Public Meeting

We do not now plan to hold a public meeting; however, you may submit a request for a meeting by writing to the First Coast Guard District, Bridge Branch, at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that one would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The Ferry Street Bridge, across the Quinnipiac River, mile 0.7, at New Haven, Connecticut, has a vertical clearance in the closed position of 25 feet at mean high water and 31 feet at mean low water. The existing regulations are listed at 33 CFR 117.213.

In early 2007, the Connecticut Department of Transportation requested a temporary deviation to facilitate scheduled structural repairs and bridge painting at the Ferry Street Bridge at New Haven, Connecticut. In order to perform the structural repairs, one bascule bridge span had to remain in the closed position while the other span could remain in the full open position at all times for the passage of vessel traffic.

As a result of the above request, the Coast Guard published a temporary deviation from the drawbridge operation regulations in the **Federal Register** (72 FR 18884), on April 16, 2007, in effect from April 16, 2007 through September 27, 2007.

On June 22, 2007, the Coast Guard was notified that the scheduled repairs authorized under the temporary deviation listed above would not be completed by the end of the effective period, scheduled to end on September 27, 2007.
