

“Amendment 11” and “Amendment 7” respectively. Paragraph 2.B.3 is deleted and replaced with a new paragraph 2.B.4 to read, “Pursuant to the Act and Title 10, CFR, Chapter I, Parts 30, 40, and 70, to receive, possess, and use in amounts as required any byproduct, source, or special nuclear material without restriction to chemical or physical form, for sample analysis or instrument calibration or associated with radioactive apparatus or components.”

Paragraph 2.A of License TR-3 is revised by changing the last sentence to read, “The PBRF is described in the application for the full-term license dated January 10, 1964 and amendments thereto.”

Paragraph 3 of Licenses TR-3 and R-93 is revised to read, “NASA is authorized to decommission the facility in accordance with the Decommissioning Plan for the Plum Brook Reactor Facility approved by the Commission by issuance of license amendment dated March 20, 2002, as revised pursuant to paragraph 3.A.1 below, and to perform Final Status Surveys in accordance with the Final Status Survey Plan for the Plum Brook Reactor Facility* * *.”

Paragraph 3.A of Licenses TR-3 and R-93 is revised to read, “This amendment authorizes inclusion of the Decommissioning Plan for the Plum Brook Reactor Facility and the Final Status Survey Plan for the Plum Brook Reactor Facility and their supplements as supplements to the Final Safety Analysis Report pursuant to 10 CFR 50.82(b)(5).”

Paragraph 3.A.1 of Licenses TR-3 and R-93 is revised to read, “The licensee may make changes to the above plans and revisions without prior U.S. Nuclear Regulatory Commission approval provided the proposed changes do not.” The change changes the “word” in the original to “plans”, and would allow the licensee to make changes to the Final Status Survey Plan without prior U.S. Nuclear Regulatory Commission approval.

Paragraph 3.A.1.c of Licenses TR-3 and R-93 is revised to read, “* * * increase the derived concentration guideline level and related minimum detectable concentrations (for both scan and fixed measurement methods);” Paragraph 3.A.3 of Licenses TR-3 and R-93 is deleted.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Do the changes involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes are administrative, would not change plant systems or accident analysis, and as such, would not affect initiators of analyzed events or assumed mitigation of accidents. Therefore, the proposed changes do not increase the probability or consequences of an accident previously evaluated.

(2) Does the change create the possibility of a new or different kind of accident from any accident evaluated?

Response: No.

The proposed changes do not involve a physical alteration to the plant or require existing equipment to be operated in a manner different from the present design. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident evaluated.

(3) Does the change involve a significant reduction in a margin of safety?

Response: No.

The proposed change has no effect on existing plant equipment, operating practices, or safety analysis assumptions. Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee’s analysis for the proposed revisions and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment requests involve no significant hazards consideration.
