

regarding the project's impact on significant cultural resources.

7. Implementation of the project will not adversely affect any threatened or endangered species as long as the conservation measures for the flat-tailed horned lizard and sand food are implemented during relocation of the livestock crossing.

8. All soil disturbance and shrub removal will be minimized during relocation.

9. Implementation of this action will have no adverse impact on any Indian Trust Assets.

10. Implementation of this action will not violate federal, state, or local law.

Mitigation Measures

1. The relocation of the existing livestock crossing to the site specified in the application obviates the need for further mitigation measures with respect to odors emanating from the transient presence of livestock through and at the new livestock crossing.

2. Mitigation measures for the San Luis II POE are applicable in so far as relevant to the relocated livestock crossing. The mitigation measures listed in the final FONSI (signed April 15, 2007) can be viewed on the GSA Web site at <http://www.gsa.gov/nepa>.

In accordance with NEPA (42 U.S.C. 4321 *et seq.*), the regulations of the Council on Environmental Quality (40 CFR 1500–1508), and the Department's implementing regulations (22 CFR Part 161, and in particular 22 CFR 161.7(c)), the Department finds that the project described in the attached EA is not a federal action significantly affecting the quality of the human environment. Therefore, no Environmental Impact statement will be prepared.

The Finding of No Significant Impact will become final thirty (30) days after the publication of this notice, provided that no information leading to a contrary finding is received or comes to light during this period.

Dated: July 27, 2007.

Daniel D. Darrach,

*Acting Director, Office of Mexican Affairs,
Department of State.*
