. The commenters submitted many suggestions regarding the various approaches that they believed CMS should follow when finalizing the packaging policies for certain items and services under the revised ASC payment system. A summary of the comments and our responses follow.

Comment: In general, many of the commenters agreed with CMS' proposal to continue to package under the revised ASC payment system payment for various items and services that are currently packaged under the OPPS and the existing ASC payment system. They recommended that CMS adopt its proposal to provide packaged payment for the costs of many items and services that are directly related to the provision of surgical procedures, such as facility overhead, operating and recovery room use, nursing and technician services, administrative and housekeeping items and services, appliances and equipment, materials for anesthesia, IOLs, surgical dressings, supplies, splints, and casts. They acknowledged that the statute requires that payment to ASCs for IOLs (other than NTIOLs which receive a supplemental payment) must be packaged into the ASC payment for IOL insertion procedures. In addition, the commenters agreed that CMS should continue to exclude from payment as part of the ASC payment for covered surgical procedures some items and services that are paid under other Part B fee schedules, specifically the professional services of physicians and nonphysician practitioners paid under the MFPS and laboratory services paid under the CLFS. Further, the commenters agreed that CMS should continue to provide additional payment for NTIOLs.

The commenters who supported continued packaging of the items and services described above generally provided those recommendations in the context of their broader recommendation to apply the same packaging policies under the revised ASC payment system as under the

OPPS, because the proposed payment rates under the revised ASC payment system were based upon the OPPS payment groups. They argued that parallel packaging policies were most consistent with promoting transparency between the two systems and minimizing any payment incentives to shift sites of service for various procedures. They also believed that this approach is the most appropriate, given the proposal to base the rates in the revised ASC payment system on the OPPS relative payment weights, with application of a single conversion factor. The commenters asserted that consistent packaging policies would ensure that some payment was made for the costs of all items and services used by facilities in performing surgical procedures, and that there was no duplicate payment for these items under either the OPPS or the revised ASC payment system.

MedPAC supported the proposal to expand the ASC payment bundles in the revised payment system by packaging payment for implantable prosthetics and DME, but recommended that CMS make the payment bundles under the revised ASC payment system and the OPPS even more compatible by expanding the payment bundles in the OPPS. MedPAC noted that different bundling policies under the two payment systems may lead to different relative payment amounts in each setting, even if the base payment rates share the same relative values in both settings.

Response: We appreciate the commenters' support for continuing to package payment under the revised ASC payment system for those items and services that also receive packaged payment under the OPPS. The commenters' recommendations are consistent with the PPAC recommendation that we apply payment policies uniformly across the two systems. We note that any changes to the OPPS payment bundles are outside the scope of this final rule for the revised ASC payment system. Such changes would have to be proposed and finalized through the OPPS annual rulemaking cycle, and we will keep MedPAC's recommendations in mind for future OPPS updates.

As set forth in final § 416.163, payment is made under the revised ASC payment system for ASC services furnished in connection with covered surgical procedures. As set forth in revised § 416.2, ASC services include both facility services, which are defined as items and services that are furnished in connection with a covered surgical procedure performed in an ASC and for which payment is packaged into the ASC payment for the covered surgical procedure, and covered ancillary services, which are defined as those items and services that are integral to a covered surgical procedure and for which separate payment may be made under the revised ASC payment system.

After considering all public comments received, we are finalizing, with modification, our proposal to provide packaged payment for ASC facility services into the ASC payment for covered surgical procedures under the revised ASC payment system. That is, we will continue to identify as within the scope of ASC facility services for which payment is packaged into the payment for covered surgical procedures as set forth in final § 416.164(a) the following: nursing, technician, and related services; use of the facility where the surgical procedures are performed; laboratory testing performed under a Clinical Laboratory Improvement Amendments of 1988 (CLIA) certificate of waiver; drugs and biologicals for which separate payment is not allowed under the OPPS; medical and surgical supplies not on pass-through status under the OPPS; equipment; surgical dressings; implanted prosthetic devices and related accessories and supplies not on pass-through status under the OPPS, including IOLs; implanted DME and related accessories and supplies not on pass-through status under the OPPS; splints and casts and related devices; radiology services for which separate payment is not allowed under the OPPS and other diagnostic tests or interpretive services that are integral to a surgical procedure; administrative, recordkeeping, and housekeeping items and services; materials, including supplies and equipment for the administration and monitoring of anesthesia; and supervision of the services of an anesthetist by the operating surgeon. Under the revised ASC payment system, the above items and services fall within the scope of ASC facility services, and we will package payment for them into the ASC payment for the covered surgical procedure in order to promote efficient use of resources. We will continue to provide a payment adjustment for insertion of an IOL approved as belonging to a class of NTIOLs, for the 5-year period of time established for that class, as set forth in Subpart G and new § 416.172(g) for the revised ASC payment system.

As a modification to our proposal, under the final policy of the revised ASC payment system, covered ancillary services that are integral to a covered ASC surgical procedure will be allowed separate payment. These covered ancillary services, which are outside of the scope of ASC facility services defined at § 416.2 and described at new § 416.164(a) for which payment is packaged into the ASC payment for covered surgical procedures, are defined at § 416.2 and described at new § 416.164(b) as follows: brachytherapy sources; certain implantable items that have pass-through status under the OPPS; certain items and services that we designate as contractor-priced (payment rate is determined by the Medicare contractor) including, but not limited to, the procurement of corneal tissue; certain drugs and biologicals for which separate payment is allowed under the OPPS; and certain radiology services for which separate payment is allowed under the OPPS. Public comments on the proposed rule and our responses regarding these specific items and services are discussed later in this section.

We will consider to be outside the scope of ASC services, as set forth in § 416.164(c), the following items and services, including, but not limited to: physicians' services (including surgical procedures and all preoperative and postoperative services that are performed by a physician); anesthetists' services; radiology services (other than those integral to performance of a covered surgical procedure); diagnostic procedures (other than those directly related to performance of a covered surgical procedure); ambulance services; leg, arm, back, and neck braces other than those that serve the function of a cast or splint; artificial limbs; and nonimplantable prosthetic devices and DME.

2. Policies for Specific Items and Services

Although in the August 2006 proposed rule we proposed to package payment for a broad array of items and services under the revised ASC payment system into the ASC payment for a covered surgical procedure as described earlier in this section, we solicited and received many public comments regarding our proposed treatment of those items or services that are directly related to a surgical procedure and that would be paid separately under the OPPS but that were proposed for packaging under the revised ASC payment system. We address those specific comments and provide our responses below.

Comment: A number of commenters indicated that, if the goal of the revised ASC payment system is to create a payment system that is based on OPPS relative weights and payment rates, then the packaging policy for ASCs should be

based on the same inclusions as those found under the OPPS. They suggested that following the OPPS payment policies under the revised ASC payment system would promote parity in payments between HOPDs and ASCs and, thereby, eliminate inappropriate incentives to base care decisions on payment considerations. Specifically, a number of commenters were concerned about payment differences that could arise between HOPDs and ASCs when services outside the CPT surgical range were provided in an ASC in conjunction with a covered surgical procedure on the ASC list. They noted that when HOPDs provide some of these services and items, they generally receive separate payment for them.

Response: Because we received numerous comments on various issues related to the proposed packaging of payment for specific items and services under the revised ASC payment system where the proposed packaging policy differs from the OPPS payment policy, we address them separately in the following sections:

a. Radiology Services

Under the existing ASC payment system, we define a surgical procedure as any procedure described within the range of Category I CPT codes that the AMA defines as ''surgery'' (CPT codes 10000–69999). In the August 2006 proposed rule, we indicated that we would continue this standard (71 FR 49636). Because the HCPCS codes that describe radiology services are outside of the CPT surgical range, payment for radiology services that are directly related to surgical procedures has been packaged into the ASC payment for the covered surgical procedure under the existing ASC payment system. The current regulatory definition of an ASC does not allow the ASC and another entity to mix functions and operations in a common space during concurrent or overlapping hours of operation. That is, the two facilities must be separated by time (different hours of operation) or the other entity may operate in the ASC's space when the ASC is not operating in that space. Historically, we have made an exception to this rule when there is a need for imaging services during the course of a covered surgical procedure in progress in an ASC under the existing ASC payment system. In that case, an Independent Diagnostic Testing Facility (IDTF) sharing the space with the ASC (normally at a different time) may conduct the required radiology service outside of its normal business hours, as needed, and receive Medicare payment for those services. Specifically, under the existing ASC payment system if an ASC enrolls in the Medicare program as an IDTF and bills as that supplier when furnishing a radiology service that is reasonable and necessary and directly related to and furnished in conjunction with a covered surgical procedure, the IDTF may bill and receive payment under the MPFS for imaging and guidance services, even though they are being provided during the ASC's designated hours.

The GAO Report on ASC payment released on November 30, 2006 confirmed that separate payment is commonly made to another Part B supplier for these radiology services provided in association with surgical procedures in ASCs. Currently, radiology services provided in association with surgical procedures paid under the OPPS are either packaged or paid separately through an OPPS facility payment. We received a number of comments regarding our proposal to package payment for radiology services into payment for their associated surgical procedures under the revised ASC payment system. A summary of the comments and our responses follow.

Comment: Numerous commenters opposed CMS' proposed policy of packaging payment for radiology services directly related to a surgical procedure into the ASC payment for the associated covered surgical procedure. Some commenters requested that CMS continue to follow the existing practice regarding separate payment for radiology services provided in association with surgical procedures under the current ASC payment system. That is, they recommended that CMS permit continued separate payments for such radiology services to IDTFs if the ASCs are enrolled as IDTFs and bill for the services as that type of supplier. On the other hand, other commenters believed that ASC enrollment as an IDTF supplier was unnecessarily administratively burdensome for those ASCs that only are providing radiology services necessary for the safe provision of surgical procedures. These commenters requested that CMS adopt the OPPS payment policy for radiology services under the revised ASC payment system, which either provides separate payment or packages their payment into the OPPS payment for the surgical procedure associated with the radiology services. They indicated that following the OPPS payment policy under the revised ASC payment system would promote parity in payments between HOPDs and ASCs, especially because the relative payment weights used in both payment systems were linked. In contrast, MedPAC recommended that CMS address the potentially inconsistent payment policies by creating larger payment bundles under the OPPS, consistent with CMS' proposal to package payment for radiology services directly related to a surgical procedure under the revised ASC payment system.

Response: We believe that appropriate radiology services may be necessary for the safe performance of covered surgical procedures that are provided to Medicare beneficiaries in ASCs, and we realize that under the current system, payments for many of these services are made to other Part B suppliers even though the radiology services are integral to the surgical procedures provided by ASCs. We have come to believe that the most prudent method for providing accurate payment for the ancillary radiology services that are integral to, and required for the successful performance of, covered surgical procedures is to provide separate payment for certain radiology services under our final policy for the revised ASC payment system. Payment for the costs of radiology services that are separately paid under the OPPS is not included in the OPPS payment weights upon which the revised ASC payment system is based so, under our proposal, ASCs may not have received the most appropriate payment for the costs of these associated radiology services. We will, therefore, provide separate payment to ASCs for certain ancillary radiology services when they are integral to the performance of a covered surgical procedure billed by the ASC on the same day, provided that separate payment for the radiology service would be made under the OPPS.

We specify that a radiology service is integral to the performance of a covered surgical procedure if it is required for the successful performance of the surgery and is performed in the ASC immediately preceding, during, or immediately following the covered surgical procedure. Based on our analysis of the OPPS data, we believe that, in most cases, a radiology service that is separately payable under the OPPS that is performed in the ASC on the same day as a covered surgical procedure will be provided integral to a covered surgical procedure, and the ASC will be able to receive separate payment for the service as a covered ancillary service. The separate ASC payments for these radiology services will be made at the lower of: (1) The amount calculated according to the standard methodology of the revised ASC payment system; or (2) the MPFS nonfacility practice expense amount for the service (specifically, for the

technical component (TC) if the service's HCPCS code is assigned a TC under the MPFS). This is similar to our final payment policy for covered office-based surgical procedures added to the ASC list in CY 2008 or later years. Payment for the costs of the facility resources associated with the radiology service would have been made to IDTFs under the existing ASC payment system at the MPFS nonfacility practice expense amount. Therefore, we believe the revised payment system beginning January 1, 2008, will both ensure appropriate and equitable payment for covered ancillary radiology services integral to covered surgical procedures and not provide a payment incentive for migration of services from physicians' offices or IDTFs to ASCs.

This final policy will not encourage the proliferation of ASCs enrolling as IDTF suppliers, a practice which could lead to even greater future increases in the volume of diagnostic imaging services than those recently observed for such services to Medicare beneficiaries. CMS defines an IDTF in § 410.33 as an entity independent of a hospital or physician's office in which diagnostic tests are performed by licensed or certified nonphysician personnel under appropriate physician supervision. ASCs are distinct entities that operate exclusively for the purpose of providing surgical services to patients not requiring hospitalization (§ 416.2). As discussed earlier, an ASC that is also enrolled as an IDTF must maintain separate, exclusive hours of operation from those of the IDTF, and there may be no overlap in the hours of operation of the two entities.

In order to bill for diagnostic tests, the IDTF must be enrolled as such with Medicare and meet specific requirements regarding its structure, ownership and, operation as set forth in § 410.33. As stated in § 416.49, an ASC is responsible for obtaining radiologic services from a Medicare approved facility to meet the needs of its patients and, as confirmed by the GAO in its report released on November 30, 2006, many ASCs currently provide those radiology services in association with covered surgical procedures through other Part B suppliers, specifically IDTFs.

Under the revised payment system, there is no incentive for ASCs that provide only those radiology services that are integral to the performance of covered surgical procedures to also enroll as IDTFs. In contrast to current policy, under the revised system, payment will be made to the ASC for radiology services that are furnished integral to a covered surgical procedure. Payment will no longer be permitted to IDTFs for covered ancillary radiology services furnished integral to covered surgical procedures in ASCs. Because ASCs are distinct entities that operate exclusively to provide ambulatory surgical services, we would not expect that IDTFs sharing space with ASCs would be billing for any services for a patient receiving those services in an ASC on the date of a covered surgical procedure because all such services would be integral to the surgical procedure.

Under the final policy, only the ASC can receive payment for the facility resources required to provide the ancillary radiology services. IDTFs would not be able to bill for radiology services integral to the performance of a covered surgical procedure, an existing practice which commenters claimed is unnecessarily administratively burdensome because it requires ASCs that are only providing radiology services related to the safe performance of surgical procedures also to enroll as IDTF suppliers under Medicare. As of January 1, 2008, we are no longer permitting the exception that has allowed billing by IDTFs for required radiology services provided in ASCs during the course of covered ASC surgical procedures. We are also not allowing any other suppliers to bill for the technical component of radiology services provided in ASCs that are integral to the performance of an ASC covered surgical procedure. Only ASCs will receive separate payment for the technical component of those radiology services that are separately payable under the OPPS to ensure that no duplicate payment is made. This policy will ensure that packaged or separate payment is made to ASCs for all radiology services integral to the performance of covered surgical procedures, thereby providing appropriate payment to ASCs for those radiology services that are essential to the delivery of safe, high quality surgical care.

In summary, under the revised ASC payment system, we are adopting the OPPS payment status for radiology services and will pay separately, at the lower of the amount developed according to the standard methodology of the revised ASC payment system or the MPFS nonfacility practice expense amount, for ancillary radiology services designated as separately payable under the OPPS when those radiology services are integral to the performance of a covered surgical procedure provided on the same day and billed by the ASC. Similarly, we will package payment for those services that are designated as packaged under the OPPS into the payment for the covered surgical procedure. The separate national, unadjusted ASC payment for a covered ancillary radiology service would be based either upon the OPPS payment weight for the APC group of the radiology service, with application of the uniform ASC conversion factor, or upon the MPFS nonfacility practice expense relative value units (RVUs) for the service. Payment under the revised ASC payment system for these covered ancillary radiology services would be subject to geographic adjustment, like payment for covered surgical procedures. IDTFs would no longer be able to receive payment for ancillary radiology services that are integral to the performance of a covered surgical procedure for which the ASC is billing Medicare. This policy is consistent with the PPAC's request for uniform payment policies across the OPPS and the revised ASC payment system and is responsive to MedPAC's concern about creating different payment bundles for ASCs and HOPDs. Because the packaging status of radiology services under the revised ASC payment system will parallel their treatment under the OPPS, any changes to the packaging of radiology services under the OPPS that would alter the OPPS payment bundles would also occur under the revised ASC payment system. Therefore, we believe that this approach is fully consistent with the recommendations of MedPAC and the PPAC in applying payment policies consistently to both ASCs and HOPDs.

Radiology services include all Category I CPT codes in the radiology range established by CPT, from 70000 to 79999, and Category III CPT codes and Level II HCPCS codes that describe radiology services that crosswalk or are clinically similar to procedures in the radiology range established by CPT. This revised ASC payment system policy for each calendar year will apply to all radiology services that are separately payable under the OPPS in that same calendar year. An illustrative listing that includes all radiology services that are separately payable under the CY 2007 OPPS, which will be proposed for updating and then finalized in the CY 2008 OPPS/ASC proposed and final rules, respectively, can be found in Addendum BB to this final rule. Covered ancillary radiology services are assigned to payment indicator ''Z2'' (Radiology service paid separately when provided integral to a surgical procedure on ASC list; payment based on OPPS relative payment weight) or ''Z3'' (Radiology service paid separately when provided integral to a

surgical procedure on ASC list; payment based on MPFS nonfacility PE RVUs). ASC payment rates for these radiology services will be determined according to the standard methodology of the revised ASC payment system as discussed further in section V. of this final rule, or according to the MPFS nonfacility practice expense amount, whichever payment amount is lower. This final policy is set forth in §§ 416.171(d) and 416.167(b)(3).

After consideration of all public comments received, we are finalizing a policy to provide separate payment under the revised ASC payment system for those ancillary radiology services separately paid under the OPPS that are integral to the performance of covered surgical procedures for which the ASC bills Medicare. This final policy contrasts with our proposal which would have provided packaged payment for all ancillary radiology services. Instead, under the revised ASC payment system, we will provide separate payment for those ancillary radiology services that are separately paid under the OPPS when they are provided on the same day as, and integral to, the performance of a covered surgical procedure in an ASC. Payment for ancillary radiology services that are packaged under the OPPS will be packaged under the revised ASC payment system, and these services are identified in Addendum BB to this final rule with payment indicator ''N1'' (Packaged service/item; no separate payment made).

Separately paid radiology services are considered to be covered ancillary services. ASC payment for these radiology services will not be subject to the 4-year transition (see section IV.J. of this final rule) because the services have never received separate payment under the existing ASC payment system. The 4-year transition applies only to those services that receive separate payment under the existing CY 2007 ASC payment system. We also are revising proposed § 416.164(a) and (b) to reflect this final policy.

b. Brachytherapy Sources

As we stated in the August 2006 proposed rule, under the existing ASC payment system, a single payment is made to an ASC for all facility services furnished by the ASC in connection with a covered surgical procedure. However, a number of services and related items covered under Medicare may be furnished in an ASC, where these items and services are not considered to be facility services and, therefore, are not paid through the ASC payment for the covered surgical procedure. These items and related services may be covered and paid to other Part B suppliers, such as physicians. Such is sometimes the case with payment for brachytherapy sources implanted in ASCs, where the needles and catheters to implant the sources are implanted during surgical procedures that are on the ASC list. Under the existing ASC payment system, while payment is not made for brachytherapy sources to ASCs, these sources may be separately paid at contractor-priced rates by Medicare contractors under the MPFS to physicians who may also be billing the CPT codes for application of the brachytherapy sources in ASCs. Contractor-priced rates are those payment rates for certain items or services that are individually established by each Medicare contractor for payment of claims submitted to them. Brachytherapy source application codes, which are included in the radiology section of the CPT code book, are not on the existing ASC list because they do not fall within the CPT surgical range and, therefore, are not defined as surgery for purposes of ASC payment. While we did not explicitly discuss payment for brachytherapy sources in the August 2006 proposed rule, we received a number of comments regarding payment for brachytherapy sources under the revised ASC payment system. A summary of the comments and our responses follow.

Comment: Several commenters suggested that CMS pay separately for brachytherapy sources under the revised ASC payment system when they are implanted in ASCs. Other commenters recommended that CMS continue to pay separately under the MPFS for brachytherapy sources provided in ASCs. The commenters requested that CMS allow separate payment for brachytherapy sources to facilitate the treatment of cancer patients who have brachytherapy sources implanted in ASCs. As an example, they described a closely related sequence of procedures performed in the ASC setting for the brachytherapy treatment of patients with prostate cancer, including the placement of needles and catheters, reported with a CPT code on the ASC list; the application of brachytherapy sources, reported with a CPT code not on the ASC list; and the provision of numerous brachytherapy sources, reported with specific Level II HCPCS codes in the OPPS setting. The commenters noted that it would be appropriate to implant brachytherapy sources in ASCs for the treatment of prostate cancer, because the surgical procedure to insert the required needles and catheters is currently on the ASC list and, in the case of prostate cancer in particular, patients must have the sources implanted in the same session where the needles or catheters are placed. The commenters pointed out that each of these related items and services is separately paid under the OPPS, so the base OPPS payment weights for the surgical needle and catheter placement procedures do not provide payment for the brachytherapy source application or the sources themselves. They noted that all of these individual procedures and items are required to provide the full brachytherapy treatment.

Response: Based on the comments received and our review of the issue, we have concluded that the most appropriate policy under the revised ASC payment system is to provide separate payment to ASCs for the brachytherapy sources as covered ancillary services implanted in conjunction with covered surgical procedures billed by ASCs. Further, as evidenced by our decisions regarding payment for other covered ancillary services under the CY 2008 revised ASC payment system, our intention is to maintain consistent payment and packaging policies across HOPD and ASC settings for covered ancillary services that are integral to covered surgical procedures performed in ASCs. Therefore, consistent with our policy to pay separately for some drugs, biologicals, and radiology services as covered ancillary services, we also believe that adopting a payment policy consistent with the OPPS for payment of brachytherapy sources is reasonable and appropriate to ensure that the comprehensive brachytherapy service can be provided by ASCs. The application of the brachytherapy sources is integrally related to the surgical procedures for insertion of brachytherapy needles and catheters, which are appropriate for performance in ASCs. There is a statutory requirement that the OPPS establish separate payment groups for brachytherapy sources related to their number, radioisotope, and radioactive intensity, as well as for stranded and non-stranded sources as of July 1, 2007, OPPS procedure payments do not include payment for brachytherapy sources. We agree with both MedPAC and the PPAC that consistent payment bundles between the two payment systems are desirable. Therefore, under the revised ASC payment system, we will pay ASCs separately for brachytherapy sources when they are provided in association with a surgical

procedure not excluded from ASC payment and billed by the ASC on the same day. The ASC brachytherapy source payment rate for a given calendar year will be the same as the OPPS payment rate for that year or, if specific OPPS prospective payment rates are unavailable, ASC payments for brachytherapy sources will be contractor-priced. The ASC brachytherapy source payment rate will be established at its OPPS payment rate, without application of the ASC budget neutrality adjustment factor to the OPPS conversion factor. In addition, consistent with the payment of brachytherapy sources under the OPPS, the ASC payment rates for brachytherapy sources will not be adjusted for geographic wage differences. Because brachytherapy sources are implantable devices with relatively fixed costs for which we would not expect efficiencies that would permit ASCs to acquire them at lower costs than HOPDs, we believe it is most appropriate to pay for the brachytherapy sources at the same rates as the OPPS if possible. A list of brachytherapy sources recognized under the CY 2007 OPPS, for which payment according to the statute is made at charges reduced to cost under the CY 2007 OPPS, is included in Table 3 below, as well as in Addendum BB to this final rule, specifically those codes assigned to payment indicator ''H7'' (Brachytherapy source paid separately when provided integral to a surgical procedure on ASC list; payment contractor-priced).

An updated list will be proposed and finalized for CY 2008 in the CY 2008 OPPS/ASC proposed and final rules, respectively, as will the CY 2008 OPPS payment rates for brachytherapy sources. We also may establish new brachytherapy source HCPCS codes, revise the existing HCPCS codes, or both, for separate payment on a quarterly basis under the revised ASC payment system, as we currently do under the OPPS, in order to keep the two payment systems aligned. In addition, we note that the CPT codes for the application of brachytherapy sources are radiology services in the radiology range of Category I CPT codes, so they would also be separately paid in ASCs under the revised ASC payment system if provided in association with a covered surgical procedure, as described in section IV.C.2.a. of this final rule.

TABLE 3.—BRACHYTHERAPY SOURCES PAID SEPARATELY UNDER THE CY 2007 OPPS AS OF APRIL 1, 2007

HCPCS code	Long descriptor
A9527	Iodine I–125, sodium iodide solution, therapeutic, per millicurie.
C1716	Brachytherapy source, Gold-198, per source.
C1717	Brachytherapy source, High Dose Rate Iridium-192, per source.
C1718	Brachytherapy source, Iodine-125, per source.
C1719	Brachytherapy source, Non-High Dose Rate Iridium-192, per source.
C1720	Brachytherapy source, Palladium-103, per source.
C2616	Brachytherapy source, Yttrium-90, per source.
C2633	Brachytherapy source, Cesium-131, per source.
C2634	Brachytherapy source, High Activity, Iodine-125, greater than 1.01 mCi (NIST), per source.
C2635	Brachytherapy source, High Activity, Palladium-103, greater than 2.2 mCi (NIST), per source.
C2636	Brachytherapy linear source, Palladium-103, per 1MM.
C2637	Brachytherapy source, Ytterbium-169, per source.

After consideration of all public comments received, we are finalizing a policy to provide separate payment under the revised ASC payment system for ancillary brachytherapy sources implanted in association with the performance of a covered surgical procedure that is billed by the ASC to Medicare. Under our proposal, no payment would have been made to ASCs for the implantation of brachytherapy sources in conjunction with covered surgical procedures, although payment could have been made to other Part B suppliers. Under this final policy, ASC payment for brachytherapy sources as covered ancillary services in a calendar year will be made at the OPPS rates for that same year, or if OPPS rates are unavailable, ASC payment will be made at contractor-priced rates. Payment rates for brachytherapy sources will not be developed through application of the uniform ASC conversion factor, and they will not be subject to the geographic adjustment. Accordingly, we are revising proposed § 416.164(a) and (b) to reflect this final policy.

We would also caution that we expect ASCs to follow all Federal, State, and local safety requirements regarding the proper handling and disposal of these radioactive substances. ASCs that cannot comply with those guidelines should not provide brachytherapy services. ASC policies for the proper handling and disposal of brachytherapy sources also should include accommodations for the appropriate disposal of sources that were not implanted.

c. Drugs and Biologicals

In the August 2006 proposed rule, we indicated that under the existing ASC payment system, payment for all drugs and biologicals (whether packaged or separately payable under the OPPS) is packaged into the ASC payment for the covered surgical procedure. We proposed to continue that policy under the revised ASC payment system. Under the OPPS, CMS pays separately for all pass-through drugs and biologicals, while nonpass-through drugs and biologicals are either packaged or paid separately under the OPPS, depending on whether or not their cost is equal to or less than $55 per day or exceeds $55 per day, respectively, for CY 2007. We received a number of comments on our proposal to package payment for all drugs and biologicals into the payment for their associated surgical procedures under the revised ASC payment system. A summary of the comments and our responses follow.

Comment: While the commenters generally agreed with CMS' proposal to package payment for inexpensive drugs into the ASC payment for the covered surgical procedure under the revised ASC payment system consistent with current practice, many commenters objected to CMS' proposed packaging of payment for expensive drugs and biologicals and urged CMS to pay separately for them. Moreover, several commenters requested that CMS adopt the OPPS payment policies for both pass-through and nonpass-through drugs and biologicals under the revised ASC payment system. They indicated that following the OPPS payment policies under the revised ASC payment system would promote parity in

payments between HOPDs and ASCs and, thereby, eliminate inappropriate incentives to base care decisions on payment considerations. Specifically, a number of commenters were concerned about payment differences that could arise between HOPDs and ASCs when items were provided in an ASC in conjunction with a covered surgical procedure on the ASC list. They noted that when HOPDs provide pass-through and many nonpass-through drugs and biologicals, they generally receive separate payment for these items; therefore, the base OPPS payment rates contain no payment for these drugs and biologicals.

Several commenters expressed particular concern regarding CMS' proposal to package payment for expensive biologicals into the associated surgical procedure's ASC payment. These commenters cited surgical procedures for the application of skin substitutes, newly proposed as additions for ASC payment in CY 2008, as examples of relatively inexpensive surgical procedures that require the use of costly biologicals, for which separate payment is made under the OPPS. They argued that the additions of the procedures to the ASC list would not provide meaningful access to those services in ASCs, given that the relatively low procedure payments proposed for the revised ASC payment system included no payment for those necessary biologicals. The commenters further added that not paying separately for expensive drugs and biologicals in ASCs could result in a shift of services from ASCs to HOPDs or physicians' offices, where they are separately paid, even though ASCs could be the most appropriate clinical setting for care. Some commenters suggested that CMS select specific drugs and biologicals for separate payment under the revised ASC payment system based on specific criteria such as their cost, required use, or association with specific surgical procedures not excluded from ASC payment.

Response: After considering all the comments related to payment for drugs and biologicals, we agree with the commenters that the revised ASC payment system should provide separate payment for relatively costly drugs and biologicals that are integral to covered surgical procedures that are billed by ASCs and whose payments are not packaged into the base OPPS payment rates. Therefore, effective January 1, 2008, we will pay separately for all OPPS pass-through and nonpass-through drugs and biologicals that are separately paid under the OPPS, when they are provided in association with a covered surgical procedure that is billed by the ASC to Medicare.

Based on the November 30, 2006 GAO Report on ASC payment, we recognize that historically common ASC procedures generally used drugs that are packaged under the OPPS, but we believe that the significant expansion of the procedures eligible for payment under the revised ASC payment system, in addition to evolving surgical practice, may necessitate the use of different drugs and biologicals in ASCs in the future. To ensure appropriate access to all surgical procedures that are safe for performance in ASCs, we believe it is prudent under the revised ASC payment system to provide separate payment in the ASC setting for drugs and biologicals that are integral to covered surgical procedures for which the ASC is billing, when the costs of those drugs and biologicals were not included in developing the base procedure payment weights under the OPPS. We do not believe it would be appropriate to select only a subset of these drugs and biologicals that are separately payable under the OPPS because we do not see a clear rationale for doing so.

We specify that a drug or biological is integral to the performance of a covered surgical procedure if it is required for the successful performance of the surgery and is provided in the ASC immediately preceding, during, or immediately following the covered surgical procedure. Based on our analysis of OPPS data, we believe that, in most cases, a drug or biological that is separately payable under the OPPS that is provided in an ASC on the same day as a covered surgical procedure will be provided as integral to the covered surgical procedure, and the ASC will be able to receive separate payment for the drug or biological as a covered ancillary service.

The payments for separately payable drugs and biologicals under the revised ASC payment system for a calendar year will be equal to the payment rates developed according to the payment methodology used in the OPPS for that same year, without the application of the ASC budget neutrality adjustment to the OPPS conversion factor. Because OPPS payment for separately paid drugs and biologicals is provided at the average hospital acquisition cost and is not based upon the application of the OPPS conversion factor to relative payment weights, we believe the OPPS rates should also reflect the typical acquisition cost of these products in the ASC facility setting as well. The OPPS currently relies on the average sales price (ASP) methodology to establish payment rates for many separately paid drugs and biologicals, and ASP data are based upon manufacturers' reports of all drug sales, including those to different types of facilities and physicians' offices. The ASP methodology is also utilized to establish the physician's office payment for drugs and biologicals. Therefore, we believe that aligning the ASC payment methodology with the OPPS payment for these covered ancillary services is a consistent and logical approach to setting their ASC payment rates, and we will not apply the ASC budget neutrality adjustment to establish the ASC payment rates. Comparable to their treatment under the OPPS, the ASC payment for separately paid drugs and biologicals will also not be subject to the geographic wage adjustment. In addition, ASC payment for drugs and biologicals that are not separately payable under the OPPS will be packaged into the payments for the covered surgical procedures with which they are administered, consistent with the current OPPS payment methodology.

As noted above, under the CY 2007 OPPS, payment for separately payable nonpass-through drugs and biologicals is made according to the ASP methodology, and is generally equal to the ASP plus 6 percent in CY 2007, the same as the physician's office payment. Payment for pass-through drugs and biologicals is set at the rate under the Competitive Acquisition Program (CAP) for Part B drugs or, if the drug is not included in the CAP, at the rate established by the ASP methodology and generally equal to the ASP plus 6 percent. A list of the drugs and biologicals that are separately paid under the CY 2007 OPPS, along with their payment rates as of April 1, 2007, is included in Addendum BB to this final rule, specifically those codes assigned to payment indicator ''K2'' (Drugs and biologicals paid separately when provided integral to a surgical procedure on ASC list; payment based on OPPS rate). Drugs and biologicals for which payment is packaged under the CY 2007 OPPS are also listed in Addendum BB, where they are assigned to payment indicator ''N1'' (Packaged service/item; no separate payment made).

The CY 2008 payment status and payment rates for drugs and biologicals will be proposed and finalized in the CY 2008 OPPS/ASC proposed and final rules, respectively. We also may establish new HCPCS codes for separately payable drugs and plan to update payment rates for drugs and biologicals based on new ASP information on a quarterly basis under

the revised ASC payment system, as we currently do under the OPPS, in order to keep the two payment systems aligned. This final policy is consistent with the recommendation of the PPAC and the comments of MedPAC to align the payment bundles under the OPPS and ASC payment systems.

In summary, after consideration of all public comments received, we are finalizing a policy to provide separate payment under the revised ASC payment system for drugs and biologicals that are separately paid under the OPPS, when those items are integral to the performance of a covered surgical procedure for which the ASC is billing. We proposed to provide packaged payment for all drugs and biologicals under the revised ASC payment system through the ASC payment for the covered surgical procedure. In contrast, this final policy will provide separate payment for those drugs and biologicals that are separately paid under the OPPS, when those items are provided on the same day as and integral to the performance of a covered surgical procedure in an ASC. Separate ASC payment for these drugs and biologicals will be made at the OPPS payment rate for the same calendar quarter. ASC payment for those drugs and biologicals that are integral to the performance of a covered surgical procedure and whose payment is packaged under the OPPS will receive packaged payment under the revised ASC payment system. Payment rates for drugs and biologicals will not be developed through application of the uniform ASC conversion factor, and they will not be subject to the geographic adjustment. We also are revising proposed § 416.164(a) and (b) to reflect this final policy.

d. Implantable Devices With Pass-Through Status Under the OPPS

In the August 2006 proposal for the revised ASC payment system, we proposed to pay for all implantable devices as part of the ASC payment for the covered surgical procedure, thereby packaging payment for all devices except for the additional ASC adjustment for NTIOLs. Under this proposal, payment for devices included in those device categories with pass-through status under the OPPS would also be packaged. In contrast, pass-through status under the OPPS provides payment for a device included in the pass-through device category on a claim-specific basis at the hospital's charges reduced to cost. That is, fiscal intermediaries apply the hospital's overall cost-to-charge ratio from the hospital's last submitted cost report to the submitted charges on the claim and pay the resulting amount on a claim-specific basis. A device offset amount is applied, if appropriate, to take into consideration the predecessor device payment already packaged into the OPPS payment for the associated implantation procedure, in order to ensure no duplicate payment. The predecessor device is the device that would have been used in the procedure if the pass-through device had not been implanted and for which the historical cost is packaged into the payment for the implantation procedure.

Under the existing ASC payment system, payment for OPPS designated pass-through devices is either packaged into the ASC payment for the covered surgical procedure or, if the device is implantable DME or an implantable prosthetic, separately paid under the DMEPOS fee schedule, independent from the ASC payment for the associated surgical procedure. We received many comments regarding our proposal to package payment for devices with OPPS pass-through status into payment for their associated surgical procedures under the revised ASC payment system. A summary of the comments and our responses follow.

Comment: Many commenters encouraged us to expand the OPPS pass-through program to the revised ASC payment system, to provide separate payment for those devices whose payments, in whole or in part, were not packaged into the base OPPS payment weights upon which the revised ASC payment system would be based. These commenters questioned how ASCs would be paid appropriately for devices that are paid separately under the OPPS as pass-through devices at the hospital's charges reduced to cost by the hospital's overall cost-to-charge ratio. The commenters did not believe it would be appropriate to provide payment for devices with pass-through status under the OPPS packaged into the ASC payment for the associated surgical procedure, when there are either no costs associated with those devices packaged into the base OPPS procedure payment weights or inadequate costs associated only with predecessor devices packaged into the base OPPS weights.

The commenters added that many of the OPPS designated pass-through devices that are implanted in ASCs are expensive, and their cost would not be adequately reflected in the ASC payment for the covered surgical procedure. They believed that the proposed policy would result in little access to these new technologies in the ASC setting, despite the fact that the associated surgical procedures for their implantation are appropriate for ASC payment. They pointed out that only devices that demonstrate significant clinical improvement are provided pass-through status under the OPPS; hence, Medicare beneficiaries would be unable to receive the most clinically beneficial procedures in ASCs.

Several commenters requested that CMS not provide ASC payments for many surgical procedures that use implantable devices, generally for patient safety reasons, whether pass-through devices are used or not.

Response: While the OPPS pass-through program is a statutory requirement of the OPPS under section 1833(t)(6) of the Act and, therefore, not specifically applicable to the revised ASC payment system, we agree with commenters that similar device payment policies for these devices under the OPPS and the revised ASC payment system are most appropriate to ensure access to procedures implanting these clinically beneficial devices in ASCs. Specifically in the case of OPPS pass-through devices, the costs of the devices are not fully packaged into the OPPS payment weights upon which the revised ASC payment system is based because the devices are separately paid under the OPPS. We agree with commenters that if payments to ASCs for the associated surgical implantation procedures are inadequate to cover the costs of these beneficial devices, then ASCs will not offer the procedures implanting these devices and beneficiary access to these effective devices will thereby be limited to other sites for the services.

When we examined the three device categories that currently have pass-through status under the CY 2007 OPPS, specifically C1820 (Generator, neurostimulator (implantable), with rechargeable battery and charging system), C1821 (Interspinous process distraction device (implantable)), and L8690 (Auditory osseointegrated device, includes all internal and external components), we noted that the surgical procedures associated with both C1820 and L8690 are currently payable in the ASC setting. We continue to believe that the procedures associated with these pass-through device categories are safe for ASC performance and, as such, the procedures will be paid under the revised ASC payment system. We remind the public that the list of device categories with pass-through status under the OPPS is updated quarterly, with the addition of new pass-through device categories, if applicable, and that the dates for the expiration of pass-through payment for device categories

are proposed and finalized during the OPPS annual rulemaking cycle. Only device categories C1821 and L8690 will continue with pass-through status under the CY 2008 OPPS, but there may be additional device categories established in the future that will have pass-through status during all or a portion of that calendar year. Under the OPPS, claim-specific device pass-through payment is calculated based on the device charge reduced to cost by application of the overall hospital cost-to-charge ratio and, if applicable, the resulting device cost is further subject to a payment reduction (device offset) that is equivalent to the device cost for predecessor devices already included in the APC median cost for the associated surgical procedure. This ensures that the OPPS does not provide duplicate payment for any portion of an implanted device with pass-through status. Of the three device categories currently with pass-through status under the OPPS, only one device category (C1820) has an associated device offset due to the costs of the predecessor nonrechargeable implantable neurostimulators already packaged into the base APC payment weights for neurostimulator implantation procedures.

Commenters have persuaded us that, under the revised ASC payment system, it is appropriate to provide separate payment for devices that are included in device categories with pass-through status under the OPPS. A list of the OPPS pass-through device categories as of April 1, 2007 is provided in Table 4 below, and their HCPCS codes are also included in Addendum BB to this final rule, where they are assigned to payment indicator ''J7'' (OPPS pass-through device paid separately when provided integral to a surgical procedure on ASC list; payment contractor-priced). Implantable devices that received packaged payment because they do not have OPPS pass-through status are also listed in Addendum BB to this final rule, where they are assigned to payment indicator ''N1'' (Packaged service/item; no separate payment made).

TABLE 4.—ACTIVE OPPS PASS-THROUGH DEVICE CATEGORIES UNDER THE CY 2007 OPPS AS OF APRIL 1, 2007

HCPCS code	Long descriptor
C1820	Generator, neurostimulator (implantable), with rechargeable battery and charging system.
C1821	Interspinous process distraction device (implantable).
L8690	Auditory osseointegrated device, includes all internal and external components.

It is not possible to pay for these devices using the specific OPPS payment methodology, because cost-to-charge ratios are not available for ASCs to convert ASC charges to cost in order to establish a claim-specific device payment. Because these devices are new technology and the number of device categories with pass-through status under the OPPS has been limited over the past several years, we believe that contractor-priced rates are the most appropriate payment methodology for these devices under the revised ASC payment system since there would be little or no OPPS claims data available to establish prospective payment rates for these devices. Therefore, we will pay ASCs separately for devices with pass-through status under the OPPS in that same quarter of the calendar year at contractor-priced rates when they are implanted in ASCs during a covered surgical procedure that is billed by the ASC. As under the OPPS, ASC payment for these devices would not be subject to the geographic wage adjustment, nor would the uniform ASC conversion factor be applied because there is no OPPS payment weight available for these devices and there is little clinical labor associated with the device acquisition by the ASC. The associated nondevice facility resources for the device implantation procedures would be paid through an ASC surgical procedure service payment based upon the payment weight for the nondevice portion of the related OPPS APC payment weight, as described further below with respect to ASC payment for implantable devices without pass-through status under the OPPS. This policy, similar to the device offset policy under the OPPS, would ensure no duplicate device payment by removing, if applicable, the costs of related predecessor devices packaged into the base procedure's OPPS payment weight. Under this policy, we will pay separately in ASCs for new devices that result in significant clinical improvement, consistent with the pass-through policy under the OPPS. This similar treatment of devices included in device categories with OPPS pass-through status under both the OPPS and revised ASC payment systems will help to ensure that beneficiaries have access to the devices in both settings. We believe this approach is fully consistent with the recommendation of the PPAC to apply payment policies uniformly to both ASCs and HOPDs, and with the comments of MedPAC in support of comparable payment bundles in the two systems.

As we have stated earlier in this final rule, we are firmly committed to ensuring that outpatient procedures are not limited to certain sites of service and that all surgical procedures that can safely be performed in ASCs and that are not expected to require an overnight stay are on the ASC list of covered surgical procedures so that Medicare beneficiaries have full access to surgical services in all appropriate settings. We believe that paying separately for those devices that are included in device categories with pass-through status under the OPPS and that are implanted during ASC covered surgical procedures under the revised ASC payment system will promote efficient resource use and ensure appropriate access to care.

After considering all public comments received, we are finalizing a policy to provide separate payment under the revised ASC payment system for ancillary devices included in device categories with pass-through status under the OPPS in the same quarter of the same calendar year that the devices are implanted during a covered surgical procedure that is billed by the ASC. In contrast with our proposal which would have provided packaged payment for these devices, but consistent with their separate payment under the OPPS, this specific subset of implantable devices will receive separate payment under the revised ASC payment system as covered ancillary services. ASC payment will be made for the devices at contractor-priced rates and will not be subject to geographic wage adjustment, and payment for the associated surgical procedures will be made according to our standard methodology for the revised ASC payment system, based on only the service (nondevice) portion of the procedure's OPPS relative payment weight. Accordingly, we are revising proposed § 416.164(a) and (b) to reflect this final policy.

e. Implantable Devices Without Pass-Through Status Under the OPPS

Historically, separate payment for implantable DME and prosthetics provided in association with procedures on the ASC list of covered surgical procedures has been made to ASCs on the basis of the DMEPOS fee schedule. Payment for other devices that are not implantable DME or prosthetics, including some nonpass-through devices under the OPPS, has historically been made as part of the ASC payment for the covered surgical procedure because such items have been considered to be supplies.

In the August 2006 proposed rule for the revised ASC payment system, we proposed to pay for nonpass-through devices as part of the ASC payment that would be based on the OPPS relative payment weight of the associated surgical procedure, thereby packaging payment for all nonpass-through devices, consistent with their treatment under the OPPS. We also proposed to apply an ASC budget neutrality adjustment of 62 percent to the OPPS conversion factor to calculate the ASC payment rates for all covered surgical services, regardless of the specific nature of the surgical procedures. Therefore, payment for surgical procedures with high device costs, referred to as device-intensive procedures, would be calculated like payment for all other surgical procedures not excluded from ASC payment under the revised payment system. We received many comments on our proposed payment policy for devices without pass-through status under the OPPS. A summary of the comments and our responses follow.

Comment: Many commenters objected to the packaging of payment for all devices as proposed, principally on the basis that, where the device cost exceeds 62 percent of the APC payment rate, the ASC would not be paid enough to cover the cost of the device, let alone the other service costs of the implantation procedure. Some commenters suggested that CMS continue to pay separately for devices for which it currently pays separately under the DMEPOS fee schedule and provide payment through the ASC payment for only the nondevice portion of the implantation procedure. They recommended that CMS apply the ASC conversion factor only to the nondevice portion of the APC payment weight to calculate the ASC service payment for the implantation procedure. Other commenters believed that CMS should not apply the ASC conversion factor to the device portion of the APC payment, but instead should pass the OPPS payment amount for the device through to the ASC payment system directly because ASCs would be unable to obtain the devices at lower cost than HOPDs. They argued that ASCs would see no efficiencies regarding the fixed device costs, so it would be inappropriate to apply the ASC conversion factor to develop this portion of the ASC procedure payment. These commenters suggested that CMS could then apply the ASC conversion factor to the nondevice portion of the APC payment to develop a service payment, and sum the two partial payments (for the device and the service) to calculate the full ASC payment for these device-intensive procedures under the revised ASC payment system. They concluded that, in this manner, the OPPS and the revised ASC payment system would be aligned, because both systems would provide packaged payment for devices without OPPS pass-through status.

Several commenters requested that CMS not provide ASC payments for many procedures that use devices and that are currently paid under the OPPS, generally for patient safety reasons.

Response: For purposes of the revised ASC payment system, we are defining device-intensive procedures as all those ASC covered surgical procedures in CY 2008 that are assigned to device-dependent APCs under the OPPS, where the APC device cost is greater than 50 percent of the median APC cost. There are 40 such procedures that fall into this group based on their CY 2007 APC assignments, 25 of which are on the CY 2007 ASC list and 15 of which will be newly recognized for ASC payment beginning in CY 2008. They are listed in Tables 5 and 6, respectively, below. These procedures are also identified in Addendum AA to this final rule.

Specific payment policies have been applied to device-dependent APCs under the OPPS over the past several years (71 FR 68063 through 68070). There are about 194 OPPS device-dependent procedures, specifically those procedures that are assigned to the 42 OPPS device-dependent APCs under the CY 2007 OPPS, and 89 of these device-dependent procedures are also paid in ASCs in CY 2007. However, only 25 of those 89 procedures are assigned to APCs that have device costs that exceed 50 percent of the APC median costs and would be subject to the payment policy applied to device-intensive procedures under the revised ASC payment system. Thus, as noted above, based on current data, there are 40 device-intensive surgical procedures for which ASC payment will be made in CY 2008. ASC payments for these 40 device-intensive procedures will be made according to the policy described for device-intensive ASC procedures based on their assignments to 19 of the 42 device-dependent APCs under the OPPS for CY 2007.

We do not agree with the commenters who believe that many device-intensive procedures are unsafe for performance in ASCs because most of these device-intensive procedures have been on the ASC list of covered surgical procedures for several years and no safety concerns have arisen. In the context of developing this final rule, we have once again reviewed the clinical characteristics of all of these device-intensive procedures based on the public comments and our final policies regarding surgical procedures for exclusion from ASC payment, as discussed in section III.A.2. of this final rule. We continue to believe that many device-intensive procedures are appropriate for performance in ASCs under the final policies of the revised ASC payment system.

We also are persuaded that it would be inappropriate to continue to provide separate payment for some implantable prosthetics and DME under the DMEPOS fee schedule by maintaining the practice of the existing ASC payment system. Payment for these devices is already packaged into the base OPPS payment weights, and separate payment for devices under the ASC payment system could essentially pay twice for the device. Separate payment for devices under the revised ASC payment system would also be contrary to MedPAC's support for our proposal to increase the size of the ASC payment bundles and to create comparable payable bundles under the OPPS and the revised ASC payment system. Most importantly, separate payment for certain devices would not provide the incentives for efficiency that would occur through packaging device payment into payment for the associated surgical implantation procedure, because increased packaging through larger payment bundles would encourage ASCs to provide surgical services as cost-effectively as possible. In addition, there are some expensive implantable devices, such as ICDs, which are not currently paid under the DMEPOS fee schedule, but for which we will provide payment for their associated surgical implantation procedures in ASCs beginning in CY 2008. If the separate DMEPOS payment methodology were to be continued, ASCs would be significantly underpaid for such procedures because the device would not be separately paid if it were neither implantable DME nor an implantable prosthetic device. The

commenters who recommended continued separate payment for some devices under the DMEPOS fee schedule provided no suggestions for developing the appropriate ASC payment for expensive implantable devices that are neither implantable DME nor implantable prosthetics.

We agree with the commenters who are concerned that our standard methodology for the revised ASC payment system that applies a uniform ASC conversion factor to the OPPS relative payment weights could provide inadequate payment for device-intensive procedures under the revised ASC payment system. The estimated budget neutrality adjustment for the revised ASC payment system was 62 percent of the OPPS conversion factor in the proposed rule, and it is currently 67 percent as discussed in section V. of this final rule (the final CY 2008 ASC budget neutrality adjustment will be proposed and finalized through the CY 2008 OPPS/ASC rulemaking cycle). Because of the expected magnitude of the difference between the estimated ASC procedure payments, calculated by application of the ASC conversion factor to the OPPS payment weights under the revised ASC payment system, and the OPPS payment rates for those same procedures, we are particularly concerned that under the revised ASC payment system device-intensive procedures would be underpaid if we paid for them as proposed.

We would not expect that ASCs' device costs for expensive devices would differ significantly from the device costs of HOPDs because we do not believe that ASCs would realize more substantial efficiencies in their acquisition of devices in comparison with HOPDs. On the other hand, we believe that ASCs would experience significant efficiencies in comparison with HOPDs when performing the implantation procedures themselves, consistent with the findings of the GAO Report regarding the lower cost of procedures in ASCs in comparison with HOPDs. These lower ASC costs may be attributable to a variety of factors, including lower facility overhead costs due to ASCs' limited operating hours, lack of emergency departments, specialization of ASCs contributing to efficient delivery of services, and the characteristics of different patient populations treated in ASCs versus HOPDs. Therefore, we believe it would be most appropriate under the revised ASC payment system to apply a modified payment methodology to this group of device-intensive services. Accordingly, in developing the ASC payment rates under the revised payment system for device-intensive procedures, we will calculate the device portion of the ASC procedure payment separately from the service portion, in order to provide special consideration for the packaged device costs that are unlikely to vary significantly across different facility settings.

Our final payment methodology for device-intensive procedures under the revised ASC payment system is as follows. We will apply the OPPS device offset percentage to the OPPS national unadjusted payment to acquire the device cost included in the OPPS payment rate for a device-intensive ASC covered surgical procedure, which we will then set as equal to the device portion of the national unadjusted ASC payment rate for the procedure. The device offset percentage, which is used under the OPPS to remove the predecessor device cost from the device pass-through payment when a pass-through device is paid at charges reduced to cost, so that the pass-through payment for the device only represents the incremental payment for the new device over the payment for predecessor devices already packaged into the APC payment is our best estimate of the amount of device cost included in an APC payment under the OPPS. We believe that use of the OPPS device offset percentage is appropriate to establish the device amount of payment when device-intensive procedures are furnished in an ASC under the revised ASC payment system. The OPPS device offset percentage is calculated for each OPPS device-dependent APC based upon the most recent year of hospital outpatient claims data available and represents the relative amount of device payment that we believe exists in the total APC payment. The device offset percentage is also applied to reduce the APC payment when a typically expensive device is provided to the hospital without cost or with full credit for the device being replaced and, therefore, the hospital incurs no device cost for implanting the replacement device. For more background on the calculation and use of the device offset percentage, we refer readers to the CY 2007 OPPS/ASC final rule with comment period (71 FR 68077 through 68079).

We will then calculate the service portion of the ASC payment for device-intensive procedures by applying the uniform ASC conversion factor as specified in new § 416.171 to the service (nondevice) portion of the OPPS relative payment weight for the device-intensive procedure. Finally, we will sum the ASC device portion and ASC service portion to establish the full payment for the device-intensive procedure under the revised ASC payment system.

Tables 5 and 6 include the most current device-intensive procedures that would be subject to this modified payment methodology under the revised ASC payment system. The device-intensive procedure lists for the CY 2008 revised ASC payment system will be proposed and finalized in conjunction with the OPPS treatment of these procedures in the CY 2008 OPPS/ASC proposed and final rules, respectively. The device-intensive procedures in Tables 5 and 6 are listed in Addendum AA to this final rule, where they are assigned to payment indicators ''H8'' (Device-intensive procedure on ASC list in CY 2007; paid at adjusted rate) and ''J8'' (Device-intensive procedure added to ASC list in CY 2008 or later; paid at adjusted rate), respectively.

Table 7 provides an example of how we will calculate the ASC payment for a device-intensive procedure. We use the example of insertion of a cochlear implant, CPT code 69930 (Cochlear device implantation, with or without mastoidectomy), that is included in Table 5 above. For purposes of this illustration, we are using the CY 2007 OPPS/ASC final rule with comment period device offset percentage and payment rate for APC 0259 (Level VI ENT Procedures), the APC to which CPT code 69930 is assigned under the CY 2007 OPPS. We also assume that the ASC budget neutrality adjustment remains at 0.67 under both the first transition year and full implementation scenarios, yielding an ASC conversion factor of $42.543 based on our current estimate of the CY 2008 OPPS conversion factor. The example includes the estimated ASC payment in the first year of the 4-year transition and the estimated payment under full implementation of the revised ASC payment system.

TABLE 7.—EXAMPLE OF CALCULATION OF ASC PAYMENT FOR A DEVICE-INTENSIVE COVERED SURGICAL PROCEDURE ACCORDING TO THE MODIFIED PAYMENT METHODOLOGY OF THE REVISED ASC PAYMENT SYSTEM

	First year of 4-year transition	Full implementation of revised system
OPPS CY 2007 national unadjusted payment rate	$25,499.72	$25,499.72
OPPS CY 2007 device offset percent	84.61%	84.61%
OPPS/ASC device portion	$21,575.31 ($25,499.72 × 0.8461)	$21,575.31 ($25,499.72 × 0.8461)
OPPS service portion	$3,924.41	$3,924.41

TABLE 7.—EXAMPLE OF CALCULATION OF ASC PAYMENT FOR A DEVICE-INTENSIVE COVERED SURGICAL PROCEDURE ACCORDING TO THE MODIFIED PAYMENT METHODOLOGY OF THE REVISED ASC PAYMENT SYSTEM—Continued

	First year of 4-year transition	Full implementation of revised system
OPPS relative payment weight attributable to service (OPPS service portion divided by estimated CY 2008 OPPS conversion factor)	61.8047 ($3,924.41/63.497)	61.8047 ($3,924.41/63.497)
ASC service portion (OPPS relative payment weight for service portion multiplied by estimated CY 2008 ASC conversion factor)	$2,629.36 (61.8047 × $42.543)	$2,629.36 (61.8047 × $42.543)
CY 2007 ASC payment (without device payment)	$995	N/A
ASC service payment (see following paragraph)	$1,403.59 (0.25 × $2,629.36) + (0.75 × $995)	$2,629.36
Estimated CY 2008 ASC total payment (sum of service payment and device payment)	$22,978.90 ($1,403.59 + $21,575.31)	$24,204.67 ($2,629.36 + $21,575.31)

As discussed further in section IV.J. of this final rule and as shown in the example above, we will apply the transitional blend only to the service portion of the ASC procedure payment. Consistent with their treatment under the OPPS, we will apply the ASC geographic wage adjustment to payment for device-intensive procedures under the revised ASC payment system.

Comment: Several commenters encouraged CMS to pay the same amount and apply the same payment policies regarding implantable devices in both ASCs and HOPDs. In particular, they recommended that ASCs be paid 100 percent of the portion of the OPPS procedure payment that is device-related, when ASCs perform device-intensive procedures.

Response: We agree with commenters that providing the same device payment amount for expensive devices under the revised ASC payment system as under the OPPS is appropriate, and our final payment methodology accomplishes that. As we discuss above, we will specifically calculate the amount of OPPS device payment in APCs that contain devices for which the device cost exceeds 50 percent of the APC median cost. We will then add the OPPS device payment amount to the ASC service payment for each device-intensive procedure that is a covered ASC surgical procedure, in order to determine the total payment for the device-intensive procedure when it is performed in an ASC.

We also agree that the same payment policies that exist with regard to payment for costly devices under the OPPS should also apply to payment for devices implanted in ASCs. In particular, under the OPPS, beginning on January 1, 2007, when a device is replaced without cost to the hospital or with full credit for the cost of the device being replaced, CMS reduces the APC payment to the hospital by the amount that we estimate represents the cost of the device. The application of this same policy to ASC payment for certain device-intensive procedures is fully consistent with the comments that CMS should pay ASCs for expensive devices in the same manner that they are paid under the OPPS, and with the recommendation of the PPAC that CMS should apply payment policies uniformly under the OPPS and revised ASC payment systems. Therefore, in accordance with the OPPS policy implemented in CY 2007, beginning in CY 2008, we will reduce the amount of payment made to ASCs for device-intensive procedures assigned to certain OPPS APCs in those cases in which the necessary device is furnished without cost to the ASC or the beneficiary, or with a full credit for the cost of the device being replaced. We will provide the same amount of payment reduction that would apply under the OPPS for performance of those procedures under the same circumstances. Specifically, when an ASC performs a procedure that is listed in Table 8 below and the case involves implantation of a no cost or full credit device listed in Table 9, the ASC must report the HCPCS ''FB'' modifier on the line with the covered surgical procedure code to indicate that a major implantable device in Table 9 was furnished without cost. We expect that this scenario will occur most often in cases in which there is a recall, field action, or other activity that results in the ASC receiving a device from a device manufacturer, for which the facility has no obligation to pay. In these cases, this policy is necessary to be consistent with section 1862(a)(2) of the Act, which excludes from Medicare coverage items and services for which neither the beneficiary nor anyone on the beneficiary's behalf has an obligation to pay. This reduction policy is consistent with the modified payment methodology for device-intensive procedures under the revised ASC payment system that would generally provide the same device-related payment amount in HOPD and ASC settings, both in those cases where the facility bears the cost of the device and those situations where it does not. Tables 8 and 9 list those specific procedures and implantable devices to which the reduction policy applies under the CY 2007 OPPS. The list of device-dependent APCs and their associated procedures and implantable devices to which this policy will apply in CY 2008 will be proposed and finalized in the CY 2008 OPPS/ASC proposed and final rules, respectively. See the CY 2007 OPPS/ASC final rule with comment period (71 FR 68071 through 68077) for further discussion of this policy.

When the ''FB'' modifier is reported with a procedure code that is listed in Table 8, the contractor will reduce the ASC payment for the procedure by the amount of payment that CMS attributed to the device when the ASC payment rate was calculated. The reduction of ASC payment in this circumstance is necessary to pay appropriately for the covered surgical procedure being furnished by the ASC.

After considering all public comments received, while we are finalizing our proposed policy to package payment under the revised ASC payment system for all implantable devices without pass-through status under the OPPS into the ASC payment for the associated surgical implantation procedure, we are adopting a modified methodology to calculate the payment rates for device-intensive procedures under the revised ASC payment system. We proposed to pay for these devices and their associated implantation procedures according to the standard revised ASC payment system methodology, with application of the uniform ASC conversion factor to the applicable OPPS payment weight for the procedure. However, our final payment policy will apply a modified payment methodology to develop the ASC payment rates for device-intensive covered surgical procedures, in order to provide the same payment amount to ASCs for the implantable devices as is made under the OPPS. This methodology will apply to ASC covered surgical procedures that are assigned to device-dependent APCs under the OPPS for the same calendar year, where those APCs have a device cost of greater than 50 percent of the APC cost (device offset percentage greater than 50). While lists of device-intensive procedures under the revised ASC payment system to which this policy would apply based on their CY 2007 OPPS status are included in Tables 5 and 6 of this final rule, the list of ASC procedures subject to this modified payment methodology will be proposed and finalized in the CY 2008 OPPS/ASC proposed and final rules, respectively.

We will also reduce the ASC procedure payment for certain device-intensive procedures when the necessary device is furnished to the ASC or the beneficiary at no cost or when a full credit for the device being replaced is provided to the ASC, by the same amount as the OPPS payment reduction for the same calendar year because neither the HOPD nor the ASC incur a device cost for the replaced device in such situations. Accordingly, we are adding new § 416.179 to reflect this payment reduction policy.

D. Payment for Corneal Tissue Under the Revised ASC Payment System

In a memorandum dated May 21, 1992, CMS (known at the time as the Health Care Financing Administration or ''HCFA'') notified Regional Administrators that carriers could pay corneal tissue acquisition costs when HCPCS code V2785 (Processing, preserving and transporting corneal tissue) is reported with corneal transplant procedures performed in an ASC. The memorandum indicated that payment for corneal tissue acquisition costs is subject to the usual coinsurance and deductible requirements, and could be paid as an add-on to either the ASC payment or the physician's fee for corneal transplant surgery performed at an ASC. In the June 12, 1998 proposed rule to revise the ASC ratesetting methodology and payment rates, we proposed to package the costs incurred by an ASC to procure corneal tissue into the payment for the associated corneal transplant procedure, rather than continue making separate payment for those costs (63 FR 32312 and 32313). We also proposed to package corneal tissue acquisition costs into the APC payment for corneal transplant procedures in the September 8, 1998 proposed rule to implement the OPPS (63 FR 47760).

We received numerous comments from physicians, eye banks, and health care associations opposing both proposals. In the April 7, 2000 final rule with comment period, which implemented the OPPS, we summarized the comments that we received in response to the September 8, 1998 proposal, and we determined that we would not implement our proposal to package payment under the OPPS for corneal tissue acquisition costs but would, instead, make separate payment based on hospitals' reasonable costs to procure corneal tissue (65 FR 18448 and 18449). Because we never made final the changes in the ASC payment rates and ratesetting methodology that we proposed in the June 12, 1998 **Federal Register**, the policy issued in the June 1992 memorandum remains in effect, which allows carriers (now MACs) to make separate payment for the costs incurred to procure corneal tissue for transplant at an ASC.

In the August 2006 proposed rule to revise the ASC ratesetting methodology and payment rates beginning in CY 2008, we proposed to continue to pay ASCs separately, based on their invoiced costs, for the procurement of corneal tissue (71 FR 49648). We had no evidence to suggest that costs incurred to procure corneal tissue are any less variable now than they were in 1992, in 1998, or in 2000. We noted that, if we were to package payment for the procurement of corneal tissue into the APC payment for corneal transplant procedures, we believed the resulting payment rate would overpay those facilities that are able to acquire corneal tissue at little or no cost through philanthropic organizations and underpay those facilities that must pay for corneal tissue processing, testing, preservation, and transportation costs. We further proposed in the August 2006 proposed rule to exclude, through proposed new § 416.164(b), the costs of procurement of corneal tissue furnished in an ASC on or after January 1, 2008 from the scope of ASC facility services.

We invited comments and submission of data that supported or challenged this proposal to continue paying ASCs separately for corneal tissue on an acquisition cost basis.

Comment: Several commenters agreed with our proposal to continue to pay separately for the acquisition costs of corneal tissue under the revised ASC payment system, rather than package payment for corneal tissue costs into the payment for the associated corneal transplant procedure. The commenters indicated that this proposed methodology is consistent with the way physicians and HOPDs are currently paid for corneal tissue procurement. They believed that this policy of paying separately for the procurement of corneal tissue has been, and continues to be, the most appropriate payment policy for these services provided in ASC settings, because of the continuing significant variability in the costs of corneal tissue procurement. The commenters further reiterated that packaging these costs should not be considered, because such an option would result in overpayments to certain facilities that have been able to acquire corneal tissue at little or no cost through philanthropic organizations and would undoubtedly result in underpayments to other facilities that paid for the corneal tissue processing, testing, preservation, and transportation costs.

Response: After consideration of the public comments we received, we are finalizing our proposed CY 2008 ASC corneal tissue procurement payment policy, with modification to clarify that

corneal tissue is a covered ancillary service within the scope of ASC services, but not within the scope of ASC facility services. Corneal tissue procurement will be included in the scope of ASC services as a covered ancillary service when it is integral to the performance of an ASC covered surgical procedure, but its payment will not be packaged into the ASC payment for the associated covered surgical procedure. Specifically, under the revised ASC payment system, we will continue to pay ASCs separately, based on their invoiced costs, for the acquisition costs of corneal tissue for transplant in an ASC. The HCPCS code for corneal tissue processing, V2785, is listed in Addendum BB to this final rule, where it is assigned to payment indicator ''F4'' (Corneal tissue processing; paid at reasonable cost). Accordingly, we are reflecting this final policy in revised proposed §§ 416.164(b)(3) and 416.171(b).

E. Payment for Office-Based Procedures

Since the inception of the ASC benefit, procedures that are commonly performed or that can be safely performed in a physician's office have generally been excluded from the ASC list of covered surgical procedures. We refer to these procedures as ''office-based'' in this preamble discussion. Over the past 15 years, physicians and ASC associations have urged CMS to add office-based procedures to the ASC list of covered surgical procedures or to retain on the ASC list procedures that were originally performed most commonly in an institutional setting, but that have subsequently moved to an office setting as surgical techniques and technology have advanced. Representatives of the ASC industry have argued that although, for most patients, the office is an appropriate setting for most high volume office procedures, there are some patients for whom an ASC or another more resource-intensive setting is required. The physician may decide that a facility setting is necessary for individual patients for various clinical reasons, such as the need for more nursing staff, a sterile operating room, or a piece of equipment not typically available in the office setting. CPT code 52000 (Cystourethroscopy (separate procedure)) is a prime example of a high volume procedure that is performed more than 80 percent of the time in an office setting, but for which a small number of patients require resources usually available only in an ASC or a hospital. Representatives of the ASC industry have contended that unless we made an exception to the criteria that historically governed which procedures comprised the ASC list and allowed an office-based procedure to remain on the ASC list, as we have done with CPT code 52000, the hospital would be the only facility setting available as an alternative to the office setting. ASC industry commenters asserted in the past that this limitation was burdensome both to physicians and to beneficiaries and could, in some cases, limit beneficiary access to needed surgery.

We generally interpret ''office-based'' or ''commonly performed in a physician's office'' to mean a surgical procedure that the most recent BESS data available indicate is performed more than 50 percent of the time in the physician's office setting. In the August 2006 proposed rule for the revised ASC payment system and as discussed in section III.A.2. of this final rule, we proposed to expand the ASC list of covered surgical procedures to allow payment for all surgical procedures, except those procedures that pose a significant safety risk or would be expected to require an overnight stay. Because office-based surgical procedures typically do not pose a significant safety risk and do not require an overnight stay, we proposed not to exclude them from ASC payment under the revised ASC payment system. However, we were concerned that allowing payment to ASCs for office-based procedures based on OPPS relative payment weights could have a significant impact on Medicare program costs. Approximately two-thirds of the additional procedures which we proposed not to exclude from ASC payment beginning in CY 2008 are office-based, that is, they are performed in the physician's office more than 50 percent of the time. The practice expense payment for many of these procedures under the MPFS, when they are performed in the physician's office, would be lower than the payment for the same procedures under the OPPS or under the standard methodology of the revised ASC payment system as proposed. Therefore, we indicated that the proposed ASC payment rates based on the OPPS relative payment weights could result in a significant program cost if these high volume procedures were to shift from the office-based setting to the ASC setting.

One reason why we were concerned about the possibility of a sizable shift of office-based procedures to ASCs is the impact that such a shift might have on ASC payments in light of the statutory requirements that the revised ASC payment system be designed to result in the same aggregate amount of expenditures that would be made if the revised payment system were not implemented. In the August 2006 proposed rule, we explained that, depending on the methodology for determining the requisite budget neutrality adjustment (71 FR 49657), an influx of high-volume, relatively low cost office-based surgical procedures into the ASC setting under the revised payment system could lower the payment amounts for other procedures made to ASCs due to the constraints of budget neutrality. In other words, we might have had to scale the ASC conversion factor downward in order for estimated aggregate expenditures under the revised system to not exceed what they would have been if the revised payment system were not implemented. Payment for procedures with relatively high payments would have to be reduced in order to offset increased aggregate costs resulting from an influx of relatively low cost, high volume office-based procedures shifting to ASCs. (See section V. of this final rule for a detailed discussion of our proposed and final policies regarding calculation of an ASC conversion factor.)

In the August 2006 proposed rule, we explained that we are committed to refining Medicare payment systems wherever possible to prevent payment incentives from inappropriately driving decisions about where to perform a surgical procedure, when those decisions should properly be based on clinical considerations. Towards that end, we proposed to cap payment for office-based surgical procedures for which ASC payment would be newly allowed under the revised payment system as of January 1, 2008, at the lesser of the MPFS nonfacility practice expense amount or the ASC rate developed according to the standard methodology of the revised ASC payment system. We also proposed to exempt procedures that are on the ASC list as of January 1, 2007, and that meet our criterion for designation as office-based, from the payment limitation proposed for office-based procedures for which ASC payment would be allowed for the first time beginning January 1, 2008. Accordingly, we proposed to incorporate in proposed new § 416.171(e) the payment basis for these office-based procedures beginning January 1, 2008.

When we started to identify the codes that we would propose to classify as office-based surgical procedures beginning in CY 2008, we encountered some anomalous cases that required further refinement of our office-based criterion beyond strict application of a

50-percent utilization threshold. For example, we identified some CPT codes that met the 50-percent office utilization threshold but for which a nonfacility practice expense amount had not been developed under the MPFS. We proposed to classify as office-based any surgical codes that our physicians' claims data indicated are performed more than 50 percent of the time in an office setting, even if the codes currently lack a nonfacility practice expense value under the MPFS. We further proposed to cap payment for these procedures, as appropriate, once a nonfacility practice expense amount is established. Until that time, we proposed to calculate payment for these office-based surgical CPT codes using the methodology we proposed for other surgical procedures under the revised ASC payment system. Similarly, until a national nonfacility practice expense amount is established for office-based surgical CPT codes that are contractor-priced (that is, carriers typically determine the payment for a procedure for which there is no calculated national payment) under the MPFS, we proposed to calculate the ASC payment using the same methodology that we proposed for surgical procedures that are not office-based. Application of the cap to codes designated as office-based would be updated through rulemaking as part of the annual OPPS/ASC payment update.

In applying the 50-percent threshold, we discovered some apparent contradictions in the BESS data that required us to further refine our definition of office-based procedures. For example, we noted instances in which seemingly similar procedures had inconsistent site-of-service utilization data. The BESS data showed high levels of office utilization for some complex procedures that we expected to be performed relatively infrequently in an office setting, whereas simpler but related procedures showed lower levels of office utilization.

Therefore, we undertook another, more detailed level of review and identified groups of surgical CPT codes related to procedures that are performed 50 percent or more of the time in the office setting to determine if there was a logical correlation between procedure complexity within a group of related procedures and the frequency with which those procedures were performed in the office setting. For example, according to CPT coding, the following three codes are related:

- 13120, Repair, complex, scalp arms and/or legs; 1.1 cm to 2.5 cm.
- 13121, Repair, complex, scalp arms and/or legs; 2.6 cm to 7.5 cm.
- 13122, Repair, complex, scalp arms and/or legs; each additional 5 cm or less.

As is often the case for groups of related codes in the CPT coding system, the first of these codes is the least complex clinically and, in this example, the complexity of the procedure increases in proportion to the increase in the size of the area to be repaired. If utilization data indicated that CPT code 13122 was performed in the office 67 percent of the time in CY 2005, we would expect to find that both CPT codes 13120 and 13121 were also performed in the physician's office more than 50 percent of the time during that year. Because the most complex procedure was provided in the office most of the time, logically, it would seem that the less complex procedures would also have been performed frequently in that site of service. However, the BESS data showed that this was not always the case.

Although our expectation was that the less complex procedures within a group of related procedure codes would typically be performed most often in the office and the more complex procedures less often in the office, there were instances in which the less complex procedures within the code group were billed more commonly in an ASC or HOPD, while the more complex procedures within the code group were billed more frequently in the office setting. Therefore, we believed it was prudent to consider the clinical characteristics and utilization data of related CPT codes in determining the codes to be proposed as office-based, to supplement our consideration of data specific to the codes under review.

In our analysis of the BESS site-of-service data, we also took into consideration the volume of cases represented in the data. There were a few instances in which we initially identified a procedure as office-based because the data indicated that 100 percent of the cases were performed in the physician's office. However, closer inspection revealed that there was only one case reported for the procedure with a physician's office as the site of service. We were concerned about using such a low volume of procedure claims as the basis for identifying a procedure as office-based. Therefore, we also believed it was wise to consider the volume of claims for procedures in the context of our assessment of their utilization data, to determine those codes to propose as office-based for the revised ASC payment system.

Because of the occasional unevenness and inconsistency of the data associated with some of the codes we initially classified as office-based, we conducted a code-by-code analysis to buttress inconclusive data with the clinical judgment of our medical advisors. As a result, in our proposed rule, there were some procedures that met the 50-percent office performance threshold when evaluated in isolation from other closely related codes, but that we did not propose to designate as office-based after more specific review.

In the August 2006 proposed rule for the revised ASC payment system, we proposed to assess each year, based on the most recent available BESS and other data available to us and detailed clinical review, whether there are additional procedures that we would propose to newly classify as office-based, beginning in the update year. We would solicit comments on the proposed classification of additional codes as office-based as part of the annual OPPS/ASC rulemaking cycle. In addition, we proposed that once we identify a procedure as office-based, that classification could not change in future updates of the ASC payment system. We reasoned that once a procedure becomes safe enough to be performed in more than 50 percent of cases in the office setting, it would be improbable for it to revert to an institutional setting.

To summarize, the list of codes that we proposed as office-based took into account the most recent available volume and utilization data for each individual procedure code and/or, if appropriate, the clinical characteristics, utilization, and volume of related codes. We proposed to apply the office-based designation only to procedures that would no longer be excluded from ASC payment beginning in CY 2008 or later years. Moreover, we proposed to exempt all procedures on the CY 2007 ASC list from application of the office-based classification. We believed that the resulting list accurately reflected Medicare practice patterns and was clinically coherent. The procedures that we proposed to designate as subject to the office-based payment limit were identified in Addendum BB to the proposed rule (71 FR 49845 through 49948). Those procedures for which the CY 2008 payment would be based on the MPFS nonfacility practice expense RVUs according to our analysis for the August 2006 proposed rule were flagged in Addendum BB to that rule. The ASC relative payment weights shown for procedures in Addendum BB to the proposed rule that would be capped by the MPFS nonfacility practice expense RVUs were adjusted to reflect the capped payment amounts. We reminded readers in the August 2006 proposed rule that the ASC payment rates in

Addendum BB to that rule were based on the proposed CY 2007 OPPS relative payment weights and the proposed CY 2007 MPFS nonfacility practice expense RVUs. Similarly, the information in Addenda AA and BB to this final rule is also only illustrative, meaning that the Addenda provide examples of the results of applying the final policies of the revised ASC payment system, based on the final information available for CY 2007 and projected CY 2008 updates. As further discussed in sections V.E. and VI. of this final rule, we will propose the CY 2008 relative payment weights, payment amounts, specific HCPCS codes to which the final policies of the revised ASC payment system would apply, and other pertinent ratesetting information for the CY 2008 revised ASC payment system in the proposed OPPS/ASC rule to update the payment systems for CY 2008 to be issued in mid-summer of CY 2007. We will then publish final relative payment weights, payment amounts, specific CY 2008 HCPCS codes to which the final policies will apply, and other pertinent ratesetting information for the CY 2008 revised ASC payment system in the final OPPS/ASC rule to update the payment systems for CY 2008.

Comment: Several commenters suggested that instituting a cap on payment for office-based surgical procedures would result in payment levels that would make it economically infeasible for many ASCs to perform certain surgical procedures, forcing patients who could be treated safely and more cost effectively in an ASC to go to an HOPD for surgery. Other commenters suggested that there is no empirical evidence that payment of office-based procedures in ASCs would lead to overutilization of ASCs or result in physicians converting their offices into ASCs. The commenters pointed out that, in historical cases where CMS has made exceptions to allow ASC payment for procedures primarily performed in the office, there have not been significant shifts in the sites of service for these procedures. Several commenters suggested that imposing a cap on payment for these procedures would be tantamount to a penalty and an affirmative policy intended to discourage these procedures from performance in the ASC setting. The commenters strongly recommended that the best policy would be to allow physicians to select the site of service they believe is the most clinically appropriate for their patients, especially because sicker patients may require the additional infrastructure and safeguards of an ASC or a HOPD. Other commenters pointed out that CMS' proposal for the revised ASC payment system depends on the use of the relative payment weights for the OPPS that CMS argued in the proposed rule would be expected to reasonably reflect the relativity of ASC resources for surgical procedures. They stated that CMS has no evidence to suggest that the OPPS relativity of payment weights for office-based procedures does not reflect the relative resource use for the performance of these procedures in ASCs and, therefore, application of a payment limitation for these procedures is unwarranted.

The commenters also expressed concern that the establishment of a payment cap for office-based procedures would be problematic and detrimental to CMS' desire to create a setting-neutral payment system. The commenters recommended that CMS exclude this provision from the final rule and pay all procedures using a single ASC conversion factor applied to the applicable OPPS relative payment weight. Several commenters suggested that CMS could follow trends in the sites of service for office-based procedures, and should CMS find significant and unwarranted migration of certain procedures to ASCs, implement the proposed policy at a later date.

Response: We acknowledge the commenters' concerns regarding our proposal to cap payments for office-based surgical procedures performed in ASCs. Nevertheless, we continue to believe that capping the payment for office-based surgical procedures performed in ASCs would be the best approach to eliminating differential payment as a factor in site-of-service decisions regarding minor surgical procedures. The combined ASC and physician payment exceeds the single payment the physician would receive for services performed in the office, even with the application of the proposed payment limitation for office-based procedures. Therefore, we are concerned that allowing payment for office-based procedures under the ASC benefit may create an incentive for physicians inappropriately to convert their offices into ASCs or to move all their office surgery to an ASC. As discussed further in section V. of this final rule, the final policy for the budget neutrality adjustment for the revised ASC payment system which would cap payment for office-based surgical procedures as we proposed takes into account the expected migration of 15 percent of the current office utilization of office-based procedures that will be newly paid in CY 2008 under the revised ASC payment system over the first 4 years of the revised payment system. As commenters observed, a setting-neutral payment system is most consistent with the principle that physicians should be free to make site-of-service decisions on the basis of clinical and quality of care considerations alone. We strongly agree that the health of the patient should be the primary consideration. The proposed cap significantly reduces the payment differential that would otherwise exist when office-based surgical procedures are performed in ASCs and is, thus, more consistent with the principle of site-neutral payment.

After consideration of the public comments we received, we are finalizing our proposal under § 416.167(b)(3) and § 416.171(d), without modification, to cap payment for office-based surgical procedures for which ASC payment would first be allowed under the revised payment system beginning in January 1, 2008, or later years at the lesser of the MPFS nonfacility practice expense amount or the ASC rate developed according to the standard methodology of the revised ASC payment system. For those office-based procedures for which there is no available MPFS nonfacility practice expense amount, we will implement the cap, as appropriate, once a MPFS nonfacility practice expense amount is available. Until that time, those procedures that are office-based but for which there is no available MPFS nonfacility practice expense amount available for the comparison will be paid using the standard methodology for calculating ASC payment under the revised ASC payment system.

The procedures that we are finalizing as office-based for CY 2008 are identified in Addendum AA to this final rule, assigned to payment indicators of ''P2'' (Office-based surgical procedure added to ASC list in CY 2008 or later with MPFS nonfacility PE RVUs; payment based on OPPS relative payment weight); ''P3'' (Office-based surgical procedure added to ASC list in CY 2008 or later with MPFS nonfacility PE RVUs; payment based on MPFS nonfacility PE RVUs); and ''R2'' (Office-based surgical procedure added to ASC list in CY 2008 or later without MPFS nonfacility PE RVUs; payment based on OPPS relative payment weight). These payment indicators identify the office-based procedures' estimated payment status under the CY 2008 revised ASC payment system, based on the final CY 2007 information for the OPPS and the MPFS as discussed above, and their illustrative CY 2008 relative payment weights and payment rates reflect

application of the capped payment amounts for those procedures with a payment status indicator of ''P3.'' We note that the actual proposed and final ASC relative payment weights and payment amounts for CY 2008 will be proposed and finalized through the CY 2008 OPPS/ASC proposed and final rules, respectively. We will continue to monitor the appropriateness of the payment cap for office-based surgical procedures performed in ASCs and explore other opportunities to promote site-neutral payments as we gain experience under the revised ASC payment system.

Comment: Several commenters expressed concern about the ''50-percent rule'' we proposed to use to designate which procedures would be considered office-based. One commenter indicated that if a procedure is performed in an office 50 percent of the time, that means half the time the physician has determined that the office is not the appropriate setting for specific patients. Commenters further indicated that clinical circumstances dictate the site of service and not the physician's personal preference, as suggested by the policy proposed for the revised payment system. One commenter stated that surgeons often perform a procedure in the office when anesthesia is not required and perform the same procedure in an ASC when anesthesia is required due to the complexity of individual patient factors.

The commenters offered several suggestions for modifying the specific proposal for designating procedures as office-based. In particular, one commenter requested that there be a reasonable, fair, and efficient mechanism for removing a procedure from the office-based list if the typical site of service for a procedure does change for a legitimate clinical reason. Other commenters recommended that CMS consider raising the threshold above 50 percent to a number that shows the clear majority of cases are performed in the physician's office or allow an exemption to the cap for procedures that are performed in ASCs because of the need for anesthesia. Another commenter suggested that CMS could implement this policy through the use of a modifier that indicates the surgeon selected the ASC over the physician's office as the site of service because of the necessity of anesthesia or patient factors, whereupon the payment limitation would not be applied.

Response: As indicated in our proposed rule, office-based procedures are surgical procedures that the most recent BESS data available indicate are performed more than 50 percent of the time in the physician's office setting. We believe our ''50-percent rule'' proposed policy is the best option at this point in time. It is our current practice to consider procedures that are performed more than 50 percent of the time in the physician's office setting as office-based procedures, and we will continue to monitor whether the 50-percent threshold is appropriate for this categorization. These office-based procedures, as categorized through application of the ''50-percent rule,'' are typically procedures that have transitioned from low volume in the office setting and high volume in the facility setting to higher volume in the office setting and lower volume in the facility setting. The 50-percent threshold marks the point in that transition at which a procedure comes to be performed more often in the office. Typically, procedures that come to be performed more frequently in offices than in the facility setting remain primarily office-based once that transition has taken place. Therefore, we continue to believe that the 50-percent threshold is an appropriate, objective measure for determining which procedures ought to be considered office-based. Moreover, a rigorous review of procedures that met the aforementioned threshold took into account the most recent available volume and utilization data for each individual procedure code and, if appropriate, the utilization and volume of related codes. In addition, we conducted a code-by-code analysis to bolster inconclusive data with the clinical judgment of our medical advisors.

We will continue to assess each year, based on the most recent available BESS and other data available to us, whether there are additional procedures that we would propose to classify as office-based. However, we note that we proposed that once we identify a procedure as office-based, that classification would not change in future updates of the ASC payment system, except in cases of new codes, where those initial determinations are temporary, as explained further in section V.E. of this final rule. As we have explained above, once a procedure becomes safe enough to be performed in more than 50 percent of cases in the office setting, it is unlikely to revert to a facility setting.

The vast majority of procedures designated as office-based under the revised ASC payment system would require only either local anesthesia or at most moderate or ''conscious'' sedation, that is, sedation to achieve a medically controlled state of depressed consciousness while maintaining the patient's airway, protective reflexes, and ability to respond to stimulation or verbal commands. The use of general anesthesia for the performance of these office-based procedures would be expected to be highly unusual. In those cases where local anesthesia or ''conscious'' sedation are the typical types of anesthesia used in the performance of certain procedures, the procedure's MPFS nonfacility practice expense amount would have already been valued to include payment for the anesthesia typically used, so appropriate payment would be provided in the ASC setting if the procedure were subject to the office-based payment limitation. However, even when general anesthesia may be required because of uncommon patient-specific considerations, basing a surgical procedure's prospective payment rate on the typical case when anesthesia is not required and the procedure can be performed safely in the office is consistent with the averaging principle that is the basis for all our prospective payment systems, including the revised ASC payment system.

Therefore, after considering all comments received, we are finalizing our proposal, without modification, to identify office-based surgical procedures for the revised ASC payment system as those surgical procedures no longer excluded from ASC payment beginning in CY 2008 or later years that are performed more than 50 percent of the time in physicians' offices, taking into account the most recent available volume and utilization data for each individual procedure code and/or, if appropriate, the clinical characteristics, utilization, and volume of related codes. We will annually assess whether there are additional procedures that we would propose to classify as office-based as part of the annual OPPS/ASC rulemaking cycle. With the exception of new codes for which our determinations would remain preliminary until there are adequate physicians' claims data available to assess their predominant sites of service as discussed further in section V.E. of this final rule, the classification of a procedure as office-based would not change in future updates of the ASC payment system. Those procedures whose office-based designation for CY 2008 is temporary because they are new codes for which there is not yet adequate physicians' claims data are flagged with an asterisk (*) in Addendum AA to this final rule.

Comment: One commenter indicated that code CPT 64555 (Percutaneous implantation of neurostimulator electrodes; peripheral nerve (excludes

sacral nerve)), should not be designated as an office-based procedure under the revised ASC payment system because not all of the procedures described by the code can be done in the physician's office. The commenter further stated that payment accuracy should be included as a goal of any new payment system, to avoid site-of-service decisions that are based on financial factors rather than clinical appropriateness. The commenter reasoned that the proposed payment method for procedures similarly identified as office-based would inappropriately impact site-of-service decisions, because it would not be possible to provide the procedures in the ASC setting.

Another commenter suggested that CPT code 15340 (Tissue cultured allogeneic skin substitute, first 25 sq cm or less) be removed from the proposed list of office-based procedures so as to ensure appropriate payment for the procedure in the ASC setting and thereby provide Medicare beneficiaries with increased access to the procedure. The commenter noted that this CPT code was new for CY 2006 and, therefore, there were no CY 2005 utilization data available for our review. They also explained that the predecessor CPT code was not performed in the physician's office more than 50 percent of the time, and they did not believe this new code would be determined to be office-based based on the 50-percent threshold when CY 2006 data were available.

Response: We have identified CPT code 64555, newly proposed for ASC payment beginning in CY 2008, as a device-intensive procedure that is clinically similar to other CPT codes for implantation of neuroelectrodes that are not office-based procedures, although some of the other procedures are ASC covered surgical procedures prior to January 2008. The code is assigned to APC 0040 (Percutaneous Implantation of Neurostimulator Electrodes, Excluding Cranial Nerve) under the CY 2007 OPPS, where other neurostimatulor electrode implantation procedures reside. Therefore, we believe it is most appropriate to remove CPT code 64555 from the list of office-based procedures under the revised ASC payment system, so that it will be paid in the ASC setting according to the modified payment methodology we are adopting for device-intensive procedures. We refer readers to section IV.C.2.e. of this final rule for a detailed discussion of our proposed and final policies regarding ASC payment for procedures with significant device costs. In addition, we note that, while we had also proposed an office-based designation for CPT code 64565 (Percutaneous implantation of neurostimulator electrodes; neuromuscular) beginning with its initial ASC payment in CY 2008, under the OPPS this code is assigned to the same clinical APC as CPT code 64555, which it resembles from both clinical and facility resource perspectives. Therefore, we will also remove CPT code 64565 from the list of office-based procedures for the CY 2008 revised ASC payment system. Following the removal of these two codes from the list of office-based procedures, there are no ASC covered surgical procedures that are both device-intensive and office-based for the CY 2008 revised ASC payment system.

With respect to CPT code 15340, as the commenter pointed out, we have no utilization data from CY 2005 available for this procedure to review in developing this final rule. We note that we did not propose to designate the CPT add-on code for an additional area of application, 15341 (Tissue cultured allogeneic skin substitute, each additional 25 sq cm) as office-based under the revised ASC payment system. The proposed ASC treatment of CPT code 15340 was a temporary designation for the new code, subject to change in response to public comments and our examination of utilization data when available. At this time, we have decided to remove this CPT code from the office-based list because, after further review, we believe it is not likely to be performed more than 50 percent of the time in the physician's office setting. However, we will continue to evaluate the appropriateness of this action as new data become available and will annually reassess whether this code, or other procedures newly paid in ASCs in CY 2008 or later years that are not already designated as office-based or for which that classification is temporary, should be proposed as office-based for ASC payment, in the context of each year's OPPS/ASC annual update. We note, specifically, that our treatment of CPT code 15340 in this CY 2008 ASC final rule is not a final determination for CY 2008, because we expect to have CY 2006 utilization data available for the CY 2008 OPPS/ASC proposed rule, where we may propose that additional codes be classified as office-based for the CY 2008 revised ASC payment system.

After considering all public comments received, we are finalizing our proposal, with modification, of the office-based list of covered surgical procedures under the CY 2008 revised ASC payment system. At this point, we are removing CPT codes 64555, 64565, and 15340 from the office-based list for the CY 2008 revised ASC payment system. As new data become available, we may propose that additional HCPCS codes newly paid in ASCs in CY 2008 be classified as office-based in the CY 2008 OPPS/ASC proposed rule, and the final CY 2008 ASC list of covered office-based surgical procedures will be published in the CY 2008 OPPS/ASC final rule.

F. Payment Policies for Multiple and Interrupted Procedures

1. Multiple Procedure Discounting Policy

In the August 2006 proposed rule for the revised ASC payment system, we proposed to mirror the OPPS policy for discounting when a beneficiary has more than one surgical procedure performed on the same day at an ASC facility (71 FR 49651). The current policy for multiple procedure discounting in the ASC, as specified in § 416.120(c)(2)(ii) of our regulations, is based on a simple count of procedures performed on the same day. The most costly procedure is paid the full amount and all other procedures are discounted by half.

Under the OPPS, certain surgical procedures are not subject to the discounting policy. Generally, the procedures that are exempted are those performed to implant costly devices. They are not discounted even when performed in association with other surgical procedures because the cost of the implantable device does not change; therefore, resource savings due to efficiencies would be minimal.

Until now, there has been no reason to exempt any procedure from the multiple procedure discounting policy in ASCs because separate payments have been made for implantable devices. Although the ASC payment for the procedure may have been discounted, the cost of the device was paid outside of that rate and was unaffected by the multiple procedure discount methodology.

Under the revised ASC payment system in the August 2006 proposed rule, we proposed to package payment for implantable devices into the procedure payment made to the ASC, as under the OPPS. Because we are trying wherever possible to implement parallel payment policies across both systems, we proposed to adopt the OPPS discounting policy that is applied to surgical procedures so that the costs of performing multiple procedures for the implantation of costly devices are taken into account. Thus, payment for the

same set of multiple procedures under the OPPS and the ASC payment system would be made using similar packaging and payment rules.

For the revised ASC payment system, we proposed in Table 46 of the August 2006 proposed rule (71 FR 49652) a listing of the covered surgical procedures that would be exempt from multiple procedure discounting based on CY 2007 OPPS proposed procedure-specific discounting designations (71 FR 49652 through 49654). These exempt procedures were those surgical procedures proposed for ASC payment in CY 2008 that were also proposed for assignment to a status indicator other than ''T'' under the CY 2007 OPPS, indicating that a multiple surgical procedure reduction would not apply. We proposed to update this list annually in the OPPS/ASC proposed and final rules, and solicited comments on the list.

We also proposed to incorporate our proposed policy on multiple procedure discounting in proposed new § 416.172(e).

Comment: Several commenters supported our proposal to apply the multiple procedure discounting policy of the OPPS to procedures provided under the revised ASC payment system. The commenters noted that this policy would ensure that payments for ASC covered surgical procedures with high fixed costs are not discounted, and that the full costs of procedures to implant expensive devices are taken into account when these device-intensive procedures are performed in conjunction with other surgical procedures. The commenters also suggested that adopting the OPPS multiple procedure discounting policy would provide parity in payments to both HOPDs and ASCs, as well as minimize any payment incentive to shift services between the two settings because of different policies. They believed that this consistency would result in appropriate and parallel policies for payment of multiple surgical procedures performed in a single operative session in both of these delivery settings where outpatient surgery is commonly performed.

Response: We appreciate the commenters' support for the proposed ASC multiple procedure discounting policy. Specifically, when more than one covered surgical procedure is provided by an ASC in a single operative session to a Medicare beneficiary, the procedure with the highest ASC payment rate would be paid 100 percent of the ASC payment amount, and ASC payments for any other surgical procedures not expressly exempt from the discounting policy would be reduced by half. Certain ASC covered surgical procedures with relatively high fixed costs would be specifically exempt from the ASC multiple procedure discounting policy, consistent with the current OPPS multiple procedure discounting policy for those surgical procedures assigned to a status indicator other than ''T'' under the OPPS. We agree with the commenters' general reasoning and further believe that adopting an ASC policy that parallels the OPPS discounting policy would assist in timely and coordinated updates to the multiple procedure discounting status of services payable under both payment systems.

Comment: Several commenters indicated that CMS inappropriately included only one of three similar CPT codes for the placement of breast brachytherapy catheters (specifically CPT code 19298 (Placement of radiotherapy after loading brachytherapy catheters (multiple tube and button type) into the breast for interstitial radioelement application following (at the time of or subsequent to) partial mastectomy, includes imaging guidance)) on the list of procedures proposed for exemption from multiple procedure discounting, which was provided as Table 46 in the CY 2008 ASC proposed rule (and which has been updated as Table 10 below based on the CY 2007 OPPS final procedure-specific discounting designations). These commenters explained that the general surgical approach and devices required to perform CPT code 19298 are similar to those used to provide CPT code 19296 (Placement of radiotherapy after loading balloon catheter into the breast for interstitial radioelement application following partial mastectomy, includes imaging guidance; on date separate from partial mastectomy) and CPT code 19297 (Placement of radiotherapy after loading balloon catheter into the breast for interstitial radioelement application following partial mastectomy, includes imaging guidance; concurrent with partial mastectomy). Moreover, the commenters believed that, because all three CPT codes are assigned to status indicator ''S'' under the OPPS, indicating that multiple procedure discounting does not apply to payment for their performance in the hospital outpatient setting, all of these codes should also be exempt from multiple procedure discounting under the revised ASC payment system.

Response: While CPT code 19298 is assigned to status indicator ''S'' under the CY 2007 OPPS, CPT codes 19296 and 19297 are assigned to status indicator ''T'' under the OPPS effective January 1, 2007. As discussed in the CY 2007 OPPS final rule with comment period (71 FR 68028), CPT codes 19296 and 19297 were reassigned from New Technology APCs to a clinical APC effective January 1, 2007. Along with their APC reassignments, CPT codes 19296 and 19297 were also reassigned from status indicator ''S'' to ''T'' effective January 1, 2007. During the CY 2007 OPPS rulemaking cycle, in considering the public comments and finalizing the new assignments of CPT codes 19296 and 19297 to a clinical APC with status indicator ''T,'' the implications of the multiple procedure reduction to payment for CPT codes 19296 and 19297 in various clinical scenarios were taken into consideration. Therefore, consistent with our proposed multiple procedure discounting policy for the revised ASC payment system, these two procedures were not included on the proposed list of procedures for exemption from multiple procedure discounting under the revised ASC payment system. Their OPPS payment status of ''T'' implies that the multiple procedure payment reduction would be appropriate, and the possibility of a 50-percent payment reduction has already specifically been evaluated with respect to the hospital outpatient resources required to perform the procedures. However, because CPT code 19298 is assigned to status indicator ''S'' under the CY 2007 OPPS, where it remains in its original New Technology APC while additional hospital cost data are being collected, we believe that CPT code 19298 would be appropriately exempted from multiple procedure discounting in both the ASC and HOPD settings, consistent with our overall proposal for discounting under the revised ASC payment system.

After considering the public comments we received, we are finalizing our proposed payment policy for multiple surgical procedure discounting under the revised ASC payment system under § 416.172(e) with only editorial modification. We will mirror the OPPS payment policy for discounting when a beneficiary has more than one covered surgical procedure performed in a single operative session in an ASC in CY 2008, by exempting those surgical procedures on the ASC list of covered surgical procedures that are assigned to a status indicator other than ''T'' under the CY 2008 OPPS from multiple procedure discounting under the revised ASC payment system. The discounting policy of the revised ASC payment system, like

the policy of the existing ASC payment system, will apply the multiple procedure reduction if the same procedure is performed bilaterally, consistent with the general discounting policy of the OPPS for payment of surgical procedures that are performed bilaterally. A procedure performed bilaterally in one operative session would be paid at 150 percent of the single procedure payment under the revised ASC payment system. The multiple procedure discounting policy will only apply to ASC payment for covered surgical procedures. ASC payment for covered ancillary services, as discussed further in section IV.C.2. of this final rule, will not be subject to the multiple procedure discount.

The specific multiple procedure discounting policy that applies to each ASC covered surgical procedure is identified in Addendum AA to this final rule. Table 10 provides an illustrative summary list of the CY 2007 HCPCS codes on the ASC list of covered surgical procedures for CY 2008, and their respective APCs as of January 1, 2007 under the OPPS, which will be exempt from multiple procedure discounting in ASCs effective January 1, 2008, if no changes are made to their OPPS discounting designation for CY 2008. We will update this list annually in the OPPS/ASC proposed and final rulemaking process, which includes the solicitation of public comments. The CY 2008 list of exemptions will be proposed and finalized for the CY 2008 revised ASC payment system through the OPPS/ASC rulemaking cycle for CY 2008.

2. Interrupted Procedure Policies

When a procedure requiring anesthesia is discontinued after the beneficiary is prepared for the procedure and taken to the room where it is to be performed, but before the administration of anesthesia, ASCs currently report modifier 73 (Discontinued outpatient procedure prior to anesthesia administration) appended to the discontinued procedure and receive 50 percent of the ASC payment for the planned surgical procedure. We believe that ASCs, like hospital outpatient facilities, realize significant savings when procedures for which anesthesia is to be used are discontinued prior to their initiation but after the beneficiary is taken to the procedure room. We believe that savings are recognized for the costs associated with a variety of facility resources, including treatment/operating room time, single use devices, drugs, equipment, supplies, and recovery room time. When a procedure is interrupted after its initiation or the administration of anesthesia, ASCs currently report these cases using modifier 74 (Discontinued outpatient procedure after anesthesia administration) appended to the interrupted procedure, and the full ASC payment for the covered surgical procedure is made. Similar to hospital outpatient procedures that are discontinued after the administration of anesthesia or the initiation of the procedure, in cases where modifier 74 is reported by ASCs, we believe that the facility costs incurred for these discontinued procedures that were initiated to some degree are generally as significant to the ASC as those for a completed procedure, including resources for patient preparation, operating room use, and recovery room care. In the August 2006 proposed rule, we proposed no change to the existing ASC payment policy for procedures reported with modifier 73 or 74 under the revised ASC payment system, and note that the policy under the existing ASC payment system is the same as the OPPS policy in these circumstances.

Under the existing ASC payment system, ASCs do not report modifier 52 (Reduced services) for interrupted procedures, because most interrupted covered surgical procedures paid in ASCs would be appropriately reported with modifier 73 or 74 because they generally require anesthesia. Modifier 52 is appended to a service under the OPPS to signify that a service that did not require anesthesia was partially reduced or discontinued at the physician's discretion. Modifier 52 is reported under the OPPS for a variety of types of interrupted services, such as radiology services, and we believe that there are considerable resource savings to the facility under the circumstances where it is reported. Therefore, under the OPPS, we apply a 50 percent reduction to the facility payment for interrupted procedures and services reported with modifier 52.

The PPAC recommended that we apply payment policies consistently under the revised ASC payment system and the OPPS. We received a number of public comments recommending consistency of payment policies between the two payment systems. Although not discussed in our proposed rule for the revised ASC payment system, we received comments on the application of the current interrupted procedure policies to the revised ASC payment system and respond to these comments below.

Comment: Many commenters recommended that we establish consistent payment policies under the OPPS and the revised ASC payment system, because the hospital and ASC facilities provide many of the same services to similar patients. In particular, several commenters compared current payment policies that were similar between the existing ASC payment system and the OPPS, including the payment policy that reduces the payment for interrupted procedures reported with modifier 73 by 50 percent in both payment systems.

Response: We agree with commenters that consistent policies between the revised ASC payment system and the OPPS are desirable whenever possible, because the revised ASC payment system will be based upon the OPPS relative payment weights. We also note that, with the significant expansion of procedures eligible for ASC payment under the revised ASC payment system, it is possible that some of the additional procedures payable in the ASC setting beginning in CY 2008 may not always require anesthesia. In addition, as further discussed in section IV.C.2. of this final rule, we will be providing separate payment for some ancillary radiology services that are integral to the performance of covered surgical procedures under the revised ASC payment system. Therefore, we believe that the revised ASC payment system should also allow ASCs to report interrupted services not requiring anesthesia with modifier 52, consistent with the OPPS reporting of these services. Because we expect ASCs to utilize fewer facility resources in such situations, similar to ASC procedures where modifier 73 is reported and to

HOPDs where modifier 73 or 52 is reported, we believe that it is appropriate to provide the same payment reduction of 50 percent under the revised ASC payment system as under the OPPS when modifier 52 is reported.

After considering the public comments received, we are clarifying here the payment policies for interrupted procedures in ASCs. First, procedures requiring anesthesia that are terminated after the patient has been prepared for surgery and taken to the operating room but before the administration of anesthesia will be reported with modifier 73, and the ASC payment for the covered surgical procedure will be reduced by 50 percent. Second, procedures and services not requiring anesthesia that are partially reduced or discontinued at the physician's discretion will be reported with modifier 52, and the ASC payment for the covered surgical procedure or covered ancillary service will be reduced by 50 percent. Third, procedures requiring anesthesia that are terminated after the administration of anesthesia or the initiation of the procedure will be reported with modifier 74, and the full ASC payment for the covered surgical procedure will be provided. We are adding new § 416.172(f) to reflect this final policy.

G. Geographic Adjustment

Currently, Medicare adjusts 34.45 percent of the national ASC payment rates using wage index values and localities that were established under the hospital IPPS prior to implementation of the new CBSAs issued by OMB in June 2003. Medicare currently adjusts 60 percent of national OPPS payment rates by the IPPS wage index value assigned to hospitals using the June 2003 OMB definitions for geographical statistical areas and wage adjustments required under Public Law 108–173.

Since 1990, ASC payments have been adjusted for regional wage variations using the IPPS wage index values. As we discussed in the August 2006 proposed rule, we believe that standardization continues to be appropriate in recognition of widely varying labor market costs tied to geographic localities. We also explained in the proposed rule that we believe it is advisable to maintain consistency in locality designations between ASCs and hospitals and acknowledge parity of labor costs between ASCs and HOPDs that are competing for staff in the same locality. Therefore, we proposed to apply to ASCs the IPPS pre-reclassification wage index values associated with the June 2003 OMB geographic localities, as recognized under the IPPS and OPPS, to adjust national ASC payment rates for geographic wage differences under the revised payment system.

Although we had not collected new data to identify whether the current labor-related share is correct, the results of a 1994 survey of ASC costs generally supported the current 34.45-percent labor adjustment factor, and we had received no complaints from the ASC community, prior to our proposal, about our continued use of the 34.45/65.55 ratio of labor to nonlabor costs for purposes of adjusting payments for regional wage differences. Moreover, in the proposed rule, we stated our belief that it is reasonable to expect ASCs to have a lower labor adjustment factor than that of hospitals. For example, most OPPS HOPDs are staffed 24 hours per day to provide emergency department services and observation care, and these patterns of operation could lead to relatively higher labor costs for hospital services overall. Therefore, we proposed to continue using 34.45 percent as the labor adjustment factor for regional wage differences under the revised ASC payment system, beginning in CY 2008. We proposed to establish rules governing this proposal in new § 416.172(c).

Subsequent to the publication of the August 2006 proposed rule for the revised ASC payment system, the GAO issued the report, ''Medicare: Payment for Ambulatory Surgical Centers Should Be Based on the Hospital Outpatient Payment System,'' (GAO–07–86), which is discussed in further detail in section II.B. of this final rule. In this report, the GAO determined that based upon the 2004 ASC cost data from a geographically representative group of ASCs received in response to its ASC survey, the mean labor-related proportion of ASC costs was 50 percent.

Comment: Several commenters agreed with CMS' proposal to use the IPPS pre-reclassification wage index values associated with the June 2003 OMB geographic localities. However, many commenters indicated that the current 34.45-percent labor factor is based on old data and is too low, leading to their recommendation that the 60-percent OPPS labor factor would be more appropriate. Some commenters explained that it was difficult to assess the appropriateness of CMS' proposal in the absence of the GAO Report on the ASC payment system that was directed to address whether a geographic adjustment should be provided for payment of procedures furnished in ASCs and, if so, the labor and nonlabor shares of ASC payment. Other commenters recommended that CMS collect more recent data on the costs of delivering services in the ASC setting or suggested that ASCs be asked to submit cost reports to inform the development of an appropriate, contemporary labor factor reflecting current ASC costs.

Response: For the reasons stated in the proposed rule and reiterated above, we agree with the commenters that we should use the IPPS pre-reclassification wage index values associated with the June 2003 OMB geographic localities. While we share the concerns of commenters about the age of the survey data used for the current 34.45-percent labor factor, we disagree that it would be appropriate to use the same 60-percent labor factor used under the OPPS. The commenters who indicated a preference for the OPPS labor factor did not address the fact that most OPPS HOPDs are staffed 24 hours per day to provide emergency department services and observation care. Other than their request for parity with the OPPS labor adjustment, they provided no specific data to support the appropriateness of a 60-percent labor factor based on current ASC costs for performing procedures.

However, we agree with commenters that the 34.45 labor-related share that we proposed for the revised payment system is likely too low to accurately reflect the current proportion of ASCs' labor costs. The data used to develop the 34.45 labor-related share are 20 years old, and 1994 ASC survey cost data, which have never been used for ASC payment, showed a slightly higher labor-related share of 37.66 percent that we believe was likely reflective of a generally increasing proportion of ASC labor costs. ASCs and HOPDs operate in some of the same communities, using similar clinical staff to perform certain procedures, and ASC staff wages may be comparable to those of hospital staff. However, we have no data to indicate that ASCs and HOPDs have equivalent ratios of labor to nonlabor costs, on average, for all the services each type of facility provides. As discussed above, because ASCs only provide a subset of surgical procedures compared with the wide variety of OPPS services that we expect could be, overall, relatively more labor-intensive than ambulatory surgical procedures specifically, we believe that the most appropriate ASC labor-related share would be lower than the 60 percent used to adjust HOPD payment. The GAO Report determined, on the basis of the 2004 ASC cost data received from a geographically representative group of ASCs in response to its ASC survey, that the mean labor-related

proportion of costs was 50 percent. In addition, the GAO found that the range of the labor-related costs for the middle 50 percent of ASCs responding to the survey was relatively narrow, at 43 percent to 57 percent of total costs.

Therefore, in response to comments about the age of the historical data used for the existing and proposed revised ASC payment system labor factor, in addition to consideration of the GAO's determination based on the most recent ASC survey findings, we reviewed the labor-related share indicated by the 1994 ASC survey cost data and assessed the clinical labor required to provide both ASC and OPPS services, in the context of the full facility resource costs associated with those services. Based on all of those considerations, we believe that it is not necessary to collect additional ASC cost data in order to determine the appropriate labor-related factor for use under the revised ASC payment system and that a 50-percent labor factor for the revised ASC payment system is most appropriate. Fifty percent is significantly higher than the current labor-related share (34.45 percent) that we proposed to maintain but is also lower than the OPPS labor-related share of 60 percent, a differential we believe is appropriate given the broader range of labor-intensive services provided in the HOPD setting. A 50-percent labor-related share is fully consistent with the GAO findings that we believe provide a more accurate representation of the present-day labor-related proportion of ASC costs than the data upon which we currently rely. In the future, if we believe that the collection of additional ASC cost data is important to providing appropriate payment to ASCs and such an activity is administratively feasible, we may consider gathering such information from ASCs.

After considering the public comments received, we are finalizing our proposal to apply to ASC payments under the revised ASC payment system the IPPS pre-reclassification wage index values associated with the June 2003 OMB geographic localities, as recognized under the IPPS and OPPS, in order to adjust national ASC payment rates for geographic wage differences under the revised payment system. However, rather than adopting 34.45 percent as the labor adjustment factor as we proposed, we are adopting 50 percent as the labor-related proportion under the revised ASC payment system. The geographic adjustment policy of the revised ASC payment system is set forth in § 416.172(c).

H. Adjustment for Inflation

As noted above, section 1833(i)(2)(C)(iv) of the Act, as amended by section 626(a) of Public Law 108–173, requires the adjustment of ASC payment amounts for inflation for FY 2005, the last quarter of CY 2005, and each of CYs 2006 through 2009 to equal zero percent. Otherwise, section 1833(i)(2)(C)(i) of the Act provides that ASC payment amounts are to be adjusted by the percentage increase in the CPI–U during years when the ASC payment amounts are not updated.

Although we are only required to increase the ASC payment rates by the percentage increase in the CPI–U during years in which we have not updated the ASC payment amounts, we proposed to update the ASC conversion factor annually using the CPI–U. For CY 2008 and CY 2009, the statute requires a zero percent CPI–U increase for ASC services. Beginning in CY 2010, in the August 2006 proposed rule for the revised ASC payment system, we proposed to update the ASC conversion factor by the percentage increase in the CPI–U (U.S. city average) as estimated for the 12-month period ending with the midpoint of the year involved. Accordingly, we proposed to establish rules in proposed new §§ 416.171 and 416.172 to reflect our proposed policy for applying an inflation adjustment under the proposed revised payment system beginning January 1, 2008. (These sections of the proposed regulations also included our proposed policies for calculating a conversion factor and standardizing labor-related costs, respectively, under the proposed revised payment system.)

Comment: A number of commenters recommended that CMS use the hospital market basket as an update for inflation in the revised ASC payment system. The commenters generally indicated that the hospital market basket more appropriately reflects inflation in the costs of providing surgical services. These commenters pointed out that the CPI–U is a measure of consumer inflation rather than health care provider inflation, and that the hospital market basket was specifically designed to measure the cost of hospital inflation. They concluded that the hospital market basket is, thus, a better proxy for the inflationary pressures faced by ASCs. One commenter presented data indicating that the cost of operating an ASC rose by an average of 13.4 percent between 2003 and 2005 and that, during that same period, the CPI–U fell 36 percent short of meeting these increased costs.

Some commenters expressed concern that the use of two different factors to update payments for ASCs and HOPDs would further increase the discrepancies between payments in the two settings. They further suggested that alignment with hospital updates and policies in general would achieve parity and transparency in the market and ensure that facility decisions are made based upon what is best for the patient. Other commenters suggested that CMS develop another method that would more closely approximate the rising cost of operating an ASC if the proposal to base the annual update of the ASC conversion factor on the CPI–U is finalized.

Response: As we explained in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68003), the OPPS conversion factor is updated annually using the hospital inpatient market basket percentage increase. The statute specifically required us to take into account the recommendations of a GAO Report studying the appropriateness of aligning a revised ASC payment system with the payment rates and relative weights established under the OPPS. However, the statute gives the Secretary broad authority in designing the specific features of the revised system. In particular, the statute gives the Secretary considerable discretion in determining an appropriate update mechanism for the revised ASC payment system. Section 1833(i)(2)(C)(i) of the Act requires that the Secretary update the payment amounts established under the revised system ''by the percentage increase in the Consumer Price Index for all urban consumers,'' but only if the Secretary has not otherwise ''updated amounts established'' under the revised system for that year. The statute, therefore, does not mandate the adoption of any particular update mechanism, but it does establish the CPI–U as the default update mechanism in the absence of any other update. In addition, section 1833(i)(2)(C)(iv) of the Act mandates a zero CPI–U adjustment in CY 2008 and CY 2009 for ASCs, the first 2 years under the revised payment system, suggesting that maintaining continuity in the update mechanism under the revised system may be appropriate. Therefore, we proposed, under the revised system beginning in CY 2010, to apply the CPI–U adjustment to update the ASC conversion factor for inflation on an annual basis. While we understand the arguments of commenters in favor of adopting the hospital market basket as the update mechanism under the revised ASC

payment system, we continue to believe that it is appropriate to adopt the default update mechanism designated by Congress for the revised system.

Therefore, we are finalizing our proposal, beginning in CY 2010, to update the conversion factor by the percentage increase in the CPI–U (U.S. city average) as estimated for the 12-month period ending with the midpoint of the year involved. At the same time, we recognize that we continue to have flexibility under the statute to employ a different update mechanism under the revised ASC payment system. As one example, we do not intend for the revised ASC payment system to result in additional Medicare expenditures over time. We will be monitoring this issue closely in the coming years. Consequently, we will reconsider the ASC update if expenditures increase inappropriately in future years.

Therefore, after consideration of all public comments received, we are finalizing our proposal under § 416.171(a)(2), without modification, to apply the CPI–U to update the ASC conversion factor for inflation on an annual basis under the revised ASC payment system.

I. Beneficiary Coinsurance

Payment for ASC services is subject to the Medicare Part B deductible and coinsurance requirements. Currently, Medicare pays participating ASCs 80 percent of a prospectively determined standard overhead amount, adjusted for regional wage variations for ASC covered surgical procedures, except for screening colonoscopies. The beneficiary deductible and coinsurance make up the other 20 percent of payment for ASC services, except for screening colonoscopies for which there is no deductible and for which the coinsurance is equal to 25 percent. Section 1834(d) of the Act requires this higher coinsurance for screening colonoscopies and screening flexible sigmoidoscopies. However, only screening colonoscopies are on the CY 2007 ASC list of covered surgical procedures. In addition, effective January 1, 2007, a deductible is no longer applied for colorectal cancer screening tests, including screening flexible sigmoidoscopy and screening colonoscopy procedures performed in ASCs or other settings, as specified in section 1833(b)(8) of the Act (as added by section 5113 of Public Law 109–171).

Section 626(c) of Public Law 108–173 amended section 1833(a)(1) of the Act to provide that, beginning with the implementation date of the revised payment system, the Medicare program payment to ASCs shall equal 80 percent of the lesser of the actual charge for the services or the payment amount that we determine under the revised payment system for the services. This amendment, however, did not affect section 1834(d) of the Act. Therefore, we proposed to make this change and to continue to maintain the beneficiary deductible and coinsurance at 20 percent under the revised ASC payment system, except for screening colonoscopies and screening flexible sigmoidoscopies (which are both ASC covered surgical procedures in CY 2008) for which the statute requires 25 percent beneficiary coinsurance. In the August 2006 proposed rule for the revised ASC payment system, we proposed to reflect the 20 percent beneficiary coinsurance in proposed new §§ 416.172(b) and (d); however, the proposed regulation text did not address the statutory requirement of 25 percent coinsurance for screening flexible sigmoidoscopies and screening colonoscopies. Consistent with the provisions of section 1834(d) of the Act, we implemented the 25 percent coinsurance requirement for screening colonoscopies (screening flexible sigmoidoscopies are not on the CY 2007 ASC list of covered surgical procedures) in ASCs, effective January 1, 2007, as finalized in § 410.152(i) and discussed in the preamble to the CY 2007 OPPS/ASC final rule with comment period (71 FR 68174).

Comment: Many commenters supported our proposal to continue to apply the 20 percent coinsurance provision to payment for covered surgical procedures performed in ASCs and paid under the revised ASC payment system.

Response: We appreciate the comments. The statute requires Medicare to pay 80 percent of the lesser of the actual charge for the service or the amount we determine under the revised payment system, other than for screening colonoscopy and screening flexible sigmoidoscopy procedures. Beneficiary coinsurance will remain at 20 percent for ASC services under the revised ASC payment system, except for screening flexible sigmoidoscopy and screening colonoscopy procedures. The coinsurance for screening colonoscopies and screening flexible sigmoidoscopies will be 25 percent, as required by section 1834(d) of the Act, with no deductible for those services under the revised ASC payment system. This requirement is reflected in our regulations at §§ 416.172(b) and (d).

J. Phase-In of Full Implementation of Payment Rates Calculated Under the Revised ASC Payment System Methodology

We discussed in section XXVII.D. of the preamble to the August 2006 proposed rule for the revised ASC payment system (71 FR 49690 through 49695), our analysis of the impact that the revised ASC payment system and estimated payment rates for implementation in CY 2008 could have on certain ASCs that specialize in or perform high volumes of procedures for which payment under the new system would decrease. We wanted to ensure that the revised payment system does not cause a sudden, unwarranted migration of services from ASCs to other ambulatory settings, or the reverse; that ASCs would have an opportunity to balance their Medicare case-mix between procedures whose rates decrease and procedures whose rates increase; and that beneficiaries and their physicians would continue to have a robust choice of sites where important preventive and other surgical services are paid under Medicare.

In the August 2006 proposed rule, we proposed to implement the revised ASC payment system in CY 2008 using transitional payment rates that would be based upon a 50/50 blend of the CY 2007 ASC payment rate for a procedure on the CY 2007 ASC list of covered surgical procedures and the final payment rate for that same procedure calculated under the revised payment system methodology described in the proposed rule and reflected in proposed new § 416.171(c). We further proposed that, in CY 2009, we would fully implement the ASC payment rates calculated under the proposed payment methodology, discontinuing the blended transitional payment rates for services furnished beginning January 1, 2009. This was proposed in new § 416.171(d).

Comment: Several commenters expressed concern that the proposed 2-year transition period would threaten the viability of many ASCs. The commenters indicated that given the size of the payment cuts contemplated under the proposed rule for certain procedures and specialties, especially gastrointestinal, pain management, and ophthalmology services, 1 year would not provide adequate time for ASCs to adjust to the changes and that a 4-year phase-in would allow a more gradual and less disruptive transition to the new payment system. Many commenters urged CMS to implement policies to further address the decrease in payments for procedures whose rates would fall significantly during a

transition to the new payment system. One commenter suggested that CMS hold harmless procedures that were on the ASC list of covered surgical procedures prior to CY 2008 to prevent significant changes in payments during the transition. Some commenters expressed concern that if CMS revises both the payment system and the geographic localities used for wage adjustment at the same time, providers in certain areas could experience dramatic shifts in payment as a result of the cumulative effect of the wage index and other policy changes that were described in the proposed rule. These commenters encouraged CMS to consider the cumulative effects of the wage index and other policy changes on payments to ASCs under the revised ASC payment system and develop a transitional approach that protects providers from significant reductions in payment.

A number of commenters supported the proposed 2-year phase-in of the ASC payment rates based on the final methodology of the revised ASC payment system. The commenters generally believed that the transition period as proposed would provide sufficient notice and time for ASCs to adapt to the revised payment system.

Some commenters stated that the proposed transition does not appropriately address payment for device-intensive procedures that implant devices that are paid separately according to the DMEPOS fee schedule under the existing payment system during the transitional year of CY 2008. Some of these commenters urged CMS to devise a strategy that would accelerate full implementation of payment for device-intensive procedures according to the proposed methodology for the revised ASC payment system. Alternatively, other commenters suggested that CMS develop a final transitional policy that does not exclude the payments for implanted devices now paid separately under the DMEPOS fee schedule in calculating the CY 2007 ASC payment contributions to the blended payment rates for device-intensive procedures for CY 2008.

Response: After consideration of all of these public comments, we agree with the majority of the commenters who indicated that a 2-year transition may provide some ASCs with insufficient time to adapt to the revised payment system. During the transition to the revised system, we believe it is important to maintain appropriate Medicare beneficiary access to ASC services. In addition, we do not believe that the transition should be asymmetrical, meaning that procedures with decreasing payments under the revised payment system should be transitioned differently from those with increasing payments. We also do not believe that the transition should lead to increases or decreases in overall Medicare ASC expenditures.

Therefore, in order to provide additional time for ASCs to adapt to the revised payment system and to facilitate Medicare beneficiary access to ambulatory surgical procedures at those ASCs that may not adjust as quickly as others to the revised payment system, we are extending the transition from our proposed 2 years to 4 years for all services on the CY 2007 ASC list of covered surgical procedures, as reflected in § 416.171(c). We believe a transition period of 4 years, comparable to transition periods provided under other payment systems (for example, the recent practice expense changes to the MPFS) and as suggested in comments concerning this issue, will provide a reasonable and balanced approach to implementation that addresses two important objectives, in particular offering sufficient notice and time for ASCs to adapt to the revised payment system and providing more accurate and appropriate ASC payments for covered surgical procedures. The contribution of CY 2007 ASC payment rates to the blended transitional rates will decrease by 25 percentage point increments each year of transitional payment, until CY 2011, when we will fully implement the ASC payment rates calculated under the final methodology of the revised payment system. Procedures new to ASC payment for CY 2008 or later calendar years will receive payments determined according to the final methodology of the revised ASC payment system, as reflected in § 416.171(a), without the need for a transition. ASC covered surgical procedures listed in Addendum AA to this final rule that are subject to the transition are assigned to payment indicators ''A2'' (Surgical procedure on ASC list in CY 2007; payment based on OPPS relative payment weight) and ''H8'' (Device-intensive procedure on ASC list in CY 2007; paid at adjusted rate). ASC covered surgical procedures listed in Addendum AA to this final rule that are not subject to the transition are assigned to payment indicators ''G2'' (Non office-based surgical procedure added to ASC list in CY 2008 or later; payment based on OPPS relative payment weight); ''J8'' (Device-intensive procedure added to ASC list in CY 2008 or later; paid at adjusted rate); ''P2'' (Office-based surgical procedure added to ASC list in CY 2008 or later with MPFS nonfacility PE RVUs; payment based on OPPS relative payment weight); ''P3'' (Office-based surgical procedure added to ASC list in CY 2008 or later with MPFS nonfacility PE RVUs; payment based on MPFS nonfacility PE RVUs); and ''R2'' (Office-based surgical procedure added to ASC list in CY 2008 or later without MPFS nonfacility PE RVUs; payment based on OPPS relative payment weight).

In addition, we agree with commenters who indicated that an adjustment should be made during the transition period for certain procedures that implant devices that are separately payable under the existing ASC payment system. For device-intensive procedures utilizing separately payable devices of significant cost, ideally, we would adjust the CY 2007 base rates for the procedures to appropriately reflect the fact that associated devices may have been separately paid to ASCs in CY 2007 under the DMEPOS fee schedule, but beginning in CY 2008 implantable device payment will be packaged into the ASC payment for the covered surgical procedure under the revised ASC payment system. This would require associating the current separately provided implantable device payments with specific covered surgical procedures, in order to determine an appropriate CY 2007 base payment rate for the transition for each procedure. However, due to the challenges in making these associations, including the common historical practice of payment at contractor-priced rates for some implantable devices that have been reported only under Level II HCPCS unlisted codes under the existing payment system, we cannot accurately allocate those device payments to covered surgical procedures using the ASC data.

Under the final methodology of the revised ASC payment system for calculating payment for procedures with significant device costs as discussed in section IV.C.2.e. of this final rule, for device-intensive procedures on the CY 2007 ASC list of covered surgical procedures, we will separately determine both the device payment and service payment portions of the total ASC payment under the revised payment system. We will apply the ASC conversion factor only to the specially calculated OPPS relative payment weight for the service portion, while providing the same packaged payment for the device portion as would be made under the OPPS. That is, we will determine the payment amount attributable to the device, as currently determined under the OPPS, and

combine that payment amount with the adjusted ASC service payment, resulting in a total ''bundled'' ASC payment for the device-intensive procedure under the revised ASC payment system.

Consistent with that approach, we also will apply our transition policy differentially to those portions of the total ASC payment. While we will not subject the device payment portion of the total ASC payment for the procedure under the revised ASC payment system to the transition policy, we will transition the service payment portion of the total ASC payment for the procedure over the 4-year phase-in period. Device-intensive procedures that are new to the ASC list of covered surgical procedures for CY 2008 or later years will be exempted from any transition period and will be paid at the fully implemented revised ASC payment system rates beginning in CY 2008 or the applicable update year, just like all other new ASC surgical procedures. During each of the transition years, when the CY 2007 ASC payment rate for a device-intensive procedure that did not previously include packaged ASC payment for the implantable device itself is blended with the payment developed under the methodology of the revised ASC payment system that would otherwise package the device payment, the full device payment amount will be paid to ASCs in the transition year, with blended payment determined only for the service portion of the ASC payment, for which a corresponding CY 2007 ASC payment rate exists. This methodology achieves an appropriate payment for costly, implantable devices, because it recognizes that, in general, the device costs are similar for ASCs and HOPDs. This specific transition approach for device-intensive procedures ensures that ASCs receive appropriate packaged payment for implantable devices during the transition years, even though payment for such devices is generally not included in their base CY 2007 ASC payment rates under the existing ASC payment system.

A full discussion of the calculation of the payment rates for these device-intensive procedures can be found in section IV.C.2.e. of this final rule, in the context of establishing payment weights for device-intensive procedures under the revised ASC payment system. Tables 5 and 6 above are illustrative of the device-intensive procedures likely to be subject to this special transitional policy for device-intensive procedures under the revised ASC payment system, pending updating of their OPPS status in CY 2008 and future years.

After considering the public comments received, we are finalizing a policy to phase in implementation of the payment rates calculated under the revised ASC payment system over 4 years. For CYs 2008, 2009, and 2010, payment will be made for each procedure on the CY 2007 ASC list of covered surgical procedures based on a 25/75, 50/50, and 75/25 blend, respectively, of the CY 2007 payment rate for the procedure and the payment rate for that procedure calculated under the standard revised payment system methodology set forth in § 416.171(a). Procedures that are newly approved for ASC payment in CY 2008 or later years are not subject to the transition policy. In CY 2011, we will fully implement the ASC payment rates calculated under the standard payment methodology of the revised ASC payment system. This final transition policy is set forth in § 416.171(c).

The service payment portion of the total ASC payment for device-intensive procedures that are on the ASC list of covered surgical procedures in CY 2007 will be subject to the transition. The service payment portion calculated under the fully implemented revised ASC payment system methodology will be blended with the ASC payment for the procedure under the existing payment system. In contrast, the device payment portion of the total ASC payment for these procedures, where the device would generally have been paid separately according to the DMEPOS fee schedule under the existing ASC payment system, will not be subject to the transition. Rather, the contribution of the device payment portion to the total ASC payment during the transitional years will be calculated according to the methodology of the fully implemented revised ASC payment system. During the years of phase-in of the revised ASC payment system, the device payment portion will be summed with the blended service payment portion (that is, the 25/75, 50/50, or 75/25 blend, as appropriate) to establish the total ASC payment for these device-intensive procedures for each year of the transition. Device-intensive procedures new to the ASC list of covered surgical procedures for CY 2008 or later years will be paid the fully implemented revised payment system rates.

V. Calculation of ASC Conversion Factor and ASC Payment Rates for CY 2008

A. Overview

As discussed in section IV.B. of this final rule, in the August 2006 proposed rule, we proposed to base ASC relative payment weights and payment rates under the revised ASC payment system on APC groups and relative payment weights established under the OPPS. We also proposed to set the ASC relative payment weight for certain office-based surgical procedures so that the national ASC payment rate does not exceed the MPFS unadjusted nonfacility practice expense amount. We explained that the proposed ASC payment weights would be multiplied by an ASC conversion factor to calculate the ASC payment rates. In the August 2006 proposed rule, our estimate for the CY 2008 budget neutral ASC conversion factor was $39.688. In this final rule, we estimate that the ASC conversion factor for CY 2008 will be approximately $42.543. This new estimate of the ASC conversion factor differs from the estimate in the August 2006 proposed rule for a number of reasons, including: (1) Use of the final OPPS relative payment weights for CY 2007; (2) use of the final MPFS nonfacility practice expense payment amounts for CY 2007; (3) use of updated utilization data for the full year of CY 2005; (4) a 4-year instead of 2-year transition to the revised payment system rates, with a modified transition for device-intensive procedures; (5) more recent estimates of the hospital market basket update and the MPFS conversion factor update for CY 2008; and (6) adoption of the with-migration approach to calculation of the budget neutrality adjustment using different time periods for the assumed migration of procedures from physicians' offices and HOPDs to ASCs under the revised ASC payment system. Specific details regarding our final methodology for estimating the revised ASC payment system conversion factor are discussed later in this section.

We are not able to provide the final CY 2008 ASC conversion factor in this final rule for the revised ASC payment system because the final conversion factor will be based on the final OPPS relative payment weights for CY 2008, the final MPFS nonfacility practice expense payment amounts for CY 2008, and updated and complete CY 2006 utilization data, all of which are unavailable at this time but will be available for the CY 2008 OPPS/ASC final rule. Therefore, in this final rule, we are finalizing the methodology for calculating the ASC conversion factor for the revised ASC payment system. When the necessary data are available, they will be used in the methodology described in this final rule, and we will provide the final CY 2008 ASC conversion factor and ASC relative

payment weights and rates in the CY 2008 OPPS/ASC final rule.

B. Budget Neutrality Requirement

Section 626(b) of Public Law 108–173 amended section 1833(i)(2) of the Act by adding subparagraph (D) to require that in the year the revised ASC system is implemented:

''* * * [S]uch system shall be designed to result in the same aggregate amount of expenditures for such services as would be made if this subparagraph did not apply, as estimated by the Secretary. * * *''

As discussed in the August 2006 proposed rule for the revised ASC payment system, the ASC conversion factor is calculated so that estimated total Medicare payments under the revised ASC payment system would be budget neutral to estimated total Medicare payments under the current ASC payment system as required by the statute. That is, application of the ASC conversion factor would be designed to result in aggregate expenditures under the revised ASC payment system in CY 2008 equal to aggregate expenditures that would have occurred in CY 2008 in the absence of the revised system, taking into consideration the cap on payments in CY 2007 as required under section 5103 of Public Law 109–171, which we discuss further in section IV.A. of this final rule.

We note that, in the August 2006 proposed rule (71 FR 49656), we considered the term ''expenditures'' in the context of section 626(b) of the Public Law 108–173 budget neutrality requirement to mean expenditures from the Medicare Part B Trust Fund. We did not consider expenditures to include beneficiary coinsurance and copayments.

C. Calculation of the ASC Payment Rates for CY 2008

1. Proposed Method for Calculation of the ASC Payment Rates for CY 2008 in the August 2006 Proposed Rule

In the August 2006 proposed rule, we proposed to calculate the ASC payment rates for CY 2008 as follows:

a. Estimated Medicare Program Payments (Excluding Beneficiary Coinsurance) Under the Current ASC Payment System in the August 2006 Proposed Rule

Step 1: To estimate the aggregate amount of expenditures that would be made in CY 2008 under the current ASC payment system, we first multiplied the estimated CY 2008 ASC volume for each HCPCS code on the CY 2007 ASC list of covered surgical procedures by the estimated CY 2008 ASC payment rate for the HCPCS code under the existing ASC system, and then subtracted beneficiary coinsurance. In the August 2006 proposed rule, the estimated CY 2008 ASC payment rates were based on the proposed CY 2007 ASC payment rates, which were listed in Addendum AA to the rule, taking into account the OPPS cap on ASC services at the OPPS rate as required by section 5103 of Public Law 109–171 and reflecting the zero percent CY 2008 update for ASC services mandated by section 1833(i)(2)(C)(iv) of the Act. Although we did not specify in the August 2006 proposed rule that we did so, we also estimated the amount the Medicare program would pay in CY 2008 for implantable prosthetic devices and implantable DME for which ASCs currently receive separate payment under the DMEPOS fee schedule. We then summed the estimated DMEPOS fee schedule total amount and all of the estimated procedure payment amounts for services on the CY 2007 ASC list of covered surgical procedures to estimate the aggregate amount of expenditures that would be made in CY 2008 under the policies of the current ASC payment system.

b. Estimated Medicare Program Payments (Excluding Beneficiary Coinsurance) Under the Proposed Revised ASC Payment System in the August 2006 Proposed Rule

Step 2: To estimate the aggregate amount of expenditures that would be made in CY 2008, we used estimated CY 2008 OPPS payment amounts instead of estimated CY 2008 ASC payment amounts under the current system, and we multiplied the estimated CY 2008 ASC volume for each HCPCS code on the CY 2007 ASC list of covered surgical procedures by the estimated CY 2008 OPPS payment rate for the HCPCS code, and then subtracted beneficiary coinsurance. We summed the results for all services on that ASC list of covered surgical procedures.

c. Calculation of the Proposed CY 2008 Budget Neutrality Adjustment in the August 2006 Proposed Rule

Step 3: To calculate the proposed CY 2008 ASC budget neutrality adjustment, we divided the total expenditures calculated in Step 1 by the total expenditures calculated in Step 2. We calibrated this estimate of the budget neutrality adjustment to take into account that, in CY 2008, the payment rate for procedures on the CY 2007 ASC list of covered surgical procedures was proposed to be 50 percent of the CY 2007 ASC payment amount and 50 percent of the CY 2008 ASC payment rate calculated according to the proposed revised payment system methodology without the transition. The result of these calculations was a budget neutrality adjustment of 0.62.

d. Application of the Budget Neutrality Adjustment To Determine the Proposed CY 2008 ASC Conversion Factor in the August 2006 Proposed Rule

Step 4: To determine the proposed CY 2008 ASC conversion factor, we multiplied the estimated CY 2008 OPPS conversion factor by the result of Step 3. The proposed estimated CY 2008 OPPS conversion factor was $64.013. Multiplying the estimated CY 2008 OPPS conversion factor by the 0.62 budget neutrality adjustment yielded our proposed CY 2008 ASC conversion factor of $39.688.

e. Calculation of the Proposed CY 2008 ASC Payment Rates Under the Revised ASC Payment System in the August 2006 Proposed Rule

Step 5: To determine the proposed national ASC payment rates for covered surgical procedures under the revised payment system (including beneficiary coinsurance), we multiplied the ASC conversion factor from Step 4 by the ASC relative payment weight.

The proposed ASC relative payment weights for covered surgical procedures were based on the relative payment weights for the APC groups established under the OPPS as described in section IV.B. of this final rule. However, as further discussed in section IV.E. of this final rule, the ASC relative payment weights for certain office-based surgical procedures were set so that the national ASC payment rate did not exceed the MPFS unadjusted nonfacility practice expense amount.

f. Calculation of the Proposed CY 2008 ASC Payment Rates Under the Transition in the August 2006 Proposed Rule

Step 6: We proposed to fully implement the revised ASC payment rates through a 2-year transition to 100 percent implementation of the revised ASC payment rates for procedures included on the CY 2007 ASC list of covered surgical procedures. In the first year of the transition, the payment rate would be based on 50 percent of the final CY 2007 ASC payment rate under the existing ASC payment system and 50 percent of the final CY 2008 ASC payment rate calculated under the proposed revised payment methodology. The CY 2008 payment for procedures not on the CY 2007 ASC list of covered surgical procedures, but for which we proposed to make payment

under the revised payment system beginning in CY 2008, would be made at the fully implemented revised ASC payment rates.

2. Alternative Option for Calculating the Proposed Budget Neutrality Adjustment in the August 2006 Proposed Rule

In the August 2006 proposed rule, we presented an alternative approach to calculating the budget neutrality adjustment under the revised ASC payment system, which would take into account the effects of migration of procedures across ASCs, physicians' offices, and HOPDs that might be attributable to the revised ASC payment system (71 FR 49657 through 49658). In the following discussion, the phrase ''new ASC procedure'' refers to a surgical procedure not on the CY 2007 ASC list of covered surgical procedures but for which we proposed to make payment under the revised ASC payment system beginning in CY 2008.

Under this alternative, we assumed that 25 percent of the HOPD utilization for new ASC procedures would migrate to ASCs, and we also assumed that 15 percent of the physician's office utilization for new ASC procedures would migrate to ASCs in the first year of the revised ASC payment system. In the August 2006 proposed rule, we also noted our belief that our assumptions of 25 percent and 15 percent migration from HOPDs and physicians' offices to ASCs, respectively, were reasonable, given the general utilization relationships between those settings for services on the CY 2007 ASC list of covered surgical procedures. Services on the ASC list of covered surgical procedures that are predominantly performed in ASC and HOPD settings are, on average, performed 30 percent of the time in the ASC setting. Furthermore, services on the existing ASC list of covered surgical procedures that are mainly performed in ASC and physician's office settings are, on average, performed 17 percent of the time in the ASC setting. We assumed that new ASC procedures would migrate at slightly lower rates in the first year of the revised ASC payment system, yielding our migration assumptions to ASCs of 25 percent for the HOPD services and 15 percent for the physician's office services.

We also assumed that the net impact of migration of services on the existing CY 2007 ASC list of covered surgical procedures would be negligible. We noted that payment rates for the current highest volume ASC procedures would generally decrease under the proposed revised ASC payment system, and the lower volume ASC procedures would experience significant payment increases. We believed it was reasonable to assume that some of the higher volume services would migrate from ASCs to other settings, and some of the current lower volume procedures would migrate to the ASC setting as a result of the payment changes.

In order to calculate the budget neutrality adjustment under this alternative option in the August 2006 proposed rule, first we estimated expenditures that would occur if we did not revise the ASC payment system. We estimated CY 2008 expenditures if the ASC payment rates were not revised and the ASC list of covered surgical procedures was not expanded, as described below.

a. Estimated Medicare Program Payments (Excluding Beneficiary Coinsurance) Under the Existing ASC Payment System in the August 2006 Proposed Rule

Step 1: Migration from HOPDs to ASCs was valued using estimated CY 2008 OPPS payment rates.

(a) We multiplied the estimated CY 2008 HOPD utilization for each new ASC procedure by 0.25, consistent with our assumption that 25 percent of the HOPD utilization for new ASC procedures would migrate to the ASC.

(b) For each new ASC procedure, we multiplied the results of Step 1(a) by the estimated CY 2008 OPPS payment rate for the procedure, and then subtracted beneficiary coinsurance for the procedure.

(c) We summed the results of Step 1(b) across all new ASC procedures.

Step 2: Migration of procedures from physicians' offices to ASCs was valued using estimated CY 2008 MPFS physician in-office payment rates. ''Physician in-office payment rate'' was equal to the MPFS nonfacility practice expense RVUs multiplied by the estimated CY 2008 MPFS conversion factor.

(a) To estimate the payment associated with our assumption that 15 percent of the physicians' office utilization for new ASC procedures would migrate to the ASC, we multiplied the projected CY 2008 physicians' office utilization for each new ASC procedure by 0.15.

(b) For each new ASC procedure, we multiplied the results of Step 2(a) by the estimated CY 2008 physician in-office payment rate for the procedure, and then subtracted beneficiary coinsurance for the procedure.

(c) We summed the results of Step 2(b) across all new ASC procedures.

Step 3: CY 2007 ASC services valued using the estimated CY 2008 ASC payment rates under the current ASC system.

This is described under Step 1 in the Estimated Payments under the Current ASC Payment System section, specifically section V.C.1.a. above.

Step 4: The results of Steps 1–3 were summed.

b. Estimated Medicare Program Payments (Excluding Beneficiary Coinsurance) Under the Proposed Revised ASC Payment System in the August 2006 Proposed Rule

Step 5: HOPD migration was valued using estimated CY 2008 OPPS payment rates.

This step is the same as Step 1 in section V.C.2.a. above.

Step 6: We identified new ASC procedures that were office-based (as discussed in section III.C. of this final rule).

Step 7: Migration of new ASC office-based procedures from physicians' offices to ASCs was valued based on estimated CY 2008 OPPS payment rates capped at the estimated CY 2008 physician in-office payment rates, if appropriate.

(a) For each new ASC procedure determined to be office-based, we multiplied the results of Step 2(a) from section V.C.2.a. above by the lesser of—

(1) The estimated CY 2008 OPPS payment rate for the procedure; or

(2) The estimated CY 2008 physician in-office payment rate for the procedure, and then subtracted beneficiary coinsurance for the procedure. (As noted in subsequent discussion in section V.C.3. of this final rule, we applied this adjustment for the capped office-based procedures after publication of the proposed rule and posted the results on our Web site.)

(b) The results of Step 7(a) were summed across all new ASC procedures considered to be office-based.

Step 8: Migration of new ASC procedures that were not determined to be office-based from physicians' offices to ASCs was valued using the estimated CY 2008 OPPS rates.

(a) For each new ASC procedure not considered to be office-based, we multiplied the results of Step 2(a) from section V.C.2.a. above by the estimated CY 2008 OPPS rate for the procedure, and then subtracted beneficiary coinsurance for the procedure.

(b) The results of Step 8(a) were summed across all new ASC procedures not considered to be office-based.

Step 9: Migration of new ASC procedures from physicians' offices to ASCs was valued using the estimated CY 2008 MPFS physician out-of-office payment rates. ''Physician out-of-office

payment rate'' was equal to the facility practice expense RVUs multiplied by the estimated CY 2008 MPFS conversion factor.

(a) For each new ASC procedure, we multiplied the results of Step 2(a) from section V.C.2.a. above by the estimated CY 2008 physician out-of-office payment rate for the procedure, and then subtracted beneficiary coinsurance for the procedure.

(b) The results of Step 9(a) were summed across all new ASC procedures.

Step 10: Current ASC services were valued using the estimated CY 2008 OPPS payment rates.

This is described under Step 2 in section V.C.1.b. above.

Step 11: The results of Steps 5 and 7–10 were summed.

c. Calculation of the Proposed CY 2008 Budget Neutrality Adjustment in the August 2006 Proposed Rule

Step 12: The result of Step 4 was divided by the result of Step 11.

Step 13: The calculation of the budget neutrality adjustment in Step 12 was calibrated in a number of ways. The application of the cap at the estimated CY 2008 MPFS nonfacility practice expense amount that occurred in Step 7 was dependent on the ASC conversion factor. The ASC budget neutrality adjustment resulting from Step 12 was calibrated to take into account the effects of the physician's office payment cap on the ASC conversion factor. The ASC budget neutrality calculation was also calibrated to take into account the fact that the additional physician out-of-office payments under the revised ASC payment system calculated in Step 9 must be fully offset by the budget neutrality adjustment to ASC services under the revised payment system. Furthermore, the budget neutrality calculation was calibrated to take into account the CY 2008 transitional payment rates for procedures on the CY 2007 ASC list of covered surgical procedures.

As reported in the August 2006 proposed rule (71 FR 49658), the budget neutrality adjustment calculated using this alternative option that incorporated CMS' migration assumptions was 0.62, indicating that under the migration assumptions described above there was no difference, rounded to the nearest hundredth, between our proposed budget neutrality adjustment without migration (0.62) and the alternative budget neutrality adjustment with migration (0.62).

d. Discussion of the Alternative Calculation of the Budget Neutrality Adjustment

We chose to propose calculation of the budget neutrality adjustment based on the CY 2007 final ASC list of covered surgical procedures and the most recent available ASC utilization data because we believed this was the most appropriate approach to estimating expenditures to result in a budget neutral payment system in CY 2008. We believed that the data available to us did not enable us to precisely estimate the net potential migration of services between the ASC, outpatient hospital, and physician's office settings that might result from implementation of the revised ASC payment system. Moreover, basing our estimate of expenditures on current ASC utilization without including migration from other sites of service was consistent with how we estimate expenditures for purposes of establishing budget neutrality in other Medicare payment systems. However, we recognized, that significant service migration would not generally be expected to occur under these other payment systems and acknowledged that the potential for migration could be significantly greater under the revised ASC payment system, with a possible effect on Medicare expenditures. Our recognition of the uniqueness of the revised ASC payment system was the reason we presented the alternative with-migration budget neutrality adjustment calculation in the August 2006 proposed rule, so commenters would have the opportunity to fully examine this model, in addition to the traditional without-migration methodology that we proposed to use.

Given that the revised ASC payment system includes a significant expansion of procedures for which ASC payment would be allowed, in addition to the expected service mix changes that result from the changes in payment incentives that accompany the introduction of any revised payment system, we expected that some commenters might believe that it would be more appropriate to estimate the ASC budget neutrality adjustment taking into account the potential migration of services between the ASC, hospital outpatient, and physician's office settings, consistent with the alternative with-migration model discussed in the August 2006 proposed rule. In that proposed rule, we explained that we would welcome data supporting the use of specific migration assumptions in the calculation of the ASC budget neutrality adjustment. We described the budget neutrality calculation under the alternative approach based on our best estimate of the potential migration of services between the different settings, hoping to facilitate and stimulate comment on migration that could occur and specifically to encourage the submission of pertinent quantitative evidence of service migration resulting from changes in payment rates. We welcomed data on all of the migration assumptions presented in the proposed rule discussion of the alternative approach. We noted that there was no difference between our proposed budget neutrality calculation without migration (0.62) and the alternative budget neutrality adjustment with migration (0.62), when rounded to the nearest hundredth.

Comment: Many commenters recommended different interpretations of section 626(b) of Public Law 108–173. The commenters believed that CMS' interpretation of the law's requirement that CMS ensure the budget neutrality of the revised system was overly restrictive and that consequently, the proposed budget neutrality factor was not adequate to make fair ASC payments. According to the commenters' interpretations of the law, they believed that CMS has the clear legal authority to make assumptions regarding the migration of procedures between different sites of service, and that expenditures for all services covered by the ASC payment system, including beneficiary coinsurance, should be considered in the calculation of budget neutrality. Most of the commenters recommended that CMS include projected case migration across ASC, HOPD, and physician's office settings in its budget neutrality model and use total expenditures across all Medicare Part B sites of service, rather than limit the base solely to estimated CY 2008 aggregate expenditures under the ASC payment system. Several commenters supported the use of the alternative option for calculating budget neutrality that incorporated the case migration assumptions as they were presented in the August 2006 proposed rule, with the stipulation that several technical corrections to fully account for the Medicare expenditures for all procedures that were assumed to migrate to the ASC would be made and that the resulting conversion factor would be 64.6 percent. Most other commenters believed that case migration would certainly be one result of implementation of the revised ASC payment system, and that CMS' budget neutrality adjustment model should include recognition of those changes in sites of service and the related Medicare expenditures. They recommended that

CMS use a model like the alternative option for calculating budget neutrality presented in the August 2006 proposed rule and discussed above in this final rule, but that the specific assumptions CMS used should be revised as indicated in their comments.

Response: As discussed in the August 2006 proposed rule, we were interested in comments from the public about our interpretation of budget neutrality and our proposed methodology for developing the budget neutrality adjustment factor for the revised ASC payment system. We will fully address each of the specific technical corrections (for example, that we account for differences in beneficiary coinsurance amounts in HOPD and ASC settings) and migration assumption modifications that were recommended by commenters in section V.C.3. of this final rule. At the more general level, we noted the strong preference among commenters for CMS to use the alternative, with-migration methodology that would take into account the effects of assumed migration of cases across ambulatory sites of service that could result from the payment changes associated with the revised ASC payment system. The August 2006 proposal reflected our belief that adoption of the without-migration model was more appropriate than the alternative with-migration model that was also discussed. In the proposal, we explained that basing our estimate of expenditures on current utilization without including migration from other sites of services was consistent with how we estimate expenditures for purposes of maintaining budget neutrality in other Medicare payment systems. We realized that the influx of newly covered procedures was unique to our proposal for the revised ASC payment system, but because the budget neutrality adjustment that resulted from both models in the August 2006 proposed rule was the same and data to determine estimates of potential case migration were limited, we adopted the without-migration model in our proposal, consistent with our previous modeling to ensure that our payment systems are budget neutral.

We agree with commenters that the flexibility to include migration assumptions in our calculation of budget neutrality for the revised ASC payment system is provided by the statute. Furthermore, our review of the extensive comments on the August 2006 proposed rule led to our conclusion in this final rule that the significant expansion of ASC covered surgical procedures proposed as part of the revised system is not only a unique aspect of the revised ASC payment system, but that its effects on ASC expenditures may be substantial. An influx of new covered services has not been a factor in developing the budget neutrality adjustment factors for our other prospective payment systems. The scope of services in other payment systems does not change significantly from one year to the next, as does the ASC scope of services between CYs 2007 and 2008 in the context of our final policies for the revised ASC payment system, as discussed in sections III. and IV. of this final rule.

In view of our belief that the revised ASC payment system is unique because of the significant expansion of covered surgical procedures and covered ancillary services to be paid under the revised ASC payment system, we conclude that including estimates of case migration of the new procedures, as well as the existing ASC covered surgical procedures, is the most accurate method for developing the budget neutrality adjustment in this case. After reviewing all of the public comments and reexamining the available data, we believe that there is sufficient evidence to indicate that adoption of a with-migration methodology for calculating the budget neutrality adjustment for the revised ASC payment system is appropriate. Thus, we have determined that it would be prudent, and more accurate, to adopt a with-migration budget neutrality estimation methodology, in order to take into account the effects of the migration of procedures between ASCs, physicians' offices, and HOPDs that might be attributable to the revised ASC payment system. While the budget neutrality estimation methodology that takes into account migration increases the complexity associated with establishing the budget neutrality adjustment, we believe that its application provides us with the most reasonable approach to establishing payment rates under the revised ASC payment system in order to assist in ensuring continued access to current ASC procedures and expanded access to new surgical procedures for Medicare beneficiaries in ASCs.

Although we are convinced that the with-migration model is more appropriate for calculating the final budget neutrality adjustment factor for the revised ASC payment system, we calculated the budget neutrality adjustment for this final rule using both with-migration and without-migration models, as we had for the August 2006 proposed rule. However, in contrast to the results of our work for that proposed rule, where application of either model resulted in the same adjustment factor, the budget neutrality factors that resulted from application of the two methods for this final rule were different. The adjustment factor that resulted from application of our proposed model that did not consider migration was 0.64, while the with-migration model resulted in a 0.67 budget neutrality adjustment factor. For a full discussion of the calculation of the final budget neutrality adjustment factor, we refer readers to section V.C.3. of this final rule.

Comment: Several commenters agreed with the use of a blended rate for CY 2008 to calculate budget neutrality for the revised ASC payment system, based on the proposal for a 2-year transition to the fully implemented revised payment system. They believed this use of discretion was an appropriate interpretation of the legislation and produced the most reasonable result. They believed that, because the proposed CY 2008 rates were a 50/50 blend of the CY 2007 ASC rate and the estimated CY 2008 ASC rate calculated according to the methodology of the proposed revised ASC payment system, the ASC payment system would have increased expenditures in CY 2009 unless migration patterns differed from the assumptions discussed in the proposed rule regarding the alternative calculation of the budget neutrality adjustment. These commenters concluded that the increased expenditures that would result from our adoption of their recommendation to utilize a modification of the alternative calculation of the proposed budget neutrality adjustment were expected, appropriate, and consistent with the budget neutrality provision of section 626(b) of Public Law 108–173 for the revised ASC payment system.

Response: We agree with commenters that the migration assumptions influence the relationship between estimated expenditures under the current ASC system and the revised ASC payment system over time. As noted elsewhere in sections IV.J. and V.C.4 of this final rule, we have extended the transition period for payment of services on the CY 2007 ASC list of covered surgical procedures and have also modified our migration assumptions to reflect migration over a more extended time period than was reflected in our discussion of the alternative option for calculating the budget neutrality adjustment in the August 2006 proposed rule. As described in section X. of this final rule, we estimate that, over time, the expenditures under the revised ASC system using our final migration assumptions would be slightly less than

the expenditures that would occur if we did not revise the system.

3. Calculation of the Estimated CY 2008 Budget Neutrality Adjustment According to the Final Policy

In the August 2006 proposed rule, and as discussed earlier in this section of the final rule, we described two methodologies for determining the budget neutrality adjustment under the revised ASC payment system that could then be used to establish the ASC conversion factor for CY 2008 (71 FR 49656 through 49658). We proposed that, under the standard methodology of the revised ASC payment system, the ASC conversion factor would be multiplied by the ASC payment weight for each covered surgical procedure to determine the procedure's CY 2008 ASC payment rate. As discussed in detail in section IV.C. of this final rule, our final policy will also provide separate payment for covered ancillary services under the revised ASC payment system. While the payment rates for separately payable drugs and biologicals, brachytherapy sources, corneal tissue acquisition, and implantable devices with OPPS pass-through status that are covered ancillary services, along with the device portion of ASC payment for device-intensive covered surgical procedures, will be determined without application of the ASC conversion factor, the final standard methodology of the revised ASC payment system will apply the ASC conversion factor to ASC payment weights to calculate the fully implemented payment rates for covered surgical procedures and covered ancillary radiology services. We received a number of general and specific comments on our proposal for calculating the CY 2008 ASC payment rates under the revised ASC payment system.

Comment: There was general agreement among the commenters that, in the absence of cost data for surgical procedures performed in ASCs, CMS' proposal to base the revised ASC payment system on the OPPS APC groups and their relative payment weights was sound policy that could reasonably be expected to result in accurate ASC payments for most procedures. Further, the commenters generally agreed that ASC facility costs are lower than the HOPD costs for providing the same surgical services. The commenters gave specific examples of the reasons why higher costs are incurred by hospitals, including the requirement that HOPDs satisfy quality and safety standards that are not applied to ASCs; the fact that hospitals' resources are available 24 hours a day, 7 days a week; Emergency Medical Treatment and Labor Act of 1986-related (EMTALA-related) requirements; treatment of a more acutely ill population with greater comorbidities; and higher uncompensated care rates. Moreover, those commenters cited MedPAC's findings reported in 2003 and 2004 that hospitals probably incur higher costs than ASCs for providing similar procedures, because HOPDs are subject to additional regulatory requirements which are likely to increase their overhead costs, and HOPDs also treat patients who are more medically complex.

Beyond these points, the commenters diverged on their opinions about the accuracy and appropriateness of the proposed conversion factor, as discussed in detail below.

Response: We appreciate the commenters' general support of our proposal to base payment under the revised ASC payment system on the OPPS relative payment weights and the APC groups. These comments were consistent with the recommendation of the GAO (GAO–07–86) that CMS should implement a payment system for procedures performed in ASCs based on the OPPS, taking into account the lower relative costs of procedures performed in ASCs compared to HOPDs. For further discussion of this subject, as well as a summary of additional public comments and our responses, we refer readers to section IV.B. of this final rule.

Comment: Several commenters specifically recommended that CMS adopt 75 percent as the multiplier to the OPPS conversion factor, so that payment rates under the revised ASC payment system would be 75 percent of the OPPS rates. They cited legislation that was introduced in the U.S. Senate in 2003 in which payments to ASCs were to have been provided at 75 percent of the OPPS rates. The proponents of that proposed legislation believed that, by using a 75 percent factor to reduce OPPS rates in order to provide payment for ASCs to perform procedures, Medicare would save 25 cents for every dollar spent for procedures performed in the ASC setting instead of the HOPD.

Several commenters also believed that, because ASC rates have been frozen since 2003 while OPPS rates have been increased annually for inflation, an unfair differential in payments between the two payment systems has grown over the past several years. These commenters argued that by calculating budget neutrality for the revised ASC payment system using the static ASC rates in comparison with annually updated OPPS rates, CMS proposed an inappropriately low budget neutrality adjustment factor. They were convinced that, if CMS had implemented the revised ASC payment system immediately after Congress passed Public Law 108–173 in 2003, before the differential between the payment rates for the two systems increased due to the continued freeze on ASC rates, the budget neutrality adjustment for the revised payment system would have been close to 85 percent, rather than 62 percent as CMS proposed for the revised payment system to be implemented in CY 2008. Other commenters, noting that Congress gave CMS the authority to implement the revised payment system between CY 2006 and CY 2008, expressed their belief that, had CMS implemented the revised ASC payment system in an earlier year, the budget neutrality adjustment would have been at least 8 percent higher than the 62 percent that was proposed.

Response: We see no rationale for estimating the budget neutrality adjustment by comparing existing ASC payment system rates with OPPS rates from an earlier calendar year, prior to implementation of the revised ASC payment system. Congress provided CMS with the latitude to implement the revised ASC payment system beginning on or after January 1, 2006, and not later than January 1, 2008. We believe that the statute provides direction that the revised ASC payment system is to be budget neutral in its design in order to result in the same aggregate expenditures for services as would be made if the provisions of the revised ASC payment system did not apply, that the ASC conversion factor is not to be updated before CY 2010, and that implementation of the revised system by January 1, 2008 is timely. There is no evidence that Congress intended for CMS to attempt to maintain the relationship between OPPS payment rates and ASC payments that existed at the time of enactment of Public Law 108–173 (CY 2003) in the development of the revised ASC payment system. We also see no rationale for adopting an arbitrary multiplier, such as 75 percent of OPPS payment rates, that is not founded on explicit consideration of budget neutrality as required by the statute.

We received many public comments in response to our proposed budget neutrality adjustment factor. A number of commenters included seven specific recommendations, three of which were related to the migration assumptions discussed as an alternative option for calculating the budget neutrality adjustment in the proposed rule. The

other four were technical in nature and related to our proposed budget neutrality model. A summary of the comments and our responses follow, beginning with the four recommended technical modifications to our proposed methodology, followed by the three migration assumption recommendations.

Comment: One of the recommended technical modifications was that, instead of basing ASC payments on CY 2007 rates for all procedures on the CY 2007 ASC list of covered surgical procedures, CMS should use the payment amounts that would be made in CY 2008 in the absence of the revised payment system for those ASC procedures whose payments are capped in CY 2007 due to section 5103 of Public Law 109–171. The commenters believed that using the lower CY 2007 rates for ASC procedures capped by section 5103 of Public Law 109–171 was an unfair representation of estimated ASC payments under the existing payment system in CY 2008. Their rationale was that, if the revised ASC system were not implemented in CY 2008, the payments for those services under the policy of the existing ASC payment system would increase in CY 2008, consistent with the overall projected increase in OPPS rates of 4 percent. The commenters expected that incorporation of this adjustment would result in a 0.11 percentage point increase to the budget neutrality adjustment.

Response: We do not agree that the ASC rates for these specific services would necessarily increase consistent with an overall increase in OPPS rates for CY 2008. Through the annual update of the OPPS, while the aggregate spending is generally projected to increase in the update, the specific payments for individual services may rise or fall from year to year based on a variety of factors, including APC recalibration. Because the ASC procedures that are capped at the OPPS rates in CY 2007 are a small subset of all OPPS services, we are unable to project that their rates would be subject to a 4 percent increase, or indeed any increase, as suggested by the commenters. In addition, we believe that Congress intended for the revised ASC payment system rates and budget neutrality to be related to the estimated aggregate expenditures for ASC services based on ASC payment rates from the year prior to implementation of the revised system. Congress mandated that the revised ASC system be budget neutral and be implemented by CY 2008. It also set ASC updates to zero percent for the calendar years through 2009. We believe all of those actions, in combination, provide clear indication that Congress did not intend for estimates of aggregate expenditures under the existing ASC payment system to take into account updated ASC payment rates for CY 2008. The limitations on ASC payments prior to implementation of the revised ASC payment system, specifically both section 626 of Public Law 108–173 that specifies that ASC rates would not be updated before CY 2010 and, further, the limit on ASC payment at the lesser of the OPPS or ASC rate, as required in section 5103 of Public Law 109–171 that extends until implementation of the revised ASC payment system, provide clear evidence that the CY 2007 ASC rates for covered procedures are to be used in developing the budget neutrality adjustment for the revised payment system. We continue to believe, for the purposes of this final rule, that the most appropriate course for calculation of the budget neutrality adjustment, consistent with our proposal, is to estimate that the CY 2008 rates for the ASC procedures subject to the cap set forth in section 5103 of Public Law 109–171 in CY 2007 will be the same as their CY 2007 rates.

Comment: Some commenters stated that, in CMS' calculation of estimated ASC payments under the existing ASC payment system for comparison to payments under the proposed methodology for the revised ASC payment system, CMS did not include payments for the costs of implantable prosthetic devices that are currently separately paid to ASCs under the DMEPOS fee schedule. The commenters recommended that CMS include the amount paid to ASCs to cover the costs of separately payable implantable prosthetics and DME under the DMEPOS fee schedule to avoid understating Medicare's current full cost related to the surgical implantation procedures. The commenters believed that inclusion of those payments would increase the budget neutrality adjustment by 0.41 percentage points.

Response: We agree with the commenters that the payments to ASCs for the implantable prosthetic devices and DME should be included in estimating total ASC payments for CY 2008 under the policies of the existing ASC payment system. In fact, we did include those payments in our proposed budget neutrality adjustment calculation, but we failed to explicitly state that in our explanation in the August 2006 proposed rule. Therefore, the effect of including those payments was reflected in the budget neutrality adjustment that we proposed. We have also included these payments in our calculation of the budget neutrality adjustment for this final rule.

Comment: Several commenters believed that, although CMS accounted for the 20 percent beneficiary coinsurance in ASCs by discounting by 20 percent all of the payment rates used to estimate the CY 2008 payments under the existing ASC system and under the proposed methodology of the revised ASC payment system, CMS did not appropriately account for beneficiary coinsurance associated with the new ASC office-based procedures for which payment was proposed to be limited to the MPFS unadjusted nonfacility practice expense amount. They believed that CMS should apply the 20 percent discount to those procedures because that approach would more accurately and consistently reflect the Medicare program costs, and they concluded that this change would increase the budget neutrality adjustment by 0.43 percentage points.

Response: While we did not apply this discount to payment rates for the capped office-based procedures newly proposed for ASC payment in CY 2008 in our calculation of the proposed budget neutrality adjustment, we agree with this recommendation. Recognizing those lower costs to the Medicare program, consistent with our calculation of program costs under the existing ASC payment system and the standard methodology of the revised ASC payment system, would be more accurate. Soon after publication of the August 2006 proposed rule, we discovered this oversight, made the appropriate adjustments to the data, and posted the revised data on our Web site (*http://www.cms.hhs.gov/ASCPayment*).

Comment: Commenters noted that CMS did not account for the variable copayment amounts associated with procedures under the OPPS for purposes of establishing the budget neutrality adjustment under the revised ASC payment system. The beneficiary copayment under the OPPS varies from 20 to 40 percent of the payment rate, depending on the procedure, whereas the coinsurance under the ASC payment system is 20 percent for all procedures. The commenters believed that as a result of not considering the sometimes much higher copayments under the OPPS, CMS artificially inflated Medicare's estimated payments under the proposed methodology of the revised ASC payment system. They believed that accurately accounting for the OPPS copayments would increase the budget neutrality adjustment by 1.04 percentage points.

Response: We agree with the commenters regarding this

recommendation. We did not apply the variable OPPS copayment amounts in the model that was proposed. However, soon after publication of the August 2006 proposed rule, we discovered this oversight, made the appropriate adjustments to the data, and posted the revised data on our Web site (*http://www.cms.hhs.gov/ASCPayment*).

After considering the first four technical recommendations of many commenters and making the two technical adjustments as described above, the resulting increase in the proposed budget neutrality adjustment was approximately 2.6 percentage points. We have applied these same two technical adjustments in our calculation of the budget neutrality adjustment for this final rule. In addition, we made another technical change in this final rule by taking the multiple procedure discount into account in our estimates of ASC, OPPS, and MPFS expenditures both before and after implementation of the revised ASC payment system. We factored the multiple procedure discount into our estimates of ASC, OPPS, and MPFS spending under the existing and revised ASC payment systems. We assumed that the pattern of multiple surgical procedures furnished in ASCs and physicians' offices would be similar to the pattern in HOPDs. Based on claims data indicating the prevalence of multiple procedures in HOPDs, we estimated the percentage of discounted units to total units for each procedure and then reduced the volume for those procedures prior to estimating expenditures in each year. We incorporated this reduction into our estimates of Medicare expenditures under the ASC, OPPS, and MPFS payment systems both before and after implementation of the revised ASC payment system. We had not factored the multiple procedure discount into the August 2006 proposed rule estimates.

The final three recommendations by commenters that were related to the migration assumptions used in the alternative option for calculating the budget neutrality adjustment presented in the August 2006 proposed rule are discussed below.

Comment: Many commenters believed that the alternative method for calculating the budget neutrality adjustment that CMS discussed in the August 2006 proposed rule described a preferable and superior method for developing the budget neutrality adjustment for the revised ASC payment system. They believed that developing and applying some assumptions to account for the migration of services and their payment across Medicare Part B sites of care would be the most appropriate method for ensuring budget neutrality. However, they recommended that CMS revise some of the assumptions regarding migration that were described in that proposed rule.

The first of their recommendations in this regard was that CMS use a much lower migration assumption of 2 percent for new ASC procedures migrating from physicians' offices to ASCs. They were convinced that CMS' assumption in the proposed rule that 15 percent of the current office utilization of new ASC procedures would migrate to ASCs was far greater than would be possible. They stated that ASCs do not have the capacity to absorb that level of services. Furthermore, they explained that ASCs have found that, once physicians acquire the equipment and resources to provide a procedure in their offices, they prefer to perform it there. The commenters believed that physicians only typically perform procedures in an ASC or HOPD setting when there is a particular patient need that requires the facility setting. They argued that by allowing the new ASC procedures to receive payment in ASCs, CMS would realize savings because cases could be moved from the office to an ASC instead of to the more costly HOPD setting when the physician determines that relocation of the service is preferable for a particular beneficiary.

Furthermore, the commenters stated that ASCs would not only be overwhelmed by the volume of cases CMS assumed would migrate to that setting, but that ASCs would not welcome the influx of low paying, minor procedures that could generally be performed in physicians' offices over the more complex, higher paying procedures that ASCs are accustomed to providing in the more efficient and intensive facility setting. The commenters believed that adjusting the assumption for migration of new ASC procedures from physicians' offices to ASCs to 2 percent of the cases would be more appropriate and would result in a 3.11 percentage point increase in the budget neutrality adjustment.

In addition, the commenters believed that CMS did not accurately adjust for the likely negative migration of cases involving procedures paid under the existing ASC payment system out of ASCs and into more costly HOPDs under the proposal for the revised payment system. They developed a model that they believed would more correctly predict the migration of procedures out of ASCs and into HOPDs based on the magnitude of the procedure's proposed payment rate decrease. In that model, the commenters assumed that for every 10 percent decrease in a procedure's ASC payment rate from the existing to the revised payment system, 1.5 percent of the ASC volume would migrate to HOPDs. They believed that CMS' application of this adjustment would result in a 0.51 percentage point decrease to the budget neutrality adjustment.

They also recommended that CMS account for the positive migration of existing ASC covered procedures from HOPDs to ASCs by assuming that for every 10 percent increase in a procedure's ASC payment rate under the proposal for the revised ASC payment system, 1.5 percent of the HOPD volume would migrate to ASCs, up to a maximum of 25 percent of the procedure's current HOPD volume. Furthermore, commenters suggested that ASC capacity would limit movement of these procedures to no more than 25 percent of each procedure's existing ASC volume. The commenters believed that, although ASCs have significant excess capacity, as confirmed by a CY 2006 industry study that showed that only about one quarter of ASCs were operating above 60 percent operating room capacity, they could not absorb more than 25 percent of the HOPD volume for all ASC procedures for which payment was expected to increase under the proposed revised payment system. They explained that application of their assumption would result in a 5.57 percentage point increase in the budget neutrality adjustment.

Response: We appreciate the extensive comments we received regarding the appropriate migration assumptions to be applied in determining the budget neutrality adjustment for the revised ASC payment system. While commenters provided a number of suggestions regarding migration assumptions for both the procedures on the CY 2007 ASC list of covered surgical procedures and new ASC procedures, they did not provide data supporting all of the specific assumptions regarding the relationship between expected service migration and changes in payment rates that they recommended we adopt along with their other migration assumptions. However, as stated above, we are adopting a with-migration model for calculation of the final budget neutrality adjustment factor because we believe that it is more accurate than the without-migration model that we proposed that does not consider the migration of new procedures across sites of service, but we did not adopt the assumptions recommended by some commenters.

The CMS Office of the Actuary (OACT) developed the assumptions utilized in the final budget neutrality model. With respect to current ASC covered surgical procedures paid under the existing ASC payment system, we did not accept the recommendation by commenters that we should assume that negative migration, that is, movement of existing ASC covered procedures out of ASCs and into the higher cost HOPD setting, would have an effect on our budget neutrality adjustment that is not equal to the effect of positive migration of cases from other settings into ASCs. Rather, in this final rule, after reviewing information provided by commenters and reevaluating current site-of-service utilization patterns for exiting and new ASC procedures, we are assuming that the effect on budget neutrality due to movement of cases involving existing ASC procedures out of ASCs will be balanced by movement of additional cases involving existing ASC procedures into ASCs. We believe that it is reasonable to assume that the payment increases for many currently low volume ASC procedures will result in higher ASC volumes for those procedures under the revised ASC payment system. Moreover, we believe that this anticipated positive migration of those procedures will balance the estimated negative migration of the high volume ASC procedures for which payment will decrease. Our actuaries project that the net budgetary effect of migration into and out of ASCs for procedures currently on the ASC list of covered surgical procedures will be negligible.

Consistent with our assumption for the alternative budget neutrality adjustment model discussed in the August 2006 proposed rule, under the final methodology for the revised ASC payment system, we assume that 25 percent of the current HOPD volume of new ASC procedures would ultimately migrate from HOPDs to ASCs. However, taking into consideration the final, longer 4-year transition period to the fully implemented payment weights of the revised ASC payment system and the final modifications to several aspects of the proposed payment policy as discussed in this preamble, for this final rule, we assume that the 25 percent case migration would occur more gradually, over the first 2 years of the transition, instead of all in the first year. We believe the migration would occur over the first 2 years of the 4-year transition, as the ASC industry adapts to the revised ASC payment system and the significant expansion of covered surgical procedures described in this final rule. We agree with commenters that the level of migration in a single year, as discussed in our presentation of the with-migration budget neutrality adjustment model in the August 2006 proposed rule, would be difficult for ASCs to accommodate in a single year, but we believe, based on current ASC and HOPD utilization and ASC industry information, that the 25 percent case migration over 2 years is most likely.

We believe that our assumption of 25 percent migration of current HOPD volume for new ASC procedures is reasonable, given the general utilization relationships between ASCs and HOPDs for services as discussed in section V.C.2. above. We also note that commenters generally did not disagree with our proposed HOPD migration assumption for the new ASC procedures. As discussed in the August 2006 proposed rule (71 FR 49657), services on the ASC list of covered surgical procedures that are predominantly performed in ASC and HOPD settings are, on average, performed 30 percent of the time in the ASC setting. Thus, for calculation of the budget neutrality adjustment according to the final policy of this final rule, we assume that new ASC procedures would migrate at the slightly slower rate of 25 percent over the first 2 years of the 4-year transition, reflecting their movement toward the general 30-percent site-of-service utilization pattern currently observed for ASC covered surgical procedures as ASCs transition to the revised ASC payment system.

Our assumed 25 percent migration of new ASC procedures from HOPDs to ASCs differs considerably from the commenters' recommended positive migration assumptions, because the commenters' model included all current ASC procedures and applied a formula linking the magnitude of ASC payment changes under the revised ASC payment system to the expected volume of migration. Given that the commenters based their estimate for this assumption on existing ASC procedures, they used 25 percent of current HOPD volume as the upper limit for migration from HOPDs to ASCs, the same assumption we used for the migration of new ASC procedures in CY 2008. However, because they believed that ASC capacity would ultimately limit procedure movement, they also limited the movement to 25 percent of the existing ASC volume for those procedures. Our actuaries determined migration assumptions separately for existing ASC covered procedures and new ASC procedures. As mentioned earlier, the net effect of migration of existing procedures into and out of ASCs is assumed to be negligible. For the new ASC procedures, it is assumed that 25 percent of the current HOPD volume will migrate to ASCs during the first 2 years of the revised ASC payment system.

The commenters assumed some negative migration of existing ASC covered procedures from ASCs to HOPDs in response to price changes under the revised ASC payment system, based on a relationship between a procedure's decrease in ASC payment and its volume of migration. However, as discussed above, we also believe that we have adequately accounted for the expected migration of procedures currently covered in ASCs from the ASC to the HOPD setting under the revised ASC payment system.

Finally, the commenters' recommendation that we assume much less migration from physicians' offices to ASCs for new ASC procedures due to ASC capacity limitations led us to reconsider our earlier assumption articulated in the August 2006 proposed rule for the alternative model to calculate the budget neutrality adjustment. Thus, for this final rule, although the actuaries' assumption is that 15 percent of the physicians' office volume of new ASC procedures may eventually be expected to move into ASCs, they did take into consideration the commenters' argument that such a level of migration could not be fully accommodated by ASCs in CY 2008. Therefore, in our final policy we assume that the migration of these currently office-based cases would occur more gradually, with an additional one quarter of the total migration occurring in each year of the full 4-year transition period. Thus, we expect that only 3.75 percent of the office utilization of new ASC procedures would migrate to ASCs in CY 2008, followed by an additional quarter of new cases in each subsequent year, reaching the full 15 percent by the end of the transition period to the fully implemented revised ASC payment rates. Given the current 17 percent ASC utilization of procedures that are predominantly performed in physicians' offices and ASCs that are on the existing ASC list of covered surgical procedures, we see no reason to assume that only 2 percent of the current office volume for new ASC procedures would migrate to ASCs, as suggested by some commenters. Instead, we believe the eventual utilization data for those procedures would most likely resemble the site-of-service utilization for procedures predominantly performed in ASC and physician's office settings that are currently paid in ASCs. Our

assumption of 15 percent is slightly lower than the current pattern of 17 percent ASC utilization, consistent with our expectation that migration of the broad array of new ASC procedures would result in slightly lower ASC utilization in 4 years than the currently observed pattern for procedures on the CY 2007 ASC list of covered surgical procedures that are predominantly performed in physicians' offices and ASCs.

In addition, in the context of developing the budget neutrality adjustment for the revised ASC payment system under the with-migration model, the actuaries took into consideration the final payment policies of the revised ASC payment system. These include the final changes to the payment rate calculations for device-intensive procedures, as well as the separate payment for covered ancillary services. While specific current and projected ASC utilization of covered ancillary services is difficult to estimate, in establishing the final budget neutrality adjustment, the actuaries took into account the findings of the GAO that payment for many of these ancillary services is currently provided to other Medicare Part B suppliers under the existing ASC payment system, and that most drugs and biologicals utilized with current ASC procedures do not receive separate payment under the OPPS.

In summary, since our discussion of the alternative model for calculating the budget neutrality adjustment presented in the August 2006 proposed rule for the revised ASC payment system, the actuaries have continued to refine the assumptions and estimates related to the with-migration budget neutrality model to take into account policy decisions made in this final rule, additional research, information from industry experts, and public comments. Application of our final revised migration assumptions, along with changes to the OPPS rates, MPFS rates, and updated utilization data, as well as the final payment policies for the revised ASC payment system, taken together result in an estimated budget neutrality adjustment of 0.67. The estimated budget neutrality adjustment of 0.67 in this July 2007 final rule for the revised ASC payment system is based on the CY 2007 OPPS relative payment weights, with an estimated update factor for CY 2008, the CY 2007 MPFS PE RVUs trended forward to CY 2008, and CY 2005 utilization data projected forward to CY 2008. It is important to note that the budget neutrality estimate in this final rule is illustrative only. The CY 2008 ASC budget neutrality adjustment will be proposed in the CY 2008 OPPS/ASC proposed rule based on the methodology for calculating budget neutrality established in this final rule and incorporating the proposed CY 2008 OPPS relative payment weights, the proposed CY 2008 MPFS PE RVUs, and CY 2006 utilization information projected forward to CY 2008. The final CY 2008 ASC budget neutrality adjustment will be established in the CY 2008 OPPS/ASC final rule with comment period. The final CY 2008 ASC budget neutrality factor will be calculated in that rule in accord with the methodology for calculating budget neutrality established in this July 2007 final rule and based on the final CY 2008 OPPS relative payment weights, the final CY 2008 MPFS PE RVUs, and updated CY 2006 utilization data projected forward to CY 2008.

4. Final Calculation of the Estimated ASC Payment Rates for CY 2008

The following is a step-by-step illustration of the final budget neutrality adjustment calculation.

a. Estimated CY 2008 Medicare Program Payments (Excluding Beneficiary Coinsurance) Under the Existing ASC Payment System

Step 1: Migration from HOPDs to ASCs is valued using estimated CY 2008 OPPS payment rates.

(a) We multiply the estimated CY 2008 HOPD utilization for each new ASC procedure by 0.125, consistent with our assumption that 25 percent of the HOPD utilization for new ASC procedures will migrate to the ASC over the first 2 years of the revised ASC payment system, only half of which would be in CY 2008. In estimating HOPD utilization for CY 2008, we take into account the impact of the multiple procedure discount (as discussed in more detail in section V.C.3. of this final rule).

(b) For each new ASC procedure, we multiply the results of Step 1(a) by the estimated CY 2008 OPPS payment rate for the procedure, and then subtract beneficiary coinsurance for the procedure.

(c) We sum the results of Step 1(b) across all new ASC procedures.

Step 2: Migration of procedures from physicians' offices to ASCs is valued using estimated CY 2008 physician in-office payment rates. ''Physician in-office payment rate'' is equal to the MPFS nonfacility practice expense RVUs multiplied by the estimated CY 2008 MPFS conversion factor.

(a) We multiply the estimated physician office utilization for CY 2008 for each new ASC procedure by 0.0375, consistent with our assumption that 15 percent of the physician's office utilization for new ASC procedures will migrate to the ASC over the full 4-year transition period.

(b) For each new ASC procedure, we multiply the results of Step 2(a) by the estimated CY 2008 physician in-office payment rate for the procedure, and then subtract beneficiary coinsurance for the procedure.

(c) We sum the results of Step 2(b) across all new ASC procedures.

Step 3: CY 2007 ASC services are valued using the estimated CY 2008 ASC payment rates under the current ASC system.

To estimate the aggregate expenditures that would be made in CY 2008 under the existing ASC payment system:

(a) We multiply the estimated CY 2008 ASC utilization for each HCPCS code on the CY 2007 ASC list by the estimated CY 2008 ASC payment rate for the HCPCS code under the existing ASC payment system, and then subtract beneficiary coinsurance for the procedure. The estimated CY 2008 ASC payment rates are based on the CY 2007 ASC payment rates, which were listed in Addendum AA to the CY 2007 OPPS/ASC final rule with comment period and take into account the OPPS cap on payment for ASC services as required by section 5103 of Public Law 109–171 and reflect the zero percent CY 2008 update for ASC services mandated by section 1833(i)(2)(C) of the Act. In estimating ASC utilization for CY 2008, we take into account the impact of the multiple procedure discount (as discussed in section V.C.3. of this final rule).

(b) We estimate the amount the Medicare program would pay in CY 2008 for implantable prosthetic devices and implantable DME for which ASCs currently receive separate payment under the DMEPOS fee schedule.

(c) We sum the results of Steps 3(a) and 3(b) to estimate the aggregate amount of expenditures that would be made in CY 2008 for current covered surgical procedures under the existing ASC payment system.

Step 4: Sum the results of Steps 1–3.

b. Estimated Medicare Program Payments (Excluding Beneficiary Coinsurance) Under the Revised ASC Payment System

Step 5: HOPD migration is valued using estimated CY 2008 OPPS payment rates.

This step is the same as Step 1, above.

Step 6: We identify new ASC procedures that are office-based (as discussed in section III.C. of this final rule).

Step 7: Migration of new ASC office-based procedures from physicians' offices to ASCs is valued based on estimated CY 2008 OPPS payment rates capped at the estimated CY 2008 physician in-office payment rates, if appropriate.

(a) For each new ASC procedure determined to be office-based, we multiply the results of Step 2(a) above by the lesser of—

(1) The estimated CY 2008 OPPS rate for the procedure; or

(2) The estimated CY 2008 physician in-office payment rate for the procedure, and then subtract beneficiary coinsurance for the procedure.

(b) The results of Step 7(a) are summed across all new ASC procedures considered to be office-based.

Step 8: Migration of new ASC procedures not determined to be office-based from physicians' offices to ASCs is valued using the estimated CY 2008 OPPS rates.

(a) For each new ASC procedure not considered to be office-based, we multiply the results of Step 2(a) above by the estimated CY 2008 OPPS rate for the procedure, and then subtract beneficiary coinsurance for the procedure.

(b) The results of Step 8(a) are summed across all new ASC procedures not considered to be office-based.

Step 9: Migration of new ASC procedures from physicians' offices to ASCs is valued using the estimated CY 2008 MPFS physician out-of-office payment rate. ''Physician out-of-office payment rate'' is equal to the facility practice expense RVUs multiplied by the estimated CY 2008 MFPS conversion factor.

(a) For each new ASC procedure, we multiply the results of Step 2(a) from above by the estimated CY 2008 physician out-of-office payment rate for the procedure, and then subtract beneficiary coinsurance for the procedure.

(b) The results of Step 9(a) are summed across all new ASC procedures.

Step 10: Current ASC services are valued using the estimated CY 2008 OPPS payment rates.

To estimate the aggregate amount of expenditures that would be made in CY 2008, we use estimated CY 2008 OPPS payment amounts instead of estimated CY 2008 ASC payment amounts under the current system, and we multiply the estimated CY 2008 ASC volume for each HCPCS code on the CY 2007 ASC list by the estimated CY 2008 OPPS payment rate for the HCPCS code, and then subtract beneficiary coinsurance for the procedure. We sum the results over all services on that ASC list.

Step 11: The results of Steps 5 and 7–10 are summed.

c. Calculation of the Final Estimated CY 2008 Budget Neutrality Adjustment

Step 12: The result of Step 4 is divided by the result of Step 11.

Step 13: The application of the cap at the estimated CY 2008 physician in-office payment rates that occurs in Step 7 is dependent on the ASC conversion factor. The ASC budget neutrality adjustment resulting from Step 12 is calibrated to take into account the interactive nature of the ASC conversion factor and the physician's office payment cap. The ASC budget neutrality calculation is also calibrated to take into account the fact that the additional physician out-of-office payment rates under the revised ASC payment system calculated in Step 9 must be fully offset by the budget neutrality adjustment to ASC services under the revised payment system. Furthermore, the budget neutrality calculation is calibrated to take into account the CY 2008 transitional payment rates for procedures on the CY 2007 ASC list of covered surgical procedures.

d. Calculation of the Final Estimated CY 2008 ASC Payment Rates

As described earlier, the application of the methodology to the data available for this final rule results in an estimated budget neutrality adjustment of 0.67. The CY 2008 budget neutrality adjustment for the revised ASC payment system, based on the methodology outlined above, will be proposed in the CY 2008 OPPS/ASC proposed rule and finalized in the CY 2008 OPPS/ASC final rule with comment period, based on the methodology for calculating budget neutrality established in this July 2007 final rule.

After developing the estimated CY 2008 budget neutrality adjustment of 0.67 according to the policies established in this final rule, in order to determine the estimated CY 2008 ASC conversion factor we multiply the estimated CY 2008 OPPS conversion factor by the budget neutrality adjustment. At this time, our estimate of the CY 2008 OPPS conversion factor is $63.497. Multiplying the estimated CY 2008 OPPS conversion factor by the 0.67 budget neutrality adjustment yields our estimated CY 2008 ASC conversion factor of $42.543 for this final rule. To determine the fully implemented ASC payment rates for this final rule, including beneficiary coinsurance, according to the final payment methodology that applies to covered surgical procedures and covered ancillary radiology services under the revised ASC payment system, we multiply the ASC conversion factor by the ASC relative payment weight for each procedure or service. As further discussed in sections IV.C. and IV.E. of this final rule, the ASC relative payment weights for certain office-based surgical procedures and covered ancillary radiology services are set so that the national unadjusted ASC payment rate does not exceed the MPFS unadjusted nonfacility practice expense amount. In addition, as discussed in section IV.C of this final rule, the ASC relative payment weights for device-intensive covered surgical procedures are set according to a modified payment methodology to ensure the same device payment under the revised ASC payment system as under the OPPS. We then calculate the estimated CY 2008 payment rate for procedures on the CY 2007 ASC list of covered surgical procedures using a blend of 75 percent of the final CY 2007 ASC payment rate and 25 percent of the estimated revised ASC payment rate developed according to methodology of the revised ASC payment system, applying the special transition treatment to device-intensive procedures as discussed in section IV.J. of this final rule. See Addenda AA and BB to this final rule for the illustrative estimated CY 2008 ASC payment weights and payment rates for covered surgical procedures and covered ancillary services that are expected to be paid separately under the CY 2008 revised ASC payment system.

D. Calculation of the ASC Payment Rates for CY 2009 and Future Years

1. Updating the ASC Relative Payment Weights

In the August 2006 proposed rule, we proposed to update the ASC relative payment weights each year using the national OPPS relative payment weights for that calendar year, as well as the practice expense payment amounts under the MPFS schedule for that calendar year because some covered office-based surgical procedures and covered ancillary services will be paid according to MPFS amounts if those are less than the rates calculated under the standard methodology of the revised ASC payment system. We further proposed to uniformly scale the ASC relative payment weights for each update year so that estimated aggregate expenditures using updated ASC relative payment weights would be the same as estimated aggregate expenditures using the current year ASC

relative payment weights. That is, we proposed to make the relative payment weights budget neutral to ensure that changes in the relative payment weights from year to year would not cause the estimated amount of expenditures to ASCs to increase or decrease as a function of those changes. For example, we proposed to uniformly scale the ASC relative payment weights for CY 2009 so that estimated expenditures for CY 2009 using the updated CY 2009 ASC relative payment weights would be the same as they would be using the CY 2008 ASC relative payment weights. Similarly, we proposed to uniformly scale the ASC relative payment weights for CY 2010 so that estimated expenditures for CY 2010 using the updated CY 2010 ASC relative payment weights would be the same as they would be using the CY 2009 ASC relative payment weights.

We proposed to scale the relative payment weights annually because we believed that the purpose of using relative payment weights as part of the ratesetting methodology under the proposed revised ASC payment system was only to establish appropriate relativity among surgical procedures paid in ASCs. Changes in weights should not, in and of themselves, change aggregate payment levels under a prospective payment system. Scaling the relative payment weights each year would also serve as a buffer to protect ASCs from sudden changes that could occur under the OPPS. For example, by making the relative payment weights budget neutral under the revised ASC payment system, the ASC relative weights would not drop were there to be a sudden upsurge in costs associated with outpatient hospital emergency or clinic visits relative to outpatient hospital surgical costs. Moreover, making the ASC relative weights budget neutral would shield the ASC payment system from the inadvertent impact of unrelated aggregate changes in OPPS expenditures. We proposed to continue this methodology to update the revised ASC payment system in future years.

Comment: Several commenters supported the proposal to annually update ASC relative payment weights using the national OPPS payment weights for the corresponding year; conversely, some commenters also expressed concern regarding our proposed policy of rescaling ASC relative weights. They were concerned that annual rescaling would cause divergence of the relative weights between the OPPS and the revised ASC payment system for individual procedures.

Response: We appreciate commenters' support for annually updating ASC relative payment weights in coordination with the OPPS update, consistent with the proposed relationship between the two payment systems. We believe this process would provide more appropriate payments for surgical services under the revised ASC payment system that would reflect ongoing changes in the facility costs associated with different surgical procedures. We also acknowledge commenters' concerns about our proposed policy of rescaling ASC relative weights. However, we note that rescaling the relative payment weights in the ASC payment system would not cause divergence in the relativity of the weights of various services under the two payment systems. Rescaling of the weights would equally increase or decrease the relative payment weights of services under the revised ASC payment system in comparison to the relative weights of the same services under the OPPS, but only to the extent necessary to ensure that changes in the relative weights do not, in and of themselves, change aggregate payments to ASCs.

Rescaling of relative weights or the application of a budget neutrality adjustment is a common feature of Medicare payment systems, designed to ensure that the estimated aggregate payments under a payment system for an upcoming year would be neither greater than nor less than the aggregate payments that would be made in the prior year, taking into consideration any changes or recalibrations for the upcoming year. For example, in CY 2006, as required by section 1833(t)(9)(B) of the Act, we scaled relative weights under the OPPS by applying a budget neutrality adjustment to ensure that changes due to APC reclassification and recalibration changes, wage index changes, and other adjustments were made in a manner that ensured that estimated aggregate OPPS payments for CY 2006 would not exceed aggregate payments for CY 2005 (70 FR 68542). We continue to believe that this principle should apply as well in the revised ASC payment system. We note that while we do not currently have a provider-level dataset of ASC utilization that accurately identifies unique ASCs and their geographic information that would allow us to compare changes in geographic adjustment over time for budget neutrality purposes, we intend to take these changes into account in maintaining budget neutrality for the revised ASC payment system as soon as our provider-level ASC data permit.

In addition to considerations that are common to many payment systems, there is another reason for adopting annual rescaling of the relative weights in the revised ASC payment system. Because we are finalizing our proposal to generally employ the relative payment weights developed under the OPPS in the revised ASC payment system as discussed earlier in section IV.B. of this final rule, aggregate payments to ASCs could, in the absence of rescaling, be affected by changes in the cost structure of HOPDs that ought to be relevant only under the OPPS. We provided an example of such a scenario in the August 2006 proposed rule. A sudden increase in the costs of hospital outpatient emergency or clinic visits due, for instance, to an increase in the volume of cases, would have the effect of increasing the weights for these services relative to the weights for surgical procedures in the hospital outpatient setting. In the absence of rescaling, this change in the relative weights under the OPPS would result in a decrease in the relative weights for surgical procedures under the ASC payment system and, therefore, a decrease in aggregate ASC payments for these same procedures. Because ASCs principally receive payment for surgical procedures, aggregate payments to ASCs could decline; ASCs would receive lower payments for surgical procedures without realizing the benefits of the higher payments provided to HOPDs for emergency or clinic visits. As we explained in the August 2006 proposed rule (71 FR 49657), we believe that changes in relative weights each year under the OPPS should not, in and of themselves, cause aggregate payments under the revised ASC payment system to increase or decrease. In fact, scaling the relative weights each year under the revised ASC payment system would serve as a buffer to protect ASCs from sudden changes that could occur under the OPPS.

Rescaling of relative payment weights in a budget neutral manner under the revised ASC payment system would thus shield the ASC payment system from the inadvertent impact of unrelated aggregate changes in OPPS expenditures. It is important to note that the specific adjustment factor applied in the scaling process could be positive or negative in any particular year. Annual scaling would prevent both sudden decreases in aggregate payments to ASCs and sudden windfall payments due solely to changes in HOPD costs for nonsurgical services. In the example given above, the scaling adjustment would be positive, that is, scaling would increase the relative weights of all surgical procedures under the ASC payment system in order to maintain aggregate ASC payments for the

procedures at the same level, in the absence of other factors affecting the relative payment weights of hospital outpatient emergency or clinic visits and surgical procedures under the OPPS.

After considering the public comments we received, we are finalizing our proposal, without modification, to update the ASC relative payment weights in the revised ASC payment system each year using the national OPPS relative payment weights for that same calendar year and to uniformly scale the ASC relative payment weights for each update year to make them budget neutral. For example, holding ASC utilization and the mix of services constant, for CY 2009, we will compare the total weight using the CY 2008 ASC relative payment weights under the 75/25 blend (of the CY 2007 payment rate and the revised payment rate) with the total weight using CY 2009 relative payment weights under the 50/50 blend (of the CY 2007 payment rate and the revised payment rate), taking into account the changes in the OPPS relative payment weights between CY 2008 and CY 2009. We will use the ratio of CY 2008 to CY 2009 total weight to scale the ASC relative payment weights for CY 2009. Scaling of ASC relative payment weights would apply to covered surgical procedures and covered ancillary radiology services whose payment rates are related to OPPS relative payment weights. Scaling would not apply in the case of ASC payment for other separately payable covered ancillary services that have a predetermined national payment amount (that is, their national payment amounts are not based on OPPS relative payment weights) such as drugs and biologicals that are separately paid under the OPPS. Any service with a predetermined national payment amount would be included in the budget neutrality comparison, but scaling of the relative payment weights would not apply to those services that have a predetermined payment amount. The ASC payment weights for those services without predetermined national payment amounts (that is, their national payment amounts would be based on OPPS relative payment weights if a payment limitation did not apply) would be scaled to eliminate any difference in the total payment weight between the current year and the update year.

2. Updating the ASC Conversion Factor

Section 1833(i)(2)(C) of the Act requires that, if the Secretary has not updated the ASC payment amounts in a calendar year after CY 2009, the payment amounts shall be increased by the percentage increase in the CPI–U as estimated by the Secretary for the 12-month period ending with the midpoint of the year involved. Therefore, in the August 2006 proposed rule for the revised ASC payment system we proposed to update the ASC conversion factor using the CPI–U in order to adjust ASC payment rates for inflation.

We received a number of comments regarding our proposal to use the CPI–U to adjust payments to ASCs for inflation, and these comments and our responses are discussed in section IV.H. of this final rule, which addresses the adjustment for inflation under the revised ASC payment system. We did not receive any public comments regarding our proposal to adjust ASC payments for inflation by applying the inflation adjustment to the conversion factor under the revised ASC payment system.

As explained in section IV.H. of this final rule, after consideration of the public comments we received, we are finalizing our proposal under §§ 416.171(a) and (b), without modification, to apply the CPI–U to adjust payments to ASCs for inflation. We will implement the annual update through an adjustment to the conversion factor under the revised ASC payment system, beginning in CY 2010 when the statutory requirement for a zero update no longer applies.

E. Annual Updates

Currently, under the existing ASC payment system, we update the ASC list of covered surgical procedures every 2 years through the notice and comment regulation process. We make additions to and deletions from the ASC list of covered surgical procedures based on clinical judgment and data that are available regarding utilization of care settings. We last published an updated list of the ASC covered surgical procedures in the CY 2007 OPPS/ASC final rule with comment period (71 FR 67960).

Under the revised ASC payment system, which will be implemented effective January 1, 2008, we proposed in the August 2006 proposed rule to update on an annual calendar year basis the ASC conversion factor, the relative payment weights and APC assignments, the ASC payment rates, and the list of procedures for which Medicare would not make payment of an ASC payment rate. To the extent possible under the rules and policies of the revised ASC payment system, we proposed to maintain consistency between the OPPS and the ASC payment system in the way we treat new and revised HCPCS and CPT codes for payment under the ASC payment system. We also proposed to invite comment as part of the annual update cycle to determine if there are procedures that we exclude from payment in the ASC setting that merit reconsideration as a result of changes in clinical practice or innovations in technology.

We proposed to update the ASC list of covered surgical procedures and payment system as part of the annual proposed and final rulemaking cycle updating the hospital OPPS. We believed that including the ASC update as part of the OPPS rulemaking cycle would ensure that updates of the ASC payment rates and the list of covered surgical procedures for which Medicare makes payment to ASCs would be issued in a regular, predictable, and timely manner. Moreover, the ASC payment system would be updated concurrent with changes in the APC groups and the OPPS inpatient list, making it easier to predict changes in payment for particular services from year to year.

In the August 2006 proposed rule for the revised ASC payment system, we proposed to issue a final rule in the first part of CY 2007 in which we would respond to comments submitted timely regarding the proposals set forth in that proposed rule and make final the policy and regulations for the revised ASC payment system for implementation effective January 1, 2008. We also proposed to include the CY 2008 ASC payment rates for surgical procedures payable in an ASC as part of the proposed and final rules for the CY 2008 OPPS update.

In addition, in the August 2006 proposed rule we proposed to evaluate each year all new HCPCS codes that describe surgical procedures to make preliminary determinations regarding whether or not they should be payable in the ASC setting and, if so, whether they are office-based procedures. In the absence of claims data that would indicate where procedures described by new codes are being performed and identify the facility resources required to perform them, we proposed to use other available information, including our clinical advisors' judgment, predecessor CPT and Level II HCPCS codes, information submitted by representatives of specialty societies and professional associations, and information submitted by commenters during the public comment period following publication of the final rule with comment period in the **Federal Register**. We would publish in the annual OPPS/ASC payment update final rule those interim determinations for

the new codes to be active January 1 of the update year. The ASC payment system treatment of those procedures would be open to comment on that final rule, and we would respond to comments about our interim determinations in the final rule for the following year, just as we currently respond to comments about our APC assignments for new codes in the OPPS final rule for the following year. After our review of public comments and in the absence of physicians' claims data, if our determination regarding a new code was that it should reside on the ASC list of covered surgical procedures as an office-based procedure subject to the payment limitation, this determination would remain preliminary until we were able to consider more recent volume and utilization data for each individual procedure code and/or, if appropriate, the clinical characteristics, utilization, and volume of related codes. Using that information, if we confirmed our determination that the new code was appropriately assigned to an office-based payment indicator, it would then be permanently assigned to the list of office-based procedures subject to the payment limitation.

Accordingly, we proposed to reflect this annual rulemaking and publication of revised payment methodologies and payment rates in new § 416.173 in proposed new Subpart F.

Comment: Several commenters recommended that CMS continue to consider the input of interested parties submitting comments regarding the assignment of HCPCS codes to appropriate APCs, additions to and deletions from the ASC list of covered surgical procedures, and creation of payment mechanisms to account for new technology.

Response: As stated in our August 2006 proposal for the annual update process, we intend to invite comments from interested parties as part of the consolidated annual update cycle for updating the hospital OPPS and revised ASC payment system. As always, the OPPS treatment, including APC assignments, of all HCPCS codes would be open to comment, and we proposed also to invite comment regarding whether there are procedures that we exclude from payment in the ASC setting that merit reconsideration as a result of changes in clinical practice or innovations in technology. This approach is consistent with the recommendation of the PPAC that we utilize a process for the revised ASC payment system to obtain input from national medical specialty societies and the ASC community in order to provide payment to ASCs for all safe and appropriate procedures and to allow for changes in technology and evolution in medical practice. Annual updating will provide for the adaptable methodology that the PPAC recommends for the revised ASC payment system.

Comment: Some commenters supported our proposal for the annual updates, indicating that the proposed alignment of annual updates to the revised ASC payment system with the OPPS updates is appropriate and allows the industry to review and contemplate the changes in both payment systems simultaneously.

Response: We appreciate the commenters' support and continue to believe that including the ASC update as part of the OPPS rulemaking cycle would ensure that updates of the ASC payment rates and the list of surgical procedures for which Medicare pays ASCs would be issued in a regular, predictable, and timely manner. Moreover, the ASC payment system would be updated concurrent with changes in the APC groups and the OPPS inpatient list, making it easier to predict changes in payment for particular services from year to year. We believe this approach is especially appropriate, given the final policy of the revised ASC payment system as discussed further in section IV.B. of this final rule, to use the APC groups and relative payment weights for surgical procedures established under the OPPS as the basis of the payment groups and the relative payment weights for surgical procedures paid in ASCs beginning in CY 2008. The annually updated OPPS device offset percents will be used to establish ASC payment rates for device-intensive procedures. In addition, according to the final policies established in this final rule, the OPPS relative payment weights and rates will be used as the basis for the payment of most covered ancillary services under the revised ASC payment system, so coordinated annual updating of the OPPS and the revised ASC payment system is particularly important.

Comment: A number of commenters indicated that many ASCs were interested in submitting bills to Medicare using the same claim form that is used by HOPDs, the CMS UB–92 (soon to be the UB–04), so that CMS would have additional information available for the annual ASC update under the revised ASC payment system. The commenters stated that the CMS–1500 billing form currently used by most Medicare Part B providers and suppliers, including ASCs, limits the amount of information that ASCs can report on claims. The commenters expressed concern that, as a result of having to use the CMS–1500, the true costs incurred by ASCs to provide services are not available to CMS and that, consequently, CMS cannot include actual ASC costs in its analyses to develop and update the revised payment system. They recommended that ASCs be allowed to report to CMS the same level of detail about the services they provide as do HOPDs. Further, the commenters stated that it would be less burdensome than the current Medicare billing policy because ASCs already use the UB–92 to submit bills to commercial payors. Thus, they concluded that allowing ASCs to use the UB–92 for Medicare Part B billing would be advantageous for both CMS and ASCs, because ASCs could provide more detailed cost information to CMS and this change would reduce the administrative burden on ASCs that currently are maintaining billing capabilities for both the CMS–1500 and UB–92 formats.

Response: For future ASC update years, we will explore the feasibility of adopting the ASC billing change recommended by commenters, but this is not a change that we can make by January 2008. We understand the commenters' concerns in this regard and investigated the possibility of implementing this recommendation as part of the revised payment system, effective January 2008. A policy change that requires ASCs to use a different billing format would have to incorporate adequate time for CMS and ASCs to make the necessary systems changes and for CMS to provide training for contractors and ASCs prior to implementing the new format. Although we will continue to explore this recommendation, not only is there insufficient time to make systems changes and provide training before implementation of the revised ASC payment system, but CMS is in the midst of a comprehensive reorganization of its contracting functions, making adoption of any significant billing change at this time even more challenging. During the next few years, Medicare Part A and B claims will be processed by reconfigured contracting entities, and we believe that allowing ASCs to bill using the same format as HOPDs should be explored as part of that larger contractor reform. We plan to pursue the feasibility of this option and to coordinate any possible change to ASC billing requirements with CMS' overall contracting transition. We welcome additional information from the public regarding recommendations for ASC billing

modifications or improvements that we should consider once the revised payment system is implemented. We note that, under our final annual update methodology for the revised ASC payment system, we would not require ASC information beyond that currently available to us through the CMS–1500 in order to annually update the ASC payment system.

After consideration of the public comments we received, we are finalizing our proposal as reflected in § 416.173, without modification, to annually update the ASC conversion factor, the relative payment weights and OPPS APC assignments of covered surgical procedures paid in ASCs, the ASC payment rates, and the list of surgical procedures for which Medicare would not make payment to ASCs as part of the annual proposed and final rulemaking cycle updating the hospital OPPS. In addition, we will annually update the list of covered ancillary services and their ASC payment rates. We also are finalizing our proposal, without modification, to evaluate each year all new HCPCS codes that describe surgical procedures to make preliminary determinations regarding whether they should be payable in the ASC setting and, if so, whether they are office-based procedures. The ASC treatment of these procedures would be open to comment in the final rule, and we would provide responses in the final rule for the following calendar year. Designations of new surgical procedure codes as office-based would remain preliminary until there are adequate physicians' claims data to assess their predominant sites of services, whereupon if we confirm their office-based nature, the codes would be permanently assigned to the list of office-based procedures subject to the ASC payment limitation.

VI. Information in Addenda Related to the Revised CY 2008 ASC Payment System

We include addenda to the preamble of proposed and final rules updating the ASC payment system to present national ASC unadjusted payment rates, by HCPCS code, and other factors that affect ratesetting. For example, in Addendum BB to the August 2006 proposed rule for the revised ASC payment system, we listed the HCPCS codes of surgical procedures for which we proposed to allow payment to ASCs in CY 2008, the short descriptors for those codes, and whether or not the code was proposed to be newly added to the list of covered surgical procedures. We also indicated for each HCPCS code: (1) Whether or not we proposed to designate it as office-based; (2) whether or not we proposed to cap it at the MPFS nonfacility practice expense rate; (3) the estimated proposed CY 2008 ASC relative payment weight; (4) the estimated proposed CY 2008 full payment and coinsurance amounts; and (5) the estimated proposed CY 2008 transitional payment and coinsurance amounts using a 50/50 blend of the current and proposed new rates. Addendum CC to the August 2006 proposed rule listed the specific subset of HCPCS codes and their short descriptors for procedures proposed for payment limitation at the MPFS nonfacility practice expense amount under the revised ASC payment system.

We will continue to use addenda to summarize, as part of the annual proposed and final OPPS/ASC rules updating both payment systems, the annual update of the relative payment weights of ASC covered surgical procedures, the national unadjusted ASC payment amounts for those procedures, the procedures designated as office-based that are subject to payment limitation at the MPFS nonfacility practice expense amount, and other pertinent information that bears on the determination of the payment status and payment rates for services under the revised ASC payment system for the update year. We will also summarize in the addenda the covered ancillary services that will be separately paid under the revised ASC payment system if they are integral to the performance of a covered surgical procedure, including their updated relative payment weights as appropriate, the national unadjusted ASC payment amounts for those services, and other pertinent information.

Although we are including addenda to this final rule, we emphasize that the information presented in these addenda is intended solely to demonstrate the payment rates that result from application of the revised ASC payment system methodology that we are finalizing in this final rule based on the most current data available. We caution readers that the illustrative relative payment weights, national payment amounts, and other information shown in the addenda to this final rule are neither the proposed nor final ASC rates for the CY 2008 revised ASC payment system. The information in the addenda to this final rule exemplifies the results of applying the revised ASC payment system methodology implemented in this final rule to the final or most recently updated CY 2007 OPPS information, with application of the estimated CY 2008 OPPS update, including the CY 2007 APC groupings and relative payment weights, the CY 2007 second quarter OPPS payment rates for drugs and biologicals, the CY 2007 OPPS payment methodology for brachytherapy sources, the specification of surgical procedures as subject to OPPS multiple procedure discounting, the designation of surgical procedures as inpatient only under the OPPS, the identification of surgical procedures for which payment is packaged under the OPPS rather than separately paid, and the CY 2007 OPPS device-dependent APCs and their respective device offset percents. The information is also based on the most recently available Part B utilization data derived from the full year of CY 2005 ASC and physicians' claims, and the CY 2008 estimated transitional nonfacility practice expense payment amounts for the CY 2008 MPFS, with application of the projected CY 2008 MPFS update.

We reiterate that the information in the addenda to this final rule does not represent the rates that we will be proposing for implementation in CY 2008 under the revised ASC payment system, but merely serves to illustrate application of the final ratesetting methodology under the revised ASC payment system. All information included in Addendum AA and Addendum BB to this final rule is subject to change in the annual cycle of notice and comment rulemaking to update the OPPS/ASC payment rates for CY 2008, with the exception of the office-based designation of procedures whose designation is not marked as temporary. We note that we have also included in Addenda AA and BB to this final rule HCPCS codes for those surgical procedures, radiology services, implantable devices, and drugs and biologicals whose payment is packaged under the OPPS and which, therefore, would not be eligible for separate ASC payment as covered surgical procedures or covered ancillary services, in order to facilitate review of the ASC payment policies for these groups of services. Payment to ASCs under the revised ASC payment system for these services would also be packaged. We will propose the relative payment weights, payments rates, and other pertinent ratesetting information for the CY 2008 revised ASC payment system in the OPPS/ASC proposed rule to update both payment systems for CY 2008. This proposed rule will be issued in mid-summer of CY 2007. The relative payment weights and payment rates and other pertinent ratesetting information proposed for the revised ASC payment system in CY 2008 will be based on proposed CY 2008 OPPS payment weights and APC groups, proposed CY

2008 MPFS nonfacility practice expense payment amounts, CY 2007 second quarter OPPS payment rates for drugs and biologicals as established based on the ASP information for that quarter, and the most recent Part B utilization data available to us from CY 2006 claims.

CMS will publish final relative payment weights and final payment rates and other pertinent ratesetting information for the CY 2008 revised ASC payment system in the final OPPS/ASC rule that updates both payment systems for CY 2008.

Changes in CY 2008 payments for physicians' services under the MPFS, in first quarter CY 2008 prices for drugs and biologicals based on the most recent available ASP data, and in CY 2008 HCPCS codes and pricing of OPPS services that may occur and that would affect the CY 2008 revised ASC payment system between publication of the CY 2008 OPPS/ASC final rule and release of the January 2008 OPPS PRICER and the ASC payment files will be reflected in updated addenda that we will post on the CMS Web site.

We have created Addendum DD1 to this final rule to define ASC payment indicators that we will use in Addenda AA and BB to provide payment information regarding covered surgical procedures and covered ancillary services, respectively, under the revised ASC payment system. Analogous to the OPPS payment status indicators that we publish in Addendum D1 as part of the annual OPPS rulemaking cycle, the ASC payment indicators in Addendum DD1 are intended to capture policy-relevant characteristics of HCPCS codes that may receive packaged or separate payment in ASCs, including their ASC payment status prior to CY 2008; their designation as device-intensive; their designation as office-based and the corresponding ASC payment methodology; and their classification as a separately payable radiology service, brachytherapy source, OPPS pass-through device, corneal tissue acquisition service, drug or biological, or NTIOL.

VII. ASC Regulatory Changes

In the August 23, 2006 proposed rule, we proposed to modify applicable ASC regulations under 42 CFR Parts 410, 414, and 416 to incorporate the requirements and conditions for payments for ASC facility services under the revised payment system that was proposed for implementation beginning January 1, 2008.

A. Regulatory Changes That Were Finalized in the CY 2007 OPPS/ASC Final Rule With Comment Period

In the August 23, 2006 proposed rule (71 FR 49631), we proposed the following regulatory changes which we finalized in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68174).

- We proposed to revise the current regulations at Part 416, Subparts D and E, to ensure that the rules governing the current ASC payment system are clearly distinguishable from those that would apply to the revised system beginning January 1, 2008.
- We proposed to revise Subparts D and E to Part 416 to reflect the rules governing the ASC payment system prior to January 1, 2008.
- We proposed to redesignate existing Subpart F as Subpart G under Part 416 to codify the rules governing the ASC payment adjustment for NTIOLs (71 FR 49631).
- We proposed several technical changes to Part 416 (71 FR 49659).
- We proposed to revise existing § 416.1 (Basis and scope) to remove the obsolete reference to ''a hospital outpatient department,'' and to add provisions of section 5103 of Public Law 109–171 and applicable provisions of Public Law 108–173.
- We proposed to revise existing § 416.65 (Covered surgical procedures) to modify the introductory text to clearly denote the section's application to covered surgical procedures furnished before January 1, 2008. In addition, we proposed to remove the obsolete cross-reference in paragraph (a)(4) to § 405.310 and replace it with the correct cross-reference to § 411.15.
- We proposed to revise § 416.125 (ASC facility services payment rate) to incorporate the limitation on payment imposed by section 5103 of Public Law 109–171.
- We proposed to revise § 488.1 (Definitions) to add ambulatory surgical centers to the definition of a supplier in conformance with section 1861(d) of the Act.
- We proposed to add new § 416.76 and new § 416.121 to Subparts D and E, respectively, to clearly state that the provisions of Subparts D and E apply to services furnished before January 1, 2008.

The bases for these proposed regulatory changes were discussed in detail throughout the preamble of the August 23, 2006 proposed rule. We did not receive any public comments on these proposed revisions. In the CY 2007 OPPS/ASC final rule with comment period, we made these provisions final as proposed, without modification (71 FR 68174).

B. Regulatory Changes Included in This Final Rule

In the August 23, 2006 proposed rule (71 FR 49699), we proposed to add a new Subpart F to Part 416 entitled ''Subpart—Coverage, Scope of ASC Facility Services, and Prospective Payment System for Facility Services Furnished On or After January 1, 2008,'' which would include the following new sections:

§ 416.160 Basis and scope.
§ 416.161 Applicability.
§ 416.163 General rules.
§ 416.164 Scope of ASC facility services.
§ 416.166 Covered surgical procedures.
§ 416.167 Basis of payment.
§ 416.171 Calculation of prospective payment rates for ASC services.
§ 416.172 Adjustments to national payment rates.
§ 416.173 Publication of revised payment methodologies and payment rates.
§ 416.178 Limitations on administrative and judicial review.

We also proposed a technical change to 42 CFR Part 414 to conform with changes we were proposing under Part 416, new Subpart F (71 FR 49659), and we likewise proposed to revise § 410.152(i) to make it consistent with provisions of the revised ASC payment system. The numerous public comments that we received regarding the revised ASC payment system we proposed to implement January 1, 2008, are addressed in detail throughout the preamble of this final rule.

As a result of our review of the public comments, in this final rule, we have made a number of modifications to our proposals for the revised ASC payment system. These modifications, which are also discussed in detail in other sections of this final rule, have necessitated corresponding changes in the regulations that we proposed for the revised ASC payment system. The following is a summary of changes to 42 CFR 410 and 416 that reflect those modifications, which we are finalizing in this final rule.

- We added a new paragraph (i)(2) under § 410.152 to specify the amount of payment the Medicare program makes for ASC services beginning January 1, 2008.
- We decided not to finalize the proposed revision of § 414.22(b)(5)(i)(B) in this final rule.
- In § 416.2, we revised the definitions of ''ASC services,'' ''Covered surgical procedures,'' and ''Facility

services,'' and we added a definition of ''Covered ancillary services.''

• We added new Subpart F, as proposed, but modified the title to read ''Coverage, Scope of ASC Services, and Prospective Payment System for ASC Services Furnished on or after January 1, 2008.'' We also modified certain proposed sections under Subpart F and added other provisions as outlined below.

• We revised the section headings of §§ 416.161 and 416.164 to read ''Applicability of this subpart'' and ''Scope of ASC services,'' respectively.

We also revised the section heading of § 416.171 to read ''Determination of payment rates for ASC services.'' In addition, we added new § 416.179 with a new section heading.

• We added § 416.160(a)(4), which addresses payment rules for screening flexible sigmoidoscopy and screening colonoscopy services. Also, we reordered the paragraphs of § 416.160.

• We revised § 416.160(b) to conform the text with the changes to the definitions in § 416.2.

• We made a technical change to §§ 416.163(b) and (c) to specify that payment for anesthetists' services is made in accordance with 42 CFR part 414, in addition to editorial changes to § 416.163(a) to reference ASC services rather than ASC facility services.

• We revised § 416.164(a), ''Included facility services,'' and we renamed and revised § 416.164(b) as ''Covered ancillary services,'' to reflect the policy regarding the packaging of services which is made final in section IV.C. of this final rule. Proposed § 416.164(b) becomes final § 416.164(c), ''Excluded services,'' where we revised anesthetists' services, which are paid under 42 CFR part 414 and where we changed x-ray procedures to radiology services and separated diagnostic procedures and radiology services into separate items. Also, ''Excluded services'' no longer includes costs incurred to procure corneal tissue.

• In § 416.166(c), ''General exclusions,'' we deleted the phrase ''other medical procedures'' from the introductory sentence to conform with the definition of the type of procedures covered under the ASC benefit as discussed in section III. of this final rule. We moved the criterion proposed as paragraph (c)(5) (regarding the expected requirement for active medical monitoring and care at midnight following the procedure) to § 416.166(b) as an element of the ''General standards.'' We also added the following as new criteria for exclusion of a procedure from coverage when performed in an ASC: (1) Commonly require systemic thrombolytic therapy; (2) are designated as requiring inpatient care under § 419.22(n); and (3) can only be reported using a CPT unlisted surgical procedure code.

• We made technical and editorial changes to § 416.167(a) and (b) to reference payment for ASC services and covered ancillary services.

• We revised § 416.171 to reflect the modifications that we are making final in this final rule regarding separate payment for certain covered ancillary services and the extension of transitional payment rates from 1 to 3 years, as discussed in section IV. J. of this final rule.

• We revised § 416.172 as follows: (1) Made minor changes to paragraphs (a), (b), (d), and (e) to reference ASC services and to clarify that the comparison for purposes of assessing the lesser of the actual charge or the prospective rate is to the geographically adjusted payment rate; and (2) revised paragraph (c) to exclude application of a geographic adjustment to payment rates for certain drugs, devices, and brachytherapy sources, as discussed in section IV. C. of this final rule. In addition, we added new paragraph (f) to reflect the payment adjustment when ASC services are interrupted due to circumstances that threaten the well-being of the beneficiary. We also added new paragraph (g) to reflect the payment adjustment for the insertion of NTIOLs.

• We made editorial changes to § 416.173 and § 416.178.

• We added new § 416.179, ''Payment and coinsurance reduction for devices replaced without cost or when full credit is received,'' as discussed in section IV.C. of this final rule.

VIII. Files Available to the Public Via the Internet

Addenda AA, BB, and DD1 to this final rule provide various data pertaining to the CY 2008 ASC list of covered procedures and the covered ancillary services that will be separately paid to ASCs beginning in CY 2008 when provided by an ASC as integral to a covered surgical procedure on the same day as the procedure. All relative payment weights and payment rates are illustrative only, demonstrating the payment rates that result from application of the revised ASC payment system methodology that we are finalizing in this final rule based on the most current data available. They exemplify the results of applying the revised ASC payment system methodology implemented in this final rule to the final or most recently updated CY 2007 OPPS information as updated by the currently estimated CY 2008 OPPS update factor and to the CY 2008 estimated transitional nonfacility practice expense amounts for the CY 2008 MPFS, with application of the projected CY 2008 MPFS update.

As further discussed in section VI. of this final rule, Addendum DD1 defines the payment indicators that are used in Addenda AA and BB of this final rule, while Addenda AA and BB provide payment information regarding covered surgical procedures and covered ancillary services under the revised ASC payment system.

These addenda, as well as the final rule preamble tables and other supporting data files, are included on the CMS Web site at: *http://www.cms.hhs.gov/ASCPayment/* in a format that can easily be downloaded and manipulated. Proposed and final ASC relative weights and payment rates for CY 2008 will be published in the proposed and final CY 2008 OPPS/ASC rules, respectively, and related data files will be included on the CMS Web site as noted above. The OPPS data files are available to the public on the CMS Web site at: *http://www.cms.hhs.gov/HospitalOutpatientPPS,* and the MPFS data files are located at: *http://www.cms.hhs.gov/PhysicianFeeSched.*

We are not including as addenda to this final rule reprints of the final FY 2007 IPPS wage indexes that were included in a notice published in the **Federal Register** on October 11, 2006 (71 FR 59886). Rather, we are providing a link on the CMS Web site at: *http://www.cms.hhs.gov/AcuteInpatientPPS/WIFN* to all of the final FY 2007 IPPS wage index related tables. The final CY 2008 ASC payment system will utilize the FY 2008 IPPS wage index related tables that will be proposed and finalized in the FY 2008 IPPS rulemaking cycle, and we will provide a link on the CMS Web site to those proposed and final wage index related tables in the CY 2008 OPPS/ASC proposed and final rules, respectively. For additional assistance, contact Gift Tee, (410) 786–0378.

IX. Collection of Information Requirements

This document does not impose any information collection and recordkeeping requirements. Consequently, it need not be reviewed by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 35).

X. Regulatory Impact Analysis

A. Overall Impact

We have examined the impacts of this final rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), and Executive Order 13132.

1. Executive Order 12866

Executive Order 12866 (as amended by Executive Order 13258, which merely reassigns responsibility of duties) directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year).

We estimate that the revised ASC payment system and the expanded ASC list of covered surgical procedures that we are implementing in CY 2008 will have no net effect on Medicare expenditures compared to the level of Medicare expenditures that would have occurred in CY 2008 in the absence of the revised payment system. A more detailed discussion of the effects of the changes to the ASC list of covered surgical procedures and the effects of the revisions to the ASC payment system in CY 2008 is provided in section X.B. below.

While we estimate that there will be no net change in Medicare expenditures in CY 2008 as a result of the revised ASC payment system, we estimate that the revised system will result in savings of $240 million over 5 years due to migration of new ASC covered surgical procedures from HOPDs and physicians' offices to ASCs over time. In addition, we note there will be a total increase in Medicare payments to ASCs for CY 2008 of approximately $270 million compared to Medicare expenditures that would have occurred in CY 2008 in the absence of the revised payment system. These additional payments to ASCs of approximately $270 million in CY 2008 will be fully offset by savings from reduced Medicare spending in HOPDs and physicians' offices on services that migrate from these settings to ASCs in CY 2008 (as discussed in detail in section V.C. of this final rule). Therefore, this final rule is an economically significant rule under Executive Order 12866 and a major rule under 5 U.S.C. 804(2).

2. Regulatory Flexibility Act

The RFA requires agencies to determine whether a rule would have a significant economic impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of $9 million to $31.5 million in any 1 year (65 FR 69432).

For purposes of the RFA, we have determined that approximately 73 percent of ASCs would be considered small businesses according to the Small Business Administration (SBA) size standards. Individuals and States are not included in the definition of a small entity. We anticipate that this final rule will have a significant impact on a substantial number of small entities.

3. Small Rural Hospitals

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital with fewer than 100 beds that is located outside of a Metropolitan Statistical Area (MSA). The Secretary certifies that this final rule will not have a significant impact on the operations of a substantial number of small rural hospitals.

4. Unfunded Mandates

Section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. That threshold level is currently approximately $120 million. This final rule will not mandate any requirements for State, local, or tribal government, nor will it affect private sector costs.

5. Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it publishes any rule (proposed or final) that imposes substantial direct costs on State and local governments, preempts State law, or otherwise has Federalism implications.

We have examined this final rule in accordance with Executive Order 13132, Federalism, and have determined that it would not have an impact on the rights, roles, and responsibilities of State, local or tribal governments. The changes related to payments to ASCs in CY 2008 will not affect payments to government hospitals.

B. Effects of Revisions to the ASC Payment System for CY 2008

In CY 2008, we are implementing a revised Medicare ASC payment system that could have a far-reaching effect on the provision of outpatient surgical services for a number of years to come. First, we are greatly expanding the list of procedures that will be eligible for payment under the revised ASC payment system. Second, we are moving from a limited fee schedule based on nine disparate payment groups to a payment system incorporating relative payment weights for groups of procedures with similar clinical and resource characteristics, based on the APCs that are key elements of the OPPS.

Implementation by January 1, 2008 of a revised ASC payment system designed to result in budget neutrality is mandated by section 626 of Public Law 108–173. To set ASC payment rates for CY 2008 under the revised payment system, we are multiplying ASC relative payment weights for surgical procedures by an ASC conversion factor that we calculate to result in the same amount of aggregate Medicare expenditures for those services in CY 2008 as we estimate would have been made if the revised payment system were not implemented.

The effects of the expanded numbers and types of procedures for which an ASC payment may be made and other policy changes that affect the revised payment system, combined with significant changes in payment rates for covered surgical procedures, will vary across ASCs, depending on whether or not the ASC limits its services to those in a particular surgical specialty area, the volume of specific services provided by the ASC, the extent to which ASCs will offer different services, and the percentage of its patients that are Medicare beneficiaries.

In this July 2007 final rule for the revised ASC payment system, we have estimated the CY 2008 ASC payment rates, budget neutrality factor, and impacts using the CY 2007 OPPS relative payment weights with an estimated update factor for CY 2008, the CY 2007 MPFS PE RVUs trended forward to CY 2008, and CY 2005

utilization data projected forward to CY 2008. We emphasize that the impact estimates in this final rule are illustrative only. The CY 2008 ASC payment rates and budget neutrality factor will be proposed in the CY 2008 OPPS/ASC proposed rule based on the methodology for calculating budget neutrality established in this final rule and incorporating the proposed CY 2008 OPPS relative payment weights, the proposed CY 2008 MPFS PE RVUs, and CY 2006 utilization information projected forward to CY 2008. The final CY 2008 ASC payment rates and budget neutrality factor will be established in the CY 2008 OPPS/ASC final rule with comment period, in accordance with the methodology for calculating budget neutrality established in this final rule and based on the final CY 2008 OPPS payment weights, the final CY 2008 MPFS RVUs, and updated CY 2006 utilization data projected forward to CY 2008.

As discussed fully in section V.C. of this final rule, our final methodology for calculating the budget neutrality factor considers not only the effects of the new payment rates to be implemented under the revised payment system, but also the estimated net effect of migration of new ASC procedures across ambulatory care settings. The methodology for calculating the budget neutrality adjustment factor finalized in this rule assumes that over the first 2 years of the revised payment system, approximately 25 percent of the HOPD volume of new ASC procedures would migrate from the HOPD service setting to ASCs, and that over the 4-year transition period, approximately 15 percent of the physicians' office volume of new ASC procedures would migrate to ASCs.

We estimate that the revised ASC payment system established in this final rule will result in neither savings nor costs to the Medicare program in CY 2008. That is, because it is designed to be budget neutral, in CY 2008, the revised ASC payment system will neither increase nor decrease expenditures under Part B of Medicare. We further estimate that beneficiaries will save approximately $20 million under the revised ASC payment system in CY 2008, because ASC payment rates will, in most cases, be lower than OPPS payment rates for the same services and, because, except for screening flexible sigmoidoscopy and screening colonoscopy procedures, beneficiary coinsurance for ASC services is 20 percent rather than 20 to 40 percent as is the case under the OPPS. (The only possible instance in which an ASC coinsurance amount could exceed the OPPS copayment amount would be when the coinsurance amount for a procedure under the revised ASC payment system exceeds the hospital inpatient deductible. Section 1833(t)(8)(C)(i) of the Act provides that the copayment amount for a procedure paid under the OPPS cannot exceed the inpatient deductible established for the year in which the procedure is performed, but there is no such requirement related to the ASC coinsurance amount.) Beneficiary coinsurance for services migrating from physicians' offices to ASCs may decrease or increase under the revised ASC payment system, depending on the particular service and whether the Medicare payment to the physician for providing that service in his or her office is higher or lower than the sum of the Medicare payment to the ASC for providing the facility portion of that service and the Medicare payment to the physician for providing that service in a facility (nonoffice) setting. As noted previously, the net effect of the revised ASC payment system on beneficiary coinsurance, taking into account the migration of services from HOPDs and physicians' offices, is estimated to be $20 million in beneficiary savings in CY 2008.

1. Alternatives Considered

We are issuing this final rule to meet a statutory requirement to implement, no later than January 1, 2008, a revised payment system for ASCs. We are implementing the revised ASC payment system through rulemaking in the **Federal Register**. Through the August 2006 proposed rule, we have afforded interested parties an opportunity to comment on revisions we proposed to make to the policies and rules for identifying surgical procedures that would be excluded from payment in ASCs, to the ASC ratesetting methodology and payment policies, and to the regulations for the revised ASC payment system.

Throughout the preamble of this final rule, we discuss the various options we considered as we developed policies to redesign the ASC payment system in broad terms, and specific policies, such as those affecting payment for covered ancillary services integral to covered surgical procedures, the definition of a covered surgical procedure, criteria for identifying procedures that are not safely or appropriately performed in an ASC, and the payment methodology for device-intensive procedures, among others.

Although we proposed to phase in the new ASC payment rates under the revised payment system over a 2-year period, we are finalizing a policy to phase in the ASC payment rates under the revised payment system over a 4-year period. As we discuss in section X.B.3. of this final rule, we believe that allowing a longer transition period is appropriate in light of the adverse financial impact that some ASCs could potentially experience if they perform a high volume of procedures whose rates would decrease significantly under the revised payment system. We believe the 4-year transition will give ASCs time to reconfigure their mix of services and make other needed adjustments so they can focus on achieving more efficient delivery of a broader range of surgical procedures.

2. Limitations of Our Analysis

Presented here are the projected effects of the policy and statutory changes that will be effective for CY 2008 on aggregate ASC utilization and Medicare payments. One limitation of this analysis is that we could only infer the effects of the revised payment system on different types of ASCs, for example, single or multispecialty, high or low volume, and urban or nonurban ASCs, based on an overall comparison of procedure volumes and facility payments between the current and the revised payment system. At this time, we do not have a provider-level dataset of CY 2005 ASC utilization that accurately identifies unique ASCs and their geographic information that would allow us to compare estimated payments and geographic adjustment among classes of ASCs based on a provider-level analysis.

A second limitation is our lack of information on ASC resource use. ASCs are not required to file Medicare cost reports and, therefore, we do not have cost information to evaluate whether or not the payments for ASC services coincide with the resources required by ASCs to provide those services.

A third limitation is our inability to predict changes in service mix between CY 2005 and CY 2008. The aggregated impact tables below are based upon a methodology that assumes no changes in service-mix with respect to the CY 2005 ASC data used for this final rule. We believe that the net effect on Medicare expenditures of changes in service-mix for current ASC covered surgical procedures will be negligible, in the aggregate. Such changes may have differential effects across surgical specialty procedure groups as ASCs adjust to the revised payment system. However, we are unable to accurately project such changes at a disaggregated level. Clearly, individual ASCs will experience changes in payment that

differ from the aggregated estimated changes presented in the tables below.

Because we do not have experience with ASC payment under the revised payment system, we have relied on comments and information from stakeholders in response to our August 2006 proposed rule for the revised ASC payment system to mitigate the limitations in the data available to us for analysis of the impact of the changes on specific procedures, on classes of specialty ASCs, and on beneficiaries.

3. Estimated Effect of This Final Rule on ASCs

Some ASCs are multispecialty facilities that perform the gamut of surgical procedures, from excision of lesions to hernia repair to cataract extraction; others focus on a single specialty and perform only a limited range of surgical procedures, such as eye procedures, gastrointestinal procedures, or orthopedic surgery. The combined effect on an individual ASC of the CY 2008 revised payment system and the expanded ASC list of covered surgical procedures will depend on a number of factors, including, but not limited to, the mix of services the ASC provides, the volume of specific services provided by the ASC, the percentage of its patients who are Medicare beneficiaries, and the extent to which an ASC will choose to provide different services under the revised payment system. The following discussion presents two tables that provide estimates of the impact of the revised ASC payment system on Medicare payments to ASCs for current ASC services, assuming the same mix of services as offered by ASCs in our CY 2005 claims data. The first table depicts aggregate percent change in payment by surgical specialty group and the other compares payment for procedures estimated to receive the most payment in CY 2008 under the current payment system.

In section IV.J. of this final rule, we finalize our policy of a transition of 4 years for the revised payment rates, rather than the proposed 2-year transition, where payments will generally be made using a blend of the rates based on the CY 2007 ASC payment rate and the revised ASC payment rate. In comparing estimated payment rates for CY 2008 under the existing system with the estimated payment rates for CY 2008 under the revised system, we noted the negative effect the estimated proposed payment rates would have on Medicare payments to ASCs for certain surgical procedures that currently are performed frequently in ASCs. We were concerned about the impact of the revised payment rates on ASCs that specialize in a limited number of surgical procedures for which payment would decrease under the revised system and wanted to encourage ASCs to continue to provide access to the high volume procedures that are currently performed there because, in all likelihood, the ASC has become an extremely efficient setting for those procedures, such as cataract extractions and colonoscopies. Moreover, we believe that a positive outcome of the revised ASC payment system could be to expand beneficiary and physician choice in selection of an appropriate site for ambulatory surgical services, as a consequence of the expansion of surgical procedures for which Medicare will make an ASC payment and the revised rates that will pay more appropriately for those services. We believe a 4-year transition will give ASCs additional time to reconfigure their mix of surgical services and make other needed adjustments so that they can focus on achieving more efficient delivery of a broader range of surgical procedures.

In CY 2008, we will pay ASCs using a 75/25 blend, in which payment will be calculated by adding 75 percent of the CY 2007 ASC rate for a surgical procedure on the CY 2007 ASC list of covered surgical procedures and 25 percent of the revised CY 2008 ASC rate for the same procedure. For CYs 2009 and 2010, the blend will be transitioned first to 50/50 and then to a 25/75 blend of the CY 2007 ASC rate and the revised ASC payment rate. Beginning in CY 2011, payments will be made to ASCs for covered surgical procedures on the CY 2007 ASC list at the fully implemented revised ASC payment rates. Procedures that were not included on the ASC list of covered surgical procedures in CY 2007 will not be paid at the transitional rates for CYs 2008 through 2010 because they have no CY 2007 ASC payment rate. Those procedures will be paid at the fully implemented ASC rate, beginning in CY 2008.

Table 11 shows the impact of the revised payment system at the surgical specialty group level. We have aggregated the surgical HCPCS codes by specialty group and estimated the effect on aggregated payment for surgical specialty groups, considering separately the CY 2008 transitional rate and the fully implemented revised payment rate. The groups are sorted for display in descending order by estimated Medicare program payment to ASCs for CY 2008 in the absence of the revised ASC payment system. The following is an explanation of the information presented in Table 11:

- Column 1—*Surgical Specialty Group* indicates the surgical specialties into which ASC procedures are grouped. We used the CPT code range definitions and added the related Level II HCPCS codes and Category III CPT codes, as appropriate, to account for all surgical procedures to which the Medicare program payments are attributed.
- Column 2—*Estimated CY 2008 ASC Payments* in the absence of the revised ASC payment system were calculated by multiplying the CY 2007 ASC payment rate by CY 2008 ASC utilization (which is based on CY 2005 ASC utilization multiplied by a factor of 1.305 to take into account expected volume growth with volume adjustment, as appropriate, for the multiple procedure discount). The resulting amount was then multiplied by 0.8 to estimate the Medicare program's share of the total payments to the ASC. The payment amounts are expressed in millions of dollars.
- Column 3—*Estimated CY 2008 Percent Change with Transition (75/25 Blend)* is the aggregate percentage increase or decrease in Medicare program payment to ASCs for each surgical specialty group that is attributable to changes in the ASC payment rates for CY 2008 under the 75/25 blend of the CY 2007 ASC payment rate and the revised ASC payment rate.
- Column 4—*Estimated CY 2008 Percent Change without Transition (Fully Implemented)* is the aggregate percentage increase or decrease in Medicare program payment to ASCs for each surgical specialty group that is attributable to changes in the ASC payment rates for CY 2008 if there were no transition period to the revised payment rates. The percentages appearing in column 4 are presented as a comparison for the transition policy in column 3 and do not depict the impact of the fully implemented proposal in CY 2011.

Table 11 reflects the changes for ASCs at the surgical specialty level and shows that for all but gastrointestinal procedures, if an ASC offers the same mix of services in CY 2008 that is reflected in our national CY 2005 claims data, Medicare payments to the ASC for services in that surgical specialty area would be estimated to increase under the revised payment system. If the revised payment system were fully implemented in CY 2008, we would expect all but gastrointestinal procedures and nervous system procedures to receive greater Medicare payment. In addition to the impacts on

Medicare payments for current ASC procedures shown in Table 11, it is important to note that overall CY 2008 payments to ASCs are estimated to increase by about $270 million as a result of the revised payment system. This increased spending in ASCs is projected to be fully offset by savings from reduced spending in HOPDs and physicians' offices due to service migration.

TABLE 11.—ESTIMATED CY 2008 IMPACT OF THE REVISED ASC PAYMENT SYSTEM ON ESTIMATED AGGREGATE CY 2008 MEDICARE PROGRAM PAYMENTS UNDER THE 75/25 TRANSITION BLEND AND WITHOUT A TRANSITION, BY SURGICAL SPECIALTY GROUP

Surgical specialty group	Estimated CY 2008 ASC payments (in millions)	Estimated CY 2008 percent change with transition (75/25 blend)	Estimated CY 2008 percent change without transition (fully implemented)
(1)	(2)	(3)	(4)
Eye and ocular adnexa	$1,365	1	5
Digestive system	721	−4	−15
Nervous system	274	2	−5
Musculoskeletal system	167	24	97
Integumentary system	85	4	15
Genitourinary system	76	10	38
Respiratory system	23	16	65
Cardiovascular system	8	25	95
Auditory system	4	30	85
Hemic and lymphatic systems	2	28	110
Other systems	0.1	19	75

Table 12 below shows the estimated impact of the revised payment system on aggregate ASC payments for selected procedures during the first year of implementation (CY 2008) with and without the transitional blended rate. The table displays 30 of the procedures receiving the highest estimated CY 2008 ASC payments under the existing Medicare payment system. The HCPCS codes are sorted in descending order by estimated CY 2008 ASC program payments in the absence of the revised ASC payment system.

- Column 1—*HCPCS code.*
- Column 2—*Short Descriptor* of the HCPCS code.
- Column 3—*Estimated CY 2008 ASC Payments* in the absence of the revised payment system were calculated by multiplying the CY 2007 ASC payment rate by CY 2008 ASC utilization (which is based on CY 2005 ASC utilization multiplied by a factor of 1.305 to take into account expected volume growth with volume adjustment, as appropriate, for the multiple procedure discount). The resulting amount was then multiplied by 0.8 to estimate the Medicare program's share of the total payments to the ASC. The payment amounts are expressed in millions of dollars.
- Column 4—*CY 2008 Percent Change with Transition (75/25 Blend)* reflects the percent differences between the estimated ASC payment rates for CY 2008 under the current system and the estimated payment rates for CY 2008 under the revised system, incorporating a 75/25 blend of the estimated ASC payment using the CY 2007 ASC payment rate and the revised ASC payment rate.
- Column 5—*CY 2008 Percent Change without Transition (Fully Implemented)* reflects the percent differences between the estimated ASC payment rates for CY 2008 under the current system and the estimated payment rates for CY 2008 under the revised payment system if there were no transition period to the revised payment rates. The percentages appearing in column 5 are presented as a comparison for the transition policy in column 4 and do not depict the impact of the fully implemented proposal in CY 2011.

TABLE 12.—ESTIMATED CY 2008 IMPACT OF REVISED ASC PAYMENT SYSTEM ON AGGREGATE PAYMENTS FOR PROCEDURES WITH THE HIGHEST ESTIMATED CY 2008 PAYMENTS UNDER THE CURRENT SYSTEM

HCPCS code	Short descriptor	Estimated CY 2008 ASC payments (in millions)	Estimated CY 2008 percent change (75/25 blend)	Estimated CY 2008 percent changes without transition (fully implemented)
(1)	(2)	(3)	(4)	(5)
66984	Cataract surg w/iol, 1 stage	$1,112	1	3
45378	Diagnostic colonoscopy	153	−4	−16
43239	Upper GI endoscopy, biopsy	148	−5	−21
45380	Colonoscopy and biopsy	114	−4	−16
66821	After cataract laser surgery	102	−8	−31
45385	Lesion removal colonoscopy	96	−4	−16
62311	Inject spine l/s (cd)	81	−5	−19
45384	Lesion remove colonoscopy	44	−4	−16

TABLE 12.—ESTIMATED CY 2008 IMPACT OF REVISED ASC PAYMENT SYSTEM ON AGGREGATE PAYMENTS FOR PROCEDURES WITH THE HIGHEST ESTIMATED CY 2008 PAYMENTS UNDER THE CURRENT SYSTEM—Continued

HCPCS code	Short descriptor	Estimated CY 2008 ASC payments (in millions)	Estimated CY 2008 percent change (75/25 blend)	Estimated CY 2008 percent changes without transition (fully implemented)
(1)	(2)	(3)	(4)	(5)

64623	Destr paravertebral n add-on	9	−5	−19
45383	Lesion removal colonoscopy	9	−4	−16
26055	Incise finger tendon sheath	9	14	54

Over time, we believe that the current ASC payment system has served as an incentive to ASCs to focus on providing procedures for which they determine Medicare payments are adequate to support the ASC's continued operation. We would expect that, under the existing payment system, the ASC payment rates for many of the most frequently performed procedures in ASCs are similar to the OPPS payment rates for the same procedures. Conversely, we would expect that procedures with existing ASC payment rates that are substantially lower than the OPPS rates would be performed less often in ASCs. We believe the revised ASC payment system represents a major stride towards encouraging greater efficiency in ASCs and promoting a significant increase in the breadth of surgical procedures performed in ASCs, because it more appropriately distributes payments across the entire spectrum of covered surgical procedures, based on a coherent system of relative payment weights that are related to the clinical and facility resource characteristics of those procedures.

Table 12 identifies a number of ASC procedures receiving the highest estimated CY 2008 payments under the current system and shows that most of them will experience payment decreases in CY 2008 under the revised ASC payment system. This contrasts with the estimated aggregate payment increases at the surgical specialty group level displayed in Table 11. In fact, Table 11 shows only one surgical specialty group of procedures for which the payments are expected to see a small decrease in the first year under the revised ASC payment system, and only two groups for which a decrease would be expected if there were no transition period to the revised payment rates. The increased payments at the full group level are due to the moderating effect of the payment increases for the less frequently performed procedures within the surgical specialty group. The exception to this is the surgical specialty group of eye and ocular adnexa where the aggregate increase in CY 2008 is driven by a small increase in payment for the highest volume procedure (CPT code 66984, Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedures), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification)).

As a result of the redistribution of payments across the expanded breadth of surgical procedures for which Medicare will provide an ASC payment, we believe that ASCs may change the mix of services they provide over the next several years. The revised ASC payment system should encourage ASCs to expand their service mix beyond the handful of the highest paying procedures which comprise the majority of ASC utilization under the existing ASC payment system. For example, although cystoscopy (CPT code 52000), the highest volume ASC genitourinary procedure, is expected to experience a 4 percent payment rate decrease in CY 2008, overall payment to ASCs for the group of genitourinary procedures currently performed in ASCs is expected to increase by 10 percent. Although a urology specialty ASC may currently perform far more cystoscopy procedures than any other genitourinary procedure, we believe that under the revised ASC payment system, the ASC has the opportunity to adapt to the payment decrease for its most frequently performed procedures by offering an increased breadth of procedures, still within the clinical specialty area, and receive payments that are adequate to support continued operations. Similarly, payments for all of the highest volume pain management injection procedures are expected to decrease in CY 2008, although payments for nervous system procedures overall

are expected to increase. However, if there were no transition for CY 2008, payments would also decrease slightly for the nervous system surgical specialty group.

For those procedures that will be paid a significantly lower amount under the revised payment system than they are currently paid, we believe that their current payment rates, which are closer to the OPPS payment rates than other ASC procedures, are likely to be generous relative to ASC costs, so ASCs would in all likelihood continue performing those procedures under the revised payment system. We also note that the majority of the most frequently performed ASC procedures specifically studied by the GAO, as described in the section II.B. of this final rule for the revised ASC payment system, appear in Table 12 with estimated payment decreases under the revised ASC payment system. The GAO concluded that, for these procedures, the OPPS APC groups accurately reflect the relative costs of procedures performed at ASCs and that ASCs have substantially lower costs.

Generally, the payment changes for individual surgical procedures are relatively small in the first year under the transition to the revised payment system. As displayed in Table 12, a 1 percent increase in payment for the most common cataract surgery, CPT code 66984, is expected and mirrors the effect of the revised payment system on payment for the eye and ocular adnexa surgical specialty group (Table 11), even though payment for another relatively high volume eye procedure, CPT code 66821 (Discission of secondary membranous cataract (opacified posterior lens capsule and/or anterior hyaloid); laser surgery (e.g., YAG laser) (one or more stages)), is expected to decrease by 8 percent.

For some procedures the estimated payment amounts in CY 2008 under the revised ASC payment system are much higher than the CY 2007 rates currently paid to ASCs. For example, payment for CPT code 67038 (Vitrectomy, mechanical, pars plana approach; with epiretinal membrane stripping) increases by 31 percent compared to estimated CY 2008 payments under the current system. Similarly, the estimated CY 2008 ASC payment for CPT code 29880 (Arthroscopy, knee, surgical; with meniscetomy (medial and lateral, including any meniscal shaving)) increases by 23 percent. For these two procedures and the other procedures with estimated payment increases greater than 10 percent, the increases are due to the comparatively higher OPPS rates which, when adjusted by the ASC budget neutrality factor and blended with the CY 2007 ASC payment amounts, generate CY 2008 ASC payment rates that are substantially above the current CY 2007 ASC payment rates.

We estimate that payments for most of the highest volume colonoscopy and upper gastrointestinal endoscopy procedures will decrease under the revised payment system. In fact, payment decreases also are expected for the gastrointestinal surgical specialty group overall. We believe that decreased payments for so many of the gastrointestinal procedures are because current ASC payment rates are close to the OPPS rates. Procedures with current payment rates that are nearly as high as their OPPS rates are affected more negatively under the revised payment system than procedures for which ASC rates have historically been much lower than the comparable OPPS rates. The payment decreases expected in the first year under the revised ASC payment system for some of the high volume gastrointestinal procedures are not large (all less than 7 percent). We believe that ASCs can generally continue to cover their costs for these procedures, and that ASCs specializing in providing those services will be able to adapt their business practices and case-mix to manage declines for individual procedures.

In CY 2008, we also are adding hundreds of surgical procedures to the already extensive list of procedures for which Medicare allows payment to ASCs, creating new opportunities for ASCs to expand their range of covered surgical procedures. For the first time, ASCs will be paid separately for covered ancillary services that are integral to covered surgical procedures, including certain radiology procedures, costly drugs and biologicals, devices with pass-through status under the OPPS, and brachytherapy sources. While separately paid radiology services will be paid based on their ASC relative payment weight calculated according to the standard ratesetting methodology of the revised ASC payment system or to the MPFS nonfacility practice expense amount, whichever is lower, the other items newly eligible for separate payment in ASCs will be paid comparably to their OPPS rates because we would not expect ASCs to experience efficiencies in providing them. Lastly, this final rule establishes a specific payment methodology for device-intensive procedures that provides the same packaged payment for the device as under the OPPS, while providing a reduced service payment that is subject to the 4-year transition if the device-intensive procedure is on the CY 2007 ASC list of covered surgical procedures. This final methodology should allow ASCs to continue to expand their provision of device-intensive services and to begin performing new device-intensive ASC procedures.

4. Estimated Effects of This Final Rule on Beneficiaries

We estimate that the changes for CY 2008 will be positive for beneficiaries in at least two respects. Except for screening colonoscopy and flexible sigmoidoscopy procedures, the ASC coinsurance rate for all procedures is 20 percent. This contrasts with procedures performed in HOPDs where the beneficiary is responsible for copayments that range from 20 percent to 40 percent. In addition, ASC payment rates under the revised payment system are lower than payment rates for the same procedures under the OPPS, so the beneficiary coinsurance amount under the ASC payment system almost always will be less than the OPPS copayment amount for the same services. (The only exceptions will be when the ASC coinsurance amount exceeds the inpatient deductible. The statute requires that copayment amounts under the OPPS not exceed the inpatient deductible.) Beneficiary coinsurance for services migrating from physicians' offices to ASCs may decrease or increase under the revised ASC payment system, depending on the particular service and the relative payment amounts for that service in the physician's office compared with the ASC. As noted previously, the net effect of the revised ASC payment system on beneficiary coinsurance, taking into account the migration of services from HOPDs and physicians' offices, is estimated to be $20 million in beneficiary savings in CY 2008.

In addition to the lower out-of-pocket expenses, we believe that beneficiaries also will have access to more services in ASCs as a result of the addition of 793 surgical procedures to the ASC list of covered surgical services eligible for Medicare payment. We expect that ASCs will provide a broader range of surgical services under the revised payment system and that beneficiaries will benefit from having access to a greater variety of surgical procedures in ASCs.

5. Conclusion

The changes to the ASC payment system for CY 2008 will affect each of the more than 4,600 ASCs currently approved for participation in the Medicare program. The effect on an

individual ASC will depend on the ASC's mix of patients, the proportion of the ASC's patients that are Medicare beneficiaries, the degree to which the payments for the procedures offered by the ASC are changed under the revised payment system, and the degree to which the ASC chooses to provide a different set of procedures. The revised ASC payment system is designed to result in the same aggregate amount of Medicare expenditures in CY 2008 that would be made in the absence of the revised ASC payment system. As mentioned previously, we estimate that the revised ASC payment system and the expanded ASC list of covered surgical procedures that we are implementing in CY 2008 will have no net effect on Medicare expenditures compared to the level of Medicare expenditures that would have occurred in CY 2008 in the absence of the revised payment system. However, there will be a total increase in Medicare payments to ASCs for CY 2008 of approximately $270 million as a result of the revised ASC payment system, which will be fully offset by savings from reduced Medicare spending in HOPDs and physicians' offices on services that migrate from these settings to ASCs (as discussed in detail in section V.C. of this final rule). Furthermore, we estimate that the revised ASC payment system will result in Medicare savings of $240 million over 5 years due to migration of new ASC services from HOPDs and physicians' offices to ASCs over time. We anticipate that this final rule will have a significant economic impact on a substantial number of small entities.

6. Accounting Statement

As required by OMB Circular A–4 (available at *http://www.whitehousegov/omb/circulars/a004/a-4.pdf*), in Table 13 below, we have prepared an accounting statement showing the classification of the expenditures associated with the implementation of the CY 2008 revised ASC payment system, based on the provisions of this final rule. As explained above, we estimate that Medicare payments to ASCs in CY 2008 will be about $270 million higher than they would otherwise be in the absence of the revised ASC payment system. This $270 million in additional payments to ASCs in CY 2008 will be fully offset by savings from reduced spending in HOPDs and physicians' offices on services that migrate from these settings to ASCs. This table provides our best estimate of Medicare payments to providers and suppliers as a result of the CY 2008 revised ASC payment system, as presented in this final rule. All expenditures are classified as transfers.

TABLE 13.—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED EXPENDITURES FROM CY 2007 TO CY 2008 AS A RESULT OF THE CY 2008 REVISED ASC PAYMENT SYSTEM

Category	Transfers
Annualized Monetized Transfers.	$0 Million.
From Whom to Whom	Federal Government to Medicare Providers and Suppliers.
Annualized Monetized Transfer.	$0 Million.
From Whom to Whom	Premium Payments from Beneficiaries to Federal Government.
Total	$0 Million.

C. Executive Order 12866

In accordance with the provisions of Executive Order 12866, this final rule was reviewed by the OMB.

List of Subjects

42 CFR Part 410

Health facilities, Health professions, Laboratories, Medicare, Rural areas, X-rays.

42 CFR Part 416

Health facilities, Kidney diseases, Medicare, Reporting and recordkeeping requirements.

■ For reasons stated in the preamble of this final rule, the Centers for Medicare & Medicaid Services is amending 42 CFR Chapter IV as set forth below:

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

■ 1. The authority citation for part 410 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

■ 2. Section 410.152 is amended by adding a new paragraph (i)(2) to read as follows:

§ 410.152 Amounts of payment.

* * * * *

(i) * * *

(2) For ASC services furnished on or after January 1, 2008, in connection with the covered surgical procedures specified in § 416.166 of this subchapter, except as provided in paragraphs (i)(2)(i) and (i)(2)(ii) of this section, Medicare Part B pays the lesser of 80 percent of the actual charge or 80 percent of the prospective payment amount, geographically adjusted, if applicable, as determined under Subpart F of Part 416 of this subchapter. Part B coinsurance is 20 percent of the actual charge or 20 percent of the prospective payment amount, geographically adjusted, if applicable.

(i) If the limitation described in § 416.167(b)(3) of this subchapter applies, Medicare pays 80 percent of the amount determined under Subpart B of Part 414 of this subchapter and Part B coinsurance is 20 percent of the applicable payment amount.

(ii) Medicare Part B pays 75 percent of the applicable payment amount for screening flexible sigmoidoscopies and screening colonoscopies, and Part B coinsurance is 25 percent of the applicable payment amount.

* * * * *

PART 416—AMBULATORY SURGICAL SERVICES

■ 3. The authority citation for part 416 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

■ 4. Section 416.2 is amended by—
■ a. Revising the definition of ''ASC services.''
■ b. Adding a definition of ''Covered ancillary services'' in alphabetical order.
■ c. Revising the definition of ''Covered surgical procedures.''
■ d. Revising the definition of ''Facility services.''

The revisions and addition read as follows:

§ 416.2 Definitions.

* * * * *

ASC services means, for the period before January 1, 2008, facility services that are furnished in an ASC, and beginning January 1, 2008, means the combined facility services and covered ancillary services that are furnished in an ASC in connection with covered surgical procedures.

Covered ancillary services means items and services that are integral to a covered surgical procedure performed in an ASC as provided in § 416.164(b), for which payment may be made under § 416.171 in addition to the payment for the facility services.

Covered surgical procedures means those surgical procedures furnished before January 1, 2008, that meet the criteria specified in § 416.65 and those surgical procedures furnished on or after January 1, 2008, that meet the criteria specified in § 416.166.

Facility services means for the period before January 1, 2008, services that are furnished in connection with covered surgical procedures performed in an ASC, and beginning January 1, 2008, means services that are furnished in connection with covered surgical procedures performed in an ASC as provided in § 416.164(a) for which payment is included in the ASC payment established under § 416.171 for the covered surgical procedure.

■ 5. A new Subpart F is added to read as follows:

Subpart F—Coverage, Scope of ASC Services, and Prospective Payment System for ASC Services Furnished on or After January 1, 2008

Sec.

Subpart F—Coverage, Scope of ASC Services, and Prospective Payment System for ASC Services Furnished on or After January 1, 2008

§ 416.160 Basis and scope.

(a) *Statutory basis.* (1) Section 1833(i)(2)(D) of the Act requires the Secretary to implement a revised payment system for payment of surgical services furnished in ASCs. The statute requires that, in the year such system is implemented, the system shall be designed to result in the same amount of aggregate expenditures for such services as would be made if there was no requirement for a revised payment system. The revised payment system shall be implemented no earlier than January 1, 2006, and no later than January 1, 2008. There shall be no administrative or judicial review under section 1869 of the Act, section 1878 of the Act, or otherwise of the classification system, the relative weights, payment amounts, and the geographic adjustment factor, if any, of the revised payment system.

(2) Section 1833(a)(1)(G) of the Act provides that, beginning with the implementation date of a revised payment system for ASC facility services furnished in connection with a surgical procedure pursuant to section 1833(i)(1)(A) of the Act, the amount paid shall be 80 percent of the lesser of the actual charge for such services or the amount determined by the Secretary under the revised payment system.

(3) Section 1833(i)(1)(A) of the Act requires the Secretary to specify the surgical procedures that can be performed safely on an ambulatory basis in an ASC.

(4) Section 1834(d) of the Act specifies that, when screening colonoscopies or screening flexible sigmoidoscopies are performed in an ASC or hospital outpatient department, payment shall be based on the lesser of the amount under the fee schedule that would apply to such services if they were performed in a hospital outpatient department in an area or the amount under the fee schedule that would apply to such services if they were performed in an ambulatory surgical center in the same area. Section 1834(d) of the Act further specifies that the coinsurance for screening flexible sigmoidoscopy and screening colonoscopy procedures is 25 percent of the payment amount. Section 1834(d) of the Act also specifies that, in the case of screening flexible sigmoidoscopy and screening colonoscopy services, their payment amounts must not exceed the payment rates established for the related diagnostic services. Section 1833(b)(8) of the Act specifies that the Part B deductible shall not apply with respect to colorectal screening tests as described in section 1861(pp)(1) of the Act, which include screening colonoscopies and screening flexible sigmoidoscopies.

(b) *Scope.* This subpart sets forth—

(1) The scope of ASC services and the criteria for determining the covered surgical procedures for which Medicare provides payment for the associated facility services and covered ancillary services;

(2) The basis of payment for facility services and for covered ancillary services furnished in an ASC in connection with a covered surgical procedure;

(3) The methodologies by which Medicare determines payment amounts for ASC services.

§ 416.161 Applicability of this subpart.

The provisions of this subpart apply to ASC services furnished on or after January 1, 2008.

§ 416.163 General rules.

(a) Payment is made under this subpart for ASC services specified in §§ 416.164(a) and (b) furnished to Medicare beneficiaries by a participating ASC in connection with covered surgical procedures as determined by the Secretary in accordance with § 416.166.

(b) Payment for physicians' services and payment for anesthetists' services are made in accordance with Part 414 of this subchapter.

(c) Payment for items and services other than physicians' and anesthetists' services, as specified in § 416.164(c), is made in accordance with § 410.152 of this subchapter.

§ 416.164 Scope of ASC services.

(a) *Included facility services.* ASC services for which payment is packaged into the ASC payment for a covered surgical procedure under § 416.166 include, but are not limited to—

(1) Nursing, technician, and related services;

(2) Use of the facility where the surgical procedures are performed;

(3) Any laboratory testing performed under a Clinical Laboratory Improvement Amendments of 1988 (CLIA) certificate of waiver;

(4) Drugs and biologicals for which separate payment is not allowed under the hospital outpatient prospective payment system (OPPS);

(5) Medical and surgical supplies not on pass-through status under Subpart G of Part 419 of this subchapter;

(6) Equipment;

(7) Surgical dressings;

(8) Implanted prosthetic devices, including intraocular lenses (IOLs), and related accessories and supplies not on pass-through status under Subpart G of Part 419 of this subchapter;

(9) Implanted DME and related accessories and supplies not on pass-through status under Subpart G of Part 419 of this subchapter;

(10) Splints and casts and related devices;

(11) Radiology services for which separate payment is not allowed under the OPPS, and other diagnostic tests or interpretive services that are integral to a surgical procedure;

(12) Administrative, recordkeeping and housekeeping items and services;

(13) Materials, including supplies and equipment for the administration and monitoring of anesthesia; and

(14) Supervision of the services of an anesthetist by the operating surgeon.

(b) *Covered ancillary services.* Ancillary items and services that are integral to a covered surgical procedure, as defined in § 416.166, and for which separate payment is allowed include:

(1) Brachytherapy sources;

(2) Certain implantable items that have pass-through status under the OPPS;

(3) Certain items and services that CMS designates as contractor-priced,

including, but not limited to, the procurement of corneal tissue;

(4) Certain drugs and biologicals for which separate payment is allowed under the OPPS;

(5) Certain radiology services for which separate payment is allowed under the OPPS.

(c) *Excluded services.* ASC services do not include items and services outside the scope of ASC services for which payment may be made under Part 414 of this subchapter in accordance with § 410.152, including, but not limited to—

(1) Physicians' services (including surgical procedures and all preoperative and postoperative services that are performed by a physician);

(2) Anesthetists' services;

(3) Radiology services (other than those integral to performance of a covered surgical procedure);

(4) Diagnostic procedures (other than those directly related to performance of a covered surgical procedure);

(5) Ambulance services;

(6) Leg, arm, back, and neck braces other than those that serve the function of a cast or splint;

(7) Artificial limbs;

(8) Nonimplantable prosthetic devices and DME.

§ 416.166 Covered surgical procedures.

(a) *Covered surgical procedures.* Effective for services furnished on or after January 1, 2008, covered surgical procedures are those procedures that meet the general standards described in paragraph (b) of this section (whether commonly furnished in an ASC or a physician's office) and are not excluded under paragraph (c) of this section.

(b) *General standards.* Subject to the exclusions in paragraph (c) of this section, covered surgical procedures are surgical procedures specified by the Secretary and published in the **Federal Register** that are separately paid under the OPPS, that would not be expected to pose a significant safety risk to a Medicare beneficiary when performed in an ASC, and for which standard medical practice dictates that the beneficiary would not typically be expected to require active medical monitoring and care at midnight following the procedure.

(c) *General exclusions.* Notwithstanding paragraph (b) of this section, covered surgical procedures do not include those surgical procedures that—

(1) Generally result in extensive blood loss;

(2) Require major or prolonged invasion of body cavities;

(3) Directly involve major blood vessels;

(4) Are generally emergent or life-threatening in nature;

(5) Commonly require systemic thrombolytic therapy;

(6) Are designated as requiring inpatient care under § 419.22(n) of this subchapter;

(7) Can only be reported using a CPT unlisted surgical procedure code; or

(8) Are otherwise excluded under § 411.15 of this subchapter.

§ 416.167 Basis of payment.

(a) *Unit of payment.* Under the ASC payment system, prospectively determined amounts are paid for ASC services furnished to Medicare beneficiaries in connection with covered surgical procedures. Covered surgical procedures and covered ancillary services are identified by codes established under the Healthcare Common Procedure Coding System (HCPCS). The unadjusted national payment rate is determined according to the methodology described in § 416.171. The manner in which the Medicare payment amount and the beneficiary coinsurance amount for each ASC service is determined is described in § 416.172.

(b) *Ambulatory payment classification (APC) groups and payment weights.*

(1) ASC covered surgical procedures are classified using the APC groups described in § 419.31 of this subchapter.

(2) For purposes of calculating ASC national payment rates under the methodology described in § 416.171, except as specified in paragraph (b)(3) of this section, an ASC relative payment weight is determined based on the APC relative payment weight for each covered surgical procedure and covered ancillary service that has an applicable APC relative payment weight described in § 419.31 of this subchapter.

(3) Notwithstanding paragraph (b)(2) of this section, the relative payment weights for services paid in accordance with § 416.171(d) are determined so that the national ASC payment rate does not exceed the unadjusted nonfacility practice expense amount paid under the Medicare physician fee schedule for such procedures under Subpart B of Part 414 of this subchapter.

§ 416.171 Determination of payment rates for ASC services.

(a) *Standard methodology.* The standard methodology for determining the national unadjusted payment rate for ASC services is to calculate the product of the applicable conversion factor and the relative payment weight established under § 416.167(b), unless otherwise indicated in this section.

(1) *Conversion factor for CY 2008.* CMS calculates a conversion factor so that payment for ASC services furnished in CY 2008 would result in the same aggregate amount of expenditures as would be made if the provisions in this Subpart F did not apply, as estimated by CMS.

(2) *Conversion factor for CY 2009 and subsequent calendar years.* The conversion factor for a calendar year is equal to the conversion factor calculated for the previous year, updated as follows:

(i) For CY 2009, the update is equal to zero percent.

(ii) For CY 2010 and subsequent calendar years, the update is the Consumer Price Index for All Urban Consumers (U.S. city average) as estimated by the Secretary for the 12-month period ending with the midpoint of the year involved.

(b) *Exception.* The national ASC payment rates for the following items and services are not determined in accordance with paragraph (a) of this section but are paid an amount derived from the payment rate for the equivalent item or service set under the payment system established in Part 419 of this subchapter as updated annually in the **Federal Register**. If a payment rate is not available, the following items and services are designated as contractor-priced:

(1) Covered ancillary services specified in § 416.164(b), with the exception of radiology services as provided in § 416.164(b)(5);

(2) Device-intensive procedures assigned to device-dependent APCs under the OPPS with device costs greater than 50 percent of the APC cost;

(3) Procedures using certain separately paid implantable devices that are approved for transitional pass-through payment in accordance with § 419.66 of this subchapter.

(c) *Transitional payment rates.* (1) ASC payment rates for CY 2008 are a transitional blend of 75 percent of the CY 2007 ASC payment rate for a covered surgical procedure on the CY 2007 ASC list of surgical procedures and 25 percent of the payment rate for the procedure calculated under the methodology described in paragraph (a) of this section.

(2) ASC payment rates for CY 2009 are a transitional blend of 50 percent of the CY 2007 ASC payment rate for a covered surgical procedure on the CY 2007 ASC list of surgical procedures and 50 percent of the payment rate for the procedure calculated under the methodology described in paragraph (a) of this section.

(3) ASC payment rates for CY 2010 are a transitional blend of 25 percent of the CY 2007 ASC payment rate for a

covered surgical procedure on the CY 2007 ASC list of surgical procedures and 75 percent of the payment rate for the procedure calculated under the methodology described in paragraph (a) of this section.

(4) The national ASC payment rate for CY 2011 and subsequent calendar years for a covered surgical procedure designated in accordance with § 416.166 is the payment rates for the procedure calculated under the methodology described in paragraph (a) of this section.

(5) Covered ancillary services described in § 416.164(b) and surgical procedures identified as covered when performed in an ASC under § 416.166 for the first time beginning on or after January 1, 2008, are not subject to the transitional payment rates applicable in CYs 2008 through 2010 for ASC facility services.

(d) *Limitation on payment rates for office-based surgical procedures and covered ancillary radiology services.* Notwithstanding the provisions of paragraph (a) of this section, for any covered surgical procedure under § 416.166 that CMS determines is commonly performed in physicians' offices or for any covered ancillary radiology service, the national unadjusted ASC payment rates for these procedures and services will be the lesser of the amount determined under paragraph (a) of this section or the amount calculated at the nonfacility practice expense relative value units under § 414.22(b)(5)(i)(B) of this subchapter multiplied by the conversion factor described in § 414.20(a)(3) of this subchapter.

(e) *Budget neutrality.* (1) For CY 2008, CMS establishes the conversion factor to result in budget neutrality as estimated by CMS in accordance with paragraph (a)(1) of this section.

(2) For CY 2009 and subsequent calendar years, CMS adjusts the ASC relative payment weights under § 416.167(b)(2) as needed so that any updates and adjustments made under § 419.50(a) of this subchapter are budget neutral as estimated by CMS.

§ 416.172 Adjustments to national payment rates.

(a) *General rule.* Contractors adjust the payment rates established for ASC services to determine Medicare program payment and beneficiary coinsurance amounts in accordance with paragraphs (b) through (g) of this section.

(b) *Lesser of actual charge or geographically adjusted payment rate.* Payments to ASCs equal 80 percent of the lesser of—

(1) The actual charge for the service; or

(2) The geographically adjusted payment rate determined under this subpart.

(c) *Geographic adjustment.*—(1) *General rule.* Except as provided in paragraph (c)(2) of this section, the national ASC payment rates established under § 416.171 for covered surgical procedures are adjusted for variations in ASC labor costs across geographic areas using wage index values, labor and nonlabor percentages, and localities specified by the Secretary.

(2) *Exception.* The geographic adjustment is not applied to the payment rates set for drugs, biologicals, devices with OPPS transitional pass-through payment status, and brachytherapy sources.

(d) *Deductibles and coinsurance.* Part B deductible and coinsurance amounts apply as specified in §§ 410.152(a) and (i)(2) of this subchapter.

(e) *Payment reductions for multiple surgical procedures.*—(1) *General rule.* Except as provided in paragraph (e)(2) of this section, when more than one covered surgical procedure for which payment is made under the ASC payment system is performed during an operative session, the Medicare program payment amount and the beneficiary coinsurance amount are based on—

(i) 100 percent of the applicable ASC payment amount for the procedure with the highest national unadjusted ASC payment rate; and

(ii) 50 percent of the applicable ASC payment amount for all other covered surgical procedures.

(2) *Exception: Procedures not subject to multiple procedure discounting.* CMS may apply any policies or procedures used with respect to multiple procedures under the prospective payment system for hospital outpatient department services under Part 419 of this subchapter as may be consistent with the equitable and efficient administration of this part.

(f) *Interrupted procedures.* When a covered surgical procedure or covered ancillary service is terminated prior to completion due to extenuating circumstances or circumstances that threaten the well-being of the patient, the Medicare program payment amount and the beneficiary coinsurance amount are based on one of the following—

(1) The full program and beneficiary coinsurance amounts if the procedure for which anesthesia is planned is discontinued after the induction of anesthesia or after the procedure is started;

(2) One-half of the full program and beneficiary coinsurance amounts if the procedure for which anesthesia is planned is discontinued after the patient is prepared for surgery and taken to the room where the procedure is to be performed but before the anesthesia is induced; or

(3) One-half of the full program and beneficiary coinsurance amounts if a covered surgical procedure or covered ancillary service for which anesthesia is not planned is discontinued after the patient is prepared and taken to the room where the service is to be provided.

(g) *Payment adjustment for new technology intraocular lenses (NTIOLs).* A payment adjustment will be made for insertion of an IOL approved as belonging to a class of NTIOLs as defined in Subpart G.

§ 416.173 Publication of revised payment methodologies and payment rates.

CMS publishes annually, through notice and comment rulemaking in the **Federal Register**, the payment methodologies and payment rates for ASC services and designates the covered surgical procedures and covered ancillary services for which CMS will make an ASC payment and other revisions as appropriate.

§ 416.178 Limitations on administrative and judicial review.

There is no administrative or judicial review under section 1869 of the Act, section 1878 of the Act, or otherwise of the following:

(a) The classification system;

(b) Relative weights;

(c) Payment amounts; and

(d) Geographic adjustment factors.

§ 416.179 Payment and coinsurance reduction for devices replaced without cost or when full credit is received.

(a) *General rule.* CMS reduces the amount of payment for a covered surgical procedure for which CMS determines that a significant portion of the payment is attributable to the cost of an implanted device not on pass-through status under Subpart G of Part 419 of this subchapter when one of the following situations occur:

(1) The device is replaced without cost to the ASC or the beneficiary; or

(2) The ASC receives full credit for the cost of a replaced device.

(b) *Amount of reduction to the ASC payment for the covered surgical procedure.* The amount of the reduction to the ASC payment made under paragraph (a) of this section is calculated in the same manner as the device payment reduction that would be applied to the ASC payment for the covered surgical procedure in order to remove predecessor device costs so that

the ASC payment amount for a device with pass-through status under § 419.66 of this subchapter represents the full cost of the device, and no packaged device payment is provided through the ASC payment for the covered surgical procedure.

(c) *Amount of beneficiary coinsurance.* The beneficiary coinsurance is calculated based on the ASC payment for the covered surgical procedure after application of the reduction under paragraph (b) of this section.

ADDENDUM AA.—ILLUSTRATIVE ASC COVERED SURGICAL PROCEDURES FOR CY 2008—Continued

[Including surgical procedures for which payment is packaged]

HCPCS code	Short descriptor	Subject to multiple procedure discounting	Payment indicator	CY 2007 ASC payment rate	Estimated fully implemented payment weight	Estimated CY 2008 fully implemented payment	Estimated CY 2008 first transition year payment
27647	Extensive ankle/heel surgery	Y	A2	$510.00	41.0893	$1,748.06	$819.52
27648	Injection for ankle x-ray		N1				
27650	Repair achilles tendon	Y	A2	$510.00	41.0893	$1,748.06	$819.52
27652	Repair/graft achilles tendon	Y	A2	$510.00	66.5800	$2,832.51	$1,090.63
27654	Repair of achilles tendon	Y	A2	$510.00	41.0893	$1,748.06	$819.52
27656	Repair leg fascia defect	Y	A2	$446.00	20.8706	$887.90	$556.48
27658	Repair of leg tendon, each	Y	A2	$333.00	20.8706	$887.90	$471.73
27659	Repair of leg tendon, each	Y	A2	$446.00	20.8706	$887.90	$556.48
27664	Repair of leg tendon, each	Y	A2	$446.00	20.8706	$887.90	$556.48
27665	Repair of leg tendon, each	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27675	Repair lower leg tendons	Y	A2	$446.00	20.8706	$887.90	$556.48
27676	Repair lower leg tendons	Y	A2	$510.00	25.1296	$1,069.09	$649.77
27680	Release of lower leg tendon	Y	A2	$510.00	25.1296	$1,069.09	$649.77
27681	Release of lower leg tendons	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27685	Revision of lower leg tendon	Y	A2	$510.00	25.1296	$1,069.09	$649.77
27686	Revise lower leg tendons	Y	A2	$510.00	25.1296	$1,069.09	$649.77
27687	Revision of calf tendon	Y	A2	$510.00	25.1296	$1,069.09	$649.77
27690	Revise lower leg tendon	Y	A2	$630.00	41.0893	$1,748.06	$909.52
27691	Revise lower leg tendon	Y	A2	$630.00	41.0893	$1,748.06	$909.52
27692	Revise additional leg tendon	Y	A2	$510.00	41.0893	$1,748.06	$819.52
27695	Repair of ankle ligament	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27696	Repair of ankle ligaments	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27698	Repair of ankle ligament	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27700	Revision of ankle joint	Y	A2	$717.00	33.4505	$1,423.08	$893.52
27704	Removal of ankle implant	Y	A2	$446.00	20.8706	$887.90	$556.48
27705	Incision of tibia	Y	A2	$446.00	41.0893	$1,748.06	$771.52
27707	Incision of fibula	Y	A2	$446.00	20.8706	$887.90	$556.48
27709	Incision of tibia & fibula	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27730	Repair of tibia epiphysis	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27732	Repair of fibula epiphysis	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27734	Repair lower leg epiphyses	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27740	Repair of leg epiphyses	Y	A2	$446.00	25.1296	$1,069.09	$601.77
27742	Repair of leg epiphyses	Y	A2	$446.00	41.0893	$1,748.06	$771.52
27745	Reinforce tibia	Y	A2	$510.00	66.5800	$2,832.51	$1,090.63
27750	Treatment of tibia fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27752	Treatment of tibia fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27756	Treatment of tibia fracture	Y	A2	$510.00	25.5264	$1,085.97	$653.99
27758	Treatment of tibia fracture	Y	A2	$630.00	37.5382	$1,596.99	$871.75
27759	Treatment of tibia fracture	Y	A2	$630.00	57.2172	$2,434.19	$1,081.05
27760	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27762	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27766	Treatment of ankle fracture	Y	A2	$510.00	37.5382	$1,596.99	$781.75
27780	Treatment of fibula fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27781	Treatment of fibula fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27784	Treatment of fibula fracture	Y	A2	$510.00	37.5382	$1,596.99	$781.75
27786	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27788	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27792	Treatment of ankle fracture	Y	A2	$510.00	37.5382	$1,596.99	$781.75
27808	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27810	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27814	Treatment of ankle fracture	Y	A2	$510.00	37.5382	$1,596.99	$781.75
27816	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27818	Treatment of ankle fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27822	Treatment of ankle fracture	Y	A2	$510.00	37.5382	$1,596.99	$781.75
27823	Treatment of ankle fracture	Y	A2	$510.00	57.2172	$2,434.19	$991.05
27824	Treat lower leg fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27825	Treat lower leg fracture	Y	A2	$103.62	1.6857	$71.71	$95.64
27826	Treat lower leg fracture	Y	A2	$510.00	37.5382	$1,596.99	$781.75
27827	Treat lower leg fracture	Y	A2	$510.00	57.2172	$2,434.19	$991.05
27828	Treat lower leg fracture	Y	A2	$630.00	57.2172	$2,434.19	$1,081.05
27829	Treat lower leg joint	Y	A2	$446.00	37.5382	$1,596.99	$733.75
27830	Treat lower leg dislocation	Y	A2	$103.62	1.6857	$71.71	$95.64
27831	Treat lower leg dislocation	Y	A2	$103.62	1.6857	$71.71	$95.64

Note: The Medicare program payment is 80 percent of the total payment amount and beneficiary coinsurance is 20 percent of the total payment amount, except for screening flexible sigmoidoscopies and screening colonoscopies for which the program payment is 75 percent and the beneficiary coinsurance is 25 percent.

* Refers to codes designated as ''office-based'', whose designation as office-based is temporary because we have insufficient claims data. We will reconsider this designation when new claims data become available.

ADDENDUM AA.—ILLUSTRATIVE ASC COVERED SURGICAL PROCEDURES FOR CY 2008—Continued

[Including surgical procedures for which payment is packaged]

HCPCS code	Short descriptor	Subject to multiple procedure discounting	Payment indicator	CY 2007 ASC payment rate	Estimated fully implemented payment weight	Estimated CY 2008 fully implemented payment	Estimated CY 2008 first transition year payment
27832	Treat lower leg dislocation	Y	A2	$446.00	37.5382	$1,596.99	$733.75
27840	Treat ankle dislocation	Y	A2	$103.62	1.6857	$71.71	$95.64
27842	Treat ankle dislocation	Y	A2	$333.00	14.5947	$620.90	$404.98
